

Skis

Black Diamond skis are built to break down boundaries. Two series cover all terrain with a balance of efficiency and power from first-tram deep powder shots to ultralight, fast tours over technical terrain. So whether you're looking for a powerful big mountain charger, a nimble cruiser or to gain a vertical advantage, we feel that skiing is still all about the down and our new performance levels will take you there—whatever your style.

POWER

Skis built to deliver full power, while still being light enough to break trail.

Megawatt NEW

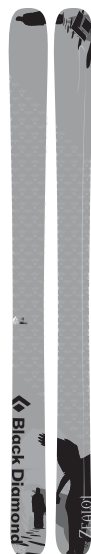

115007

A new breed of powder specialist that will take your soft snow performance to a totally new level.

FEATURES

- Long rocker tip, 125 mm wide underfoot and zero camber for user-friendly, high-performance powder skiing
- Standard underfoot sidecut for predictable curves when the powder disappears
- Formula One Technology™ with integrated 3D dampening
- CNC-machined solid wood core wrapped in Torsion Box construction

length 188 cm

Zealot

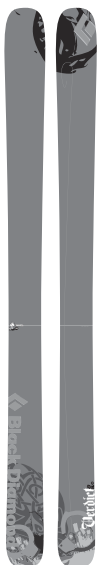

115010

Big mountain ripper for hard-charging fanatics who want a wide ride.

FEATURES

- Formula One Technology with integrated 3D dampening
- CNC-machined solid wood core wrapped in Torsion Box construction
- Built for powder but comfortable on the hardpack

length 182, 192 cm

Verdict

115015

Guilty of carving trenches on hardpack while retaining innocence in deep powder. Race inspired.

FEATURES

- Formula One Technology with integrated 3D dampening
- CNC-machined solid wood core wrapped in Torsion Box construction
- Built for the fat-ski aficionado with a race/power background

length 170, 180, 190 cm

Kilowatt

115020

A friendly fat ski with a generous sidecut that will energize all skiers looking for a wider platform.

FEATURES

- Formula One Technology with integrated 3D dampening
- CNC-machined solid wood core wrapped in Torsion Box construction
- A great blend of the Verdict's wide platform and the Havoc's ease of turning

length 155, 165, 175, 185 cm

Havoc

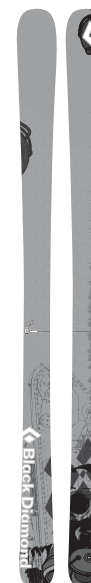

115025

Fat enough for powder and crud but not shy in tight lines or the park, the Havoc does it all.

FEATURES

- Dual Torsion Bow™ construction with integrated 3D dampening
- CNC-machined solid wood core wrapped in Torsion Box construction
- A super turny and hard-carving ski suitable for all conditions

length 165, 175, 185 cm

Machine

115030

The classic all-rounder for touring and performance. The best pure carving ski in the Black Diamond line for mountain arcing or tight, technical lines.

FEATURES

- Dual Torsion Bow construction with integrated 3D dampening
- CNC-machined wood core wrapped in Torsion Box construction
- Sidecut and flex optimized for turning like a machine

length 158, 166, 174, 182 cm

POWER, CONTINUED

Joule

115035

A women's version of the Kilowatt with the same powerful torsional stiffness but with a slightly softer longitudinal flex.

FEATURES

- ♦ Formula One Technology with integrated 3D dampening
- ♦ CNC-machined solid wood core wrapped in Torsion Box construction
- ♦ More predictable and gentle than the straighter and "surfier" cut of the Verdict

length 155, 165, 175 cm

Velvet

115040

A bit more narrow waisted women's all-rounder that is dimensionally similar to the Havoc. A solid and stable all-mountain carver.

FEATURES

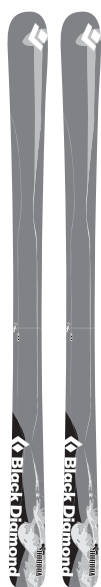

- ♦ Dual Torsion Bow construction with integrated 3D dampening
- ♦ CNC-machined solid wood core wrapped in Torsion Box construction
- ♦ A super turny and hard-carving ski suitable for ice, crud and, at 88 mm under foot, good in powder, too

length 165, 175 cm

EFFICIENT

Skis focused on efficiency, with enough power to maximize performance on the down.

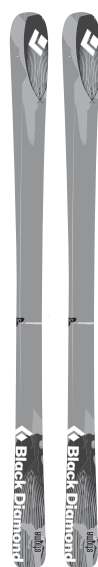

Voodoo
115045

A lightweight and more relaxed version of the Havoc requiring less energy input for great all-around performance. This is the long-distance powder hunter's ski of choice.

FEATURES

- ♦ Lightweight Dual Torsion Bow construction
- ♦ CNC-machined wood core
- ♦ The widest of our super lights, the Voodoo draws from our Power Series but with a new level of performance for a lightweight ski

length 165, 175, 185 cm

Stigma
115050

Light and spry for technical descents, dawn patrollers and hot lappers, the Stigma balances low weight for ascent and turnability for the down.

FEATURES

- ♦ Dual Torsion Bow construction
- ♦ CNC-machined wood core
- ♦ Able to handle all conditions both on the up and the down

length 158, 166, 174, 182 cm

Guru NEW
115053

Classic shape and sidecut of an AT ski with modern stability and performance.

FEATURES

- ♦ New Dual Torsion Bow construction
- ♦ CNC-machined wood core
- ♦ A performance carver for all conditions that has more sidecut and is skinnier than the Stigma

length 162, 170, 178 cm

Cult
115055

The lightest, most nimble ski in the line, the Cult is designed for long-range technical rando pursuits, and for skiers who favor efficiency but don't want the ski to get chatterly or skittish on the descent.

FEATURES

- ♦ Ultralight tapered design for minimal swing weight
- ♦ CNC-machined wood core
- ♦ The lightest ski in our line is uncompromising for speed ascents and downhill performance

length 157, 167, 177 cm
