## WE ARE SKIING

On the slopes. In powder. At the X Games. At the World Cup. Wherever you find skiers, you will find the highest quality equipment from ATOMIC. Our secret: we develop tailor-made skiing equipment for every type and every level of skier. Which makes skiing even simpler and more enjoyable and success so much easier to achieve.

Ski ▶ D2 RACE SL; Binding ▶ NEOX TL 12; Boot ▶ RT CS 130; Helmet ▶ TROOP SL; Goggles ▶ RACE RS; Protector ▶ LIVE SHIELD MAX BP MEN; Pole ▶ RACE CARBON COMPOSITE.

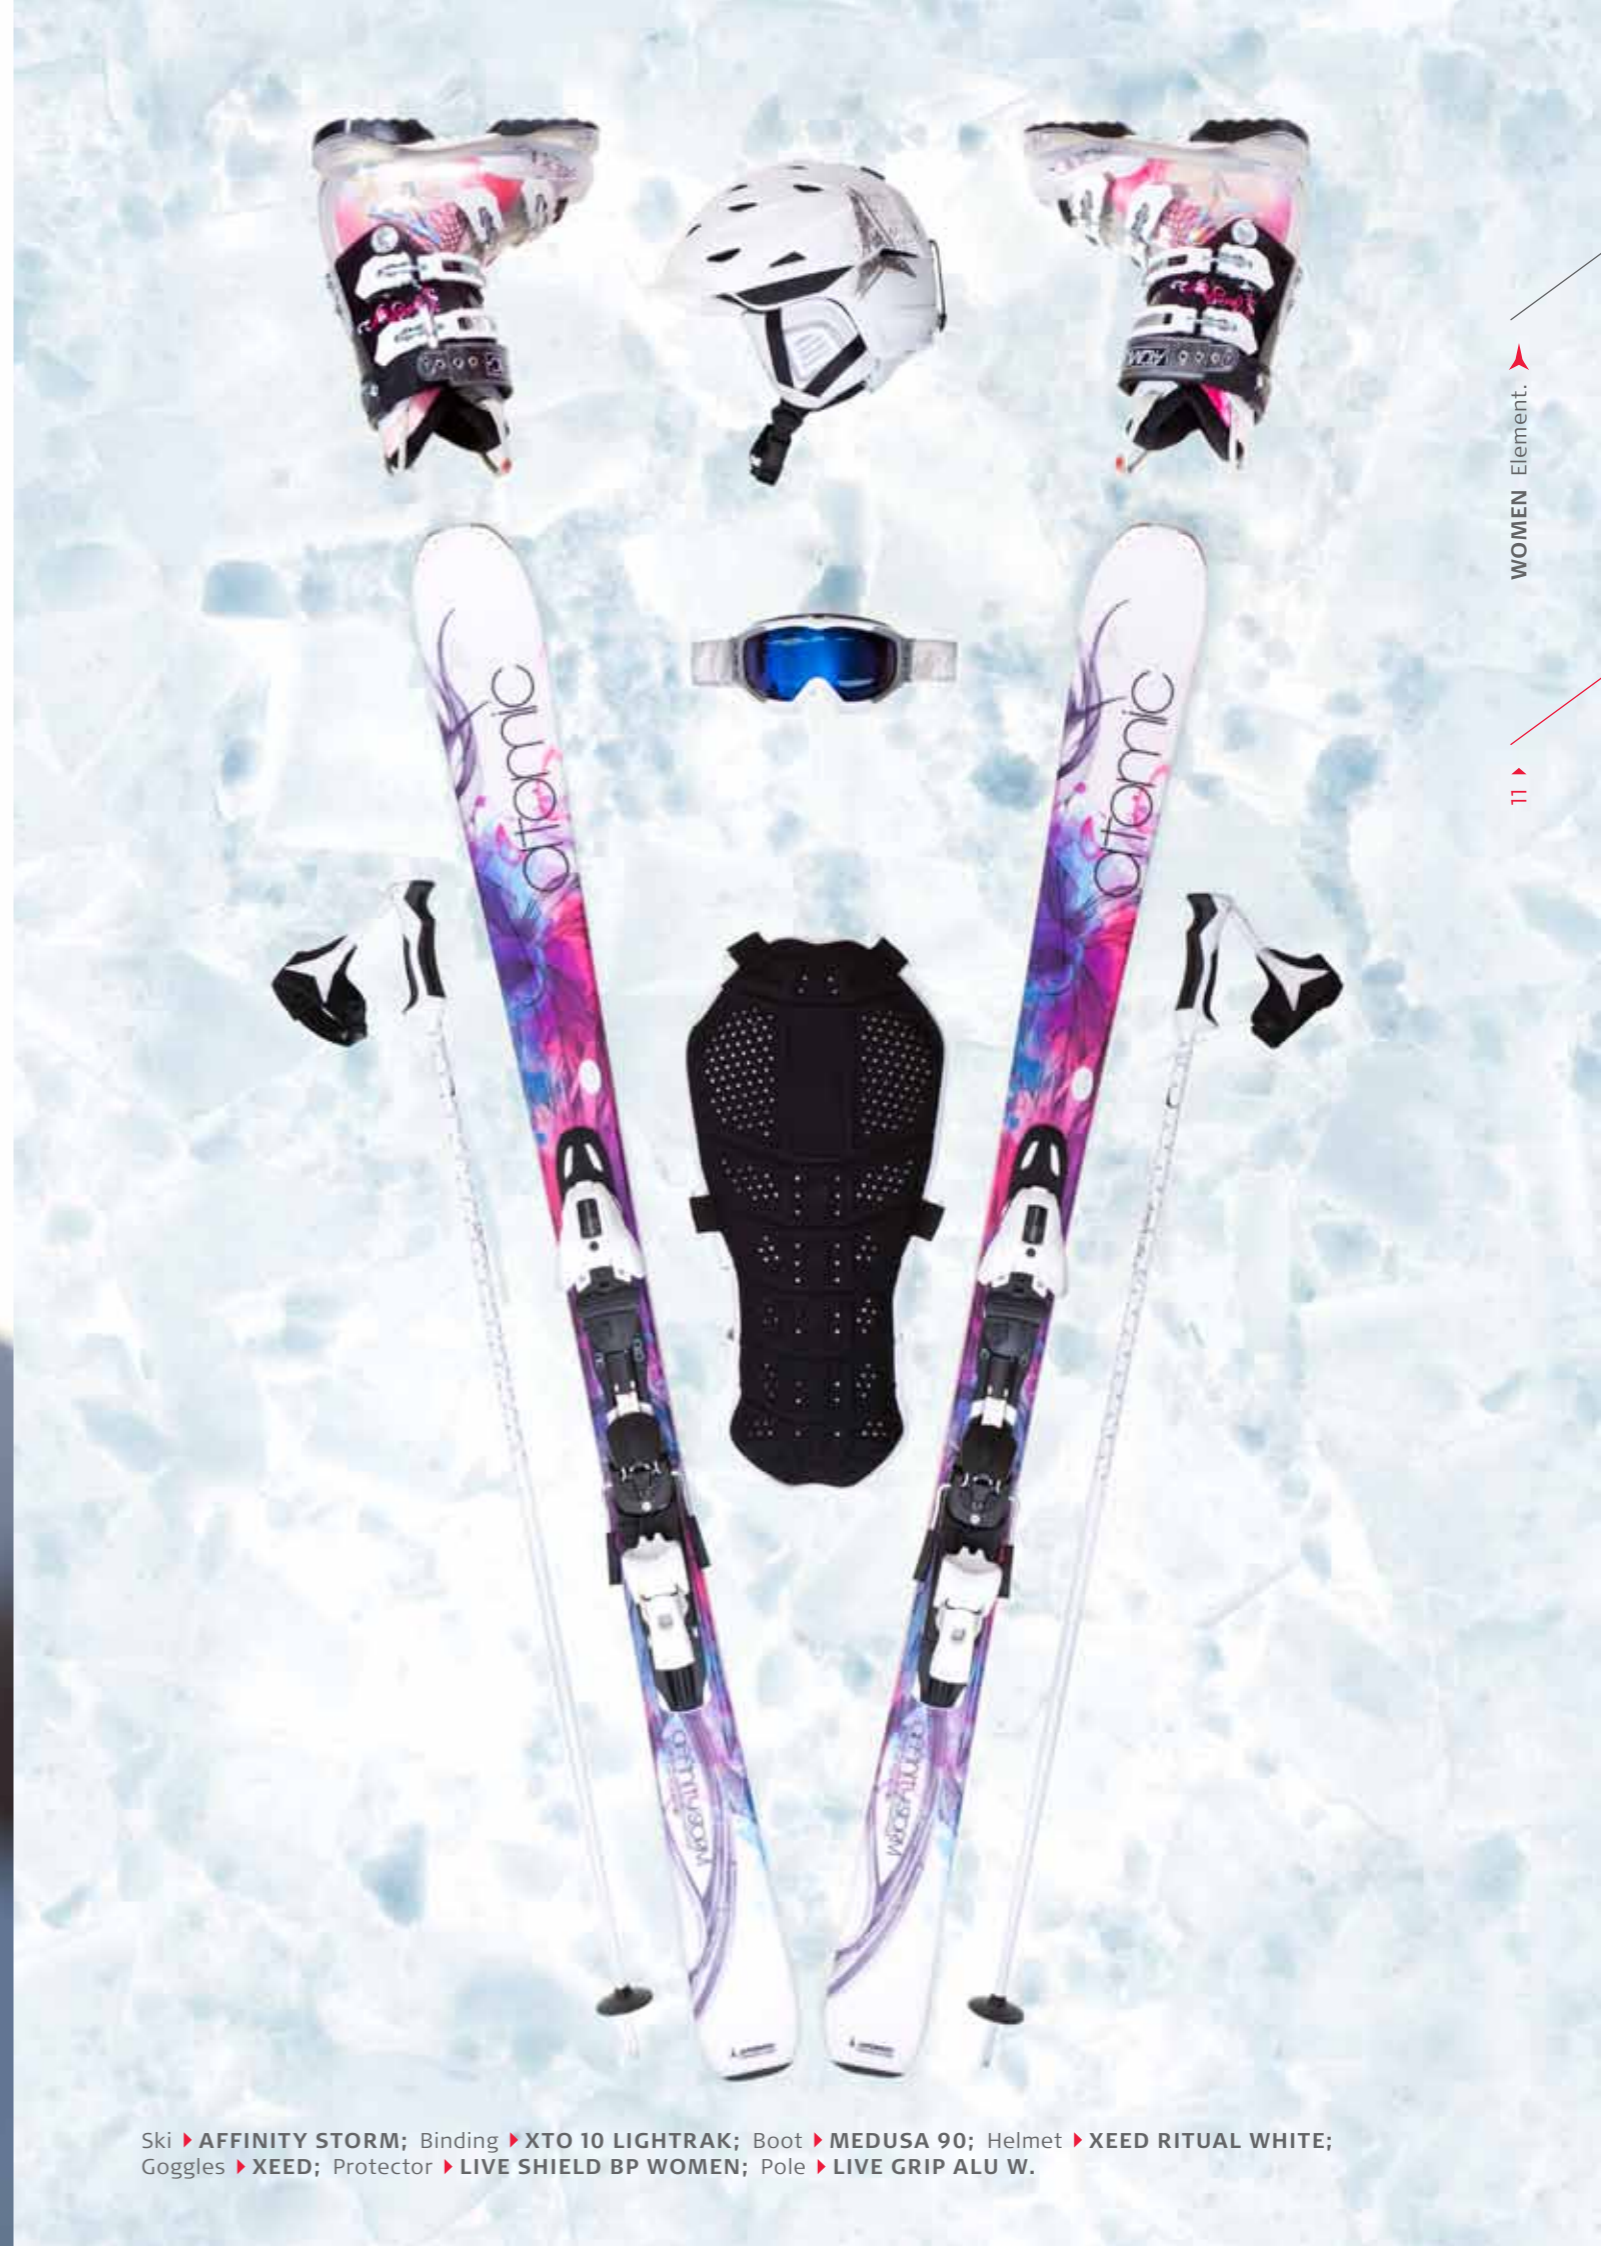

# All Mountain

Ski ▶ SAVAGE TI; Binding ▶ XTO 10; Boot ▶ BURNER 120; Helmet ▶ XEED RITUAL GREEN; Goggles ▶ XEED BLACK; Protector ▶ LIVE SHIELD MAX VEST MEN; Pole ▶ NOMAD GREEN.

# Women

WOMEN  Element.

11 

Ski  AFFINITY STORM; Binding  XTO 10 LIGHTRAK; Boot  MEDUSA 90; Helmet  XEED RITUAL WHITE; Goggles  XEED; Protector  LIVE SHIELD BP WOMEN; Pole  LIVE GRIP ALU W.

# FRESKI

# FRESKI

Ski ▶ BENT CHETLER; Binding ▶ FFG 14; Boot ▶ TRACKER 130 INT; Helmet ▶ TROOP BLACK; Goggles ▶ TROOP PINK; Protector ▶ LIVE SHIELD MAX VEST MEN; Pole ▶ LIVE GRIP SAGE PRO ALU.

# TOURING

Ski ▶ DRIFTER; Boot ▶ TRACKER RENU; Helmet ▶ XEED BLACK MATT; Goggles ▶ TROOP BLACK; Protector ▶ LIVE SHIELD BP MEN; Pole ▶ TELESKOP TRACKER.

# Kids

Ski ▶ SPIKE; Binding ▶ FFG 10; Boot ▶ OVERLOAD START UP; Helmet ▶ TROOP JR BLUE MATT; Goggles ▶ AJ JUNIOR; Protector ▶ LIVE SHIELD JUNIOR; Pole ▶ VOLT PARK.

# WHERE DO YOU SKI?

ROCKER PROFILE

A MATTER OF FORM

Up until now, the character of a ski has been influenced by three main factors: sidecut, waist width and the flex of the ski. Now, a new distinguishing characteristic is becoming more and more influential: the ski's profile when viewed from the side. In a ski bearing no weight, the profile describes the points of contact with the surface, the preloaded tension between these points, and the profile in front of and behind them. In action this plays a decisive role in determining riding characteristics, and thus the conditions for which a ski is best suited.

ATOMIC LEADS TECHNOLOGICAL PROGRESS WITH THREE CONSTRUCTION PHILOSOPHIES:

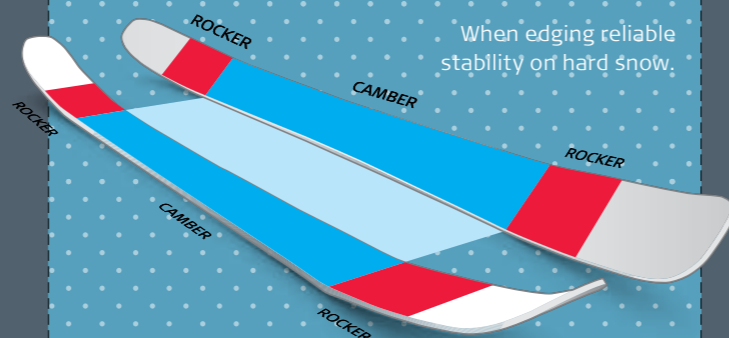

The **POWDER ROCKER** for freeskiers, who want perfect lift in powder while still desiring stability on hard snow.

The **ADAPTIVE ROCKER** for All Mountain skiers seeking ultimate versatility. Maximum support in soft snow of any terrain, convincing carving characteristics as well as also stress-free drifting on piste.

The **ACTIVE CAMBER** for on-piste skiers, who expect perfect edge-grip even in the hardest snow conditions.

## SOFT SNOW POWDER ROCKER

FLOATATION

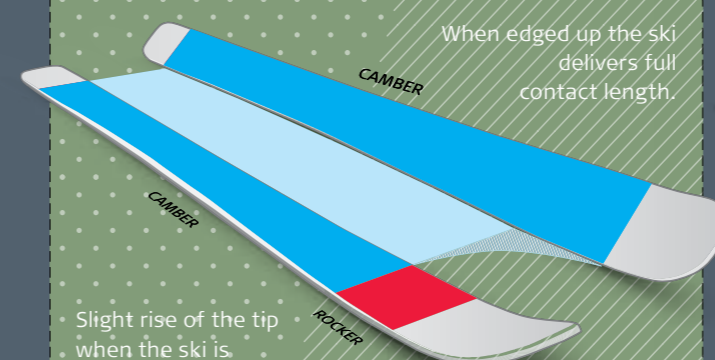

When edging reliable stability on hard snow.

Maximum floatation in powder:

## MIXED SNOW ADAPTIVE ROCKER

VERSATILITY

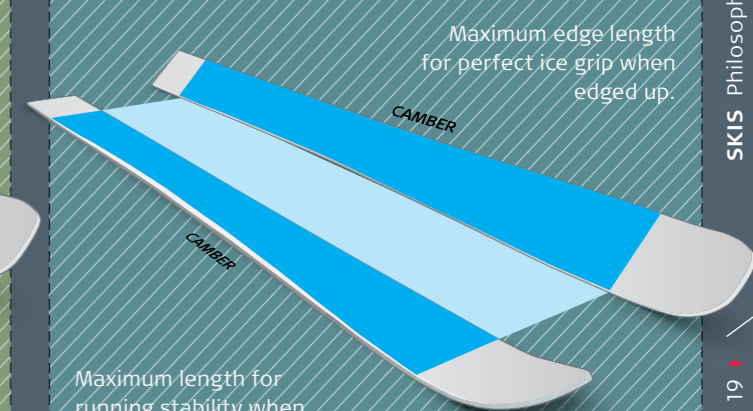

When edged up the ski delivers full contact length.

Slight rise of the tip when the ski is weighted. Easy turning, no edge catching and additional lift in soft snow conditions.

## HARD SNOW ACTIVE CAMBER

STABILITY

Maximum edge length for perfect ice grip when edged up.

Maximum length for running stability when weighted.

## ALPINE SKIS TECHNOLOGIES

### D2 DOUBLEDECK

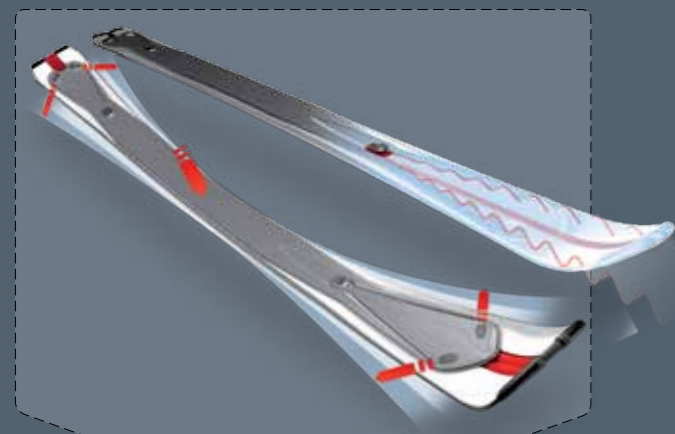

#### THE DOUBLEDECK EFFECT: SMOOTHER GLIDE, EASIER TURNS

Up until now, every ski has been a compromise: nippy or forgiving, flexible at low speeds or smooth at high speeds. The D2 Doubledeck succeeds in uniting these apparent opposites.

The reason is its unique construction, taken from two different skis: the relatively soft lower deck—the Adapter Deck—mutes vibrations, guarantees optimum edge-grip and makes for a perfectly smooth ride. The stabilizing upper deck—the Control Deck—acts like a steering module, receiving the skier's impulses and transmitting these directly to the lower deck.

#### D2 VARIO CUT

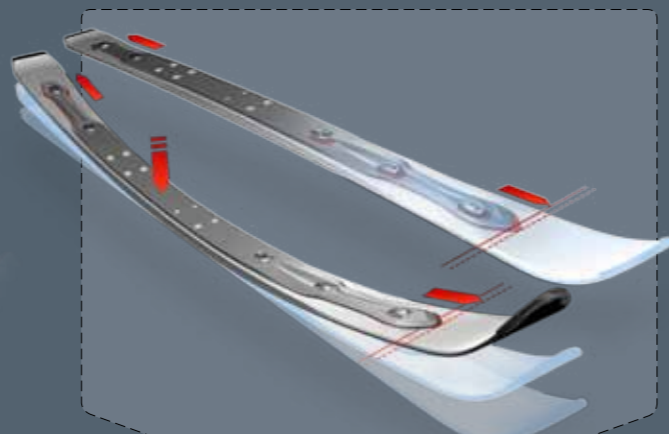

THE FIRST SKI WITH VARIABLE SIDECUT AND ADAPTIVE FLEX

The new D2 Vario Cut is the world's first ski with self-adapting radius and flex. It reacts to the skier's impulses by automatically adapting its radius and by providing the optimum dynamics for each individual skiing situation. Additionally, two elastomer-mounted glide connections between the upper and lower deck make for optimum shock absorption. All this allows the ski to glide and turn with special ease—making its rider a better skier.

#### D2 VARIO FLEX

THE DOUBLEDECK WITH SELF-ADAPTING FLEX

In the D2 Vario Flex, the elastomer-mounted connection between the upper and the lower deck influences the way the ski flexes according to current skiing speed. At low speeds, the ski is extremely easy to control. The higher the speed, the more dynamically the ski reacts. Its flex builds up progressively and uses the desired rebound to support acceleration out of turns.

### WOMEN TECHNOLOGIES

#### 1. WOMEN FLEX ZONES

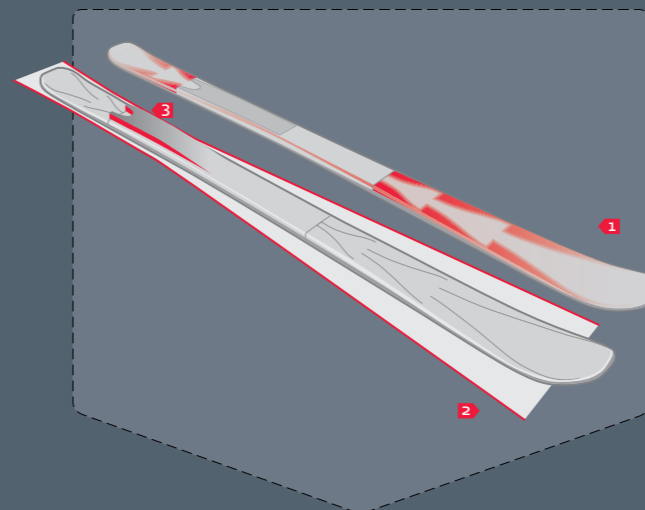

The "Women Flex Zones" specially developed for ladies ensure perfect control and a smooth ride. The flex builds progressively from the center to the tip and the tail of the skis. This makes the skis gradually softer the further the flex zones reach into the shovel and tail. The skis deliver a perfect grip under the binding, boast outstanding turning compliancy and ensure stable tracking even at high speeds. This helps to hone the skiing style of skiers of all levels.

#### 2. V-SHAPE BODY

The "V-Shape Body" of our ladies' ski models promises comfortable handling of the skis. It ensures easy and controlled turns, while the narrow tail allows for easy finishing of turns. The "V-Shape Body" is the ideal ski geometry for precisely carved or relaxedly drifted turns.

#### 3. HEEL LIFT

The "Heel Lift" technology provides a lifted stand in the heel section which helps to relieve pressure from the back and spine. It was developed because women have anatomically a different center of gravity. At the same time it affords a more natural posture on the skis. This ensures ideal control at all speeds for extended skiing fun without running out of steam too fast.

## CORE TECHNOLOGIES

### DOUBLEDECK

SKIS: D2 RACE GS, D2 RACE SL, D2 VF 70

**DOUBLEDECK POWERCORE CAP**

Thanks to a combination of Doubledeck and cap design, this agile and lively premium construction with titanium laminates and high-grade wood core is especially dynamic and boasts excellent tracking. Two rubber elastomers in the binding area dampen vibrations and allow for smoother skiing.

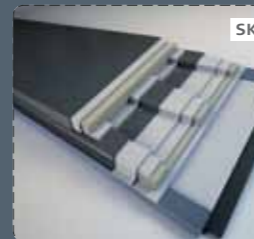

SKI: D2 VC 75

**D2 VARIO CUT DENSOLITE**

This incarnation of the Doubledeck technology boasts a lightweight and dynamic Densolite core, while the Vario Cut construction allows the radius of the ski to adapt automatically to the speed and style.

SKIS: D2 VF 72, D2 VF 82, D2 VF 75, D2 VF 73, CLOUD D2 75, CLOUD D2 73

**D2 VARIO FLEX DENSOLITE**

The Densolite core is dynamic and lightweight, the Doubledeck construction allows the flex of the ski to adapt automatically to the speed and style of the skier: ideal for performance-driven skiers.

### SIDEWALL

SKIS: RACE TI GS, RACE TI SL

**SLANTED SIDEWALL SPEEDCORE**

These high-grade sidewall skis, featuring a wood core and two titanium laminates, offer perfect performance, very smooth skiing and optimised dynamics.

SKI: PUNX

**SLANTED SIDEWALL WOODCORE**

The combination of sidewall ski and wood core means these skis are very dynamic, forgiving and durable.

SKIS: RACE LT, RACE ST

**SLANTED SIDEWALL FUSIONCORE WOOD**

The sidewall skis with a combined Densolite/wood core are developed for the ambitious on-piste carver. They ensure both easy performance and perfect dynamics.

SKIS: PERFORMER CARBON, VARIO CARBON

**SLANTED SIDEWALL FUSIONCORE**

These sidewall skis with Densolite core are designed for on-piste carving, they ensure easy handling and convince with high stability.

SKIS: PERFORMER SCANDIUM, VARIO SCANDIUM

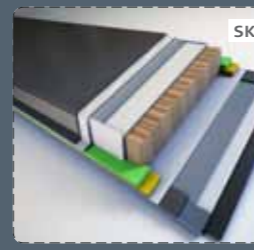

**SIDEWALL CAP FIBER**

The combination of a sidewall under the binding and a cap in the tip and tail ensures easy control and optimised edge grip.

### STEP DOWN SIDEWALL

SKIS: SAVAGE TI, CRIMSON TI, BLACKEYE TI

**STEP DOWN SIDEWALL WOODCORE TI**

The half-cap construction at the tip and tail area protects the ski from mechanical damage, the sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. A tip-to-tail wood core in conjunction with a titanal insert gives the ski an impressively sporty and dynamic character.

SKIS: BLACKEYE, AFFINITY STORM

**STEP DOWN SIDEWALL WOODCORE**

The half-cap construction at the tip and tail area protects the ski from mechanical damage. The sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. The combination of sidewall ski and wood core ensures lively performance and maintains the flex of the ski at all times.

SKI: SMOKE TI

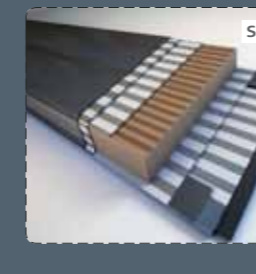

**STEP DOWN SIDEWALL CAP FIBER TI**

The half-cap construction at the tip and tail area protects the ski from mechanical damage, the sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. The Cap Fibre construction with titanal insert delivers an even more dynamic rebound at higher speeds.

### CAP

SKI: ULTIMATE

**SPEED PROFILE 2 WOODCORE + CARBON**

An ultra-light caruba/poplar wood core optimizes stability and minimizes weight – it is 15 percent lighter than conventional lightweight wood cores – and ensures in conjunction with carbon a perfect performance for ski touring racers. Thanks to optimised torsional and flex rigidity, challenging slopes can still be mastered with ease even after long ascents.

SKI: FREE DREAM

**TOUR CAP TIMBER LITE**

Designed to meet the demands of alpine touring, the advantages of a wood and Densolite core construction are combined in a ski which despite being ultra-lightweight still manages to deliver ultimate performance.

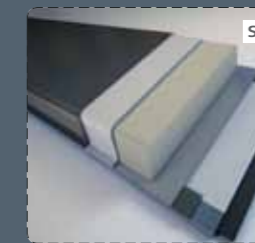

SKI: OUTBREAKER

**TOUR CAP HIGH DENSOLITE**

Designed to meet the demands of alpine touring, the advantages of the stable Tour Cap and the very light Densolite cores are combined in a weight-optimized ski still manages to deliver reliable grip and performance.

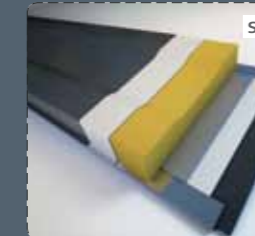

SKIS: CLOUD 9, CLOUD 8

**CAP DENSOLITE**

Very light skis but yet stable and perfect edging in any conditions.

SKIS: PERFORMER FIBER, VARIO FIBER, TROOPER, CLOUD 7, CLOUD 6, AFFINITY AIR, RACE 10 JR., RACE JR., NOMAD JR., RASCAL, ELYSIAN JR., SWEET STUFF, SPIKE, CENTURY JR., VARIO FIBER+, AFFINITY+, CLOUD+, ETL+, ETL 123+

**CAP FIBER**

The classic shell construction ensures great performance even with entry models.

SKIS: COLT, SMOKE, AFFINITY PURE, BENT CHETLER MINI, WHITEOUT+

**STEP DOWN SIDEWALL CAP FIBER**

The half-cap construction at the tip and tail area protects the ski from mechanical damage, the sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. The lightweight Cap Fibre construction reduces weight and ensures that even the entry models deliver target group specific performance.

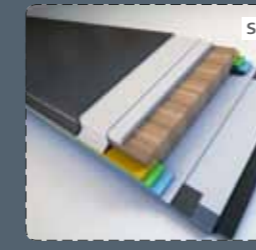

SKIS: PANIC, ACCESS, SUPREME, CENTURY

**STEP DOWN SIDEWALL L2 WOODCORE**

The half-cap construction at the tip and tail area protects the ski from mechanical damage. The dual-layer sidewall construction in the binding area improves damping while ensuring optimum edge grip and extraordinary durability. The combination of sidewall ski and wood core ensures lively performance and maintains the flex of the ski at all times.

SKIS: COAX, THEORY, ATLAS, BENT CHETLER, BLOG, PATENT, ELYSIAN, DRIFTER

**STEP DOWN SIDEWALL L3 WOODCORE**

The half-cap construction at the tip and tail area protects the ski from mechanical damage. The triple-layer sidewall construction in the binding area improves damping while ensuring optimum edge grip and extraordinary durability. The combination of sidewall ski and wood core ensures lively performance and maintains the flex of the ski at all times.

SKIS: CHARTER, DRIFTER, ASPECT

**STEP DOWN SIDEWALL RENU**

The Step Down Sidewall in the binding area improves damping and therefore edge grip and maximizes mechanical protection. The Renu construction is our most environmentally-friendly method of producing skiers: the surface contains 50% rapeseed oil, while the base is made of 100% and the steel edge of 20% recycled materials. The wood is sourced from ecologically managed cultivation (FCS certified).

SKI: DESCENDER

**STEP DOWN SIDEWALL TIMBER LITE**

High quality wood core combined with Densolite means a lightweight ski with yet convincing performance in rock hard descents. The Step Down Sidewall proves maximum robustness in the hardest terrain.

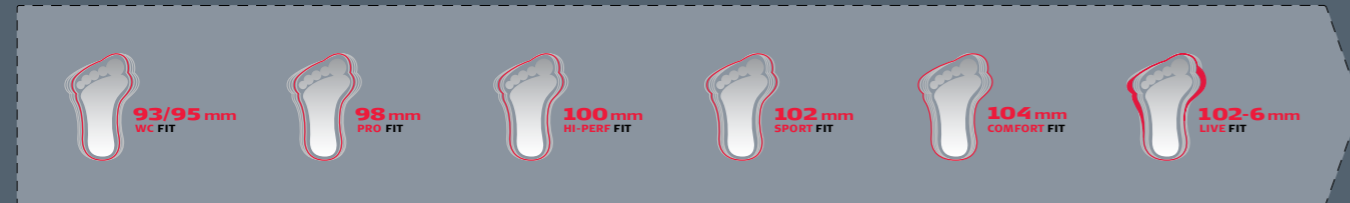

# BOOTS PHILOSOPHY

Skiers from all over the world keep reminding us of their three most important concerns when purchasing new boots: FIT, PERFORMANCE and COMFORT. Every skier has a different idea as to what Fit, Performance and Comfort mean to them. This is why we have built our entire range to cater to these three concerns for all skier types, from World Cup to convenience. Every boot we

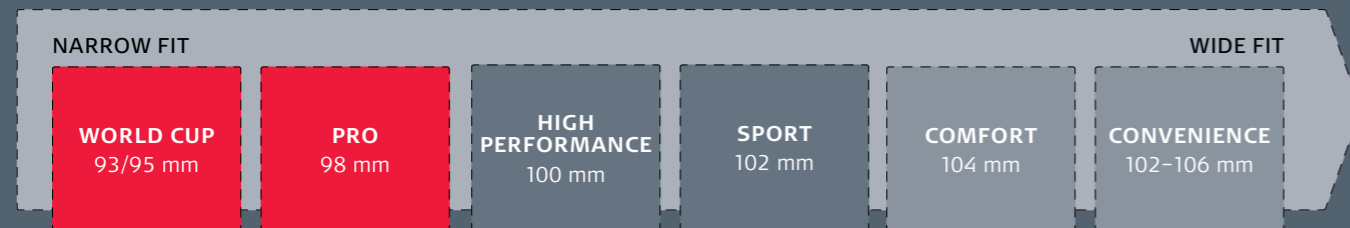

# AnATOMIC FIT

make embodies this design philosophy: the boot must FIT the way the consumer expects it, it must PERFORM to their expectations and provide the appropriate level of COMFORT they are looking for. But for us simply providing a boot with the appropriate Fit, Performance and Comfort level is not enough. We want to deliver additional features such as i-Flex and our Enduro Chassis, which genuinely enhance the skier's experience.

## FIT

## PERFORMANCE

## COMFORT

### RS LINING

- HIGHEST PERFORMANCE
- MAXIMUM SENSITIVITY

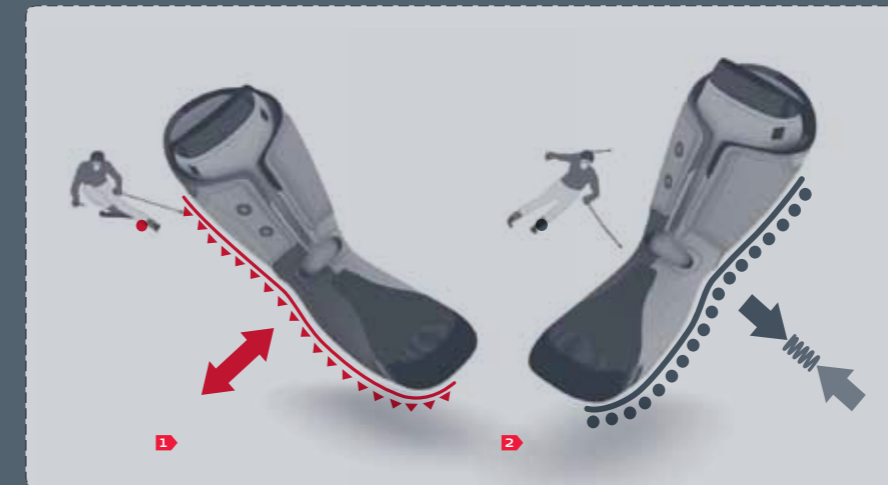

### ALACANTARA LINING

- BEST BLEND OF COMFORT AND SENSITIVITY

### VELVET MAX

- INSTANTANEOUS COMFORT
- MAXIMUM WARMTH

# LINER TECHNOLOGY

## ASY - ASYMMETRICAL ADVANTAGE LINER

The liner concept that compliments of how your foot works in the shell.

- 1 CONTROL FACE: FIRM FOR SUPER FEEL AND GRIP.
- 2 RECOVERY FACE: SOFTER TO CUSHION.

## THERMO-MOLDABLE LINERS

## LINER CHART

The best fit also requires the best liner. We have painstakingly selected the highest quality foams, insulations and lining materials in order to deliver the best fitting liners in the industry.

BOOT	FIT LAYERS	INNER LINING	EXTERNAL LAYER	TOE BOX	INSOLE	ADDITIONAL FEATURES

# BOOTS CONCEPTS

## RACE

No other boot has accumulated more victories, titles and medals faster than the Race Tech. That is why it still remains the standard by which you win the overall World Cup title.

**RACE DNA**

- 1-COMPONENT SHELL
- 93/95/98 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 0° SHELL ROTATION
- FORWARD LEAN ANGLE 16-18°

**RACE TECH GEOMETRY**  
Our secret recipe for World Cup domination: this exact combination of forward lean, ramp angle and sole canting is what delivers ultimate control, precision and sensitivity.

## BURNER

Until now, high performance all-mountain skiers were forced to ski in painted race boots that offered no advantage to skiers venturing off the groomed terrain. The Burner is the only boot to provide true advantage and benefit to the skier seeking fun in all snow types.

**BURNER DNA**

- 1-COMPONENT SHELL
- 98 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 0° SHELL ROTATION
- FORWARD LEAN ANGLE 16-18°

**ENDURO CHASSIS**  
The only boot concept on the market specifically designed to work with today's wider all-mountain skis. The 5 mm lifted construction provides the skier with increased leverage which makes wider skis more maneuverable on and off piste.

## HAWX

Keep your balance more easily, control the ski more precisely and ski with less fatigue: for all that, you need a boot that gives you reliable traction and still allows the forefoot its natural freedom of movement.

**HAWX DNA**

- 2-COMPONENT SHELL WITH I-FLEX INSERTS
- 100 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 3° SHELL ROTATION
- FORWARD LEAN ANGLE 16°

**I-FLEX ZONES**  
True game-improvement technology that allows the skier's forefoot to naturally flex during a turn, providing the skier with better balance, more control and easier skiing.

## M TECH

No all-mountain boot offers more versatility, value and performance than M Tech—the most adaptable boot on the market.

**M TECH DNA**

- 2-COMPONENT SHELL
- 102 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 3° SHELL ROTATION
- FORWARD LEAN ANGLE 16°

**AFS SHELL**  
Turning the screw on the outside of the heel reduces the ramp angle from 4° to 3° and provides the skier with more internal volume.

## B TECH

The all-mountain legend continues to be a clear favorite among dealers all over the world. No boot can fit the needs of so many consumers, and yet still offer fantastic skiing performance.

**B TECH DNA**

- 2-COMPONENT SHELL
- 104 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 3° SHELL ROTATION
- FORWARD LEAN ANGLE 16°

**ANATOMIC SHELL**  
Designed to provide the skier with ample big toe room and a generous fit across the foot. While at the same time securing the rear foot with a narrow heel pocket.

# BOOTS CONCEPTS

## LIVE FIT

Live Fit is the first ski boot in the world that transmits the exact shape of your foot LIVE through the liner and shell. Even when stepping in, the boot immediately adapts to the width of your foot. While skiing, it preserves the natural foot print for perfect balance making skiing easier than ever. Live Fit. Your perfect fit, instantly.

**LIVE FIT DNA**

- 2-COMPONENT SHELL WITH LIVE FIT INSERTS
- 102-106 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 3° SHELL ROTATION
- FORWARD LEAN ANGLE 15°

- 1 LIVE FIT ZONES**  
These zones automatically adapt to the skier's forefoot shape providing instant comfort, improved sensitivity, better blood flow, warmer toes and overall happier feet.
- 2 LIVE FIT CONVENIENCE**  
Our 2-buckle design with oversized power strap allows for easy entry and exit, all the while properly securing your foot for all day comfort on the slopes.

## WOMEN

We've gone the extra mile to ensure a level of AnAtomic correctness and fit in our Women's Boots found nowhere else.

**WOMEN DNA**

- TRUE SIZE 22.0 MP
- WOMEN'S SPECIFIC CUFF HEIGHT UP TO 27.0 MP
- WOMEN'S SPECIFIC LINER CONSTRUCTION ON ALL WOMEN MODELS

- 1 AFS LINER COLLAR**  
The AnAtomic cut-out and 4-way stretch materials instantly provide up to 10 mm of automatic calf adaptation in our liners specifically designed for women.
- 2 AFS CUFF**  
The Adaptable Fit System cuff can be easily adjusted in order to fit different calf shapes. By loosening the screw and lowering the cuff, cuff height is reduced by 10 mm and circumference is enlarged by 8 mm.

*Women*

## TRACKER

The Tracker will truly take you wherever you want to go and let you rip the descent when you get there.

**TRACKER DNA**

- 1-COMPONENT SHELL
- 98 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 0° SHELL ROTATION
- FORWARD LEAN ANGLE 16-18°

- 1 ENDURO CHASSIS**  
The only boot concept on the market specifically designed to work with today's wider all-mountain skis. The 5 mm lifted construction provides the skier with increased leverage which makes wider skis more maneuverable on and off piste.
- 2 POWER CONTROL RELEASE**  
Release the cuff from the lower shell to walk and tour the backcountry with ease. Simply return the lever back to the ski position for 100% freeride power on the descent.

## THE VOLT

The clear choice for the freeskier seeking the best freestyle/freeride crossover boot available.

**THE VOLT DNA**

- 1-COMPONENT SHELL
- 98 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 0° SHELL ROTATION
- FORWARD LEAN ANGLE 16-18°

- 1 SHOCKILLA 3-D HEEL**  
10 mm of super soft silicon protects the back of the heel on switch landings and a new EVA insert underneath the heel provides added damping for the big hits.
- 2 ENDURO CHASSIS**  
The only boot concept on the market specifically designed to work with today's wider all-mountain skis. The 5 mm lifted construction provides the skier with increased leverage which makes wider skis more maneuverable on and off piste.

## OVERLOAD

Offers a relaxed fit, relaxed geometry and even more shock absorption to soak up the impact of even the harshest landings.

**OVERLOAD DNA**

- 2-COMPONENT SHELL WITH LIVE FIT INSERTS
- 102-106 mm LAST (ON 26.5 MP)
- 1 mm OFFSET SHELL
- 3° SHELL ROTATION
- FORWARD LEAN ANGLE 15°

- 1 LIVE FIT ZONES**  
These zones automatically adapt to the skier's forefoot shape providing instant comfort, improved sensitivity, better blood flow, warmer toes and overall happier feet.
- 2 SHOCKILLA 3-D HEEL**  
10 mm of super soft silicon protects the back of the heel on switch landings and a new EVA insert underneath the heel provides added damping for the big hits.

# HELMETS CONCEPTS

For the 2011/2012 season, Atomic complements its product range with individual helmets for every user. Atomic offers the perfect helmet for every skier with five helmet concepts, focusing special attention on fit, construction and ventilation. TROOP is the latest top-performance addition to the race and all-mountain series.

FIT	CONSTRUCTION	VENTILATION
<p><b>ADAPTIVE FIT</b></p> 	<p><b>ABS HARD SHELL</b></p>  <p><b>HYBRID SHELL</b></p>  <p><b>IN-MOULD</b></p> 	<p><b>ADJUSTABLE VENTING</b></p> 
<p><b>INSTANT FIT</b></p> 		<p><b>PASSIVE VENTING</b></p> 

## PROTECT

The World Cup tested PROTECT racing helmet is the preferred choice of many of the world's best athletes. It has catapulted champions like Benni Raich and Philipp Schörghofer to victory.

- INSTANT FIT**  
The Speed Fit technology ensures an instant and yet comfortable fit. This helps the racer find the fastest line between the gates.
- ABS HARD SHELL**  
The seamless ABS hard shell provides ultimate protection.
- PASSIVE VENTING**  
Passive ventilation generates the helmet's optimal aerodynamic form.

## TROOP

The new TROOP is not only the ideal accessory for Freeskiers like Chris Benchetler, but also the top choice of World Cup slalom athletes like Marcel Hirscher.

- INSTANT FIT**  
The padding of the all-mountain fit model ensures perfect fit and makes the racer forget, that he/she is even wearing a helmet.
- ABS HARD SHELL**  
Its seamless ABS shell is suited for all situations on the racing course and off-piste. The soft ear pads ensure a comfortable fit and facilitate natural balance, with the skier perceiving all ambient sounds clearly.
- PASSIVE VENTING**  
The passive ventilation of the TROOP ensures a comfortable helmet environment in every weather condition.

## XEED

With the XEED series, Atomic offers the perfect helmet for the all mountain skier.

- ADAPTIVE FIT**  
XEED models can be individually adjusted thanks to the AFS (Adaptive Fit System).
- HYBRID SHELL**  
With the hybrid shell construction made of ABS hard shell on the top combined with an in-mould lower shell the XEED line offers maximum shock absorption and optimized weight.
- ADJUSTABLE VENTING**  
The active ventilation system is easy to operate and allows for controlling the helmet climate depending on use and weather conditions.

## PARITY

PARITY was designed for all-mountain skiers and distinguishes itself with its ultra light in-mould construction.

- ADAPTIVE FIT**  
Individually adjustable and comfortable fit thanks to AFS (Adaptive Fit System).
- IN-MOULD**  
Thanks to the low weight of the EPS foam and the optimized shell construction PARITY is one of the lightest all-mountain helmets on the market.
- PASSIVE VENTING**  
The passive ventilation ensures a comfortable helmet environment in every weather condition.

## AJ/SWEET STUFF

The AJ/Sweet Stuff models are specifically designed for junior skiers seeking an ultralight and aerodynamically designed ABS helmet. The passive ventilation helps maintain a constant, comfortable helmet climate.

## PROTECTORS TECHNOLOGY

# LIVE SHIELD

In order to have fun in the snow and perform well it is important to feel well-protected. With the Live Shield protector series Atomic proves that maximum protection, light weight and comfortable fit are not at odds with each other. "Live Shield Max", the latest innovation, successfully combines comfort and maximum safety.

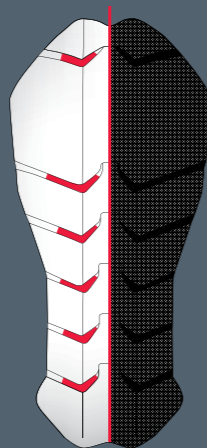

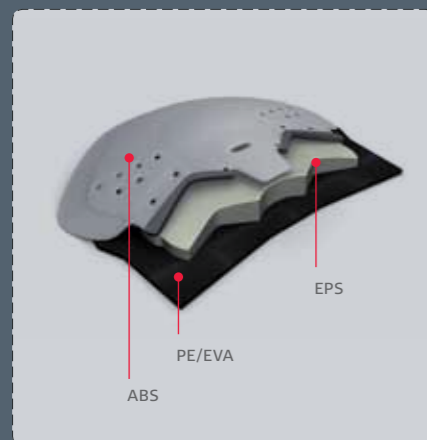

## MAXIMUM PROTECTION

"Live Shield Max" and "Live Shield" received the highest certification for back protectors (EN 1621-2).

### HARD SHELL

#### LIVE SHIELD MAX

The ABS shell absorbs impact with its ultralight and shock-absorbing EPS core. The EVA layer ensures optimal padding and fit.

### SOFT SHELL

#### LIVE SHIELD

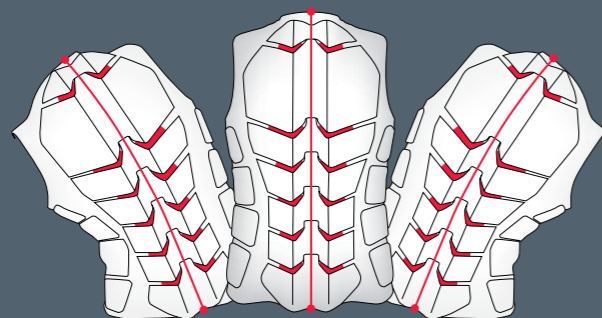

Extremely lightweight EPS core ensures high impact absorption and delivers maximum active protection, all the while the double layer made of soft EVA ensures a comfortable fit.

## MAXIMUM MOBILITY

#### LIVE SHIELD MAX

"Max" is a lightweight shield made of multiple shell components connected by individual joints. This special construction allows absolute freedom of movement. Whether you a racer or freeskiier, everyone is able to demonstrate their best performance in every situation.

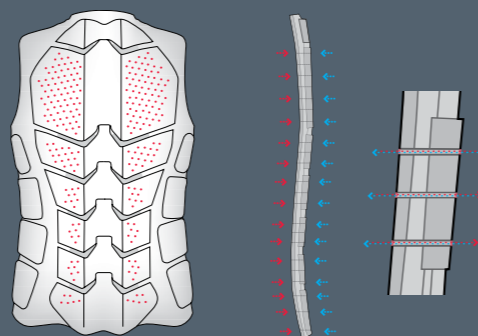

#### LIVE SHIELD

Provides maximum freedom of movement due to its EVA accordion-shaped design. "Live Shield" provides such a precise fit that the skier is only reminded of wearing the protective gear, once he/she takes it off after a whole day of skiing.

## MAXIMUM BREATHABILITY

To ensure that the protector fits comfortably in every situation, the three optimally adjusted material layers were outfitted with specific circulation ducts. On warmer days or after an intensive ascent moisture and heat are transported to the outside. Through this design, air circulation helps to maintain an optimal climate.

## RACE

### RS PRO BOOTBAG

Made of ultrarobust material with many clever details, this backpack is 100% tailored to the needs of ambitious racers. Smart details include extra padded shoulders to carry race skis, an integrated mat for changing boots and a drill pit holder.

#### 1 RS PRO DUFFLE WHEELIE AL5000504

- Size: 85 x 34 x 42 cm
- Volume: 180 l
- Weight: 4.82 kg
- Partitioned main and side compartment, extendable HD handle, included dirty clothes bag, 2 synch straps, vented compartments, holds all boots, helmet, ski suit

#### 2 RS PRO DAY PACK AL5000500

- Size: 28.5 x 52 x 18 cm
- Volume: 28 l
- Weight: 1.38 kg
- Integrated padded shoulder straps for carrying skis, lined goggle pocket, padded air mesh back and inner shoulder straps

#### 3 RS PRO BOOTPACK AL5000502

- Size: 68 x 35 x 36 cm
- Volume: 36 l
- Weight: 2.95 kg
- Integrated ground sheet, padded air mesh back and inner shoulder straps, integrated padded shoulder straps for carrying skis, easily holds boots, helmet, ski suit, lined goggle pocket, drill bit holder

#### 4 RS PRO SKI WHEELIE AL5000506

- Length: 200 cm
- Size: 235 x 50 x 25 cm
- Volume: 450 l
- Weight: 6.7 kg
- 3 partitioned top compartments, 4 synch straps, individually holds 3 pairs of 200 cm skis and poles, reinforced frame

## TRACKER

#### 1 TRACKER PART TIMER AL5000552

- Size: 36 x 52 x 16 cm
- Volume: 28 l
- Weight: 1.1 kg
- 3 compartments, hydration pack prepared, ski fixation, axe fixation, carabiner, air mesh back and inner shoulder straps

#### 2 TRACKER FULL TIMER AL5000550

- Size: 37.5 x 79 x 21 cm
- Volume: 69 l
- Weight: 3.5 kg
- Durable trolley system, 2 partitioned compartments

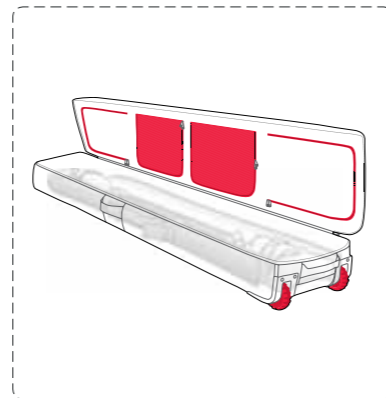

#### 3 TRACKER MOTORHOME AL5000556

- Length: 195 cm
- Size: 191 x 14 x 36 cm
- Volume: 280 l
- Weight: 4.8 kg
- 4 top compartments, external pockets, holds one pair powder ski, poles, boots, clothing

#### 4 TRACKER SINGLE BERTH SKIBAG AL5000554

- Length: 195 cm
- Size: 195 x 25 x 13 cm
- Volume: 83 l
- Weight: 1.03 kg
- Holds one pair 130 mm powder ski, fully padded, 2 synch belts

## TRACKER MOTORHOME

An all-in-one solution for every passionate skier. Thanks to its large interior and four spacious compartments in the top cover the "Motorhome" offers plenty of room and easy access to skis, ski boots and accessories.

## USB - UNIVERSAL SKI BAG

#### 1 USB TRAVEL WHEELIE AL5000510

- Size: 39 x 80 x 21 cm
- Volume: 69 l
- Weight: 3.47 kg
- Durable trolley system, 2 partitioned compartments

#### 2 USB CARRY ON WHEELIE AL5000512

- Size: 34 x 58.9 x 25 cm
- Volume: 29 l
- Weight: 2.6 kg
- Durable trolley system, carry on ready

#### 3 USB DAY BACKPACK AL5000514

- Size: 32 x 47 x 20 cm
- Volume: 22 l
- Weight: 0.79 kg
- Stabile ergonomic fit, one big main compartment, zipper pocket, adjustable shoulder straps

#### 4 USB HELMET BOOT PACK AL5000516

- Size: 35.5 x 34.5 x 29.5 cm
- Volume: 36 l
- Weight: 0.9 kg
- Big main compartment space for 1 pair boots, helmet, gloves, ... several zipper pockets, adjustable shoulder straps

#### 5 USB 1 PAIR BOOTBAG (BL) AL5000520

- Size: 40 x 29 x 23 cm
- Volume: 34 l
- Weight: 0.48 kg
- Front loader for easy packing, adjustable shoulder straps

#### 6 USB 1 PAIR BOOTBAG (BL/RE) AL5000518

- Size: 40 x 29 x 23 cm
- Volume: 34 l
- Weight: 0.48 kg
- Front loader for easy packing, adjustable shoulder straps

#### 7 USB SINGLE SKIBAG (BL) AL5000524

- Length: 165, 175, 185 cm
- Size: 187 x 25 x 13 cm
- Volume: 70 l
- Weight: 0.77 kg
- Complete length with zipper, adjustable shoulder straps
