**ARMADA**

2012/2013

ten years ago **Armada** started  
as the first rider-based, rider-driven  
company in the history of the sport.

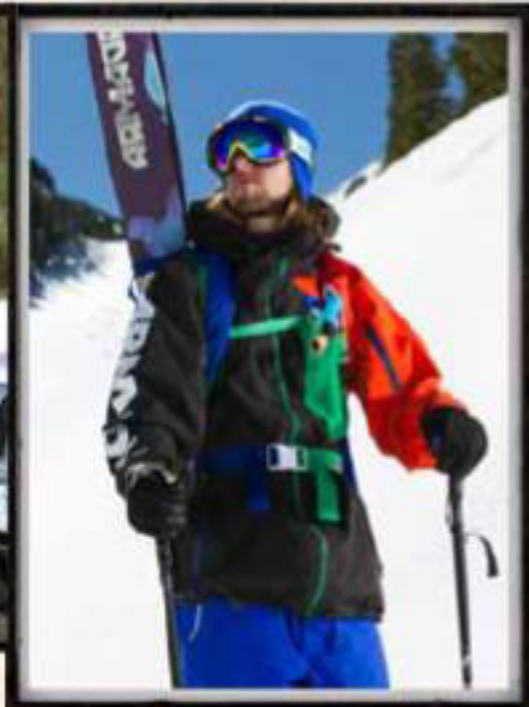

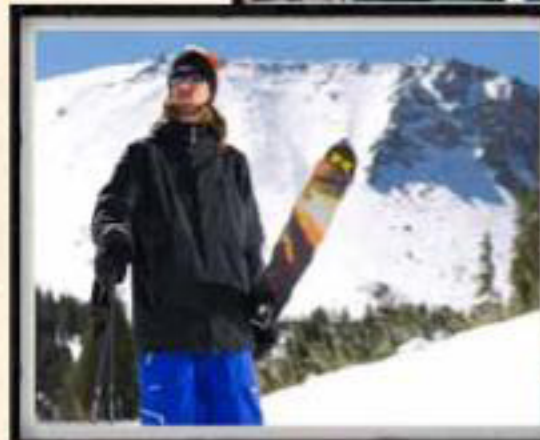

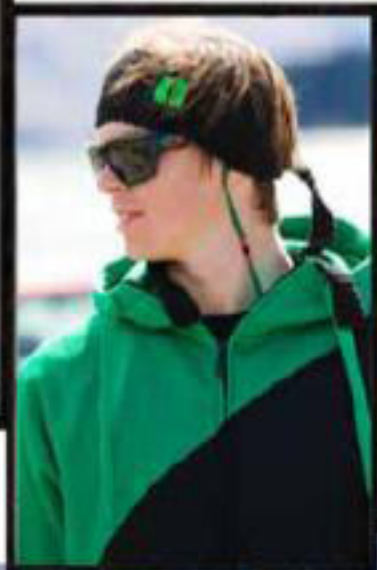

**Armada's** mission was to challenge  
the status quo of the ski industry and share  
with the world our passion for skiing, art, and  
the mountains. The past ten years have been a  
tremendous ride and dream for everyone involved.  
Without the belief and support of our dealers,  
**Armada** would still be a figment of our imagination.

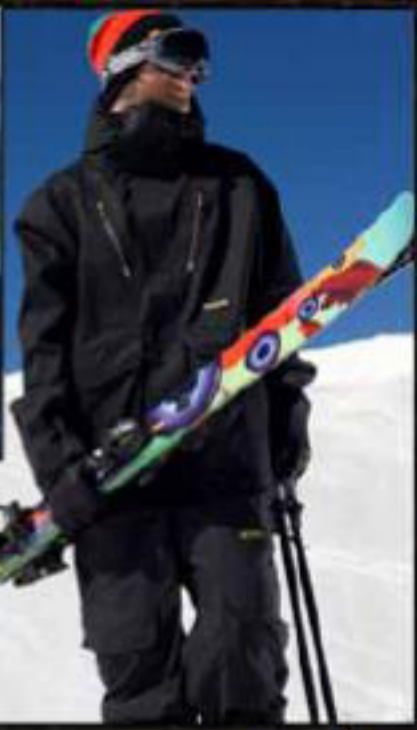

**Thank you for your contributions to Armada.**

We look forward to working with you as we continue our endeavor to be

What Skiing Will Become.

Athletes founded Armada and will always be the core of our business. The Armada team is the most recognizable group of riders in skiing. Not only are they responsible for establishing the freeride movement, but they have also pushed its progression. Skiers who change the reality of what is possible on snow require product as dedicated as they are. Our designers and engineers build to our team's specifications and do not stop until every product exceeds their expectations.

**HARDGOODS**

Mike Hornbeck on the El Rey's wearing the Crush Jacket, Ascender Pant, Ascent Glove and Triad Pole. SnowPark NZ

## CAMBER PROFILES

Our most powder-specific profile. Fully rockered at the tip and tail, with minimal camber underfoot, it maximizes float in soft conditions for unprecedented control, while the small amount of positive camber engages the two widest points of the ski just enough to allow maneuverability on the hardpack.

The best of all worlds. Rockered tips and tails combined with positive camber underfoot to promote flotation in soft snow and provide remarkable edge control in the harder stuff.

Entry rocker with positive camber underfoot and no tail rocker. Promotes flotation in the soft snow while giving the ski great drive and edge hold on the hard pack.

The next level. Subtle rocker in the tips and tails with positive camber underfoot. This enhances carving while also disengaging the tip and tail to create a catch-free feel that's ideal for buttering and nose and tail presses.

Traditional camber engages the tip and tail of the ski, enhancing ease of entry and exit into and out of a turn, while maintaining solid edge hold.

## CORE TECHNOLOGIES

**TRIPLE ZONE**  
Three high-density wood stringers

**DOUBLE ZONE**  
Two high-density wood stringers

**ULTRALIGHT CORE**  
Lightweight wood with high strength-to-weight ratios

**FLEET CORE**  
Torsion sack wrapped wood core

**AR50 HYBRID CORES**  
Pre-installed ABS layers laid alongside the core

**INJECT ZONE**  
Foam injected core - lightweight and durable

## CONSTRUCTION

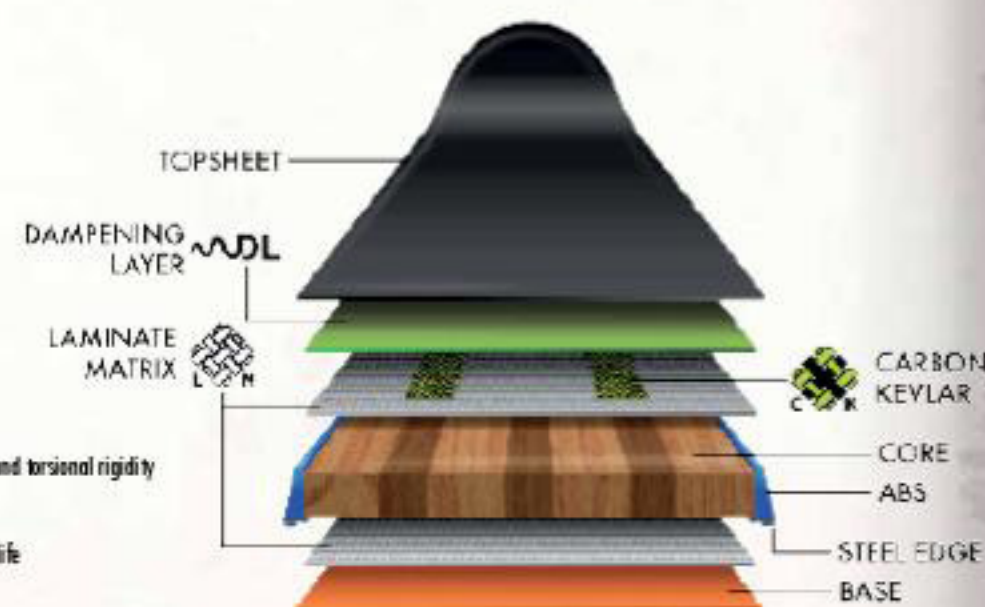

full sidewall construction - for a classic predictable feel

enhanced durability while maintaining proper flex

cap in the tip and tail, side wall under foot - balancing performance characteristics with lower swing-weight and increased durability

## TECH FEATURES

- 1.7** 1.7 Edge - light strong, heat treated for durability
- 2.5** 2.5 Edge - oversized and specially heat treated, built to resist impact damage
- CLIP** Comp Base - Armada's fastest base
- S7** S7 Base - durable and low maintenance, with a speed additive for quickness
- 50/50** 50/50 - a blend of speed and durability, the base for the skier who wants it all
- Ti** Ti-tanal - two layers of metal provides stability at the highest of speeds
- LAMINATE MATRIX** Laminate Matrix - deliberate directional layering of fiberglass dictates flex pattern and torsional rigidity
- Carbon Kevlar** Carbon Kevlar - Carbon and Kevlar stringers used in the tail to add pop and extend life
- Step Drill Bit System** - The custom drill bit increases screw retention in Armada's skis

## FLOTATION

Camber profile, waist size, turn radius... There are numerous ways to compare skis. However, as our toys have gotten more specialized throughout the years, these methods are just not enough.

This never-ending desire to improve the ski buying experience is what led our engineers to develop the first system to quantifiably measure ski flotation.

Interpreting the results is easy; the larger the cubic surface area (cm<sup>3</sup>), the more float the skis will offer in the deep stuff.

Limited. All the skis in this series are exactly that. Armada gets access to a limited supply of the very best materials available: the fastest bases, the densest hardwoods, and the snappiest lightwoods. From this stock Armada makes a predetermined number of competition ready skis that are all proven in their field.

## LTD SERIES

Torin Yater-Wallace on the Pipe Cleaners in the Crush Jacket, Rappel Pant, Ascent Glove and Legion Pole. SnowPark, NZ

## BUBBA

NEW

The ARG has been reinvented and come to the world under the moniker "BUBBA". The BUBBA is the widest ski in Armada's line designed for bottomless powder typically found while heli and cat skiing. The BUBBA boasts more effective edge and a friendlier floatation, easy pivot, unmatched planing. Patented.

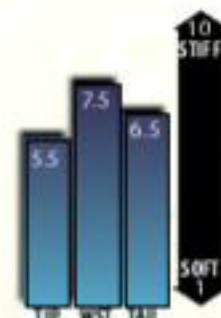

### TECH FEATURES

- ARSO Sidewall
- Hybrid UltraLight Core
- EST Powder Rocker
- 50/50 Base
- CK Stringer
- Laminate Matrix
- 1.7 Impact Edge

169cm	105mm	140mm	102mm	124mm	119mm	19m

TAKE NOTES, DON'T FORGET STUFF!

## NORWALK

NEW

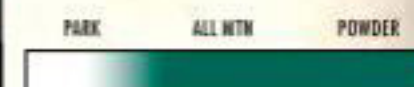

The Norwalk has tip rocker only and a traditional tail and camber underfoot. As a result, the Norwalk can drive through the end of a turn, conquer variable conditions, and has the utmost stability at high speeds. With a wider platform and longer turning radius than its younger brother, the TSI, the Norwalk is Armada's big mountain ski. Patented.

### TECH FEATURES

- ARSO Sidewall
- Hybrid UltraLight Core
- EST All Mtn Rocker
- 50/50 Base
- CK Stringer
- Laminate Matrix
- 1.7 Impact Edge

### TERRAIN SCALE

# SIGNATURE SERIES

The skis in the Signature Series contain a blend of the newest technology, proven design, and premium material with a bit of namesake thrown in for good measure. This rider-driven collection contains the most progressive skis on the market. The skis within the Signature Series will enable you to follow the tracks of a Pro or create your own anywhere on the mountain.

Tom Provo with the TST, AK Pole, wearing the Shifter Gore-Tex® Pro Jacket, Exposure Gore-Tex Pro Pant, Ascent Gloves and the Agent Avalung Backpack

## MAGIC J

## JJ AND AK JJ

As Tanner's skiing has evolved, so have his demands for a ski worthy of his name. New for 12/13 is the Magic J: a derivative of the JJ, but with Tanner's classic twist. The Magic J is a wider version of the JJ with less taper and the widest points moved slightly forward and aft. The result is a ski with a longer turning radius that is extremely stable at high speeds. Patented.

### TECH FEATURES

- AR50 Sidewall
- Hybrid UltraLight Core
- EST Freeride Rocker
- 50/50 Base
- CK Stringer
- Laminate Matrix
- 1.7 Impact Edge

165cm	126mm	136mm	115mm	133mm	123mm	12m

TAKE NOTES, DON'T FORGET STUFF!

The TST performs equally well whether it's carving edge-to-edge on hardpack or slashing tight trees in a foot of fresh. With tip rocker and no tail rocker, the TST combines float with stability and power. The ski's shape effortlessly adapts to all conditions and truly lives up to its billing as an all-mountain ski. A portion of proceeds of each ski sold are donated to Travis Steeger's Memorial Fund. Patented.

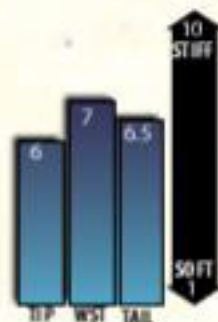

## TECH FEATURES

TAKE NOTES, DON'T FORGET STUFF!

Nike Hombeck with the AR7, Solo Jacket, Ascender Pant, and Crest Glove. SnowPark, NZ

# YOUTH SERIES

Armada recognizes that kids are the future of skiing. In order for the youth to progress from the bunny hill to the podium they need a proper all-mountain ski. Each ski in this series is exactly that: built to shred today with durability and longevity in mind.

Kim Boberg on the AR7's wearing the Scrambler Jacket, Ascender Pant, and Throttle Glove. SnowPark, NZ

## TRIPLE J

NEW!

This Junior JJ utilizes the same geometries and profile as the JJ creating the most versatile junior powder ski on the market. With EST Freeride Rocker, the Triple J dominates deep snow but still rips the hardpack on the way back to the lift. The Triple J will do everything from landing switch to making your parents feel slow. Patented.

### TECH FEATURES

TAKE NOTES, DON'T FORGET STUFF!

## TANTRUM

NEW!

The Tantrum is inspired by the TST and has tip rocker but no tail rocker. With the Tantrum you get the cheating float and initiation of tip rocker, with the drive, stability, and power of a traditional cambered ski. Built with a wood core and a medium-wide platform, the Tantrum will keep you exploring all-mountain terrain. Patented.

### TECH FEATURES

## WOMENS SERIES

The men at Armada recognize that they will never understand women. That is why they do not create the skis within this series. The Women's Series is designed, developed, and tested by real hard charging women skiers. These skis are not dumb-downed versions of the men's skis. They are specially crafted to consider differences in stance and weight resulting in a burly collection that can meet any demand a real skier places on it.

The VJJ is inspired by the JJ. It is the most versatile women's powder ski on the market. Designed with EST Freeride Rocker, the VJJ dominates deep snow and rips hardpack on the way back to the lift. The UltraLight Core and AR50 construction ensure this ski will be light and durable. Patented.

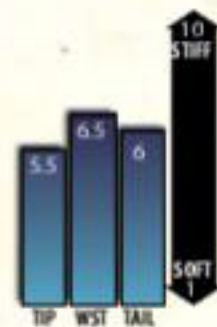

**TECH FEATURES**

- AR50 Sidewall
- Hybrid UltraLight Core
- EST Freeride Rocker
- 50/50 Base
- CK Stringer
- Laminate Matrix
- 1.7 Impact Edge

**TERRAIN SCALE**

**FLEX PATTERN**

**SIZES**

LENGTH	TIP	CP	WAIST	CP	TAIL	RADIUS

165cm	126mm	116mm	111mm	133mm	123mm	12m

TAKE NOTES, DON'T FORGET STUFF!

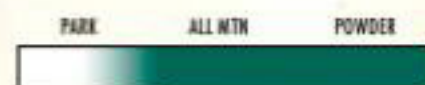

The TSTw has tip rocker and no tail rocker. This powerful combination leads to the float and initiation of tip rocker and drive and stability of a traditional cambered ski. The TSTw is truly an all mountain ski that feels perfect in all conditions from powder to groomers. A portion of proceeds of each ski sold are donated to Travis Steeger's Memorial Fund. Patented.

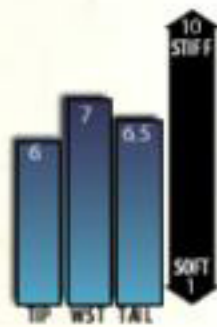

**TECH FEATURES**

- AR50 Sidewall
- Hybrid UltraLight Core
- EST All Mtn Rocker
- 50/50 Base
- CK Stringer
- Laminate Matrix
- 1.7 Impact Edge

**FLEX PATTERN**

**SIZES**

LENGTH	TIP	WAIST	TAIL	RADIUS
165cm	128mm	89mm	109mm	19m

TAKE NOTES, DON'T FORGET STUFF!

After the Armada ladies saw how much fun the men were having with the Triumph, they designed their own ski to up the ante. The Tryst is built with a premium GS race construction on an all-mountain chassis. It is stable, fast, and responsive but forgiving enough to ensure full days of fun.

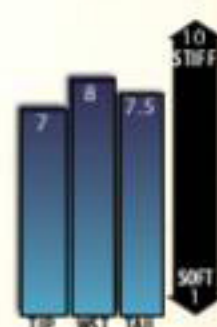

**TECH FEATURES**

- AR50 Sidewall
- Hybrid Double Zone Core
- Positive Camber
- Comp Series Base
- Titanal
- 1.7 Impact Edge

139cm	114mm	78mm	104mm	12m

TAKE NOTES, DON'T FORGET STUFF!

# ARW

ARW is the women's most core park ski on the market. The light swing weight of the Hybrid Double Zone Core and AR50 sidewall, make the ARW the go-to choice as the best everyday ski for the all-mountain female park skier. Urban rails, park jumps or jibs are all within reach and stamp-able on the ARW.

### TECH FEATURES

TAKE NOTES, DON'T FORGET STUFF!

# POLES

Like most products, poles have transformed over time into functional accessories that, when combined with the proper design elements, produce stylish items to help people navigate the mountain. For 12/13 Armada introduces our first composite pole, interchangeable basket systems, ergonomically shaped grips, and a snap-lock telescopic pole that allows you to change pole heights in deep snow without removing your gloves.

## AK POLE

- +7075 2 Section @ 18mm/16mm Aluminum Shaft
- +Power Lock adjustable 2 section adjustment system
- +Long Vario Flex Interchangeable Basket System, 85mm Basket & 100mm Basket
- +PU Grip
- +Adjustable from 105cm - 150cm

## TEAM COMPOSITE POLE

- +7075 Aluminum Shaft Steel Tip @ 16mm
- +Vario Flex Interchangeable basket system: 60mm & 85mm basket included
- +Dublo Rubber Grip
- +Available in: 70, 80, 90, 95, 100, 105, 110, 115, 120, 125cm

- +Vario Flex Interchangeable basket system: 50mm basket included
- +PE Jr. Grip
- +Available in: 70, 75, 80, 85cm

In 2002, Armada was founded by a group of the world's best skiers to challenge a stagnant industry. Ten years later, the ski industry has changed, twins and rocker are now mainstream, but now our commitment to innovation continues with both hardgoods and softgoods.

Our mission to build the best performing, most advanced outerwear possible would not be complete without our new partnership with GORE-TEX®. Our passion and creativity is now further strengthened by the latest technology and backed by sound science. The result is unique Armada designs offering the highest level of protection and comfort.

**GORETEX PRO 3-LAYER**

Engineered for extended and extreme conditions, our GORE-TEX® Pro outerwear is the optimum solution to meet the needs of our team, outdoor professionals, and serious skiers with tough, extremely breathable, waterproof and windproof protection. All components are built for maximized ruggedness while strict textile performance specifications ensure optimum strength and must pass Gore's toughest test conditions and most aggressive rainstorm test.

Our GORE-TEX® Pro 3-layer construction comprises a special high performance GORE-TEX® membrane bonded to a tough outer material and Gore's patent pending Micro Grid Backing. The benefit is no movement between the three layers, which means even greater durability, and an incredibly strong yet lightweight garment.

**GORETEX PRODUCTS**

Armada garments engineered with GORE-TEX® product technology are durably waterproof and wind-proof combined with optimized breathability. Our GORE-TEX® outerwear is guaranteed to maximize the wearers' protection and comfort.

**MICROGRID BACKING TECHNOLOGY**

Used in our GORE-TEX® Pro 3L products, this technology improves garment comfort and performance using an innovative patent pending internal backer fabric. This technology improves internal abrasion and snag resistance, enhances garment breathability and decreases garment weight. It also allows the garment to slide easily over mid-layers.

Developed to deliver a high standard of performance and a multitude of looks, our MegaRex Fabric is a two-layer fabric with a waterproof/breathable laminate or coating plus DWR finish. MegaRex is durable, delivering excellent waterproofing and breathability in two ratings: 10,000mm/10,000g and 20,000mm/20,000g.

**FITS**

**STANDARD FIT**

- JACKET:**
- Roomy throughout
- PANT:**
- Our signature fit we established with our Test line
  - Roomy throughout

**PROGRESSIVE FIT**

- JACKET:**
- Slightly slimmer through the body
  - 2" longer than our standard fit
  - Provides the perfect length while eliminating excess width to keep you light and mobile
- PANT:**
- Redesigned for 12/12
  - Long rise for slouchy hip
  - Tapered knee for a more tailored look

**LOOSE FIT**

- JACKET:**
- 4" longer than our standard fit
  - Provides extra length without the extra width from sizing up

## SUPERFLO Lining SYSTEM

Our SuperFlo Lining System is our strategically placed lining system for our 2-layer garments. It was developed to maximize function and comfort by allowing heat and moisture to escape easily, and provide snag-free layering and extra warmth in just the right places.

Our jackets are lined with reverse ticot fleece in the shoulders to provide warmth while its smooth face allows the jacket to slide during activity and allow proper alignment. Two types of mesh line the rest of the interior. Our custom DuBond-printed mesh is used in the body for the combination of warmth and breathability while its slick face ensures great mobility by allowing snag-free movement between layers. Last, the under arm area is lined with a large open-mesh for maximum airflow and quick temperature regulation.

The SuperFlo Lining in the pants utilizes fleece in the seat, open mesh in the inner leg area and the DuBond-printed mesh for the rest.

Our PolyFill insulation is a lightweight material made from polyester fibers that insulates even when wet.

## DOWN

Our down insulation is intended for use in the coldest conditions and offer the highest-level warmth to weight ratios. We only use high quality European down feathers that reaches a minimum 600 fill-power.

New for 12/13, our down jacket is constructed with a 20k/20k, seam-sealed exterior and utilizes super-soft and lightweight 20D fabric lining on the inside with interior baffling to further reduce weight and add comfort. This one-two punch will knock back the worst Mother Nature dishes out and keep you warm in any weather.

Found exclusively in our Vector series, Thinsulate insulation will help keep you warm without the unnecessary weight or bulk, and brings more freedom of movement and comfort to your clothing making it the perfect match for our lightweight Gore-tex® fabrics. Because the fibers in Thinsulate insulation are finer than the fibers used in most other synthetic or natural insulation, they trap more air in less space.

At Armada we strongly support mountain safety and avalanche education in the backcountry. If you spend any time out of bounds, we urge you to get educated and be properly equipped. It is in this spirit we are very proud of our partnership with RECCO and feature their reflectors in our line.

RECCO® is an avalanche rescue system utilized worldwide to facilitate the rapid location of burials. The two parts—reflector and detector—enable rapid pinpointing using harmonic radar but are not a substitute for transceiver use. Complementary in function, the RECCO system increases the chance of being found in time.

All Armada Outerwear is 100% seam sealed. Every seam is welded or taped to guarantee the waterproofing of the garment.

Our pant cuffs are reinforced with Bemis Overlay Film to increase abrasion-resistance and overall strength.

YKK's AQUAGUARD® Water Repellent Zippers are used to seal off our garments from the elements. Both the AQUAGUARD COIL and new for 12/13, AQUAGUARD VISLON are used in our line. The AQUAGUARD VISLON has the advantage of plastic teeth that run smoother in winter weather and provide more opportunity for color combinations.

YKK Zippers are used as our standard throughout the line to provide quality zippers you can count on. We use YKK Water Repellent Zippers on some of our garments, to help seal them off from the elements.

The Reactive Hood System provides the ability to easily react to changing mountain weather. The system utilizes a 3-way adjustment, accessible from inside and outside the jacket, and a quick release pull to instantly loosen the hood. All excess bungee stores out of your way inside the jacket.

Our new IPP System provides a simple interface between your jacket's powder skirt and pant that will prevent upward movement so it won't ride up and will stay in place all day long.

Henrik Harlout in the Belay Down Jacket

# VECTOR SERIES

The goal is simple: to build the best performing, most advanced outerwear possible. The Vector Series makes no compromises and delivers the performance demanded by our elite team of athletes and mountain professionals by utilizing GORE-TEX® fabric throughout the collection. The Vector Series ensures you are ready for whatever conditions you face.

- XS-XXL

# CR Johnson Design Jacket

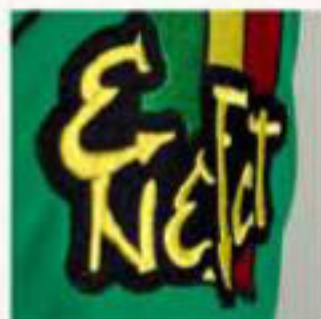

"This Jacket was designed by CR Johnson; a freeskier, a friend, a brother, and a son. He was into African scenes as a theme partly because of his interest in the origins of the Rastafarian movement but also the vast expanse of the African plains and animals gave him a sense of the beauty of life. At the time of his death he was enrolled in clothing design classes at the San Francisco Art Institute, he was pursuing his other passion, to be a clothing designer.

Proceeds from the sale of the jacket will benefit the CR Johnson Healing Center in Truckee, CA. Under the guidance of the High Fives Foundation ([highfivesfoundation.org](http://highfivesfoundation.org)) the Healing Center provides recuperative resources especially for Traumatic Brain Injuries and athletes that suffer life-altering injury not otherwise available to injured athletes.

# THERMIC SERIES

Sometimes it gets really, really, really cold when you are skiing. The Thermic Series is your defense against the extreme temperatures in our favorite playgrounds. Every piece in this collection contains insulation. Down and polyfill paired with our MegaRex fabrics stand up to the coldest and dampest of all winter environments ensuring you decide when your session ends, not mother nature.

# LAYERING

**FACT:** Cotton kills performance. Regardless of where you ski, how well you ski, or your favorite terrain, wearing cotton is detrimental. Armada recognized the need for change and developed a layering system with a variety of products for the technical junkies and park shredders alike. From our new PrimaLoft® hoody, to our Polartec® layers, to our team favorite basketball inspired tech shorts, Armada eliminates the need to ever wear cotton on snow.

**PRIMALOFT ONE®**  
PrimaLoft ONE® is the highest performing insulation on the market for warmth, water resistance, softness and compressibility. PrimaLoft ONE is an ultra-fine microfiber insulation that is as warm, soft and lightweight, and is warmer wet or dry than all other insulations.

**POLARTEC POWER DRY**  
Polartec® Power Dry® fabrics are designed to keep your skin dry when you sweat. All fabrics in this series feature a patented bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly.

**POLARTEC POWER DRY HIGH EFFICIENCY**  
Polartec® Power Dry® High Efficiency™ fabrics also feature the bi-component knit construction for superior moisture management but is further bolstered by Polartec's patented (US Patent #6927182) High Efficiency™ construction allowing these fabrics to weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

The raised fabric pillars on the inside create touch points for moisture pick up off the skin. The open air channels between those pillars ensure that the fabric delivers the highest levels of breathability, compressibility, and the highest warmth per fabric weight. Polartec® Power Dry® High Efficiency™ fabrics deliver performance in the cleanest way possible, by leaving out what you don't need.

**ODOR RESISTANCE**  
Provides permanent odor protection by inhibiting the growth of odor-causing bacteria in the fabric using silver fiber yarn.

**MEGAWICK FLEECE**  
MegaWick Fleece is a lightweight polyester fleece with a wicking treatment to keep you warm and dry on the hill.

**MEGAWICK JERSEY**  
MegaWick Jersey is a fast-drying polyester knit with a wicking and odor-resistant treatment to keep you dry and smelling nice.

**LAYERING FIT**  
Most of our layering pieces are designed to be wearable in town while providing the function needed in a winter mountain environment. Standard with a longer, slimmer fit, these pieces are intentionally lightweight, low profile, and have extra length to either look steezy or stayed tucked in on those powder days.

**MEGAREX SOFTSHELL 3L**

Our 3L softshell is engineered for maximum versatility with a DWR treated stretch face for mobility, a waterproof, windproof and breathable membrane for protection from the elements, and a soft, lightweight polyester fleece on the interior for enhanced comfort.

**MEGAREX SOFTSHELL 2L**

Thanks to a tightly woven, DWR treated stretch fabric, the versatile MegaRex Softshell 2L will have no problem repelling light moisture while the buttery brushed fleece interior keeps you cozy.

**BONDED FLEECE**

New for 12/13, our Bonded Fleece combines a smooth, water-resistant treated face fabric with a brushed fleece on the interior to create a lightweight, quick drying and highly breathable fleece that's perfect for spring park laps.

**AQUAPHOBIC FLEECE**

Our Aquaphobic Fleece features a unique polyester/cotton blend that strategically places the water-resistant treated polyester on the face to shed moisture while the interior is comprised of soft cotton. This combo makes it the ultimate all-around hoodie.

**STANDARD FLEECE**

Our standard fleece is made of buttery soft cotton fleece to keep you warm and comfy during your daily routine.

# GLOVES

It's 11am on a pow day... your friends are getting the deepest turns of their life and you are stuck in the lodge making sure your gloves don't melt while drying by the fire. Although your S20 hardware store gloves look sick, they cannot protect you from the elements. Thankfully, our glove line utilizes high performance materials to give you the most comfortable, warm, style driven gloves and mitts. Rather than continue sitting in the lodge waiting for gloves to dry, do yourself a favor and invest in a nice pair.

New for 2012: Phil Casabon designed a mitt that provides increased dexterity for grabs, superior warmth for cold days, and ideal breathability in sunny spring conditions.

**PITTARDS W100X LEATHER**  
Pittards WR100X is the world's finest sport leather. Their proprietary WR100X technology is applied during the tanning process which bonds to the structure of the leather so that it does not wash out or abrade off over time to create a permanent water resistant, sweat resistant, and breathable leather. The result is low-maintenance leather that provides extreme durability, maximum comfort and unparalleled grip guaranteed time after time.

**MEGAGOAT**  
Our standard goatskin leather offers water-resistance and exceptional durability.

**AIR INSERT**  
An insert is a breathable fabric that consists of a three-layer microporous coating structure. The first layer incorporates pores less than 0.5µ in diameter, preventing water penetration and peeling of the coating. The second layer consists of a honeycomb-like structure. This porous layer achieves moisture permeability and resistance to water penetration. The third layer has a very thin, dense structure that increases water resistance. Combined, these three complex layers provide optimal comfort.

**THINSULATE™**  
The unique microfibers of Thinsulate insulation are ten times smaller than the fibers of other synthetic insulations, which means they're much more efficient at trapping air and more effective at keeping you warm. Thinsulate is breathable, moisture-resistant and washable.

**SILLY PRINT**  
Our Silly or silicone print delivers graphics along with some extra waterproofing and exceptional grip.

**MICROFLEECE LINER**  
Our liner was selected for the warmth and comfort fleece provides and its moisture-wicking qualities that help keep you dry.

**LAZY FINGERS**  
Lazy Fingers is a design that incorporates the natural curve of your hand into the glove's construction—because you're fingers have enough work to do just keeping warm.

## AGENT AVALUNG PACK

Tough 420d nylon and 840d Ballistic nylon  
Volume: 20 L, 1,220 cu in

12ACC-AGE-AV  
12ACC-AGE

Our EST shapes make slogging the untracked snow easy and more fun. As such, more and more skiers are spending time beyond the boundaries. It's critical that everyone understands the risks, learn mountain safety and be properly equipped before ducking a rope.

For 12/13, we partnered with Black Diamond to co-brand their Agent Avalung. Armada and BD designers worked together to create this eye-popping limited edition pack. With dedicated space for a shovel and probe, and a built-in Avalung, the Armada team, family and friends are now better prepared for the unexpected.

### About the pack

The Black Diamond Agent Avalung provides the same streamlined dry tool organization with additional carrying capacity for storing backcountry essentials on longer outings. In the event of a slide, the built-in Avalung increases your chance of survival and the zippered front panel provides quick access to your shovel and probe.

\*Also Available without Avalung

- Built-in Avalung
- Large zippered front-panel opening
- Unique diagonal ski carry cable
- Tuck-away helmet carrying sling
- Dedicated dry-tool organizer pocket
- Insulated hydration sleeve

Size: Torso Length 18.5" - 21.5" / 47-55cm

Jan Provo wearing the Fixed Gore-Tex Pro Pant, Rekon Softshell, Ten Year Hat and Scrum Sock

Women's outerwear started as a serious commitment to fill the void that existed in the marketplace for high performance, functional, and stylish pieces. This commitment has quickly turned into a passion. Armada scrutinizes everything; every stitch and zipper serves its purpose. Novelty fabrics and specialty weaves are incorporated for the best styling. With women's outerwear, Armada has pushed function, fabrics, features, and fits to make sure every woman can dress the part.

This year, Armada offers women the ultimate waterproof and breathable outerwear through our partnership with Gore-Tex®. Further, Armada developed the Team Fit, a forward and fresh fit that satisfies the fashion-critical eye of our female athletes.

## WOMENS OUTERWEAR

In 2002, Armada was founded by a group of the world's best skiers to challenge a stagnant industry. Ten years later, the ski industry has changed; teens and rocker are now mainstream, but now our commitment to innovation continues with both hardgoods and softgoods.

Our mission to build the best performing, most advanced outerwear possible would not be complete without our new partnership with GORE-TEX®. Our passion and creativity is now further strengthened by the latest technology and backed by sound science. The result is unique Armada designs offering the highest level of protection and comfort.

Developed to deliver a high standard of performance and a multitude of looks, our MegaRex Fabric is a two-layer fabric with a waterproof/breathable laminate or coating plus DWR finish. MegaRex is durable, delivering excellent waterproofing and breathability in two ratings: 10,000mm/10,000g and 20,000mm/20,000g.

FITS

STANDARD FIT

- JACKET:
- Generous length
  - Subtle shaping
  - The most versatile fit for a wide range of body types

- PANT:
- Subtle shaping through the leg
  - Roomier hip and thigh

LOOSE FIT

- JACKET:
- 2" longer than our standard fit
  - More tailored fit

SLIM FIT

- PANT:
- Tailored through hip and thigh
  - Expanded knee
  - Flared hem

TEAM FIT

- JACKET:
- Extra long length provides more protection and more style
  - Fittingly tailored shape
  - Athlete favorite

Relaxed FIT

- PANT:
- Redesigned for 12/13
  - All-over looser fit

Our PolyFill insulation is a lightweight material made from polyester fibers that insulates even when wet.

Our down insulation is intended for use in the coldest conditions and offer the highest level warmth to weight ratios. We only use high quality European down feathers that reaches a minimum 600 fill power.

Found exclusively in our Vector series, Thinsulate insulation will help keep you warm without the unnecessary weight or bulk, and brings more freedom of movement and comfort to your clothing making it the perfect match for our lightweight Gore-tex® fabrics. Because the fibers in Thinsulate insulation are finer than the fibers used in most other synthetic or natural insulation, they trap more air in less space.

At Armada we strongly support mountain safety and avalanche education in the backcountry. If you spend any time out of bounds, we urge you to get educated and be properly equipped. It is in this spirit we are very proud of our partnership with RECCO and feature their reflectors in our line.

RECCO® is an avalanche rescue system utilized worldwide to facilitate the rapid location of burials. The two parts—reflector and detector—enable rapid pinpointing using harmonic radar but are not a substitute for transceiver use. Complementary in function, the RECCO system increases the chance of being found in time.

All Armada Outerwear is 100% seam sealed. Every seam is welded or taped to guarantee the waterproofing of the garment.

YKK's AQUAGUARD® Water Repellent Zippers are used to seal off our garments from the elements. Both the AQUAGUARD COIL and new for 12/13, AQUAGUARD VISLON are used in our line. The AQUAGUARD VISLON has the advantage of plastic teeth that run smoother in winter weather and provide more opportunity for color combinations.

YKK Zippers are used as our standard throughout the line to provide quality zippers you can count on. We use YKK Water Repellent Zippers on some of our garments to help seal them off from the elements.

Our pant cuffs are reinforced with Bemis Overlay Film to increase abrasion-resistance and overall strength.

The Reactive Hood System provides the ability to easily react to changing mountain weather. The system utilizes a 3-way adjustment, accessible from inside and outside the jacket, and a quick release pull to instantly loosen the hood. All excess bungee stores out of your way inside the jacket.

Our new IPP System provides a simple interface between your jacket's powder skirt and pant that will prevent upward movement so it won't ride up and will stay in place all day long.

Our women's SuperFlo Lining System was developed to maximize function by providing excellent breathability, warmth in just the right places, and unhindered mobility in a lightweight package. Reverse tricot fleece in the shoulders adds warmth while its slick face allows the jacket to slide during activity. A smooth mesh is used in the body for the combination of warmth and breathability, and provides snag-free movement between layers. An open-mesh in the underarm area allows maximum airflow and quick temperature regulation.

The SuperFlo Lining in the pants utilizes fleece in the seat and thighs, open mesh in the inner leg area and the birdseye mesh for the rest.

Our Thermal Lining System was designed to enhance the performance of our insulated garments by providing warmth with brushed tricot fleece panels at the upper shoulders and core, while the smooth taffeta panels provide mobility and reduce bulk for better articulation. The pit area is lined with large open-mesh to conduct excessive heat and moisture away from your body in the area you generate it most.

The Thermal Lining System in the Pants utilizes brushed tricot fleece in the seat and thighs, open mesh in the inner leg area, and taffeta for the rest.

Maude Raymond on the ARW, wearing the Isis Jacket and Pandora Pant. SnowPark, NZ

The goal is simple: to build the best performing, most advanced outerwear possible. The Vector Series makes no compromises and delivers the performance demanded by our elite team of athletes and mountain professionals by utilizing GORE-TEX® fabric throughout the collection. The Vector Series ensures you are ready for whatever conditions you face.

Sometimes it gets really, really, really cold when you are skiing. The Thermic Series is your defense against the extreme temperatures in our favorite playgrounds. Every piece in this collection contains insulation. Down and polyfill paired with our MegaRex fabrics stand up to the coldest and dampest of all winter environments ensuring you decide when your session ends, not mother nature.

## THERMIC SERIES
