PURE SKI MOUNTAINEERING

For 90 years our hearts have beaten in and for the mountains – our everlasting passion for the mountains has inspired our products from the beginning. From our early years as a downhill ski manufacturer to today's specialization as a ski touring expert, three irrefutable principles are central to our family business: quality, innovation and love of the Alpine lifestyle.

Our 2014/15 collection springs directly from the pulse of the mountains: we are very proud of our incredible Y[wai]-series skis and many other exceptional Ski Mountaineering products. We look forward to another 90 years of unforgettable mountain experiences with those who share our passion for the mountains and the Alpine lifestyle.

collection 2014/15

Whatever the terrain, whatever the snow, whatever the style – our wide range of products offers every ski tourer the right solution.

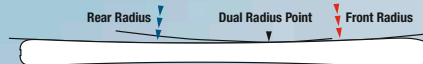

Die-Cut Running Surface

Graphite race bases create the speed. The Chimera's graphite sintered bases with die-cut inlays are extremely durable and ideally tuned for optimal riding and gliding.

Multi-Radius

The pressure and load direction determine the turning radius. Our multi-radius concept allows creation of variable short and long radii on a totally individual basis.

Rocker

All Hagan ski models are equipped with tip and tail rocker. The rocker length varies amongst models between 250 and 390mm front and 90 to 120mm. Optimized for the ascent, the "tour" rocker height is between 3 and 4mm.

Elliptical Front Ski

We designed an elliptical shape to keep the oversized shovel perfectly manageable in any snow condition and all types of terrain. The elliptical shape surfs untracked powder perfectly, but also carves through breakable crust and difficult conditions with control and precision.

Diamond Edge Cap

The diamond shaped top cap ensures perfect power transmission and reduces swing weight.

Wide Diamond Tip

In combination with the touring rocker, the broad, angular and precise blade design ensures optimal lift and flotation.

Carbon Tip Stabilizer

Hagan's innovative and proprietary carbon fiber ski tip increases stability and greatly reduces vibration. While performance is improved in all conditions, you will especially notice the improved control and smoother ride on hard chattery surfaces.

Y[wai]-series

chimera series

tour all mountain

tour professional

tour special

Y[wai] series

The Y[wai]-series is the culmination of 90 years of experience and ski development. Introduced last year with the incredibly successful Y[wai]-flow, the Y concept expands into four models this season. The Y[wai]-series models share the distinctive Y[wai]-shape, which ensures that the shovel floats on the snow – whether powder, crud or spring corn.

Smoothly progressive flex and sophisticated torsion properties create smooth turns in all terrain. All Hagan Y[wai]-series skis have paulownia wood cores, making them some of the lightest skis on the planet. Lightness is nice, reliability is paramount. Our new, innovative Y[wai]-series skis will be your faithful, trustworthy and dependable travel companions for years to come.

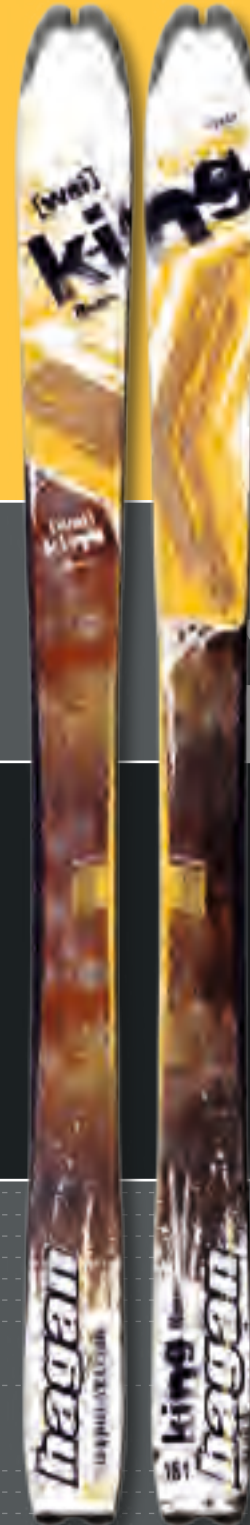

Y[wai]-boost

Those who climb mountains for 3–4 hours deserve to be rewarded with awesome descents. The Y[wai]-boost's Y shape rewards that effort. Whether powder, corn, breakable crust or inconsistent, unconsolidated snow, the [wai]-boost blasts through everything that stands in its path. The wide elliptical-shovel ensures supple buoyancy and perfect maneuverability no matter how challenging the slope. The Carbon Tip Stabilizer reduces shovel vibration and in combination with the ABS sidewall construction creates a smooth, richly decadent ride. The paulownia wood core contributes to a weight of only 1380 grams for dimensions of 132–97–113, providing a vigorous boost in the ascent!

Sidecut*	132 – 97 – 113
Weight*	1380
Sizes	170, 178*, 186
Rocker	v= 350 h= 150
Core	Paulownia wood
Multiradius*	17 – 19 – 22
Features	Diamond-Sidewall Elliptical Frontski Carbon Tip Stabilizer
Construction	Carbon top layer Paulownia Lightcore ABS-Sidewall Carbon lower layer
Base	Die-Cut-Graphite-Base
Target group	Tour Freeride

Y[wai]-king

The uncompromising Tour Freerider for big mountain skiers for whom downhill performance is paramount. Due to its lightweight construction, the Y[wai]-king is an enjoyable climber even with its width.

Sidecut*	140 – 107 – 122
Weight*	1580
Sizes	172, 181*, 190
Rocker	v= 390 h= 150

CHIMERA SKIS

Chimera is fantasy, illusion and the name for the most successful touring ski line so far from Hagan. "Light – elegant – mysterious" is the slogan. The Chimera series is made with the most modern ski construction techniques and highest quality materials. The Chimeras are at first glance elegant, understated and simple. A closer look reveals the subtle design and graphical elements.

Each of the three Chimera models has its own character to satisfy the demands of the entire range of ski touring. Each model has a unique sidecut matched with a perfectly tuned ratio of flex and torsional stiffness for a discrete sporting focus in the mountain. The Chimera series harnesses years of development work based on feedback by dedicated, insightful ski tourers who demand above else absolute reliability — in performance and durability. There is a reason Hagan skis inspire confidence — our quality has earned it.

chimera

1.1

3.1

2.1

The 122-83-107 geometry is the ideal ski shape. The multi-radius sidecut adapts to all terrain and snow conditions for a high degree of confidence on every descent. The 3D surface refines the perfectly progressive flex in the tip and tail while simultaneously increasing the torsional stiffness. The 330mm long rocker ensures effortless buoyancy and perfect controllability. Weighing just over 1,200 grams, the Chimera 2.1 enables easy climbing on or off piste.

The descent-oriented 1.1 is the widest ski in the Chimera Series. The stiffer, more robustly tuned flex curve provides perfect power transmission and enables faster, more aggressive skiing.

The narrowest Chimera inherits the sidecut of the highly esteemed Dragon with a lower, optimized weight and slightly stiffer flex curve. The 3.1 is perfectly suited for dual use on the slopes and in high alpine terrain.

Sidecut*	122 – 83 – 107
Weight*	1250

the jack

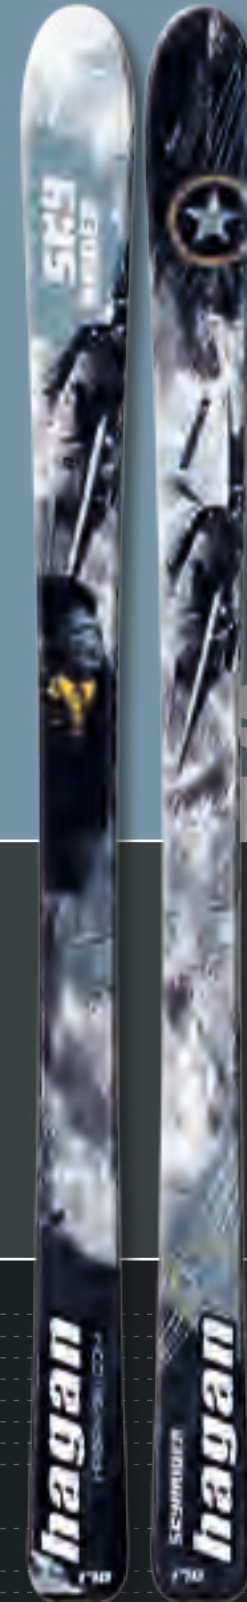

The Jack is the rebel in the Hagan range. When it is time to get down to business and weight is not the first priority, then you can really break out with The Jack. The robust poplar core and rigid ABS sidewalls provide control and stability for high speed powder turns. The wide and long rocker shovel keeps The Jack skimming the surface. The Jack is not one to be locked up. The Jack isn't intimidated by harder surfaces either. The short effective edge length bites deeply and sharply into hard snow surfaces. The Jacks fierce facial expression makes it unmistakably clear that nobody and nothing will stop it. Need to break loose? Bust out with The Jack.

Sidecut* 124 – 93 – 114
 Weight* 1600
 Sizes 170, 177*, 184

 Base High-speed Graphite base
 Target group Tour Allmountain

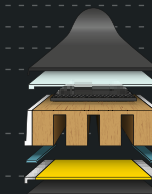

sky raider

A magnificent classic in the Hagan collection. The Skyraider, with its 83mm waist, is an aerial acrobat in all types of terrain. The multi-radius concept sidecut, tip and tail rocker and ABS sidewall construction provide brilliant ski performance. Need a trusty wingman? The Skyraider is the ace up your sleeve.

Sidecut* 122 – 83 – 107
 Weight* 1430
 Sizes 146, 154, 162, 170*, 178

X-race

hagan

© Stephan Manter

The Hagan race team is an integral part of our product testing and development. Subjecting our test products to their tough use shows us how to reduce every last unnecessary gram while not losing focus on durability, safety and performance. The X-Race is the result of years of tireless development work. At only 730 grams, it is one of the lightest and most durable race skis in existence, and the best handling.

Sidecut*	97 – 65 – 80
Weight*	730
Sizes	152, 163*
Rocker	250
Core	Paulownia wood
Multiradius*	25 – 26 – 28
Features	Diamond Edge Cap Wide Diamond Tip
Construction	Carbon top layer Paulownia light-core Carbon lower layer
Base	Nano high-speed race base stone grinded
Target group	Tour Race

ascent

The Ascent is the more robust brother of the X-Race. The Ascent has a stiffer flex and higher stability making it a perfect training ski, and the first choice race ski, for larger, more powerful ski mountaineers.

Sidecut*	97 – 65 – 80
Weight*	830

xtrace

The X-Trace is our 68 mm specialty ski with steel edges for cross-country skiing and low angle backcountry tours. The integrated scales provide excellent climbing traction. The wood core construction makes the ski dynamic and responsive for extended ventures. Combined with the X-Trace binding, which is compatible with virtually all footwear, the X-Trace is a true tool for work and play in the great outdoors.

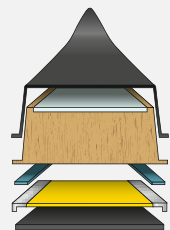

TRACE PIVOT Binding

The Pivot improves on the proven X-Trace binding. A joint was added to the base plate, making the binding even more comfortable to use. The wider and taller toe increases stability and control - and is nearly universally compatible with all boots.

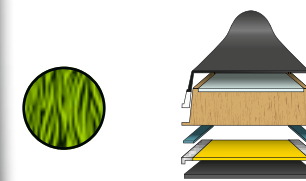

Sidecut*	68 - 60 - 65
Weight*	1000

bindings

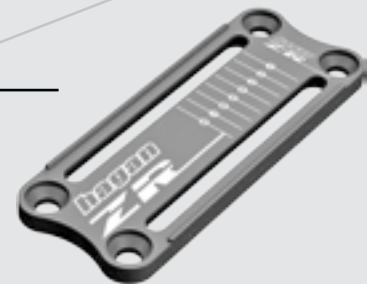

ZR

The Hagan ZR Race Binding is the logical complement to our lightest skis

Perfectly matched to the X-Race and also to Hagan's other lightweight models, the ZR weighs only 117 grams including integrated crampon mounts.

- Ultra light and race ready
- Weight: 117 grams
- Made from ultra light aluminium
- Semi-automatic lock system
- Integrated crampon hook

ZR Adjustment Plate

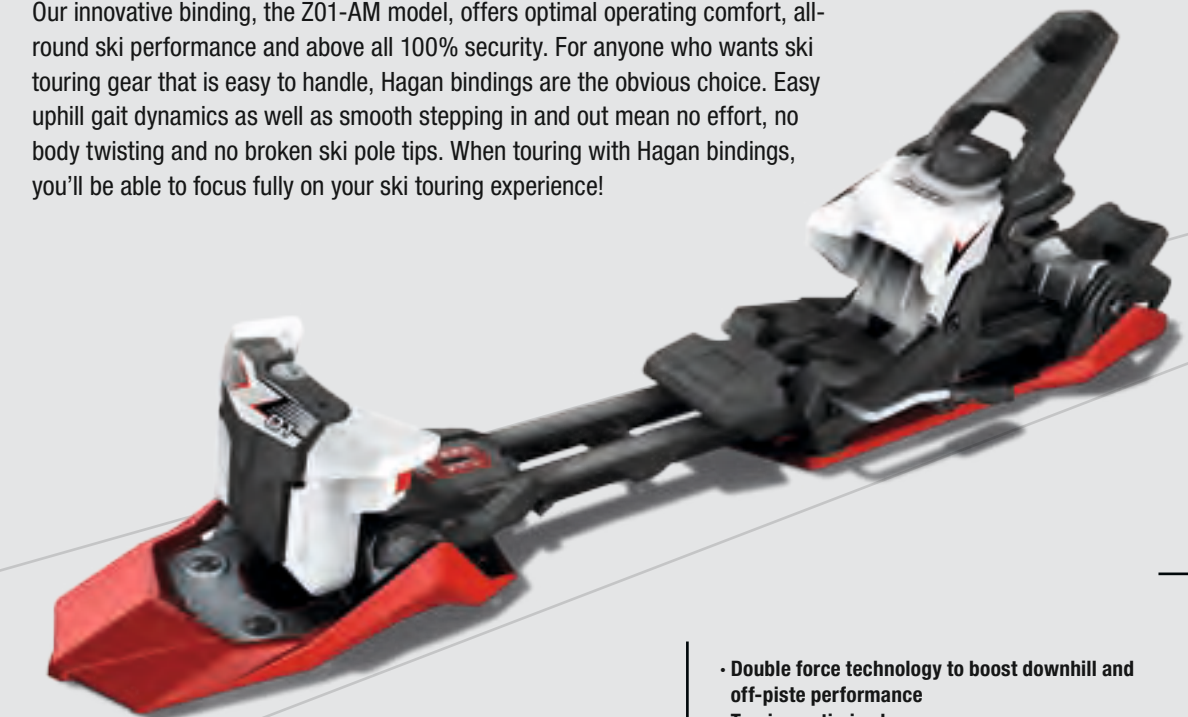

Travel: 30mm
Weight: 20 grams

Z01

The new Z01 All Mountain for advanced off-piste skiers

Our innovative binding, the Z01-AM model, offers optimal operating comfort, all-round ski performance and above all 100% security. For anyone who wants ski touring gear that is easy to handle, Hagan bindings are the obvious choice. Easy uphill gait dynamics as well as smooth stepping in and out mean no effort, no body twisting and no broken ski pole tips. When touring with Hagan bindings, you'll be able to focus fully on your ski touring experience!

- Double force technology to boost downhill and off-piste performance
- Torsion optimized
- Frame module for direct force transmission

Technical data:
ISO/DIN: 4 - 12
weight: 1,830 g/pair
sizes: S / M / L
TÜV tested

bindings

accessories

Z02

Z02 Tour for the ambitious tourer

- Brilliantly nuanced walking and climbing properties
- Greatly improved ease of use
- Top downhill performance
- Double force technology

Technical data: ISO/DIN: 3 - 10
weight: 1,680 g/pair
sizes: S / M / L
TÜV tested

hagan super grip

Flexible crampon

Providing enormously high grip and hold in extremely difficult terrain conditions.

Material: stainless steel
up to a 100 mm ski width

Crampons

For safe ascents in steep and hard packed terrain.

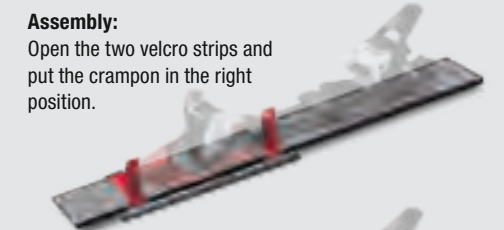

Available widths: 85, 100, 115 mm
Material: Titanal

Ski brake

An 87 mm ski brake is included with the Z01. 97, 107 and 115 mm width.

Ski brakes are available as accessories.

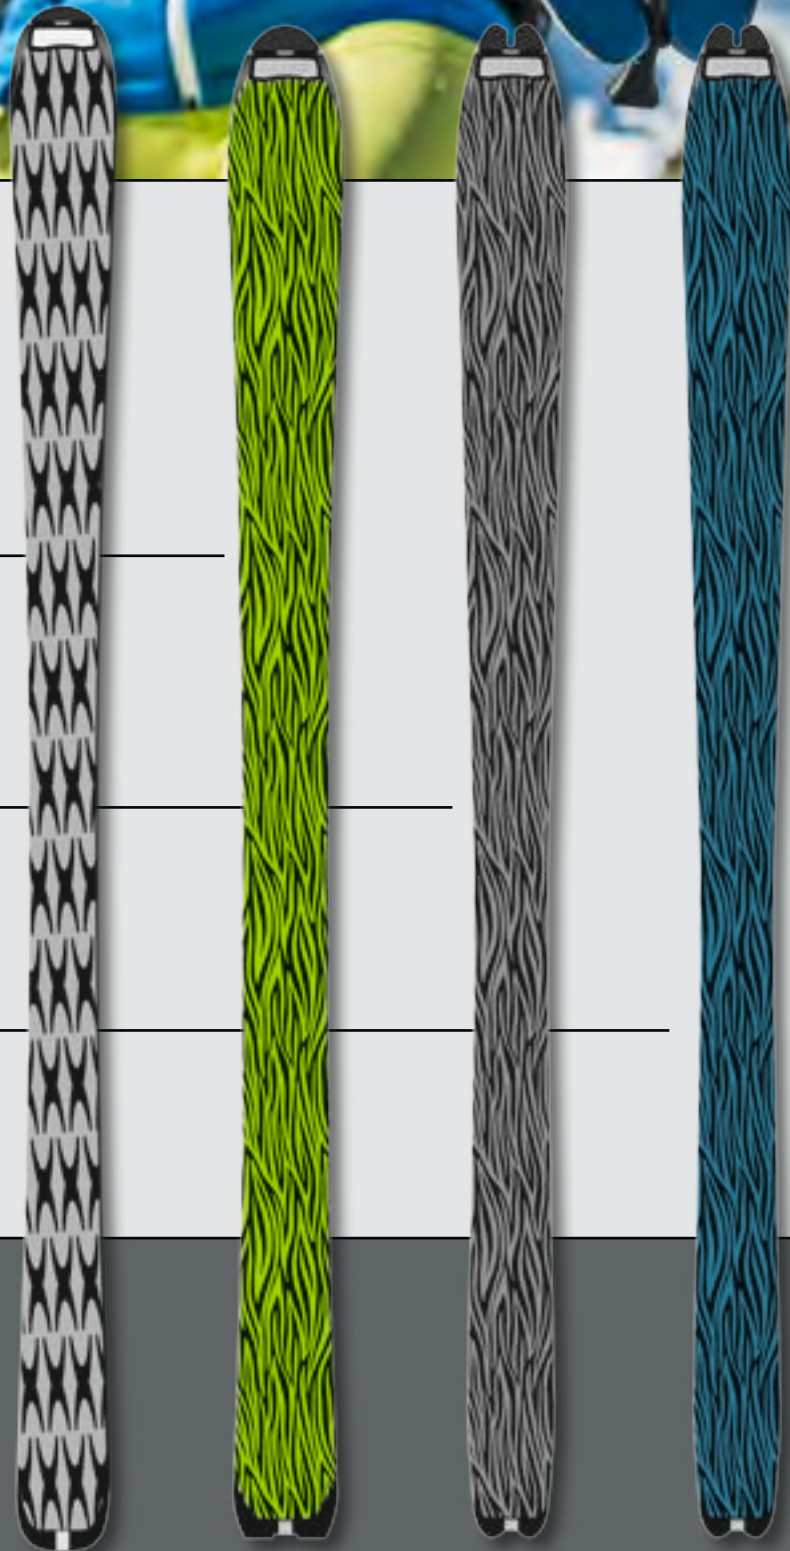

Assembly:
Open the two velcro strips and put the crampon in the right position.

Tighten the two velcro strips.

AND AWAY YOU GO!

skins

Hagan touring skins exactly match each ski's sidecut minus the steel edge. They are custom tailored and tuned with mohair mixes and advanced attachment systems specifically designed for each ski model.

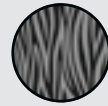

Chimera

The Chimera skins are perfectly and stylishly matched with the design of the Chimera series skis. The 70/30 mohair mix provides a perfect balance of climbing grip and fast sliding. Chimera skins are durable for long-term use. You will be using your Chimera skis often and for years. Chimera skins are the perfect match.

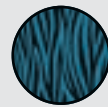

Green Tiger

The Green Tiger skins pair with our Tour All-Mountain and Special Series skis. 70% mohair provides great glide and 30% nylon improves durability and climbing performance for audacious goals.

Silver Tiger

These exceptionally fast gliding, 100% mohair climbing skins are paired with the Y[wai]-series collection and Cirrus and Cirrus Pro skis. Light skis deserve fast skins.

Blue Tiger

The fastest touring race skis need the fastest skins. The Blue Tiger is specifically designed for racing with a thin, grippy, water-resistant 100% mohair plush.

poles

Solid Rock

The high performance carbon fiber pole for high mountain pursuits where 100% reliability is a potentially life-saving requirement. The carbide-tempered steel point and ice-face tip are meant for the most demanding conditions. The titanal (titanium/aluminium alloy) Rocksleeve prevents damage to the carbon-fiber shaft from ski edges or rocks. When 100% operational capability is required, lean on the Solid Rock.

packed size: 110 cm
max. length: 150 cm

Features:

- Expedition short grip
- Padded strap
- G'Reptile grip zone
- 2 parts: upper section:** Alu 7075-T6, Ø 16 mm
- Lower section:** carbon, Ø 14 mm
- Titanal Rocksleeve
- Power Lock II system
- Ice-slope basket
- Ice-slope tip

Chimera

The Chimera is the two-piece classic in the Hagan ski pole collection. The Chimera pole features a titanal upper shaft and a carbon fiber lower shaft for a technically perfect balanced of strength, shock absorption and swing weight.

packed size: 97 cm
max. length: 140 cm

Features:

- Expedition Contour short grip
- Padded strap
- 2-section: upper part:** TITANAL .HF, Ø 16 mm
- Lower part:** carbon, Ø 14 mm
- Power Lock II system
- Ice-slope tip
- Ice-slope tungsten/carbide tip

Rapid Move

The Rapid Move robust one-piece aluminum touring pole. It is an excellent choice for ski tourers who want to quickly climb the mountains. The large, nordic-style backcountry basket swivels to match slope angle. This increases pushing power while reducing basket catch.

115 – 155 cm (in 5 cm increments)

Features:

- Expedition Foam short grip
- Padded strap
- 100 % aluminum, Ø 16/9 mm
- Speedbasket
- Ice-slope tungsten/carbide tip

Tour

The Tour Pole is an indestructible, two-piece Titanal pole with an extended grip for multiple handling positions when climbing in challenging terrain.

packed size: 85 cm
max. length: 140 cm

Features:

- Expedition grip XXL
- Padded strap
- 2 parts:** TITANAL .HF, Ø 16/14 mm
- Power Lock II system
- Vario winterbasket
- Extralong vario tungsten/carbide flex tip
