**WE
ARE
SKIING**

WINTER 2013

ALPINE

► ENGLISH

WE ARE SKIING

On the slopes. In powder. At the X Games. At the World Cup. Wherever you find skiers, you will find the highest quality equipment from ATOMIC. Because we develop tailor-made skiing equipment for every type and every level of skier. Making skiing even more exciting, even simpler and success even easier to achieve.

BE IN YOUR ELEMENT

RACE

FREESKI

women

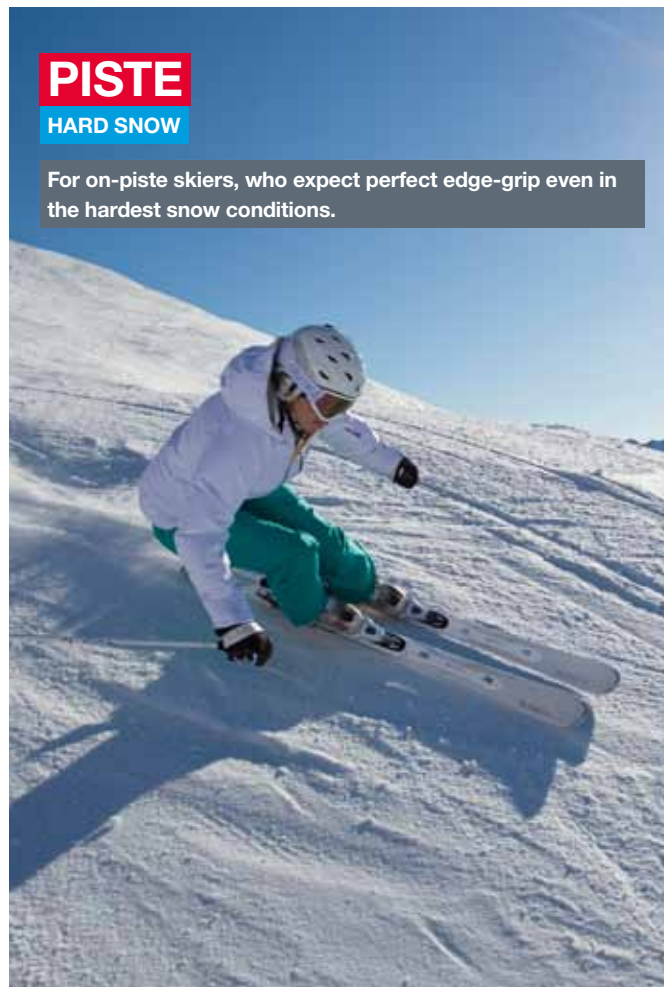

BACKCOUNTRY TOURING

kids

WHERE DO YOU SKI?

Extra-precise edge grip on any prepared piste. Effortlessly maneuverable on all-mountain terrain. Ultra-light surf sensation on fresh powder: wherever skiers love to ski the most, rockers precisely tailored to the terrain beneath improve their performance. Which is why all of our RACE, ALL MOUNTAIN, FREESKI POWDER, WOMEN and BACKCOUNTRY TOURING skis boast the advantages of Rocker Technology.

PISTE

HARD SNOW

For on-piste skiers, who expect perfect edge-grip even in the hardest snow conditions.

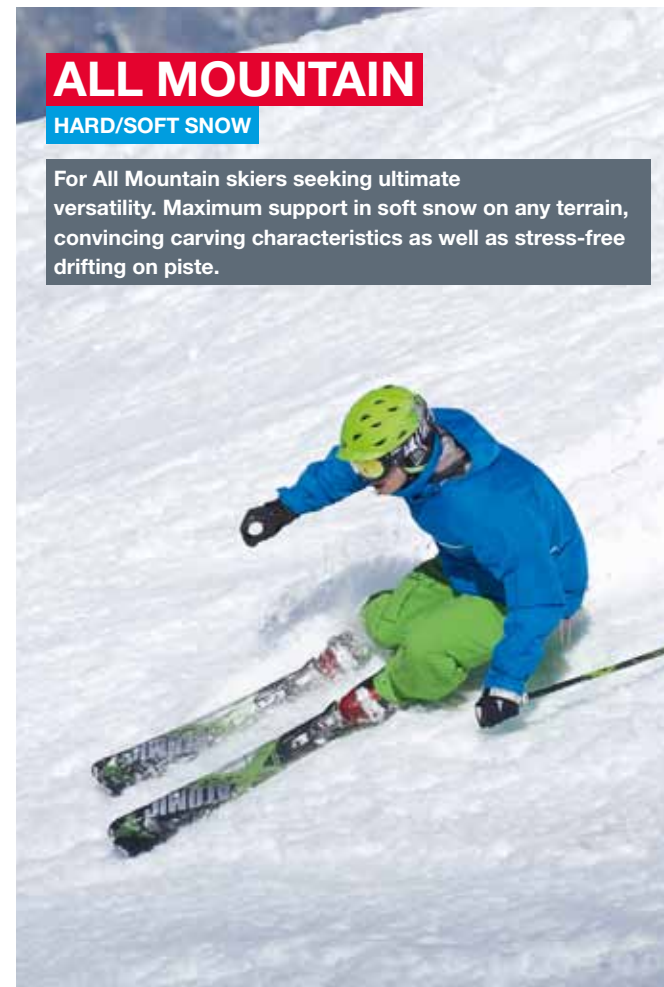

STABILITY

PISTE

ROCKER

FORGIVING AND EASY TURN INITIATION

ALL MOUNTAIN

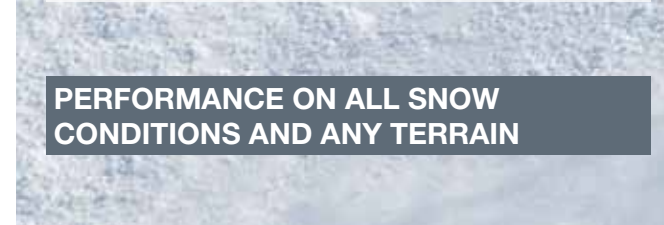

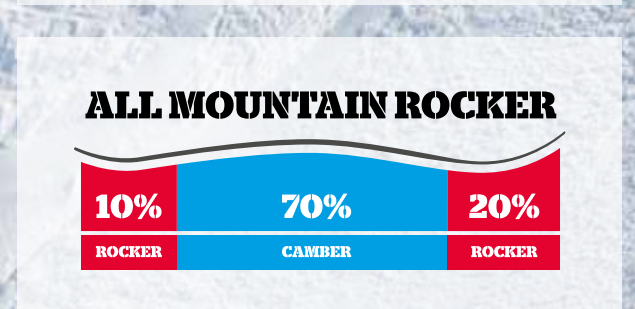

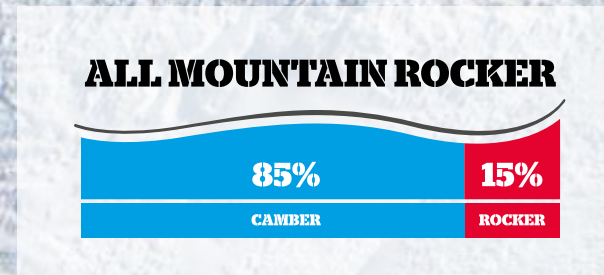

HARD/SOFT SNOW

For All Mountain skiers seeking ultimate versatility. Maximum support in soft snow on any terrain, convincing carving characteristics as well as stress-free drifting on piste.

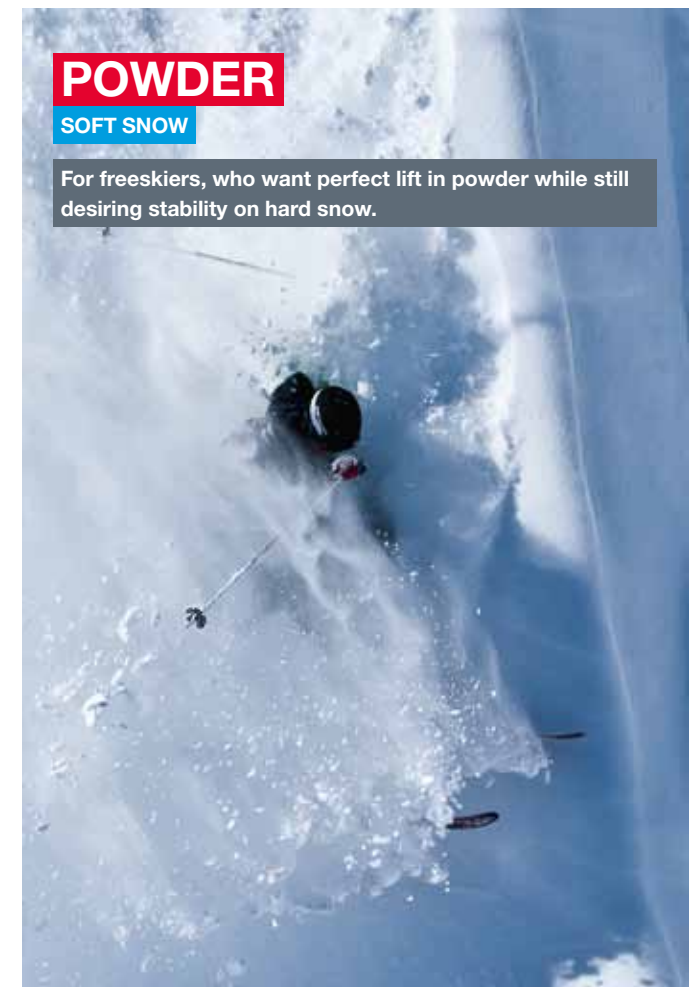

VERSATILITY

ALL MOUNTAIN

ROCKER

PERFORMANCE ON ALL SNOW CONDITIONS AND ANY TERRAIN

POWDER

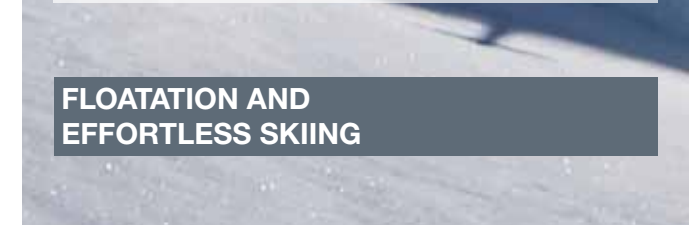

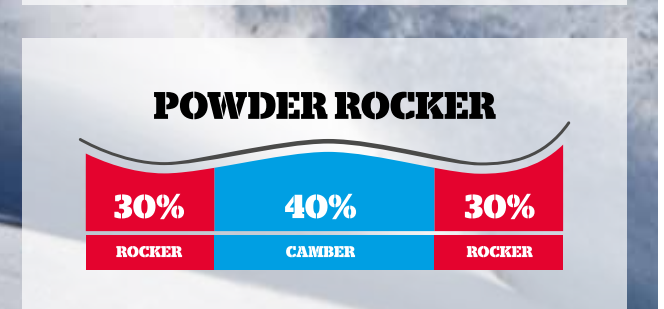

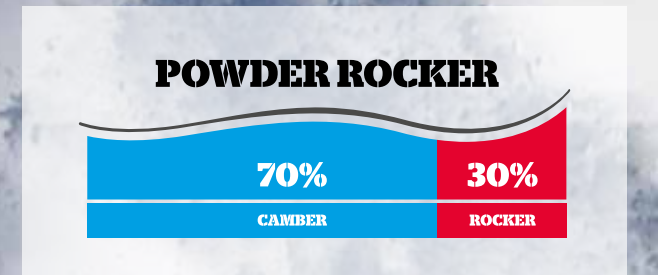

SOFT SNOW

For freeskiers, who want perfect lift in powder while still desiring stability on hard snow.

FLOATATION

POWDER

ROCKER

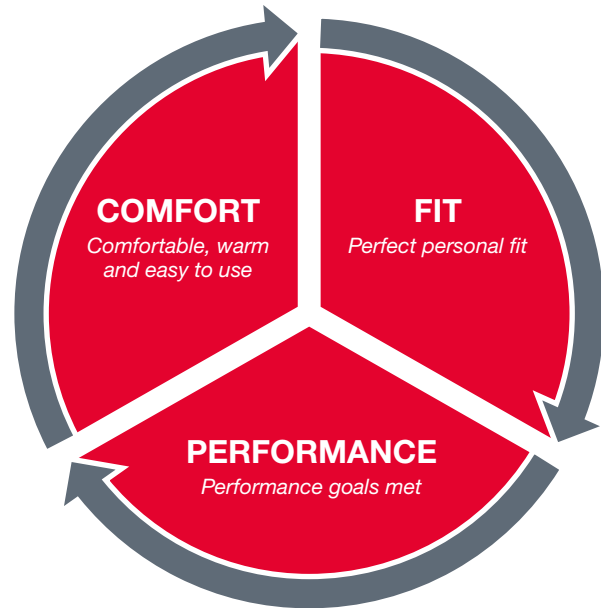

FLOATATION AND EFFORTLESS SKIING

BARRIERS TO BUY

Why is it that many skiers still hold on to their 15 year old boots? What Barriers are preventing them from buying new and better products? The fact is skiers are nervous about buying new boots because their 3 most important concerns of Comfort, Fit, and Performance might not be met.

CONSUMERS WANT...

Atomic is unique in the boot world since we are 100% committed to focusing our innovative "know how" to addressing these 3 concerns for all skier types.

COMFORT

LINER TECHNOLOGY

ASY – Asymmetric Liner Construction – The most anatomical liner on the market utilizing asymmetrically designed tongue, toe box, collar shape, and outer lining materials all geared towards creating a better fitting and ultimately more comfortable liner.

HEAT MOLDABLE

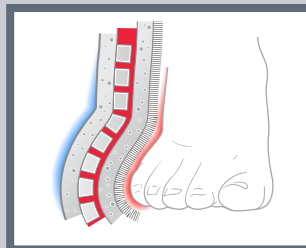

4 Levels of Customization: T1, T2, T3, Intuition

CLIMA FOAM

Uniquely Atomic, this foam has air channels in its construction trapping more air against the foot creating a new standard of insulation.

*All Hawx Women & Live Fit 90-70W

RIIDE REDSTER

THE FASTEST BOOT EVER MADE

The new Redster takes the performance skier to a whole new level. In close collaboration with ATOMIC's athletes, our engineers in Altenmarkt have developed a boot which responds more sensitively to the terrain, which steers more precisely and above all else accelerates more explosively. Based on our podium proven geometry, a totally new design has taken shape that boasts greater sensitivity, which is now even lighter, and one that makes you faster.

CARBON SPINE

Carbon-reinforced areas of the cuff and shell can be up to six times stiffer and more supportive without compromising the feel at the front of the boot.

- Supernatural Acceleration
- Incredible steering precision, increased power transfer, and exceptional edge grip

FLEX CHASSIS

Soft, medium and hard frames can be easily exchanged for custom feel.

- Individually customizable according to discipline and skiing style
- Individually tune the feel and sensitivity
- Custom forefoot flexibility delivers better balance, more control
- 200 g weight reduction per pair

NEW SOLE PROFILE

Long heel section, short toe section connected by an arcing mid section with optimized deformation zones.

- Improved forefoot flexibility offers better balance
- Maximum sensitivity means increased responsiveness and snow feel
- 200 g weight reduction per pair

ROTATIONAL POWER CONTROL

A new dimension in control & comfort.

- Cuff rotates 5mm in each direction (10mm of total rotation)
- Lightning fast turn initiation = more efficient, faster skiing
- Customizable according to discipline = faster
- Customizable to biomechanical needs = more comfortable

MICRO CUFF ALIGNMENT

Doubled amount of cuff alignment; total range of 8°: inward 2°, outward 6°.

- Better alignment = more responsive, more comfortable skiing
- Quicker turn initiation and maximum power transmission
- Customizable according to discipline = faster
- Customizable to biomechanical needs = more comfortable

ANATOMIC FIT

Goal: create the best out of the box fit. Ever. With the help of world's best boot-fitters, we have created the most anatomically shaped last the ski boot world has ever seen. No need to "make the boot work"- fit more feet instantly without the need for special ovens or compression gadgets.

BACKBONE TECHNOLOGY

PERFECT ALL MOUNTAIN ROCKER PERFORMANCE

Thanks to new Backbone technology with its special shape, wide all-mountain skis benefit from perfect flex and high torsional rigidity from ski tip to tail while weight is kept to a minimum.

OUTSTANDING SMOOTHNESS thanks to optimized absorption in the Rocker area

EASY CONTROL yet **MAXIMUM PERFORMANCE**

RELIABLE EDGE GRIP on the hardest of terrains

BACKBONE TITANIUM

Maximum dynamics and smoothness, allowing even the most challenging of downhill to be mastered with ease

BACKBONE CARBON

Additional pop for outstanding agility

RIDE
Makes the downhill precise and effortless

OVERSIZED PLATFORM
Ultra-wide base
► Maximum power transmission and dynamics, precise turns even at high speeds

LOW-PROFILE CHASSIS
Ultra-low construction, extreme rigidity
► Maximum stability, ultra-direct contact with the terrain

HIKE & RIDE SWITCH
► Switch effortlessly from Hike to securely locked Ride mode through a simple shift in body weight

TRACKER

PROVEN DOWNHILL PERFORMANCE, COMBINED WITH CONVENIENT HIKE & RIDE TECHNOLOGY

More and more skiers are looking for action and the ultimate outdoor experience in off-piste virgin snow as they forge their own routes. The new Tracker backcountry binding helps them do just that: with unrivalled downhill performance and even more direct feedback, it delivers the ultimate freeride experience on the descent. Thanks to its innovative Hike & Ride technology, it also makes the switch from ascent to descent even easier, safer and more comfortable than ever before.

HIKE
Effortless climbing

FLAT FRONT OF TOE PIECE
► Any kick turn can be mastered easily thanks to a possible 90-degree rotation of the binding

SELF-CLEANING BASE PLATE
► Effortless climbing without snow clumping

HIKE & RIDE SWITCH
► Switch from Ride to Hike mode with one push of the ski pole

MINIMUM WEIGHT, MAXIMUM PROTECTION

Before you can let yourself go on the slopes, you need to feel safe. Live Shield protectors from ATOMIC not only make you feel safe, their passive ventilation system wicks away moisture and excess heat to maintain a pleasant body temperature, they follow every movement the skier makes and because they are ultra-light they are barely noticeable.

MAXIMUM PROTECTION

LIVE SHIELD MAX and LIVE SHIELD conform to the EU's highest level of certification for back protectors (EN 1621-2).

LIVE SHIELD MAX

- Hard ABS outer shell, ultra-light weight EPS core for optimum shock absorption
- NEW feature: Neck protection

- Impacts are absorbed and cushioned
- EVA layer next to the body ensures exceptional comfort

LIVE SHIELD

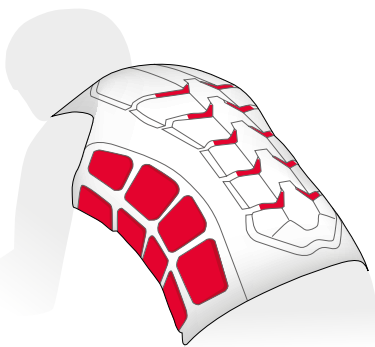

- Optimum crash protection and maximum active protection thanks to EPS core
- Ultra-light soft shell protector thanks to super-light EPS core

MAXIMUM MOBILITY

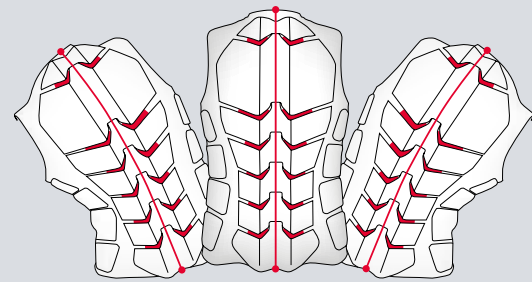

LIVE SHIELD MAX

- Shell of lightweight elements joined together by hinges
- Maintains full freedom of movement and top performance in any skiing or trick scenario

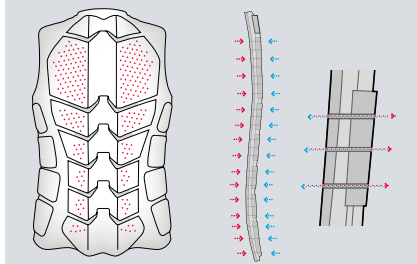

LIVE SHIELD

- Accordion structure of EVA for full freedom of movement
- Precise anatomical fit

MAXIMUM BREATHABILITY

- Circulation canals integrated into the materials
- Moisture and excess heat are wicked away

LIVE SHIELD MAX VEST MEN

AN5201502 BLACK

- Sizes: S, M, L, XL
- Nylon air mesh vest
- ABS/EPS laminate vertebrae
- Core protection - EVA Paddings
- Adjustable waist belt
- Climate control

LIVE SHIELD MAX BP MEN

AN5201504 BLACK

- Sizes: S, M, L, XL
- ABS/EPS laminate vertebrae
- Core protection - EVA Paddings
- Removable shoulder straps
- Adjustable waist/lumbar belt
- 35 mm Power Belt strap
- Climate control

LIVE SHIELD VEST MEN

AN5201500 BLACK **NEW**

- Sizes: S, M, L, XL
- Laminate EPS
- Nylon air mesh vest
- Core protection - EVA Paddings
- Adjustable waist belt
- Climate control

CLIMBING SKINS

ATTACH, BEGIN CLIMBING AND DON'T GIVE THEM A SECOND THOUGHT UNTIL THE DESCENT: THE NEW CLIMBING SKINS FROM ATOMIC.

- ▶ Outstanding gliding characteristics and maximum grip for effortless climbing
- ▶ Easy handling in any situation
- ▶ High quality with 100% Mohair for the PRO skins and a mix of 70% Mohair and 30% Synthetic for the MIX skins.

In addition to the pre-fitted PRE FIT skins for all backcountry touring models, a MULTI FIT version which can be adapted to any of ATOMIC's twin-tip skis is also available.

ATOMIC FIX SYSTEM

New and exclusive from ATOMIC:

- ▶ Ultra-easy handling – even with gloves
- ▶ Precision attachment system keeps skins firmly in place till to the very tip and prevents infiltration of snow and the skin from loosening.

REDSTER DOUBLEDECK

THE NEXT GENERATION OF THE SERIAL WINNER

The new Redster Doubledeck combines the dynamic performance of the World Cup serial winner at high speed with even greater agility at lower speeds.

The completely redesigned upper deck is what gives the Redster its character. It makes carving turns even easier without compromising on edge grip or performance. Skiing with the new Redster Doubledeck is even more precise and yet so much more effortless and easy.

POWER TRANSMISSION

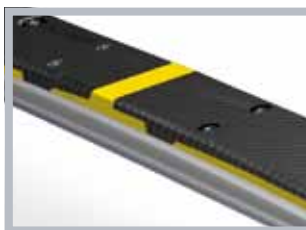

Direct interaction with the piste through Power Transmission Bridges

- Perfect power transmission to the edges

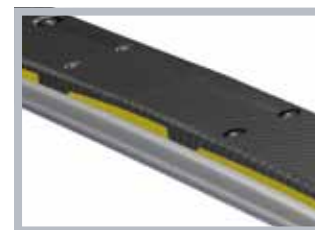

FLEX ZONES

Save both energy and fractions of a second

- Harmonious flex line across the entire length of the ski
- Carving turns made easy, maximum power in dynamic turns

REDSTER DOUBLEDECK SL
An additional flex zone in the middle of the ski makes the ski even more lively and faster edging easier.

REDSTER DOUBLEDECK GS

DAMPENING ZONES

Exceptional smoothness even at high speeds

- Absorption of vibrations and shocks
- Precision control at all times

POWER JOINT

Flexible connections between upper and lower deck

- Energy absorption and transfer for optimum rebound and maximum acceleration

SPROCKET POWER BOOSTER

PERFECT POWDER ROCKER PERFORMANCE

SPBs to the front and rear of the binding effectively dampen vibrations in the Rocker area and channel power directly to the edges.

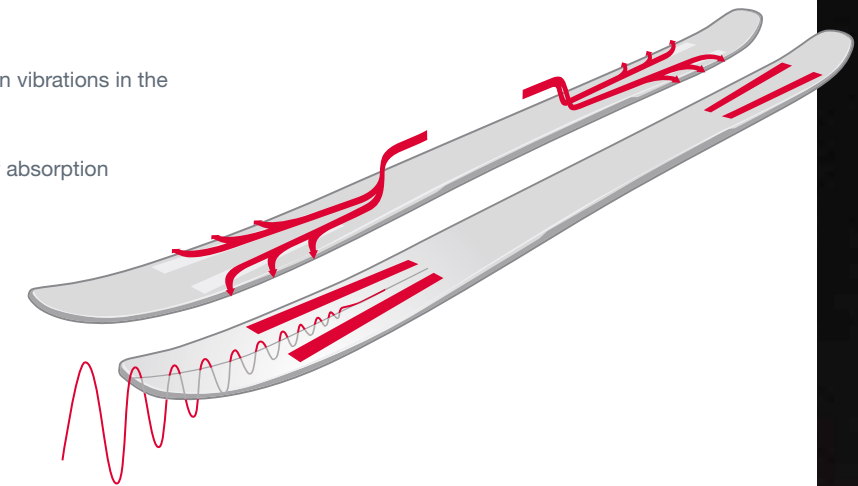

- High rebound thanks to optimized flex with extraordinary absorption
- Exceptionally smooth on all terrains
- Maximum edge grip thanks to more effective power flow

SPB TITANIUM

Maximum smoothness and dynamics on fast downhill

SPB CARBON

Outstanding agility thanks to additional pop in tip and tail

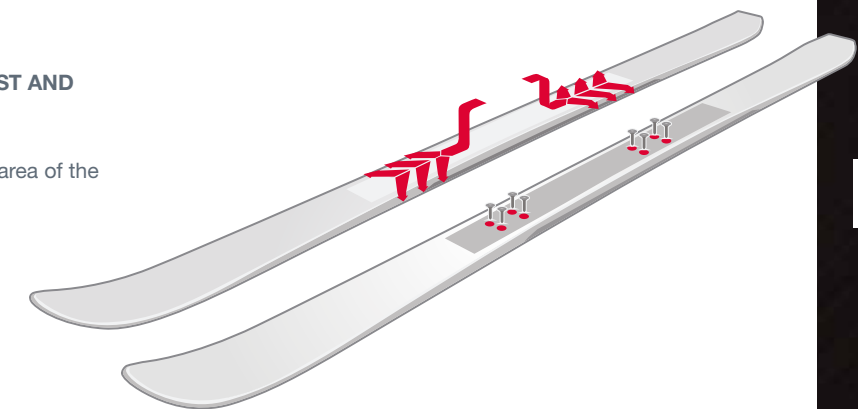

MEGA GRIP TI

MAKES BACKCOUNTRY TOURING SKIS ULTRA-ROBUST AND MAXIMIZES EDGE GRIP

MEGA GRIP TI is an ultra-light Titanal insert in the binding area of the BC Touring models, designed to add strength.

- Increases torsional rigidity, thereby maximizing edge grip
- Holds the binding secure on the ski even under extreme loads

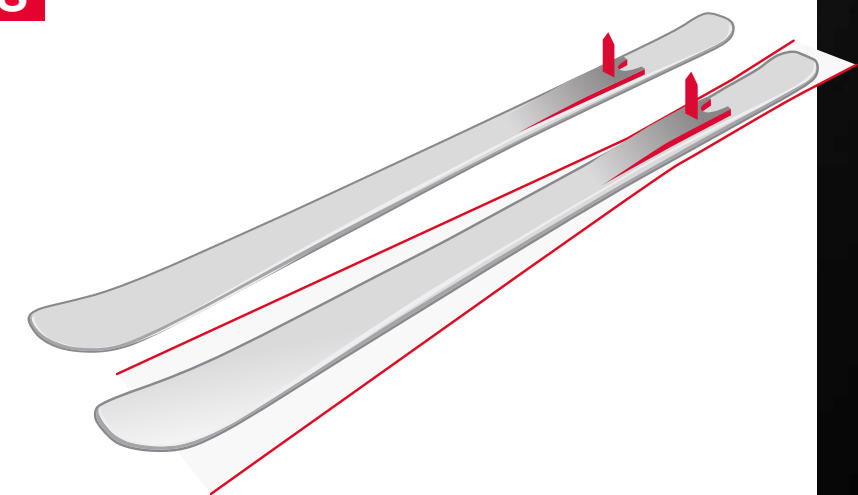

WOMEN TECHNOLOGIES

V-SHAPE BODY

- A narrower than usual tail in comparison with the ski tip
- Effortless turning from beginning to end
- Perfect for precisely carved or smoothly drifted turns

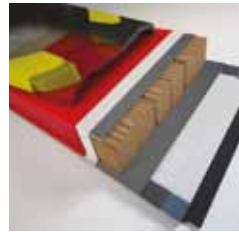

HEEL LIFT

- Raised heel area
- Tailored to the centre of gravity of the female body, the skier has a more natural position above the ski
- Increases ski control, relieves stress on the back and prevents premature tiredness

CORE TECHNOLOGIES

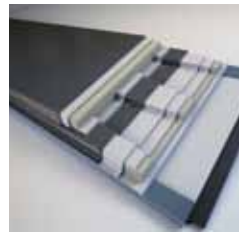

DOUBLEDECK

DOUBLEDECK SHOCKILLA POWERCORE CAP

New upper deck: special flex zones in the binding area and precise power transmission along the full length of the ski ensure a dynamic flex. At the same time, Shockilla inserts below the binding and through the Power Joints provide unrivalled levels of absorption. Thoroughbred Doubledeck Race construction for an extremely agile ride and exceptionally smooth skiing.

SKIS: REDSTER DOUBLEDECK GS, REDSTER DOUBLEDECK SL

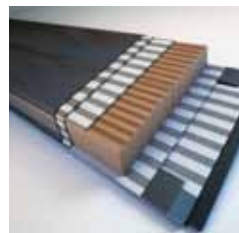

D2 VARIO FLEX DENSOLITE

The Densolite core is dynamic and lightweight, the Doubledeck construction allows the flex of the ski to adapt automatically to the speed and style of the skier: ideal for performance-driven skiers.

SKIS: D2 VF 75, D2 VF 73, CLOUD D2 75, CLOUD D2 73

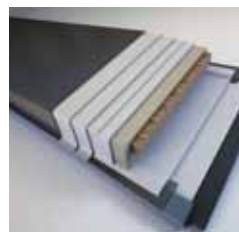

CAP

SPEED PROFILE 2 WOODCORE+CARBON

An ultra-light caruba/poplar wood core optimizes stability and minimizes weight – it is 15 percent lighter than conventional lightweight wood cores – and ensures in conjunction with carbon a perfect performance for ski touring racers. Thanks to optimised torsional and flex rigidity, challenging slopes can still be mastered with ease even after long ascents.

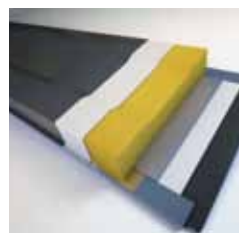

SKI: ULTIMATE

TOUR CAP TIMBER LITE

Designed to meet the demands of alpine touring, the advantages of a wood and Densolite core construction are combined in a ski which despite being ultra-lightweight still manages to deliver ultimate performance.

SKI: FREE DREAM

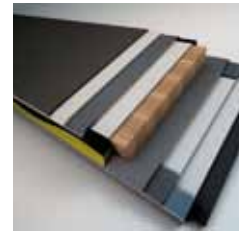

CAP FIBER

The classic shell construction ensures great performance even with entry models.

SKIS: VARIO FIBER, TROOPER, CLOUD 7, CLOUD 6, AFFINITY AIR, REDSTER JR EDGE, REDSTER JR, VANTAGE JR, RASCAL JR, AFFINITY JR, PUNX JR, CENTURY JR, VARIO FIBER+, AFFINITY+, CLOUD+, ETL+, ETL 123+

SIDEWALL

SHOCKILLA SIDEWALL SPEEDCORE

New construction and 2K Sidewall Technology in combination with a wood core. Outstanding performance, reflected in maximum smoothness and exceptional dynamics on the piste.

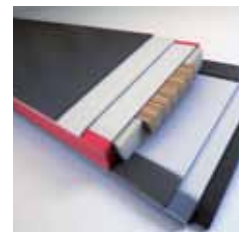

SKIS: REDSTER EDGE GS, REDSTER EDGE SL

SLANTED SIDEWALL WOODCORE

The combination of sidewall ski and wood core means these skis are very dynamic, forgiving and durable.

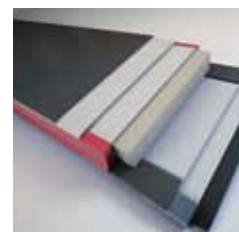

SKI: PUNX

SLANTED SIDEWALL FUSIONCORE WOOD

The sidewall skis with a combined Densolite/wood core are developed for ambitious on-piste carver. They ensure both easy performance and perfect dynamics.

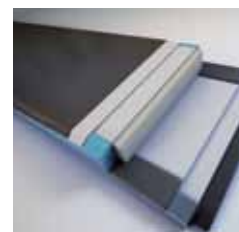

SKIS: REDSTER LT, REDSTER ST

SLANTED SIDEWALL FUSIONCORE

These sidewall skis with Densolite core are designed for on-piste carving, they ensure easy handling and convince with high stability.

SKI: VARIO CARBON

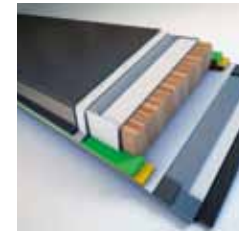

SIDEWALL CAP FIBER

The combination of a sidewall under the binding and a cap in the tip and tail ensures easy control and optimised edge grip.

SKI: VARIO SCANDIUM

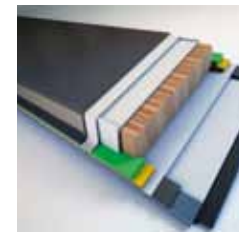

STEP DOWN SIDEWALL

STEP DOWN SIDEWALL WOODCORE TI

The half-cap construction at the tip and tail area protects the ski from mechanical damage, the sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. A tip-to-tail wood core in conjunction with a titanal insert gives the ski an impressively sporty and dynamic character.

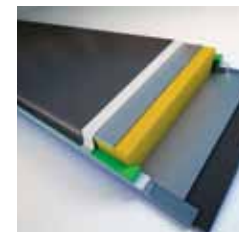

SKIS: SAVAGE TI, CRIMSON TI, BLACKEYE TI

STEP DOWN SIDEWALL WOODCORE

The half-cap construction at the tip and tail area protects the ski from mechanical damage. The sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. The combination of sidewall ski and wood core ensures lively performance and maintains the flex of the ski at all times.

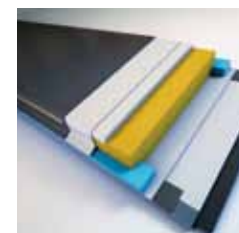

SKIS: BLACKEYE, MILLENNIUM, BLOG, ACCESS, PANIC, AFFINITY STORM, SUPREME, CENTURY

STEP DOWN SIDEWALL CAP FIBER TI

The half-cap construction at the tip and tail area protects the ski from mechanical damage, the sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. The Cap Fibre construction with titanal insert delivers an even more dynamic rebound at higher speeds.

SKI: SMOKE TI

STEP DOWN SIDEWALL CAP FIBER

The half-cap construction at the tip and tail area protects the ski from mechanical damage, the sidewall construction in the binding area improves damping, shock absorption and therefore edge grip. The lightweight Cap Fibre construction reduces weight and ensures that the entry models deliver target group specific performance.

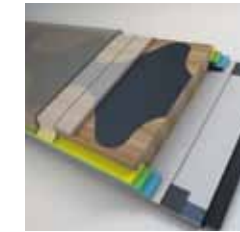

SKIS: COLT, SMOKE, CLOUD 9, CLOUD 8, AFFINITY PURE, BENT CHETLER MINI, WHITEOUT+

STEP DOWN SIDEWALL TIMBER LITE

High quality wood core combined with Densolite means a lightweight ski with yet convincing performance in rock hard descents. The Step Down Sidewall proves maximum robustness in the hardest terrain.

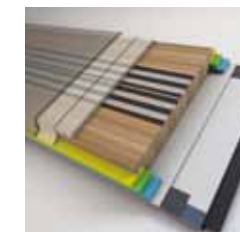

SKI: DESCENDER

STEP DOWN SIDEWALL WOODCORE TITANIUM BACKBONE

The extremely durable sidewall construction below the binding ensures optimum absorption, while the Backbone and wood core maximize the power flow and therefore improve edge grip. Vibrations in the Rocker area are effectively dampened by the Backbone. Plus its shape allows for effortless turning thanks to consistent rigidity and performance. Extreme smoothness and exceptional dynamics are the hallmarks of the Titanium version.

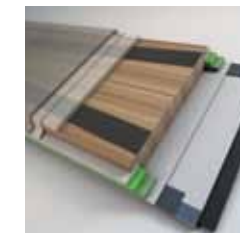

SKIS: ALIBI, RITUAL

STEP DOWN SIDEWALL WOODCORE CARBON BACKBONE

The extremely durable sidewall construction below the binding ensures optimum absorption, while the Backbone and wood core maximize the power flow and therefore improve edge grip. Vibrations in the Rocker area are effectively dampened by the Backbone. Carbon is synonymous with agility thanks to maximum pop.

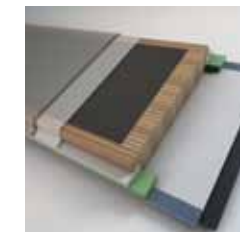

SKIS: THEORY, ELYSIAN

STEP DOWN SIDEWALL WOODCORE TITANIUM SPB / CARBON SPB

The hugely durable sidewall construction below the binding optimizes absorption and delivers reliable edge grip. The combination of wood core and SPB (Sprocket Power Booster) the Rocker area and ensures extremely smooth skiing. The Titanium SPB allows the skier's energy to be directly transferred from the binding to the edges, while the Carbon SPB delivers maximum pop in every turn.

SKIS: AUTOMATIC, BENT CHETLER

STEP DOWN SIDEWALL LITE WOODCORE TITANIUM MEGA GRIP

The sidewall construction provides optimum cushioning and edge grip. An ultra-lightweight wood core reduces overall weight, while the Step Down Sidewall and additional reinforcements on the sides make the ski extremely resistant to damage. Titanium Mega Grip delivers maximum edge grip thanks to high torsional rigidity below the binding and scores top marks in pull-out tests.

BOOT CONCEPTS

BURNER

Until now, high performance all-mountain skiers were forced to ski in painted race boots that offered no advantage to skiers venturing off the groomed terrain. The Burner is the only boot to offer true advantage and benefit to the skier seeking the best blend of all day comfort and high performance without compromise.

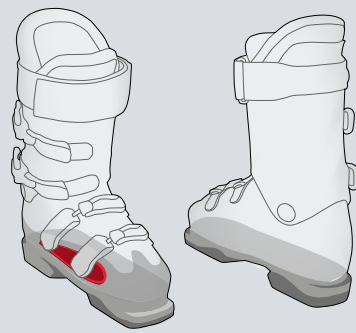

HAWX

Keep your balance more easily, control the ski more precisely, and ski with less fatigue: for all that, you need a boot that gives you reliable traction and still allows the forefoot its natural freedom of movement.

BURNER DNA

-  1-COMPONENT SHELL WITH ONE LIVE FIT INSERT
-  98 MM NARROW FIT + LIVE FIT PERFORMANCE
-  1 MM OFFSET SHELL
-  0° SHELL ROTATION
-  FORWARD LEAN ANGLE 16-18°

► LIVE FIT PERFORMANCE

A Live Fit zone is purposefully placed on the lateral side to eliminate common "hot spots", while the medial side of the boot remains solid for maximum power transfer and edge grip.

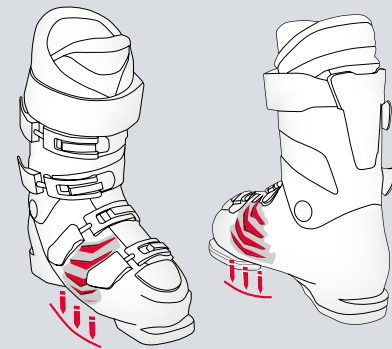

► ENDURO CHASSIS

We've taken our podium-proven race geometry and combined it with real all mountain traction. Our race geometry gives the all mountain skier the confidence to attack steeper, more aggressive terrain than ever before and our Ridge Walker Sole made with genuine Skywalk rubber provides superb traction all over the mountain.

► RECCO EQUIPPED

HAWX DNA

-  2-COMPONENT SHELL WITH I-FLEX INSERTS
-  100 MM MEDIUM FIT
-  1 MM OFFSET SHELL
-  3° SHELL ROTATION
-  FORWARD LEAN ANGLE 16°

► I-FLEX ZONES

True game-improvement technology that allows the skier's forefoot to naturally flex during a turn, providing the skier with better balance, more control, and easier skiing.

► ENERGY SPRING

A spring steel component returns the reverse cambered shell back to neutral at the end of each turn, producing a lively feel to the boot and readiness for the next turn.

► RECCO EQUIPPED

M TECH

No all-mountain boot offers more versatility, value, and performance than M-Tech – the most adaptable boot on the market.

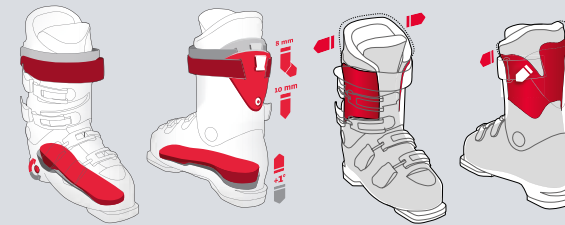

B TECH

The all-mountain legend continues to be a clear favorite among dealers all over the world. No boot can fit so many consumers, yet still offer fantastic skiing performance.

M TECH DNA

-  2-COMPONENT SHELL
-  102 MM MEDIUM FIT
-  1 MM OFFSET SHELL
-  3° SHELL ROTATION
-  FORWARD LEAN ANGLE 16°

► AFS CUFF

The Adaptable Fit System Cuff can be easily adjusted in order to fit different calf shapes. By loosening the screw and lowering the cuff, cuff height is reduced by 10 mm and circumference is enlarged by 8 mm.

► AFS SHELL

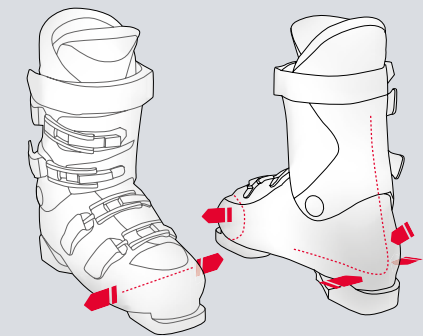

Turning the screw on the outside of the heel reduces the ramp angle from 4° to 3° and consequently provides the skier with more internal volume.

► AFS LINER

The AnAtomical cut out and 4-way stretch materials instantly provide up to 10 mm of automatic calf adaptation in our Women's Specific liners.

B TECH DNA

-  2-COMPONENT SHELL
-  104 MM WIDE FIT
-  1 MM OFFSET SHELL
-  3° SHELL ROTATION
-  FORWARD LEAN ANGLE 16°

► ANATOMIC SHELL

Designed to provide the skier with ample big toe room and a generous fit across the foot, while at the same time securing the rear foot with a narrow heel pocket.

BOOT CONCEPTS

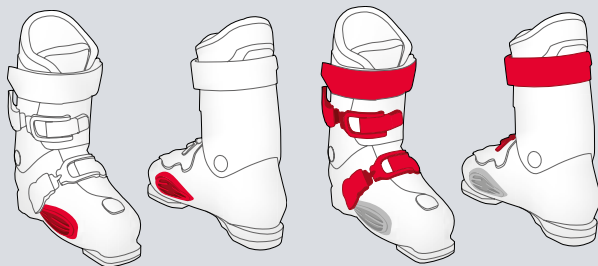

LIVE FIT

Live Fit is the first ski boot in the world that transmits the exact shape of your foot LIVE through the liner and shell. Even when stepping in, the boot immediately adapts to the width of your foot. While skiing, it preserves the natural foot print for perfect balance making skiing easier than ever. Live Fit. Your Perfect Fit. Instantly.

LIVE FIT DNA

-  2-COMPONENT SHELL WITH LIVE-FIT INSERTS
-  102 MM WIDE FIT + LIVE FIT
-  1 MM OFFSET SHELL
-  3° SHELL ROTATION
-  FORWARD LEAN ANGLE 15°

► LIVE FIT ZONES

These zones automatically adapt to the skier's forefoot shape providing instant comfort, improved sensations, better blood flow, warmer toes and happier feet.

► LIVE FIT CONVENIENCE

Our 2-buckle design with oversized power strap allows for easy entry and exit, all while properly securing your foot for all day comfort on the slopes.

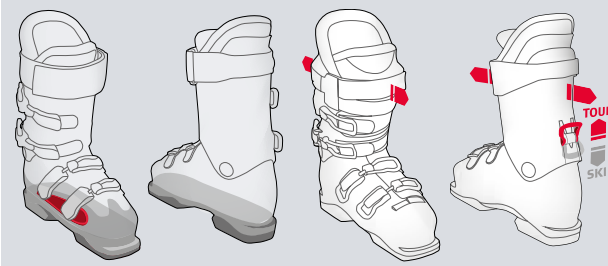

TRACKER

The highest performance freeride boot in the world. The Tracker will truly take you wherever you want to go, and let you rip the descent when you get there.

TRACKER DNA

-  1-COMPONENT SHELL
-  98 MM NARROW FIT + LIVE FIT PERFORMANCE
-  1 MM OFFSET SHELL
-  0° SHELL ROTATION
-  FORWARD LEAN ANGLE 16-18°

► LIVE FIT PERFORMANCE

A Live Fit zone is purposefully placed on the lateral side to eliminate common "hot spots", while the medial side of the boot remains solid for maximum power transfer and edge grip.

► ENDURO CHASSIS

We've taken our podium-proven race geometry and combined it with real all mountain traction. Our race geometry gives the all mountain skier the confidence to attack steeper, more aggressive terrain than ever before and our Ridge Walker Sole made with genuine Skywalk rubber provides superb traction all over the mountain.

► POWER CONTROL RELEASE

Release the cuff from the lower shell and walk and tour in the backcountry with ease. Simply return the lever back to the ski position for 100% freeride power on the descent. Allows for 20° of total range of movement (18° Final Forward Position, -2° Final Rearward Position).

► RECCO EQUIPPED

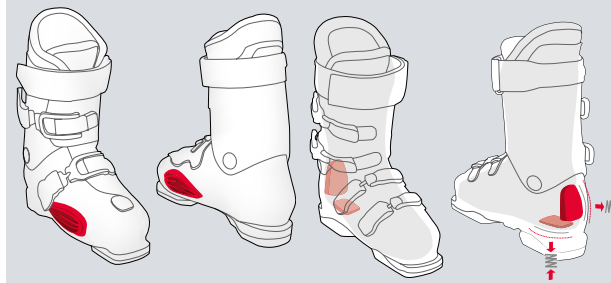

OVERLOAD

The Overload offers a relaxed fit, relaxed geometry, and even more shock absorption to soak up the harshest landings.

OVERLOAD DNA

-  2-COMPONENT SHELL WITH LIVE FIT INSERTS
-  102 MM WIDE FIT + LIVE FIT
-  1 MM OFFSET SHELL
-  3° SHELL ROTATION
-  FORWARD LEAN ANGLE 15°

► BLOW OUT ZONES

Medial and lateral Live Fit zones allow the foot to naturally expand during harsh landings, maximizing comfort and shock absorption.

► SHOCKILLA 3-D HEEL

10mm of super soft silicon protect the back of the heel on switch landings and a new EVA insert underneath the heel provides added damping for the big hits.

RENTAL

Our most successful, best fitting concepts available in highly durable colors, with sanitized liners, color coded sizing, and barcodes.

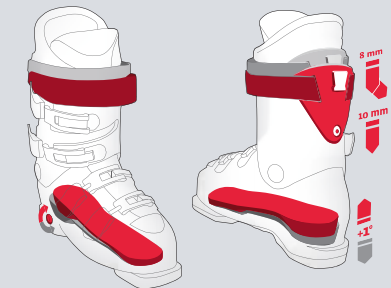

WOMEN

We have gone the extra mile to ensure a level of AnAtomic correctness and fit in our Women's Boots found nowhere else.

WOMEN DNA

- TRUE SIZE 22.0 MP
- WOMEN'S SPECIFIC CUFF HEIGHT UP TO SIZE 27.5 MP
- WOMEN'S SPECIFIC LINER CONSTRUCTION ON ALL WOMEN'S LINERS

► AFS LINER

The AnAtomic cut out and 4-way stretch materials instantly provide up to 10mm of automatic calf adaptation in our Women's Specific liners.

► AFS CUFF

The Adaptable Fit System Cuff can be easily adjusted in order to fit different calf shapes. By loosening the screw and lowering the cuff, cuff height is reduced by 10mm and circumference is enlarged by 8 mm.

► CLIMA FOAM

A unique foam construction that traps more air against the foot and creates a new level of warmth found only with Atomic.

KIDS

Our future needs the best boots today. This is why we have revamped our ultra smooth flexing Kids' boots with lower liner heights and new buckles that offer better closure and ease of handling.

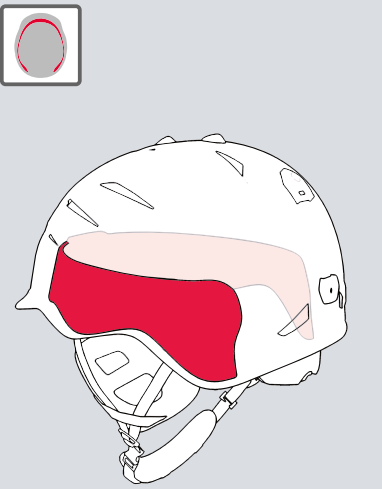

HELMETS CONCEPTS

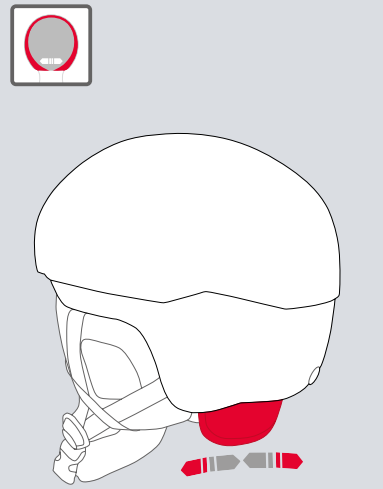

Fit. Comfort. Aesthetics. Every helmet wearer demands all three from their helmet, but everyone has their own idea as to what constitutes the best Fit, Comfort, and Aesthetics. ATOMIC's helmet range has been painstakingly tailored to each user group in order to bring the best possible Fit, greatest Comfort and amazing Aesthetics to the market.

INSTANT FIT

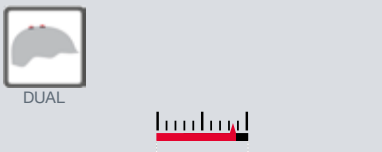

VENTILATION

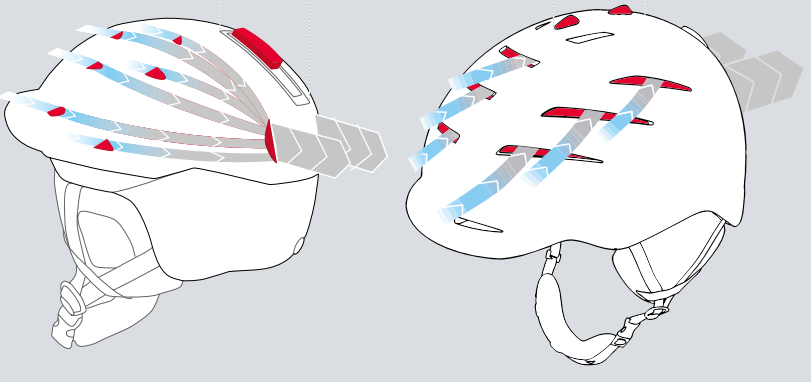

ADJUSTABLE VENTING

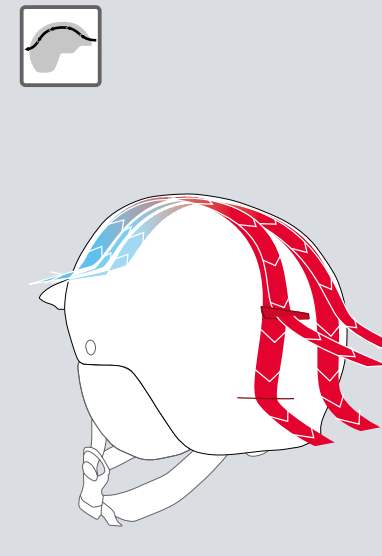

SINGLE

DUAL

PASSIVE VENTING

REDSTER

The fastest racers at the World Cup, such as Marcel Hirscher and Benni Raich, put their faith in the all-new Redster helmet.

LOW PROFILE

The all-new Redster FIS helmet features a super clean, ultra low-profile design that minimizes aerodynamic drag and maximizes speed.

INSTANT FIT

- Instantaneous fit to any shape of head
- Exceptional comfort guaranteed

RACE FIT

Our goal: to deliver the best race fit on the market. The new Redster FIS helmet combines a precise, snug fit that is comfortable all day, making this helmet second to none.

ABS HARD SHELL

- Seamless ABS shell for maximum protection
- Soft ear padding allows the wearer to hear unhindered, the natural sense of balance is maintained

PASSIVE VENTING

- Optimum temperature inside the helmet in all weathers

NOMAD

Game changer. The all-new Nomad helmet features an instantaneous custom fit, dual climate control and a low-profile design all in one helmet.

LIVE FIT

Your fit, instantly. The secret of Live Fit is the breathable PORON XRD memory foam. As soon as the skier puts on the helmet, the memory foam instantly adapts to the shape of the head, creating a custom fit and maximizing comfort. Furthermore, PORON XRD does not wear out like other helmet foams and thus ensures a longer lasting fit.

HALF ABS HARD SHELL

- Seamless ABS shell for maximum protection
- Soft ear padding allows the wearer to hear unhindered, the natural sense of balance is maintained

ADJUSTABLE VENTING - DUAL

- The dual-zone ventilation system of the Nomad is ultra easy to use. It allows the skier to independently control the ventilation in the front and rear of the helmet, depending on the wearer's needs.

ADAPTIVE FIT

- Adaptive Fit system for an individually adjustable fit

TROOP

From the shortest line between the slalom poles to the virgin expanses of the backcountry: the TROOP is an all-rounder for any terrain – and a favorite with both freeski pro Chris Benchetler and racer Marcel Hirscher.

INSTANT FIT

- Instantaneous fit to any shape of head
- Exceptional comfort guaranteed

HALF ABS HARD SHELL

- Seamless ABS shell for maximum protection
- Soft ear padding allows the wearer to hear unhindered, the natural sense of balance is maintained

PASSIVE VENTING

- Optimum temperature inside the helmet in all weathers

XEED RITUAL / XEED

All of the XEED helmets have one thing in common: each one is perfect for any type of all-mountain adventure.

ADAPTIVE FIT

- Adaptive Fit system for an individually adjustable fit

HYBRID SHELL

- Combination of hard shell and hard foam
- Maximum shock absorption, optimized weight

ADJUSTABLE VENTING

- Active ventilation system, individually adjustable
- Perfect temperature in any situation, from sweaty ascents to chilly lift rides
