RACE CATALOGUE
2011/12

elan

WWW.ELANSPTS.COM

RACE THE WORLD MORE. You can imagine it's impossible to fool skiers at the top of the food chain. Those boys and girls competing on the FIS World Cup circuit do know a thing or two about skiing and skis. If they were a bit sceptical when we handed them the racing skis with WaveFlex profile, their scepticism was wiped away right after their first test runs. After a season of good results, we can say WaveFlex truly is proof tested in the F1 of the skiing world.

1. WAVEFLEX TECHNOLOGY

The WaveFlex waved profile brings together a harmonious flex pattern with stiff torsional stability. Combined, they ensure easier turn initiation, high speed stability and improved edge grip.

4. RST SIDEWALL

The vertical sidewalls deliver optimum edge hold from tip-to-tail and a direct transfer of power to the edges at high speed.

2. LAMINATED WOODCORE

Specifically shaped for each model and size, Elan's extremely durable and responsive tip-to-tail laminated woodcore delivers supreme edge-to-edge power transmission.

5. DUAL TI (DUAL TITANIUM)

Dual TI empowers the skis with enhanced edge control in all snow conditions, ensures a harmonious flex pattern and brings superior responsiveness.

3. WORLD CUP RACE PLATE

The bi-density plate is built to perform: dual plate layout, 14 mm height, unique fixation to the ski all ensure better torsional stability, smooth free-flex and excellent power transition.

6. SL RACE TIP PROTECTOR

The asymmetrical tip protector is "gate impact" proven. No more excuses!

NO SPEEDING TICKETS, PLEASE!

Kitzbuhel's downhill is a classic in the FIS World Cup calendar. The Streif is definitely a mean place to be. Imagine starting straight down in the Startschuss, reaching speeds as high as 100 km/h in 8 seconds, racing towards the famous Mausefalle (mousetrap), jumping 50 to 80 meters and landing just in time to fight tremendous forces in the compression, when speeding at 120 km/h. And this is just the first 30 seconds! Ask Andrej Šporn, the man of the day on the 2010 edition. Yes he did finish second, but with the fastest speed of the race, using his trusted Elan World Cup Racing skis.
