CUSTOMER SERVICE CREW

PIRATES, COWBOYS, BIKERS, SKI BUMS, FRAT BOYS, CAMPERS, ROCKERS AND THE LIST GOES ON AND ON...

Over the years, K2 has played a lot of characters to demonstrate the fun and humorous side of our brand. Throughout all of them, the antics had one thing in common: K2 is based on having FUN. It's what we do and we're serious about it. But through all the K2 shenanigans and role playing in advertising, as in life, the truth is often stranger than fiction....

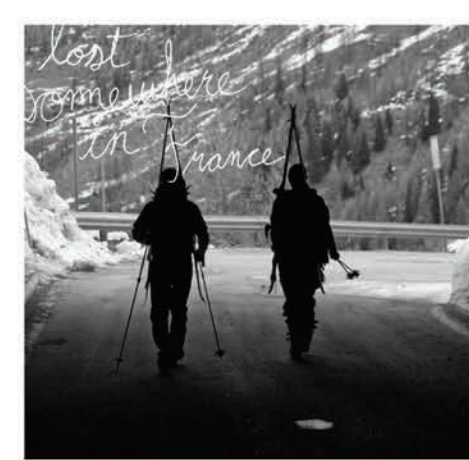

In 2015 we're looking no further than showcasing the characters that make K2 what it is – even Hollywood would be challenged to get a better casting call. It's the Team at K2 that makes the brand happen. A passionate, connected group who are the heart and soul of the company. They don't follow trends, they help set them. This team wakes up every day with the sole objective of designing and delivering products that help people have more fun on the slopes. Needless to say, the characters at K2 are serious about fun and producing the best products in the world. This next season will be no exception.

2015/16 represents the largest model line overhaul in the history of our brand. That's a big statement from a company with its share of firsts - from shaped skis, to the first women's specific program, and to rocker development, just to name a few. In 2015/16 we're launching new state-of-the-art shapes and technologies, new graphics, new names, and positioning our product to be even more customer-focused. A new brand look and feel. We have creative sales and dealer support programs that demonstrate K2's commitment to our partnerships. In essence, a new direction and a modernization of a brand that has been unconventional for more than 50 years, and we couldn't be more excited about the Serious Fun that's to come.

So on behalf of the team at K2 Skis, along with the global family of K2 Sports Associates, welcome to our 2015/16 ski collection.

Sincerely,
Tim Petrick

BoBo - OFFICE CLOWN

Dear My Beloved K2 Rig,
Do you know how ~~great~~ you make me feel when I'm behind your wheel, gliding effortlessly down the road? DAMN GOOD? REAL BIG! you are my best friend and make me feel strong.
Remember our drive down the beach and into the Pacific Ocean when your wiper blades were torn off and we couldn't see where we were going? What about that time we were driving down the interstate in 2ft of snow (unplowed) and it tore apart your grill and ripped off the license plate? Thanks for being my best friend. I love you K2 Rig!

AREA '62

K2'S FULL SERVICE DESIGN
AND PROTOTYPE FACILITY

It all starts with an idea, a concept or a vision. Area '62 is the place where those seemingly strange, odd and sometimes down right weird ideas are brought to life. It's where the impossible becomes possible. It's a space where athlete ideas turn into prototypes. A mysterious part of the building with an equally gifted, talented and ingenious group of people that call this their workspace.

SEAMLESS INTEGRATION

K2 HELMETS AND GOGGLES ARE DESIGNED TO FIT PERFECTLY TOGETHER

BUILT FROM THE GROUND UP

PINNACLE 130

Flex: 130
 Last: 97mm (LV), 100mm
 Liner: PrecisionFit Tour INTUITION® (molded/lasted)
 Sizes: 25.5, 26.5, 27.5, 28.5, 29.5, 30.5

SYNCHRO INTERLOCK

Built on the Energy Interlock design platform, the Synchro Interlock enables the simultaneous release of both an internal V-notch wedge and the Energy Interlock

INTUITION® LINER

Our premium, heat-moldable liner with the addition of Tour Flex Notches at the main hinge points for a natural flex and improved range of motion when in walk mode.

POWER BUCKLE

The K2 PowerBuckle combines the lightweight efficiency of an extra-wide powerstrap with the performance, strength, and reliability of a traditional buckle.

CUFF ALIGNMENT INDEX

Adjust +/- 2.2 degrees on medial and lateral sides for a total range of 4.4 degrees. This enables adjustments to the lower leg angle for maximum comfort and performance

INTEGRATED TECH FITTINGS

Tech fittings are fully integrated into the shell injection, instead of just the outsole pads. This design guarantees greater strength, improved torsional stiffness, durability, and makes your outsoles compatible with both DIN-alpine and Tech bindings.

REPLACEABLE OUTSOLES

Dual-injected soft and hard Thermo Plastic Urethane (TPU) increases the life of your boots and provides secure footing whether walking on rock, ice, or stairs.

INTEGRATED TECH FITTINGS

VIBRAM® ROCKER OUTSOLES

Vibram® ISO 9523 rubber touring sole upgrade available for added grip, traction and security when climbing or hiking more technical terrain. Sold separately!

E3 philosophy

ENERGY • EFFICIENT • ENGINEERING

E3= Energy Efficient Engineering- Is the principal K2 All-Mountain philosophy optimizing the power of engineering and energy through innovative products to make skiing more efficient and enjoyable in any terrain and condition.

ENERGY

ENERGY IN

Skiers absorb external energy from vibrations created by varied snow and terrain inconsistencies.

ENERGY OUT

Skiers transmit internal energy to control the speed and direction of their skis.

EFFICIENT

EFFICIENCY IN DESIGN

Creating products with efficient performance to ski longer and progress quicker.

EFFICIENCY IN CONSTRUCTION

Strategically source, apply and optimize construction for efficient performance.

EFFICIENCY IN COMPATIBILITY

Integrating products to work together for a higher level of efficiency.

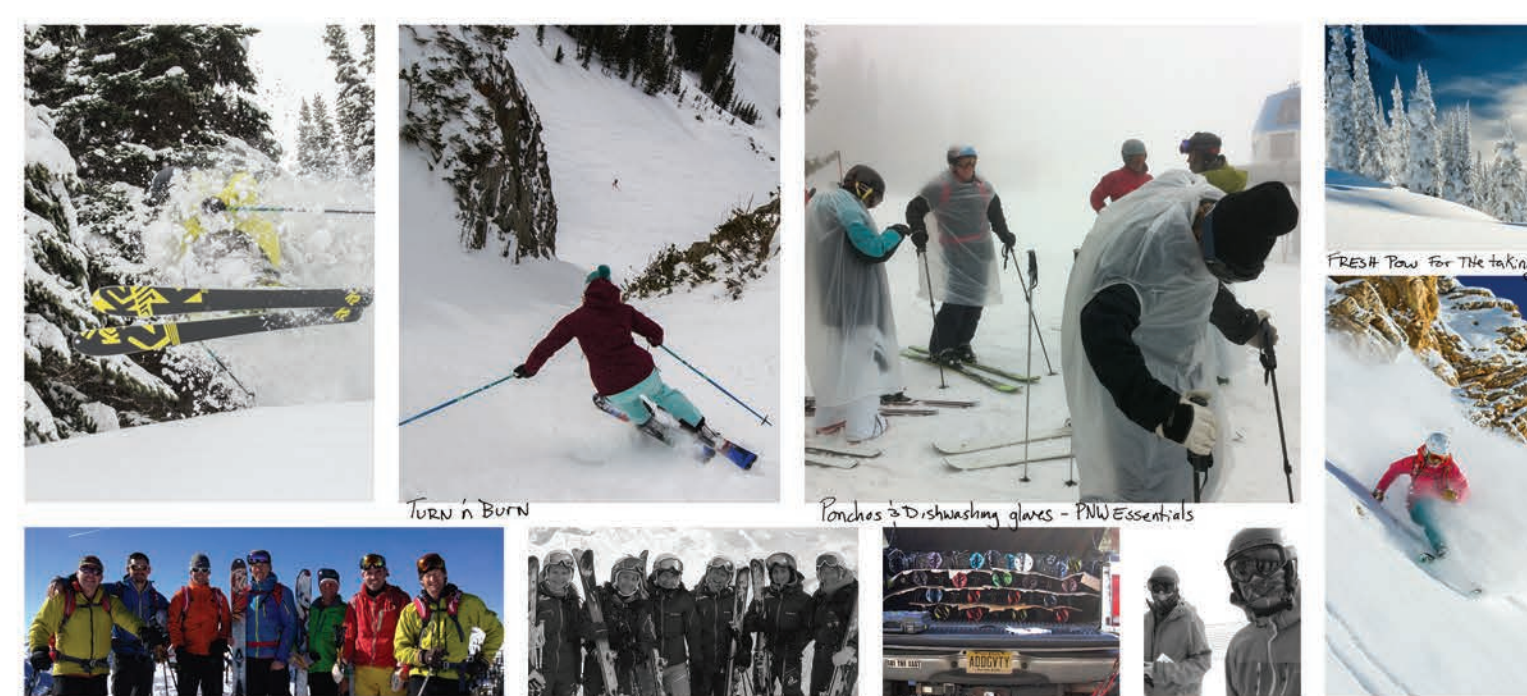

ENGINEERING

ENGINEERING ENERGY
EFFICIENT PRODUCT

Innovating lively and fun products for an enjoyable All-Mountain skiing experience.

Holding true to the K2 All-Mountain Philosophy and commitment to skiers who ski the entire mountain, K2 Skis, Boots, Helmets, Goggles, Poles, Tools and Packs are designed to work together to maximize efficiency, optimize energy and deliver performance through E3.

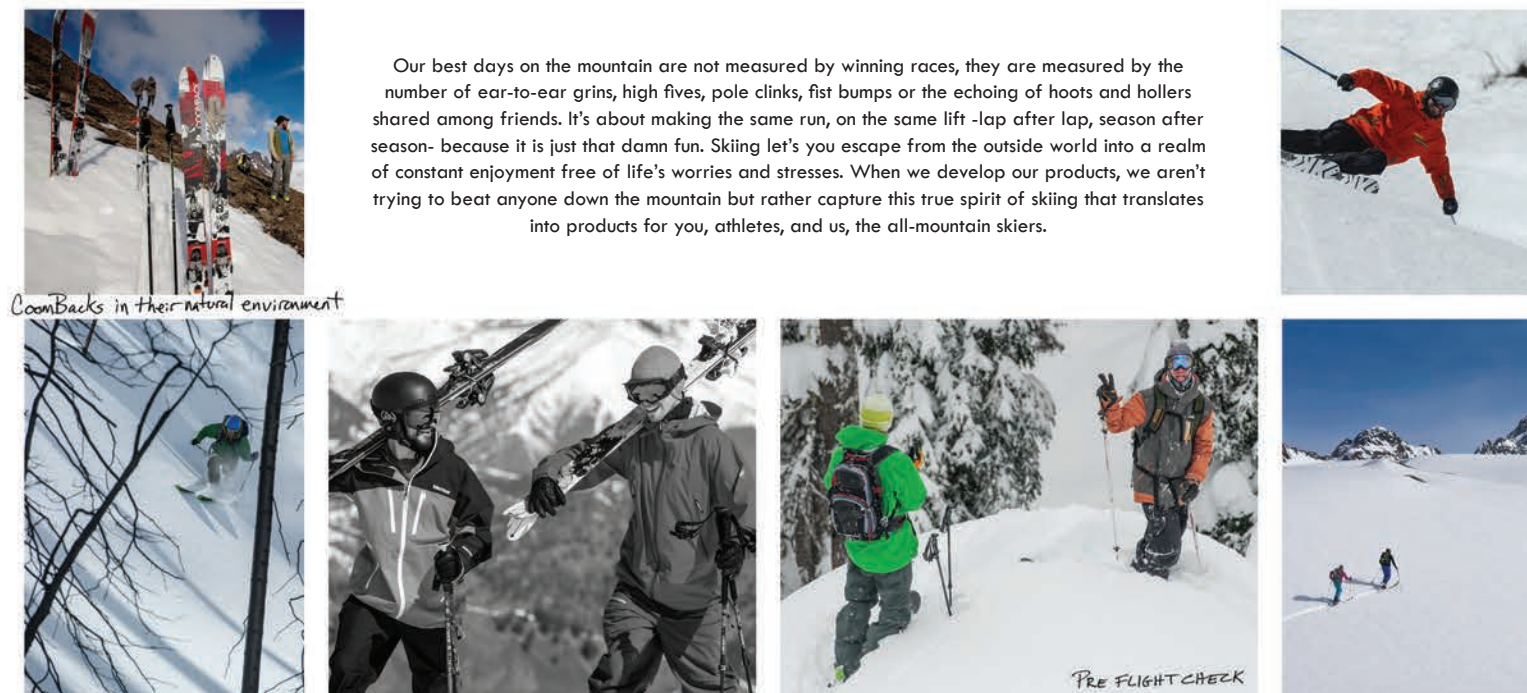

WE ARE AN ALL-MOUNTAIN COMPANY

SKIING THE ENTIRE MOUNTAIN

Our best days on the mountain are not measured by winning races, they are measured by the number of ear-to-ear grins, high fives, pole clinks, fist bumps or the echoing of hoots and hollers shared among friends. It's about making the same run, on the same lift -lap after lap, season after season- because it is just that damn fun. Skiing let's you escape from the outside world into a realm of constant enjoyment free of life's worries and stresses. When we develop our products, we aren't trying to beat anyone down the mountain but rather capture this true spirit of skiing that translates into products for you, athletes, and us, the all-mountain skiers.

SKIS

MOUNTAIN, FREESTYLE, BACKSIDE COLLECTIONS

Today's skier is better equipped than ever to ski the entire mountain. With modern advancements in ski design (wider waists, rocker, taper), boots and bindings, it's time we apply our vision and heritage to give them something more. More versatility, more performance, more ease, more enjoyment and simply more fun with less effort. We are taking everything we know and understand about the All-Mountain skier and making an efficient approach to building skis.

After a long hungry drive up to Rainier we all put our skis on and were ready to go. I said "I forgot my skis" and ended up boot packing all the way.

THE FIRST PAIR OF K2'S EVER PRODUCED SERIAL # 0001

180H0001

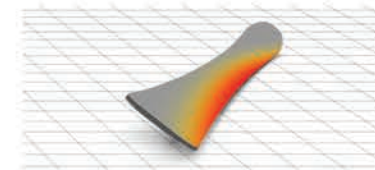

SERIOUS WHERE YOU NEED IT

FUN WHERE YOU WANT IT

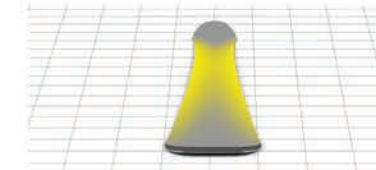

We know it doesn't take much to make skiing fun. Here at K2, we never want the fun to end, so we set out with the goal to make skiing even more enjoyable, with less effort. We approached the serious side of ski construction by strategically placing materials, technology and features where you need them for power, performance and confidence. All while retaining the fun, lively K2 feel you want, giving you effortless ease and control from bell to bell.

REVOLUTIONIZING THE ALL-MOUNTAIN EXPERIENCE

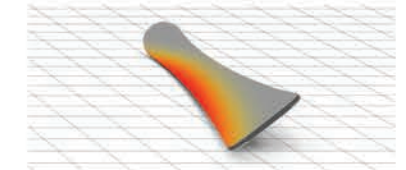

K2 Engineers studied how a skier's energy affects the performance of today's wider-waisted skis. The localized regions of applied pressure took the shape of a conic section. Utilizing the performance and pressure data, our engineers developed a more efficient All-Mountain ski design.

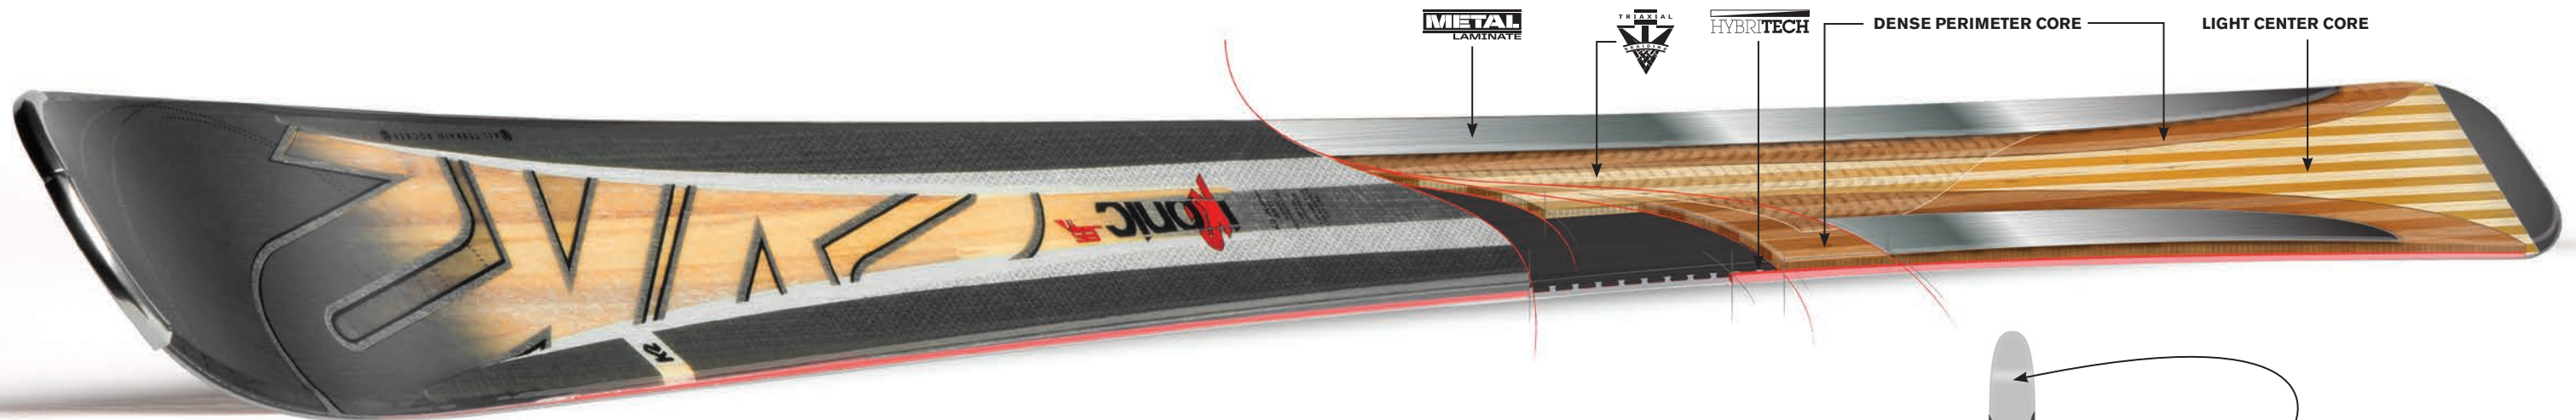

POWER IN THE TURN
The area along the perimeter edge experiences the most pressure as the ski turns.

EASE IN TRANSITIONS
The middle of the ski and extremities experience less pressure than the perimeter during transitions between turns.

POWER IN THE TURN
The area along the perimeter edge experiences the most pressure as the ski turns.

DENSE PERIMETER CORE

LIGHT CENTER CORE

Konic is a revolutionary core design that redistributes weight to the ski's perimeter providing power, strength and stability directly over the edge for performance, while reducing swing-weight from the center and extremities for added ease and control.

**STRENGTH
STABILITY
POWER**

Strategically placed materials where they're needed most to support the perimeter for increased strength, power and stability while engaging and loading turns.

**EASE
FORGIVENESS
CONTROL**

Reduced swing weight and core materials for efficiency throughout every transition, leading to an extra level of control and ease to ski with less effort.

EFFICIENCY IN CONSTRUCTION

K2 Founder, Bill Kirschner, revolutionized ski design with the introduction of fiberglass in the 1960s. 20 years later, K2 patented triaxially braided fiberglass around the wood core for increased torsional rigidity and a smooth overall flex. This technology continues to be an important component for preserving the unique K2 feel, now combined with new, more efficient construction processes for next level fun.

ALL-MOUNTAIN

K2 KONIC TECHNOLOGY

A revolutionary core design that redistributes weight to the ski's perimeter providing power, strength and stability directly over the edge, while reducing swing-weight from the center and extremities for added ease and control.

METAL LAMINATE

A metal laminate construction, denoted as "Ti" within our naming convention, consists of alternating layers of fiberglass and titanal to provide damp, accurate, unshakeable performance.

TRIAXIAL BRAIDED CORE

A K2-patented machine interlocking strands of fiberglass around a milled core for pronounced torsional strength, while retaining the lively flex patterns inherent in a wood ski.

HYBRITECH SIDEWALL

Unique blend of sidewalls underfoot for accuracy, power and performance with a cap construction in the extremities for lightweight characteristics and smooth turn initiation.

CAP CONSTRUCTION

Molding process that envelops the core and internal materials within the top layer of the ski. Cap skis are generally lighter weight and more forgiving.

K2/MARKER MXC SYSTEM

The lowest, lightest and widest high performance binding system. Metal feet extend from the pods toward the ski edge for the most accurate power transfer, edge hold and control on wider-waisted, All-Mountain skis.

BINDINGS

MXC SYSTEMS

TWINCAM (TCX)

Combining a wide Triple Pivot Elite toe with a TCX Heel for optimal power transfer on the highest performance skis.

TWINCAM (TC)

Incorporating a Triple Pivot toe with a Twin Cam Heel for great power transfer and a solid hold.

M3 SYSTEMS

M3 12 TC

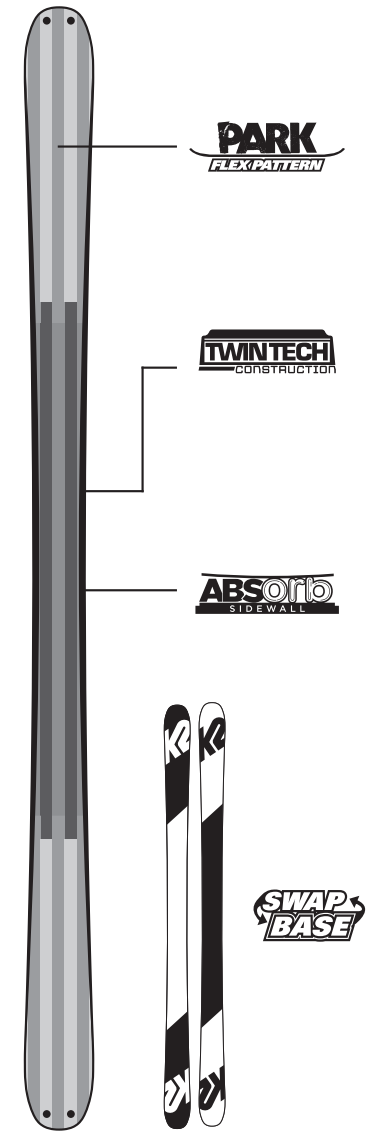

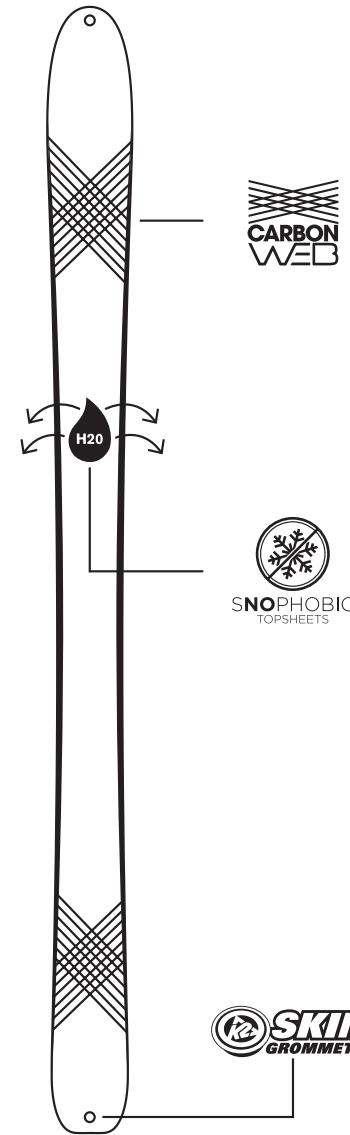

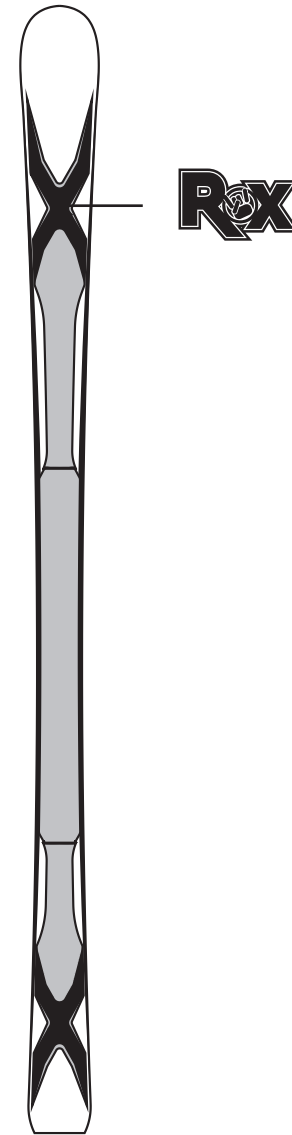

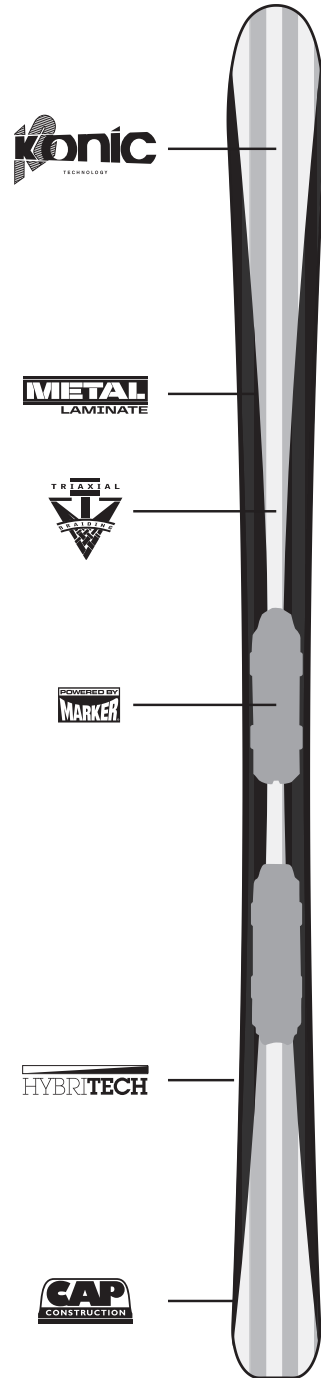

The Compact toe and Twin Cam heel provide a perfect blend of comfort and performance.

M3 10

A lightweight binding system with the Triple Pivot Compact toe and Comfort heel for great comfort and a secure feel.

QUIKLIK

Fast adjusting binding with individually sliding toe and heel pieces that feature ergonomically positioned levers in the front and rear for easy adjustments, even when boot is clicked into the binding. The bigger sole length and no-scratch scale enhances durability and readability.

PRECISION PISTE

ROX TECHNOLOGY

A raised X-shaped Mod structure reinforced with a carbon web for increased torsional rigidity for greater edge hold and grip without changing the original flex and working with the rocker profile for effortless initiation.

MXCELL

The revolutionary XCell Piston Technology toe piece keeps the boot centered during quick jolts and provides more precision and control in the centered position for increased power transmission.

BACKSIDE

CARBON WEB

Carbon weave laid at precise angles to retain a lightweight construction but add another level of torsional rigidity for higher performance.

SNOPHOBIC TOP SHEET

Snow-repellent, hydrophobic top sheet to keep snow off the top sheet during uphill climbing.

SKIN GROMMETS

Fully removable plug to accommodate K2's pre-cut skins with a Z-clip skin attachment and can be used with K2 shovels to build a rescue sled.

FREESTYLE

PARK FLEX PATTERN

Symmetrical flex pattern for presses, ollies and butters.

ABSORB SIDEWALLS

Construction sandwiching a urethane layer between ABS for shock absorption, lessening the impact of harsh landings.

TWINTTECH SIDEWALL

A durable sidewall construction used on twin tip skis that makes the top sheet more resistant to ski vs. ski impact damage.

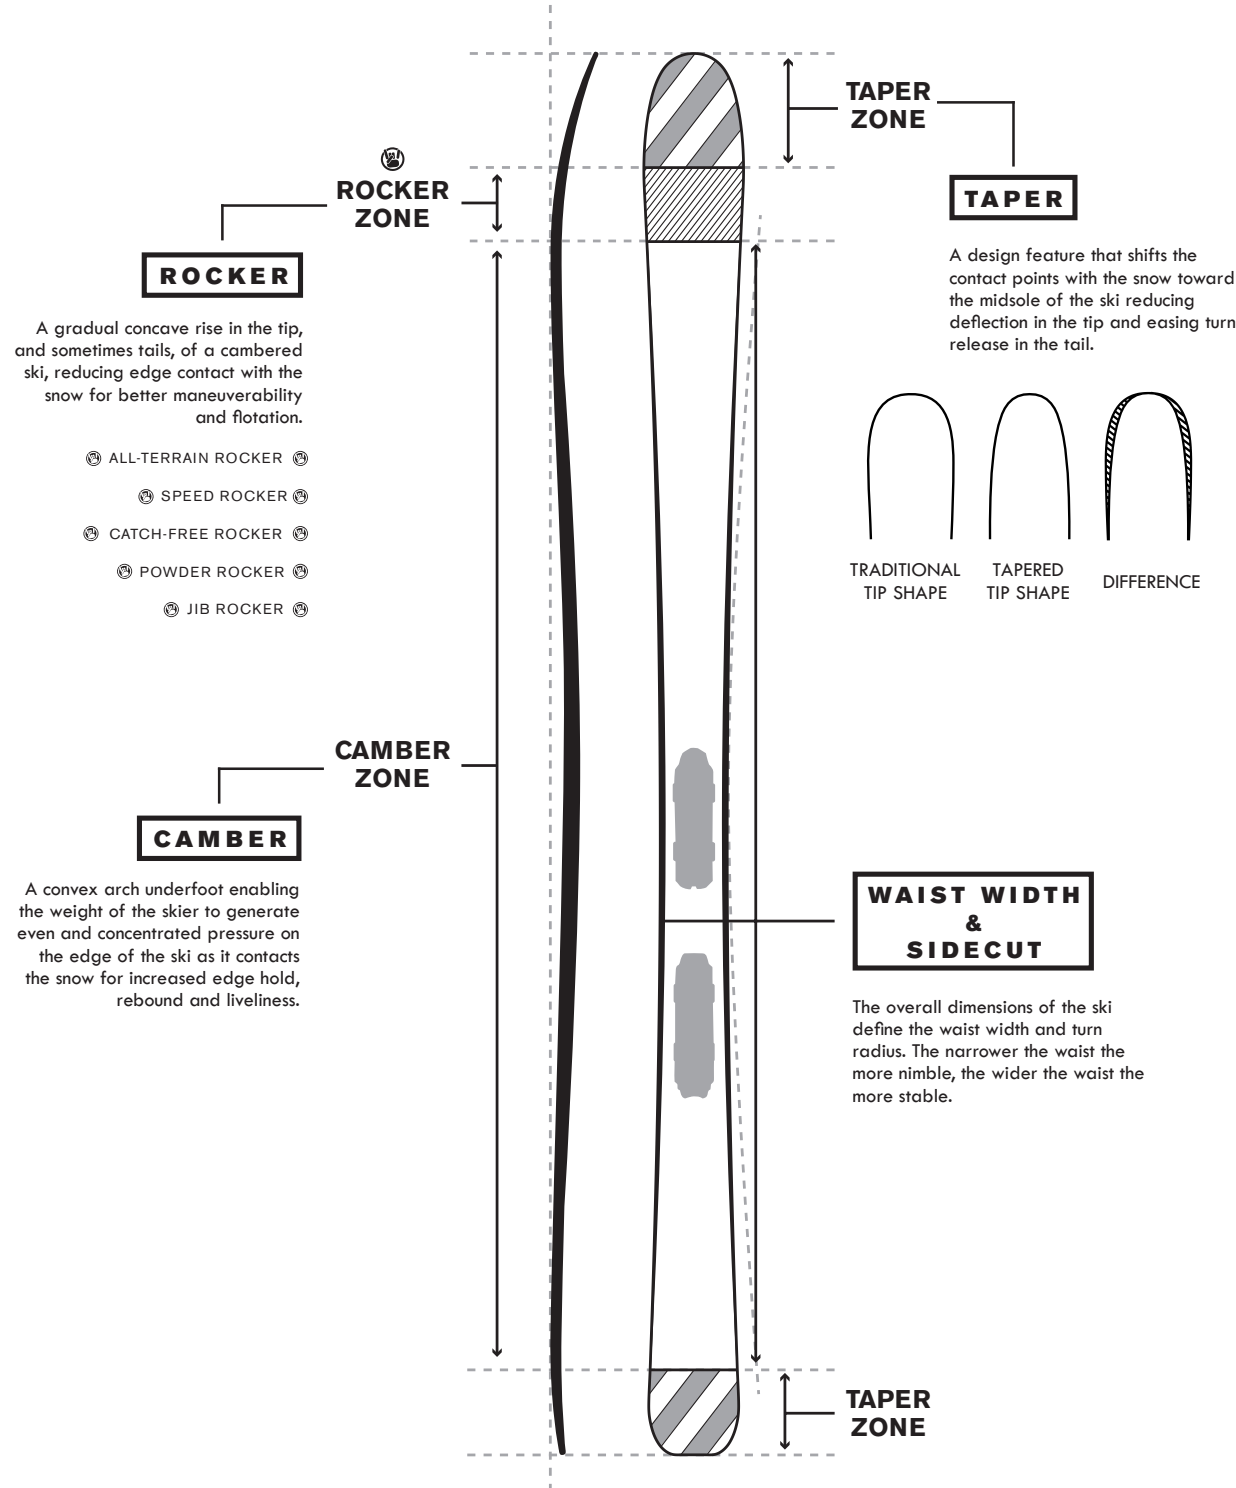

SWAP BASE

Two different color ways on the base to keep you unique from your friends.

EFFICIENCY IN DESIGN

Ingenious, revolutionizing ideas are the ones that challenge convention. The creative legend, Shane McConkey, had a vision for reverse camber (Rocker in the profile) and reverse sidecut (taper in the shape) beyond his years. What started out initially as a powder project, led to the discovery of endless shape and profile variations for all different snow conditions and skier types.

BASELINE 2.0

INTEGRATION OF PROFILE AND SHAPE

By designing a ski's PROFILE (rocker and camber) to work in combination with its overall SHAPE (top shape and sidecut) K2's engineers are able to create skis specifically targeted for a desired type of terrain, ability level, snow condition and even skiing style. Every category has a unique Baseline 2.0.

PROFILE SHAPE

FOREBODY

PROFILE

The varied amount of **rocker** and rise in the tip affect the skis' predictability, float and versatility.

SHAPE

Tip width and **taper** depth affect turn initiation and minimize deflection in variable conditions.

BENEFITS

EASE OF TURN INITIATION

MIDBODY

PROFILE

The degree of **camber** underfoot influences the liveliness of the ski.

SHAPE

The depth of **sidecut and waist width** defines the intended use in specific conditions.

DESIRED HOLD & STABILITY

TAIL

PROFILE

The presence or absence of **rocker** in the tail affects the ease of release or hold while exiting a turn.

SHAPE

Shape of the tail and **taper** depth affect exiting each turn.

STYLE OF TURN RELEASE

MODEL LINE MATRIX

MEN'S COLLECTION

Our All-Mountain philosophy focuses on building versatile skis designed to encounter a variety of conditions and terrain. The Mountain Collection is at the heart of this philosophy, offering skiers more options that match their individual style and where they ski on the mountain.

ALL-MOUNTAIN

K2's unconventional wisdom, bold decisions and revolutionary design in product development has defined the All-Mountain Category. This category has created legendary game-changing skis such as: the 5500, a high performance recreational ski, the K2 Four, the first expert-level shaped ski and the Mod X Pro and Recon which pioneered "wider" waisted and rockered skis. Our new K2 Konic series takes this legacy to the next generation of All-Mountain skis.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE

All-Terrain tip rocker for easy, predictable turn initiation in variable and firm snow conditions found within the resort.

SHAPE

Round tips and mild taper make transitioning into the turn smoother in all snow conditions.

MIDBODY

PROFILE

Moderate amount of camber for liveliness and rebound.

SHAPE

Waist widths ranging from 75mm to 85mm for the best blend of stability and agility.

TAIL

PROFILE

Flat, straight tails for confidence and control when completing the turn.

SHAPE

Blunt and round tails for predictable turn release.

FEATURED TECHNOLOGY

A revolutionary core design that redistributes weight to the ski's perimeter providing power, strength and stability directly over the edge, while reducing swing-weight from the center and extremities for added ease and control.

ALL-TERRAIN
ROCKER

126/85/114

K2 iKonic 85Ti

ALL-TERRAIN ROCKER

Revolutionizing All-Mountain skiing, the K2 iKonic 85Ti embraces the highest performance version of K2 Konic Technology. Efficiently engineered with a metal laminate laid over the perimeter of the K2 Konic wood core for unmatched power, strength and stability. The lively and energetic Aspen/Paulownia wood core runs through the center and extremities to give this powerful all-mountain ski a playful personality.

Sizes:	163, 170, 177, 184
Radius:	17m @ 177
Core:	K2 Konic Technology-Aspen/Paulownia
Construction:	Metal Laminate, Triaxial Braid, Hybritech Sidewall
Bindings:	K2/Marker MXC 12TCx or Flat

ALL-TERRAIN
ROCKER

121/80/109

K2 iKonic 80Ti

ALL-TERRAIN ROCKER

Optimizing every square inch of the ski, the K2 iKonic 80Ti features a new metal laminate construction that traces the edge of the ski and reinforces the wood core over the edges for increased power. It's the ideal ski for the all-mountain skier who wants it all, from a solid hold at mach speeds to confidently busting through crud, moguls or soft leftovers from the previous storm.

Sizes:	156, 163, 170, 177, 184
Radius:	15.5m @ 170
Core:	K2 Konic Technology - Fir/Aspen
Construction:	Metal Laminate, Triaxial Braid, Hybritech Sidewall
Bindings:	K2/Marker MXC 12TC or Flat

ALL-TERRAIN
ROCKER

121/80/109

K2 iKonic 80

ALL-TERRAIN ROCKER

The K2 iKonic 80 features a dual density K2 Konic wood core with lightweight and lively Aspen at its center and denser, more powerful fir over the edges. The intuitive K2 Konic Technology and all-mountain design of the K2 iKonic 80 makes skiing all day long noticeably more enjoyable with unbeatable performance, regardless of the conditions or terrain.

Sizes:	156, 163, 170, 177
Radius:	15.5m @ 170
Core:	K2 Konic Technology - Fir/Aspen
Construction:	Triaxial Braid, Hybritech Sidewall
Bindings:	K2/Marker M3 12TC or Flat

ALL-TERRAIN
ROCKER

119/78/108

K2 Konic 78Ti

ALL-TERRAIN ROCKER

The K2 Konic 78Ti applies a metal laminate for increased strength and power, giving the skier superior confidence all over the mountain while maintaining ease of control in this light-weight set up. The resort-friendly waist width underfoot makes it ready to ski anywhere on the mountain and in any condition.

Sizes: 149, 156, 163, 170, 177
 Radius: 15.5m @ 170
 Core: K2 Konic Technology- Composite
 Construction: Metal Laminate, Hybritech Sidewall
 Bindings: K2/Marker M3 10 or Flat

ALL-TERRAIN
ROCKER

120/76/105

K2 Konic 76

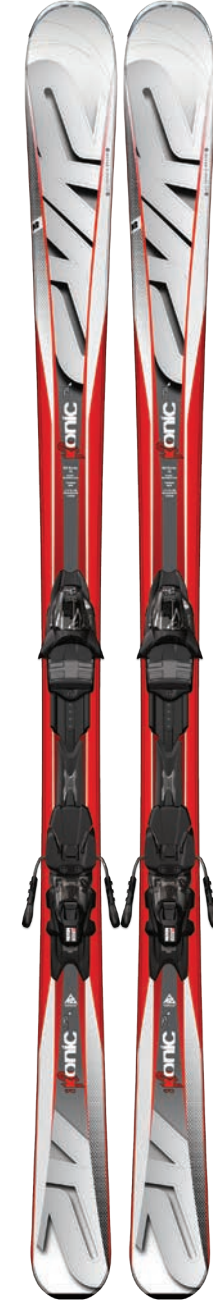

ALL-TERRAIN ROCKER

The K2 Konic 76 is designed from the ground up to take your skiing to the next level. Its power and precision come from Hybritech sidewalls while its forgiveness and ease stem from the combination of All-Terrain Rocker and a composite core. The end result is a predictable, fun, confident pair of skis that handle all conditions with ease.

Sizes: 149, 156, 163, 170, 177
 Radius: 15.5m @ 170
 Core: K2 Konic Technology- Composite
 Construction: Hybritech Sidewall
 Bindings: K2/Marker M3 10 or Flat

CATCH-FREE
ROCKER

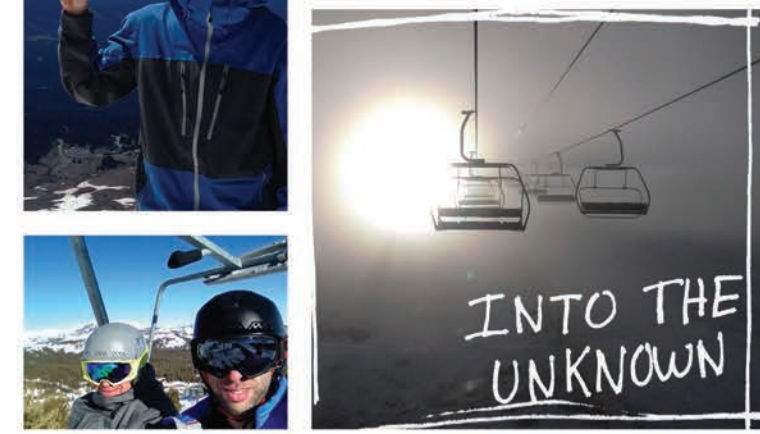

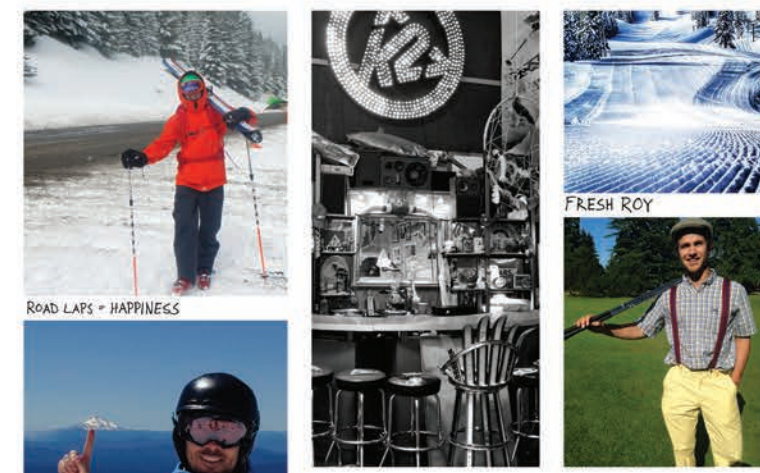

115/75/106

K2 Konic 75

CATCH-FREE ROCKER

Based on the K2 Konic design philosophy, the K2 Konic 75 is the most forgiving, easy-to-control ski in the men's all-mountain ski collection. Designed for developing skiers with a Catch-Free Rocker profile that elevates the tip and tail for added ease when initiating and finishing turns at slower speeds.

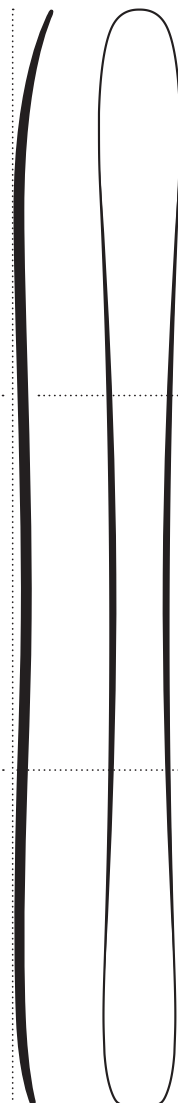

Sizes: 149, 156, 163, 170, 177
 Radius: 15m @ 170
 Core: K2 Konic Technology- Composite
 Construction: Cap Construction
 Bindings: K2/Marker M2 10 or Flat

FREERIDE

K2 inspired a league of its own in the late 80's, setting the trend with the Extreme. In 1997, K2 introduced the Factory Freeride Team, a group that brought a new attitude and approach to the mountains. They helped lay the foundation for a new category of athlete-inspired skis, complete with the first of many Seth Morrison Pro Models at an impressive 70mm underfoot. Almost 20 years later, with Seth still at the helm, these skis have progressed into their own category. The new Pinnacle Series is the next evolution of Freeride.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE

Long slow rise in the tip with All-Terrain or Powder Rocker for float through soft and varied conditions.

SHAPE

Tapered, powder-focused tip for predictability in soft and variable conditions.

MIDBODY

PROFILE

Medium to low camber for predictable soft snow performance.

SHAPE

Medium to wide waist widths ranging from 95mm to 118mm for float and moderate sidecut for medium to long turns.

TAIL

PROFILE

Low, rockered tails for ease of release and a more playful, fun feel.

SHAPE

Tapered, blunted tails for predictability when exiting turns.

FEATURED TECHNOLOGY

NANOLite

K2 Konic Technology made with Nanolite is the same revolutionary core design found in the K2 Konic and K2 iKonic all-mountain skis but features a super lightweight, low-density, aerospace grade composite in the center of the ski for added ease and control. The perimeters retain the same power, strength and stability found in wood and metal.

POWDER ROCKER

POWDER ROCKER

145/118/135

Pinnacle 118

POWDER ROCKER

Seth Morrison's Pro Model is updated with K2 Konic Technology. The powerful triaxially braided K2 Konic wood core is complemented by plenty of taper and higher Powder Rocker in the fore-body to plane quickly and attack fresh, deep pow. The slightly rockered, pintail-shaped tails gives an added level of control when varying speeds and adjusting turn shapes.

Sizes:	177, 184, 191
Radius:	23m @ 184
Core:	K2 Konic Technology- Fir/Aspen
Construction:	Triaxial Braid, Hybritech Sidewall
Bindings:	Flat

ALL-TERRAIN ROCKER

ALL-TERRAIN ROCKER

137/105/121

Pinnacle 105

ALL-TERRAIN ROCKER

The Pinnacle 105 is positioned in the middle of the new Freeride series as the do-anything, go-anywhere, ski everything, quiver of one. Even the most confident skiers will benefit from the lightweight Nanolite core while navigating through trees or floating in powder, as much as the solid and supportive wood cores with metal laminate over the edges when charging through firmer, variable snow.

Sizes:	170, 177, 184, 191
Radius:	19m @ 184
Core:	K2 Konic Technology- Aspen/Nanolite
Construction:	Triaxial Braid, Hybritech Sidewall, Metal Laminate

Pinnacle 95

ALL-TERRAIN ROCKER

Offered in a universal waist width to attack the resort in any snow condition, the Pinnacle 95 incorporates the new K2 Konic Technology with a high performance, lightweight Nanolite center core for added ease and control, while the wood core and metal laminate along the perimeter of the ski engages all the power, strength and stability needed for all-mountain dominance.

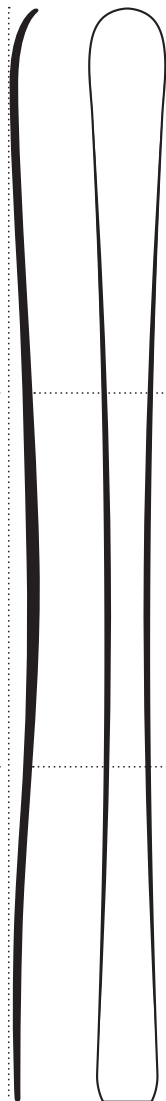

Sizes:	170, 177, 184, 191
Radius:	17m @ 184
Core:	K2 Konic Technology- Aspen/Nanolite
Construction:	Triaxial Braid, Hybritech Sidewall, Metal Laminate
Bindings:	Flat

PRECISION PISTE

After K2 created the fat ski trend, we took a different approach and focused on harder, unforgiving, groomed snow. Rocker on a high performance groomer ski? If it makes it better, why not? Sure enough, that's what we did. The evolution created an entirely new approach to high performance, piste-oriented carving skis. Packing all the power and precision of a race ski, but now with quicker initiation and added ease.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE

A short abrupt rise combined with Speed Rocker provides extra agility and precision.

SHAPE

A blunt round tip shape extends the sidecut into the tip helping to drive the ski into the turn.

MIDBODY

PROFILE

The highest amount of camber for optimal rebound, power and liveliness.

SHAPE

Narrow 72-74mm waist widths and deep sidecuts for quick transitions and unshakable edge-to-edge hold for hard snow carving.

TAIL

PROFILE

The camber is extended through the tail for added rebound and power while finishing the turn.

SHAPE

The blunt, square, tails extend the sidecut into the tail for hold through the entire turn.

FEATURED TECHNOLOGY

A raised X-shaped Mod structure reinforced by a carbon web for increased torsional rigidity, greater edge-hold and grip. The reinforced region works in combination with rocker for effortless turn initiation and rock solid hold.

SPEED ROCKER

125/72/99

A.M.P. Bolt

SPEED ROCKER

The Amp Bolt is K2's ultimate, rock solid carving tool for top-level performance on firmer snow and groomed terrain. The Bolt's powerful metal laminate construction is supercharged with a full fir core and Speed RoX Technology, making medium to long-radius turns effortless and precise no matter how hard you push it.

Sizes:	172, 179, 186
Radius:	18m @ 179
Core:	Fir
Construction:	Metal Laminate, Hybritech Sidewall
Bindings:	K2/Marker MXCell 14 TCx

SPEED ROCKER

122/74/106

A.M.P. Charger

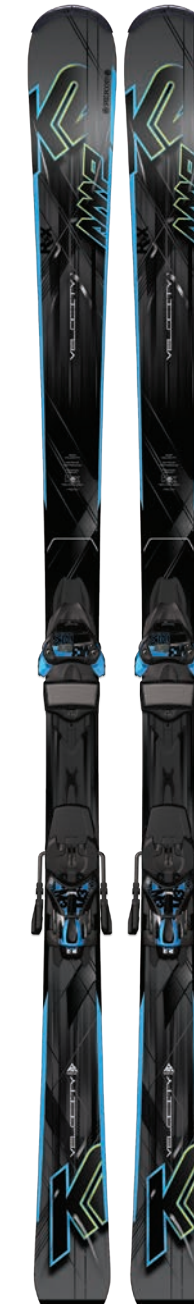

SPEED ROCKER

Built with Speed RoX and a tighter turn radius than the Bolt, the Charger is designed for quick, tight movements on piste. It's perfect for medium and short quick turns on open groomers. Expert skiers will discover confidence in this nimble and highly responsive chassis as they put their skills to test at high speeds.

Sizes:	165, 172, 179, 186
Radius:	17m @ 179
Core:	Aspen/Paulownia
Construction:	Metal Laminate, Hybritech Sidewall
Bindings:	K2/Marker MXCell 12 TCx

SPEED ROCKER

121/72/111

A.M.P. Velocity

SPEED ROCKER

The Velocity packs all the agility needed to carve effortlessly on-piste all day. It's designed with Speed RoX and a high camber for optimal rebound. Blunt round tips, square tails and a deep sidecut maximize the ski's running surface for great edge to edge hold and quick transitions in short to long radius turns.

Sizes:	165, 172, 179
Radius:	15m @ 179
Core:	Fir/Asepn
Construction:	Hybritech Sidewall
Bindings:	K2/Marker M3 11 TC

FREESTYLE

K2 started the Freestyle party in the 70's with the Performers who supported and promoted an emerging and totally alternative segment known as "hot-dogging." The Freestyle movement was showcased through a series of K2-endorsed promotional films following the lifestyle of athletes and the sport. K2 continues to back Freestyle through films and the athletes who are immersed in it, such as Sean Pettit, who's skiing has inspired an entire collection of All-Terrain Freestyle skis.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE

All-Terrain or Powder Rocker tip for float and maneuverability in soft and variable conditions.

SHAPE

Tapered, blunted powder focused tip for predictability in soft and variable conditions.

MIDBODY

PROFILE

The camber is medium to low for a lively and more surfy feel.

SHAPE

Medium to wide waist widths range from 102mm to 120mm for float with a moderate sidecut for quick, medium turn shapes.

TAIL

PROFILE

Full All-Terrain or Powder Rockered tails for float, ease of release and added maneuverability.

SHAPE

Tapered, blunted twin tips for a looser more playful feel.

FEATURED TECHNOLOGY

TAPERED TIP

A tapered tip shifts the widest part further back to reduce tip weight and deflection in soft and variable snow conditions. A tapered tail allows for easier release as you exit the turn for a more playful yet predictable and trusted feel. The amount of taper in each region depends on the desired performance in varied snow conditions.

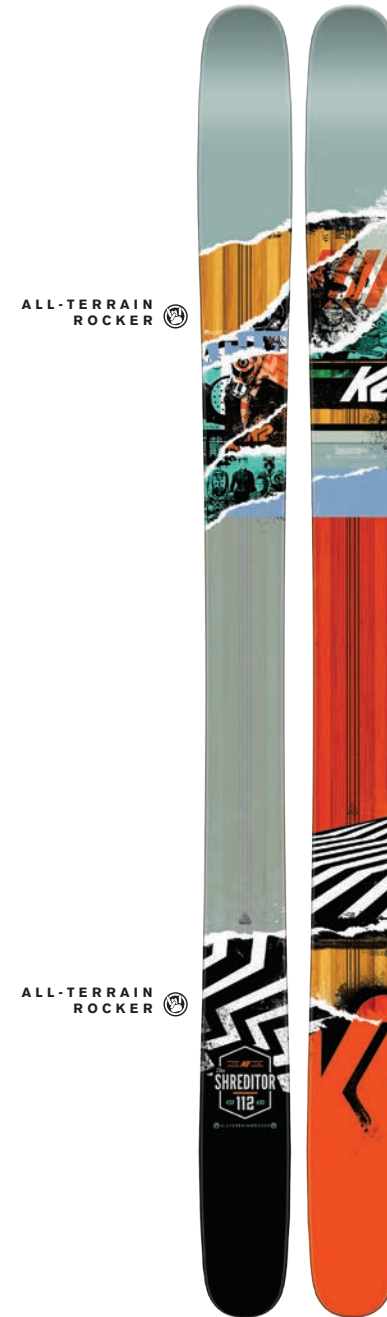

147/120/141

Pettitor

POWDER ROCKER

Designed by Sean Pettit to be the most well-rounded pow ski, the Pettitor returns to thrive in the deepest, softest snow you can find. The tapered powder-tip adds predictability to its Powder Rocker profile for responsive float. While comfortably at home in soft snow, the Pettitor also stands its own in crud and variable conditions with a light and lively feel.

Sizes:	169, 179, 189
Radius:	22m @ 179
Core:	Fir/Aspen
Construction:	Triaxial Braid, TwinTech Sidewall

135/112/130

Shreditor 112

ALL-TERRAIN ROCKER

The innate mannerisms of the Shreditor collection come to light within the Shreditor 112, whether in deep pow or busted up crud. A surfy float and quick maneuverability keeps this as the go-to set up, regardless of the snow report. Slightly more taper and rocker than the 102, the 112 won't let you down regardless of how you ski a line.

Sizes:	169, 179, 189
Radius:	20m @ 179
Core:	Fir/Aspen
Construction:	Triaxial Braid, TwinTech Sidewall

131/102/125

Shreditor 102

ALL-TERRAIN ROCKER

Positioned in the middle of the Shreditor collection, the 102 defines versatility. The optimal amount of camber, sidecut, tip rise and waist width is just what you need to slice up firm snow, rip hot laps through the park or claim deep tracks all day. Playful by character, the Shreditor 102 is designed with added tip and tail taper to be fun and maneuverable yet snappy and stable, no matter the conditions or terrain you seek to enjoy.

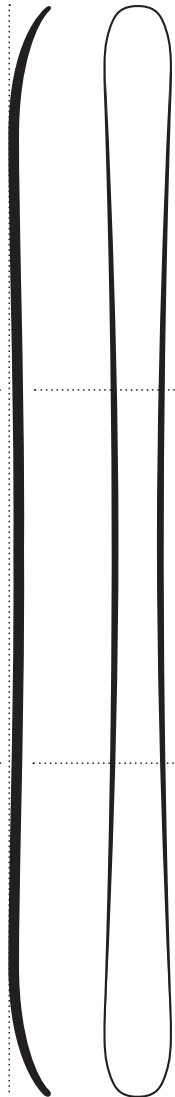

Sizes:	170, 177, 184, 191
Radius:	20m @ 184
Core:	Aspen/Paulownia
Construction:	Triaxial Braid, TwinTech Sidewall

FREESTYLE

The Freestyle movement of the 70's gave rise to the modern Freestyle revolution of today and K2 and our athletes have been at the forefront since the beginning. From the introduction of the Poacher, the first-ever twin tip, to the 360 mute grab in mogul skiing, to newschool skiing in the X-Games, to slopestyle and superpipe on the Olympic main stage, to the street skiing assault of today, we have been providing skiers with the reliable tools to progress the sport.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
Standard rise in the tip with All-Terrain or Jib Rocker for confidence, predictability and pop.

SHAPE
Blunted rounded tips for a maximized sidecut with reduced weight.

MIDBODY

PROFILE
The camber is medium to flat for a lively and playful feel.

SHAPE
Medium waist widths from 85 mm to 92mm for solid grip with a moderate sidecut for quick, medium turn shapes.

TAIL

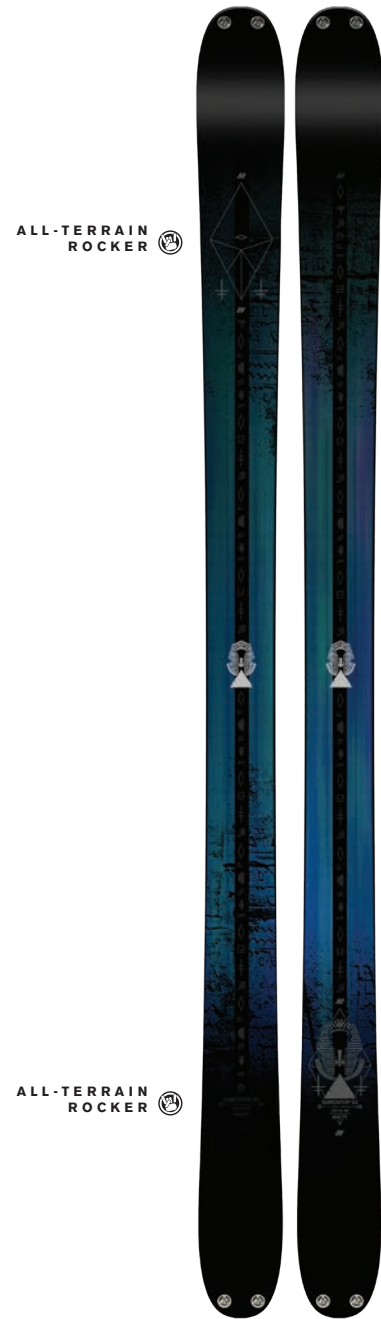

PROFILE
Full All-Terrain or Jib Rockered tails for a balanced feel when riding switch.

SHAPE
Blunted twin tips for a loose, easy release.

FEATURED TECHNOLOGY

TwinTech Sidewall construction sandwiching a urethane layer between ABS for shock ABSorption, lessening the impact of harsh landings.

124/92/118

Shreditor 92

ALL-TERRAIN ROCKER

Bridging the gap between K2's freeride-inspired freestyle Shreditor series with the park and pipe-influenced freestyle skis, the Shreditor 92 does it all, from laps in the park to laps on the gondola and everything in between. Designed with features to be quick and maneuverable, it dominates hard pack conditions and mellows out the harshest landings, thanks to the dampening ABSorb sidewalls.

Sizes:	163, 170, 177, 184
Radius:	21m @ 184
Core:	Fir/Aspen
Construction:	Triaxial Braid, TwinTech with Vertical ABSorb Sidewall

115/90/115

Domain

JIB ROCKER

A distinguished ski in the park and beyond, the Domain is K2's only fully symmetrical ski made with K2's Jib Rocker. It has just the right amount of camber for all the pop, rebound, balance and versatility needed for the park, street or just pillaging the entire resort.

Sizes:	159, 164, 169, 174, 179
Radius:	21m @ 179
Core:	Aspen
Construction:	Triaxial Braid, TwinTech Sidewall

118/85/109

Sight

ALL-TERRAIN ROCKER

Seamlessly transitioning in and out of the terrain park, the Sight is the most versatile ski of the twin tip Freestyle collection. Built with All-Terrain Rocker, moderately more side cut and a standard rise in the tip, the Sight has all the predictability you need, but the playfulness to be loose, fun and balanced.

Sizes:	149, 159, 169, 179
Radius:	20m @ 179
Core:	Aspen
Construction:	Triaxial Braid, TwinTech Sidewall

113/85/104

Press

JIB ROCKER

The Press's lightweight construction is bolstered by the ski's unique park inspired flex pattern that gives this ski an extra level of playfulness and fun. Add in the Jib Rocker and you have your go-to set up for the park and beyond.

Sizes:	149, 159, 169, 179
Radius:	20m @ 169
Core:	Aspen
Construction:	Triaxial Braid, Cap Construction

159cm

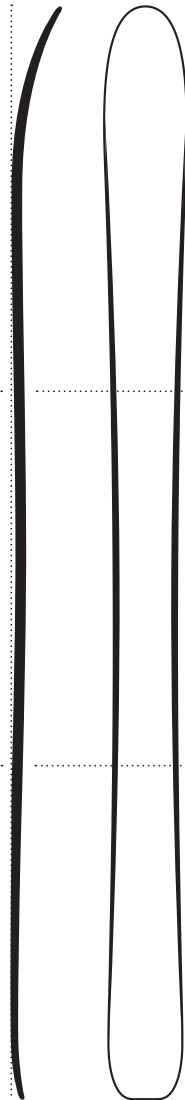

179cm

BACKSIDE

K2 has been at the forefront of backcountry skiing for more than two decades. In the late 80's Doug Coombs was involved with breaking down resort boundaries and pioneering the Chugach and later La Grave in the 90's. Doug's influence on the sport of adventure skiing has been undeniable. Channeling everything into a collection of skis that are lighter, easier and more forgiving, his inspiration is strong as ever with a new line of skis and tools to prove it.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
Long and low rise with All-Terrain Rocker for smooth planing through softer snow and increased versatility.

SHAPE
Powder influenced design with progressively more taper as waist width increases for control in variable snow.

MIDBODY

PROFILE
Medium to low camber for a consistent feel in a variety of snow conditions.

SHAPE
Medium to long radius sidecuts with waist widths from 88mm to 114mm.

TAIL

PROFILE
Slight rocker for maximum precision, also allows the skier to plunge the tails into the snow to build anchors.

SHAPE
Tapered, blunted tails to easily adjust turn shapes.

FEATURED TECHNOLOGIES

Carbon weave laid at precise angles to retain a lightweight construction but add another level of torsional rigidity for higher performance.

Snow-repellent, hydrophobic top sheet to keep snow off the top sheet during an uphill climb.

ALL-TERRAIN
ROCKER

ALL-TERRAIN
ROCKER

140/114/118

Coomback 114

ALL-TERRAIN
ROCKER

As the widest backside ski in the collection, the Coomback 114 is designed to be a lightweight, playful powder hound as much as a high performance touring ski. The addition of more tip/tail taper and rocker creates more versatility and predictability in soft snow, allowing the user to easily adjust the shape of the turn. The added sidewalls underfoot give it solid edge hold in firmer conditions.

Sizes:	170, 177, 184
Radius:	23m @ 177
Core:	Paulownia/Maple
Construction:	Torsion Box, Hybritech Sidewall
Weight:	1800g @ 177

K2

ATHLETE INSPIRED

INSPIRING INNOVATIONS

From the Performers, to K2's Team Extreme, and our Factory Team, K2 athletes have always been at the forefront of the sport. Their ideas are often light years ahead of what we are skiing on today, and those very ideas have spawned some of the greatest and most game-changing innovations in All-Mountain skiing. From high performance shaped skis, to the first twin tips, mid fats, massive fat skis, women's skis, to rockered and tapered skis, these creations came from the minds of our athletes, not from the race course. This section represents their ideas and input coming to life through the like-minded goal to build skis for Serious Fun.

K2 WOMEN'S SKIS

ALLIANCE INSPIRED

Originally dubbed "T-9" in reference to the Title IX civil rights law providing females equal participation in competitive sports, the K2 Alliance instigated the development of the first women's specific products in the ski industry. Today, 15 years later, the K2 Ski Alliance still leads the charge as the most progressive women's program by encouraging female skiers to express their individuality and inspire each other in a way that is true to the K2 spirit.

Year round, the Alliance devotes a lot of time, energy, sass, charm, spunk, and compassion into making the best women's skis on the market. To celebrate where we have been and where we are going, we are paying tribute to the heart of our existence and **BRINGING BACK THE LUV!**

Featuring entirely modernized technology, fresh graphics and a lot of K2 personality, the 2015/16 Luv line is the best women's ski collection since your first pair of Luvs.

BABES w/ BICEPS

EARLY BIRD GETS THE POW

SUMMER STOKE

LEXI + KIM

REFINED, LIVELY & EMPOWERING

With the rise of women in today's skiing world, our K2 Ski Alliance embraced the E3 Philosophy to Bring Back the Luv with a completely new women's specific technology.

Channels are grooved through the length of the ski to remove unwanted materials for a smoother flex, added ease and better control. Staying true to a women's specific approach, the Bioflex core and metal laminate are focused more strongly on the perimeter of the skis to maintain power, strength and stability.

DEVELOPED BY WOMEN FOR WOMEN

The K2 Ski Alliance develops, tests and validates products women need with technologies that make our skis genuinely "women's specific." It's time we build upon this platform with a newly optimized and efficient design.

K2 Bioflex is a lightweight, women's specific blended wood core, combining Aspen on the perimeter, Paulownia in the center reinforced with a Bamboo stringer for overall reduced swing weight.

THINNER PROFILE

Without compromising performance, the overall height and thickness was reduced creating a sleek profile for a smooth, natural flex.

FULL PERIMETER CORE

CHANNELLED CENTER CORE

**STRENGTH
STABILITY
POWER**

**EASE
FORGIVENESS
CONTROL**

A full thickness Bioflex core is strategically placed to support the perimeter for increased strength, power and stability in the turn.

Channels are grooved lengthwise through the bottom of the core removing unnecessary materials for added ease and control as you transition between turns.

BINDINGS

ERC 11 TC
Combining a lightened Triple Pivot Compact Toe with the easy-to-step-in Twin Cam heel for the lightest and highest performing women's system.

ER3 10 TC
The ER3 plate is powered by the Triple Pivot Compact toe and Twin Cam heel for great performance and security.

ER3 10
Incorporating a Triple Pivot Compact toe and lightweight Comfort heel for the lightest women's binding system.

MODEL LINE MATRIX

WOMEN'S COLLECTION

Our All-Mountain philosophy embraces building versatile women's specific skis designed to handle a variety of conditions and terrain. The Mountain Collection takes this philosophy to heart offering females more options that match their individual style and where they ski on the mountain.

ALL-MOUNTAIN

K2 is focused on giving women products that are designed, tested, approved and marketed by women. It all started with the first women's specific ski, the LTP, but was revolutionized in 2000 with the T:Nine collection. Orchestrated by K2 athlete Kim Reichhelm, the Alliance was formed and dedicated to creating a line of legitimate, women's specific, All-Mountain products. The mission of the Alliance has never been to "shrink it and pink it" but rather to promote the progression of women's products in skiing.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
All-Terrain tip rocker for easy, predictable turn initiation in variable and firm snow conditions found within the resort.

SHAPE
Round tips and mild taper make transitioning into the turn smoother in all snow conditions.

MIDBODY

PROFILE
Moderate amount of camber for liveliness and rebound.

SHAPE
Waist widths ranging from 75mm to 85mm for the best blend of stability and agility.

TAIL

PROFILE
Flat, straight tails for confidence and control when completing the turn.

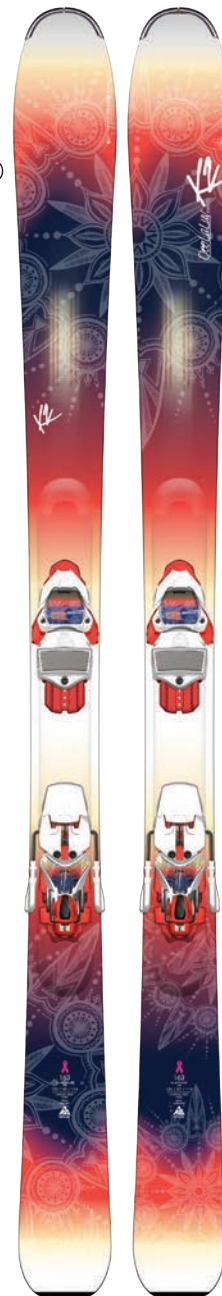

SHAPE
Blunt and round tails for predictable turn release.

FEATURED TECHNOLOGY

Women's specific core designed to remove unneeded materials by grooving channels through the length of the ski for added ease and control while the Bioflex core along the perimeter of the ski maintains power, strength and stability.

As the most forgiving, easy-to-manuever ski in the collection, the Luv 75 features softly rounded tips and tails with a Catch Free Rocker profile to encourage every turn from the point of initiation all the way through the release. The lightweight construction and thinner profile keeps skier legs fresh and ready to take on more throughout the day.

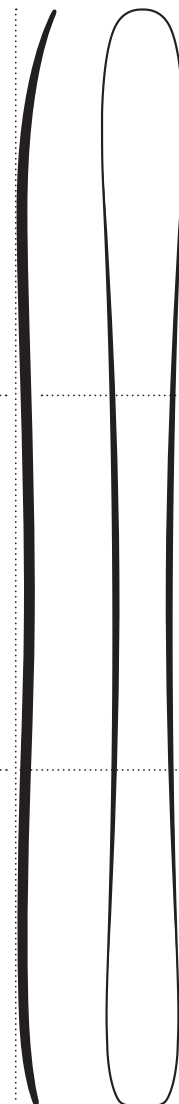

Sizes: 142, 149, 156, 163
 Radius: 14m @ 163
 Core: Composite
 Construction: Torsion Box, Cap Construction
 Bindings: K2/Marker ERP 10 or Flat

FREERIDE

K2 has had it's fair share of firsts within the ski industry, including the first women's specific freeride ski, the Phat Luv. A bold name for an equally bold product that gave women a wider-waisted ski to have more fun in powder. The Phat Luv kicked off the Luv-inspired naming convention giving rise to a complete "Luv Line," setting the benchmark for women's specific skis. K2 is Bringing the Back the Luv!

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
Long slow rise in the tip with All-Terrain or Powder Rocker for float through soft and varied conditions.

SHAPE
Tapered, powder-focused tip for predictability in soft and variable conditions.

MIDBODY

PROFILE
Medium to low camber for predictable soft snow performance.

SHAPE
Medium to wide waist widths ranging from 95mm to 118mm for float and moderate sidecut for medium to longer turns.

TAIL

PROFILE
Low, rockered tails for ease of release and a more playful, fun feel.

SHAPE
Tapered, blunted tails for predictability when exiting turns.

A short abrupt rise combined with Speed Rocker provides extra agility and precision.

SHAPE
A blunt round tip shape extends the sidecut into the tip helping to drive the ski into the turn.

MIDBODY

PROFILE
These skis have the highest amount of camber for optimal rebound, power and liveliness.

SHAPE
Narrow 74mm waist widths and deep sidecuts for quick transitions and unshakable edge-to-edge hold for hard snow carving.

TAIL

PROFILE
The camber is extended through the tail for added rebound and power while finishing the turn.

SHAPE
The blunt, square, tails extend the sidecut into the tail for hold through the entire turn.

FEATURED TECHNOLOGY

CHANNEL LIGHT CORE 

Women's specific core designed to remove unneeded materials by grooving channels through the length of the ski for added ease and control while the Bioflex core along the perimeter of the ski maintains power, strength and stability.

SPEED ROCKER 

121/74/107

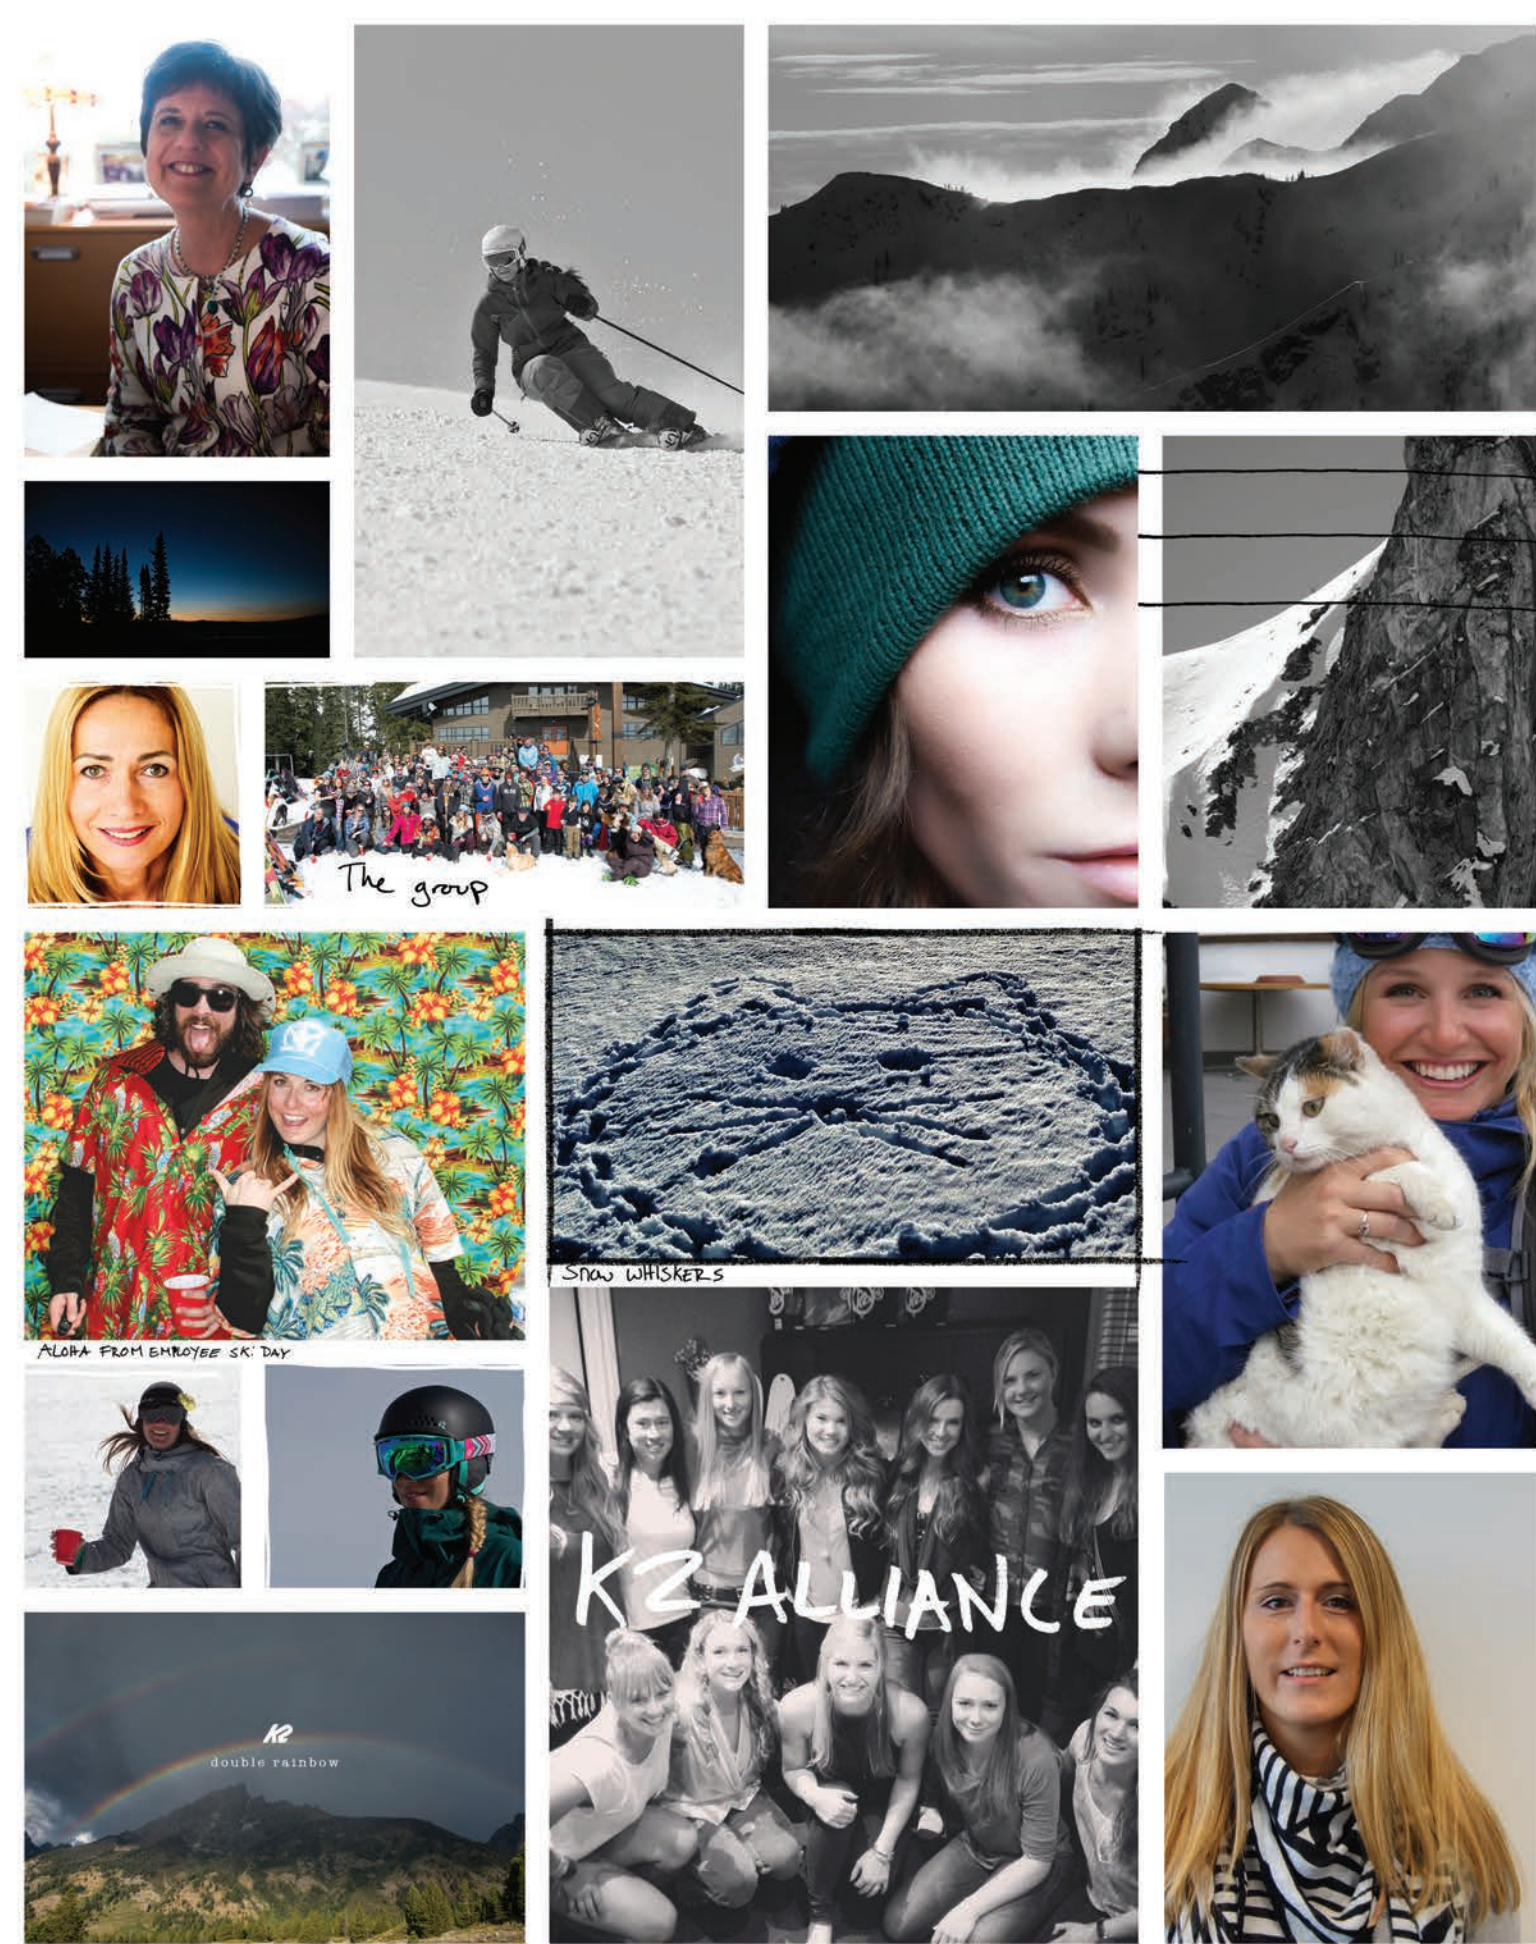

Luv Machine 74Ti

 SPEED ROCKER 

The Luv Machine is finely tuned and fueled to crank out the highest level of precision in the women's collection with unmatched agility and accuracy, leaving charging females nothing but love for the mountain's steepest, firmest runs. The new Channel Light Core reduces and redistributes the weight to the perimeters of the ski with a robust metal laminate layer, enhancing the power and confidence for top-level performance on groomed terrain.

Sizes:	146, 153, 160, 167
Radius:	12.5m @ 160
Construction:	Channel Light- Fir/Paulownia/Bamboo
Bindings:	Metal Laminate, Hybritech Sidewall K2/Marker ERC 11 TC or Flat

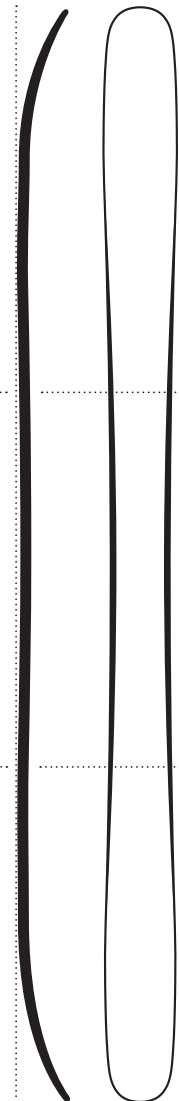

CHANNEL LIGHT CORE  bioflex  HYBRITECH

FREESTYLE

Today's freestyle skis naturally have a surfy and playful soft snow feel inherent in their twin tip design. Our women's Freestyle collection takes that concept to an entirely new level with the inclusion of our women's specific Bioflex core. Developed by our Alliance in 2002, the Bioflex core combines different types of wood in different regions to reduce the swing weight, while maintaining a solid and secure feel under foot. This construction is the foundation for a fun, versatile feel that spans generations.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
All-Terrain or Powder Rocker tip for float and maneuverability in soft and variable conditions.

SHAPE
Tapered, blunted powder focused tip for predictability in soft and variable conditions.

MIDBODY

PROFILE
The camber is medium to low for a lively and more surfy feel.

SHAPE
Medium to wide waist widths range from 102mm to 120mm for float with a moderate sidecut for quick, medium turn shapes.

TAIL

PROFILE
Full All-Terrain or Powder Rockered tails for float, ease of release and added maneuverability.

SHAPE
Tapered, blunted twin tips for a looser more playful feel.

FEATURED TECHNOLOGY

bioflex

K2 Bioflex is a lightweight, women's specific blended wood core, combining Aspen on the perimeter, Paulownia in the center reinforced with a Bamboo stringer for overall reduced swing weight.

ALL-TERRAIN
ROCKER

ALL-TERRAIN
ROCKER

135/112/130

Remedy 112

ALL-TERRAIN
ROCKER

Intended for powder queens everywhere, the Remedy 112 is the widest ski in the K2 women's collection. The powder-influenced tip and All-Terrain Rocker, combined with a wider waist, handles like a dream when floating in the fresh, but its tapered twin tip design keeps it quick and maneuverable in harder snow pack. The Remedy 112 is designed to be loose and surfy for showing off your style of skiing with creativity and flair.

Sizes:	169, 179
Radius:	18m @ 169
Core:	Aspen/Paulownia/Bamboo
Construction:	Triaxial Braid, TwinTech Sidewall

Remedy 102

ALL-TERRAIN
ROCKER

The versatile Remedy 102 is back by popular demand as the preferred Remedy prescribed for fun in all conditions and terrain. The twin tip design and tapered tips and tails allow the skis' playfulness to shine through without overpowering its versatile sidecut and All-Terrain Rocker for carving and powering through crud.

Sizes:	156, 163, 170
Radius:	16m @ 170
Core:	Aspen/Paulownia/Bamboo
Construction:	Triaxial Braid, TwinTech Sidewall

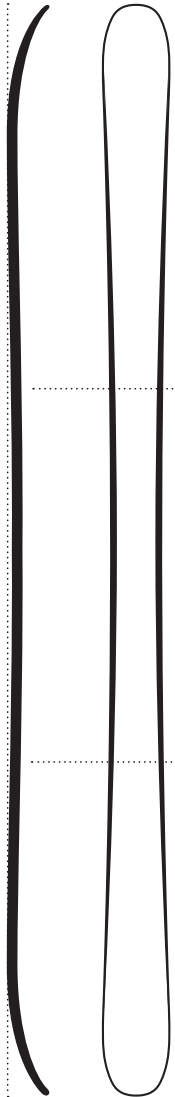

THE QUEEN OF THE DARKROOM

MT Hood

FREESTYLE

K2's history of supporting the Freestyle movement for over 50 years doesn't just include Men's skis. The MissDemenar was the first women's specific twin tip and has given K2 the foundation to create some of the best twin tips in the industry. They have been seen in the X-Games, Dew Tour, Olympics and on the feet of rising stars. The "Miss" series has given women the inspiration and opportunity to soar to new heights, pushing the women's park movement.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
Standard rise in the tip with All-Terrain or Jib Rocker for confidence, predictability and pop.

SHAPE
Blunted rounded tips for a maximized sidecut with reduced weight.

MIDBODY

PROFILE
The camber is medium to flat for a lively and playful feel.

SHAPE
Medium waist widths from 85 mm to 92mm for solid grip with a moderate sidecut for quick, medium turn shapes.

TAIL

PROFILE
Full All-Terrain or Jib Rockered tails for a balanced feel when riding switch.

SHAPE
Blunted twin tips a looser, more ease of release.

FEATURED TECHNOLOGY

TwinTech Sidewall construction sandwiching a urethane layer between ABS for shock ABSorption, lessening the impact of harsh landings.

ALL-TERRAIN
ROCKER

Empress

JIB
ROCKER

The undeniable responsiveness and balance of the Empress provokes confidence in all its users. The Empress' twin tip design and Jib Rocker profile provides aspiring park and pipe girls with the tools they need to take their Freestyle skills to the next level, or simply ski anywhere on the mountain.

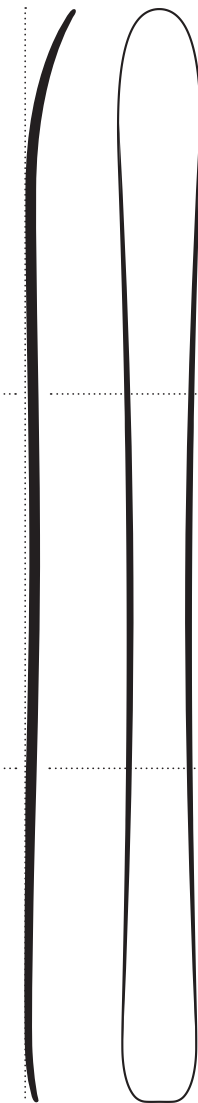

Sizes:	149, 159, 169
Radius:	17m @ 159
Core:	Aspen
Construction:	Triaxial Braid, Cap Construction

BACKSIDE

K2 has been at the forefront of backcountry skiing, unveiling innovation after innovation specific to the category, including the first shaped, mid-fat, twin tip and women's specific ski. She's Piste was developed around the turn of the century with the same women's specific approach as our All-Mountain T:Nine collection. Designed by a group of female backcountry-focused skiers, the women's backcountry collection embraces the rising enthusiasm of women getting out and exploring the backcountry.

PROFILE SHAPE

BASELINE 2.0

FOREBODY

PROFILE
Long and low rise with All-Terrain Rocker for smooth planing through softer snow and increased versatility.

SHAPE
Powder influence design with progressively more taper as waist width increases for control in unpredictable and soft snow.

MIDBODY

PROFILE
Medium to low camber for a consistent feel in a variety of snow conditions.

SHAPE
Medium to long radius sidecuts with waist widths from 88mm to 96mm.

TAIL

PROFILE
Slight rocker for maximum precision, also allows the skier to plunge the tails into the snow to build anchors.

SHAPE
Tapered, blunted tails to easily adjust turn shapes.

FEATURED TECHNOLOGIES

Carbon weave laid at precise angles to retain a lightweight construction but add another level of torsional rigidity for higher performance.

Snow-repellent, hydrophobic top sheet to keep snow off the top sheet during an uphill climb.

ALL-TERRAIN
ROCKER

128/96/118

Talkback 96

ALL-TERRAIN ROCKER

The TalkBack 96 is the ideal backcountry ski for touring female skiers. It's narrow enough to be light for the uphill climb, but wide enough to enjoy the fresh powder you worked so hard to find. Built with a lightweight Paulownia core, maple stringers for binding screw retention, sidewalls for edge hold, taper and rocker for predictability in variable snow.

Sizes:	163, 170
Radius:	17m @ 163
Core:	Paulownia/Maple
Construction:	Torsion Box, Hybritech Sidewall
Weight:	1350g @ 163

ALL-TERRAIN
ROCKER

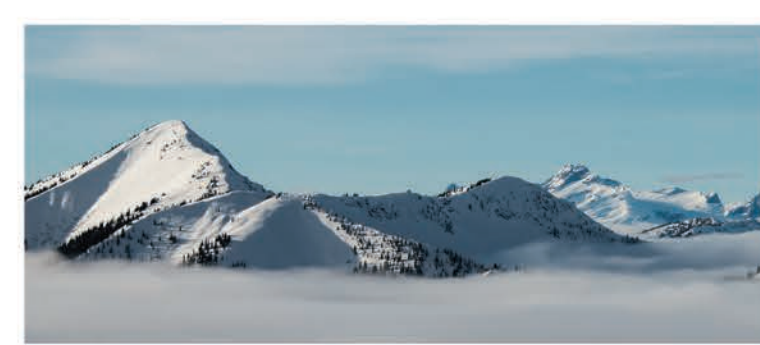

126/88/113

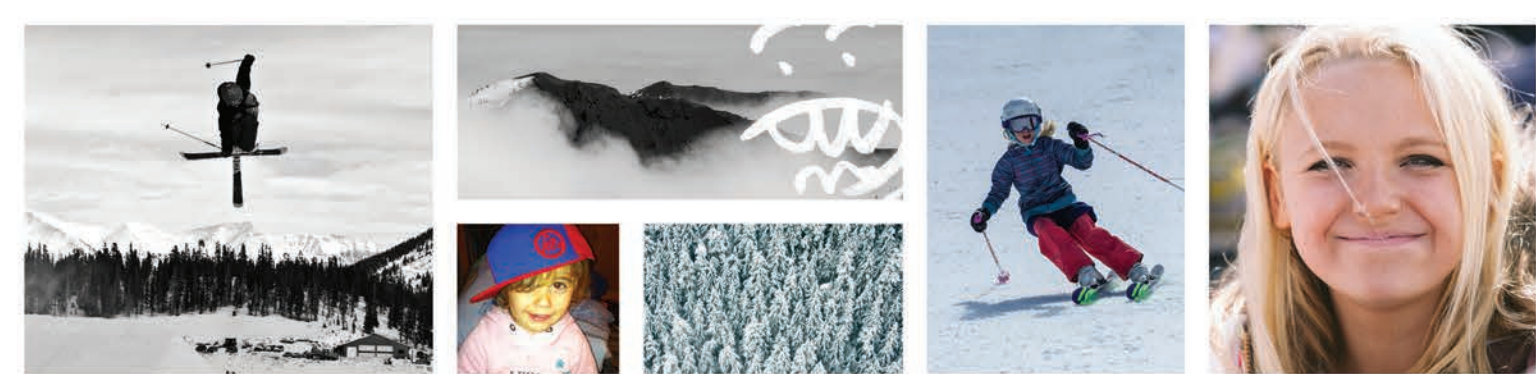

Talkback 88

ALL-TERRAIN ROCKER

The Talkback 88 is a picture of efficiency. It features the same ultra-light Paulownia/Maple core and Snophobic topsheet as the Talkback 96, but with a trimmer 88mm waist for practically effortless ascents. The All-Terrain Rocker delivers ease and consistency whether skiing through tight glades or making figure 8's in untouched powder.

Sizes:	153, 160, 167
Radius:	14m @ 160
Core:	Paulownia/Maple
Construction:	Torsion Box, Hybritech Sidewall
Weight:	1250g @ 160

DON'T... TURN... AROUND...

WHERE THE BEST SKI BOOTS ON EARTH ARE MADE

K2: FOR THOSE WHO LIVE FOR THE EXTREME!

EVEN HIGHER ALTITUDE CAMP!

"WE CAN FIT ONE MORE"

NEW ROCKERED SOLE!

friends on a pow day

K2

SKI BOOTS

ALL-MOUNTAIN, FREERIDE

GAINER INTO REALLY COLD WATER

We are an All-Mountain company and for that very reason we created our complete boot collection for skiers who ski the entire mountain. We didn't start with a rigid, intimidating race boot platform, we started from the ground up to maximize efficiency, optimize power transfer and deliver performance over a wide range of terrain and snow conditions. The 2015/16 collection offers additional last options that fit and function unlike any other boot.

EXTREME FOCUS

"LE ART"

WEAR YOUR BOOTS & EAT THEM TOO!

NORTHWEST SUNSHINE

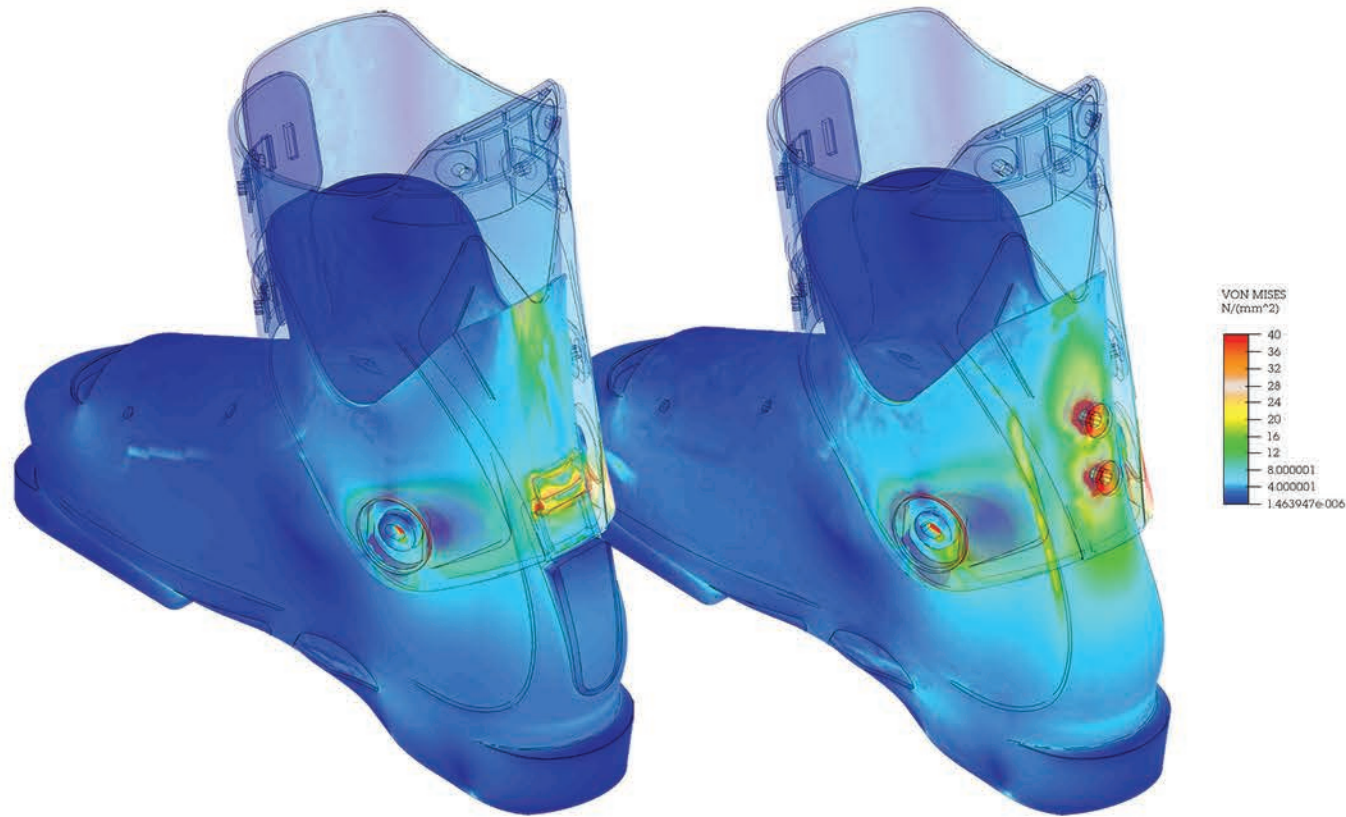

"THAT'S ONE THIRSTY HORSE"

NO RIVETS LESS STRESS

K2's collection of ski boots are designed rivet-free, taking an innovative approach that efficiently captures, stores and releases energy evenly over a wider surface area of materials with less stress, resulting in a smoother, natural flexing All-Mountain boot.

K2 NON RIVETED BOOT

RIVETED BOOT

The non-riveted K2 boot produces lower pin point stress levels resulting in a smoother load transfer, ideal for inconsistent or variable terrain and snow conditions.

A riveted design increases stress at the specific location where the cuff and shell are fixed along the rear portion of the boot, resulting in a blocky, inconsistent flex.

ALL-MOUNTAIN DESIGN EFFICIENTLY ENGINEERED FOR ALL-MOUNTAIN PERFORMANCE

The combination of three fundamental technologies creates an All-Mountain boot design that optimizes the absorption of external energy while efficiently transmitting internal energy.

powerfuse Spyrne™
Rivetless designed supportive system

energyinterlock™
Interlocking device allowing for smooth, natural flex

fitlogix™
Fit philosophy focused on creating the perfect All-Mountain fit

powerfuse Spyrne™

energyinterlock™

fitlogix™

A rear co-injected "Y" shaped support that adds strength and power to the Energy Interlock in order to maximize fore/aft flex efficiency and lateral stiffness for responsiveness in every type of terrain.

A rivet-free technology that integrates the cuff and shell, putting less stress on the boot's material and produces a smoother, progressive flex.

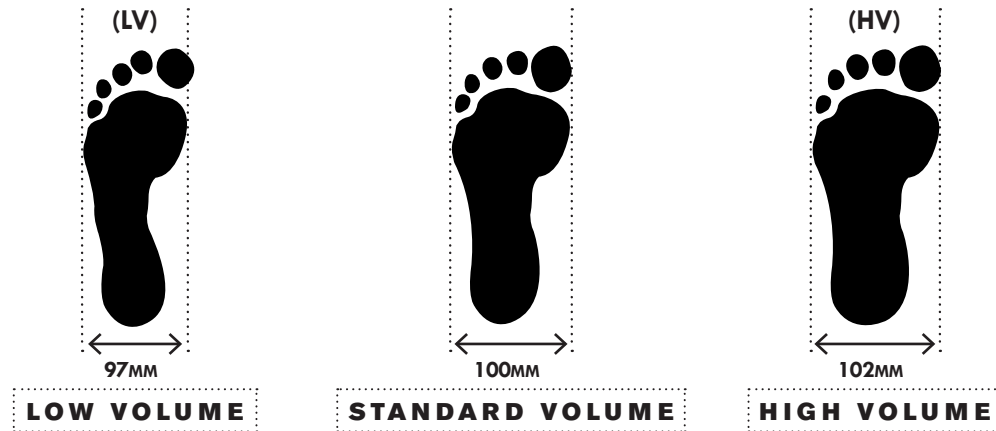

A multi-level liner-specific feature focused on how the foot, lower leg and liner interact with the interior of the boot's shell and cuff for maximum performance and best out-of-the-box fit with an extra level of INTUITION® heat-moldable customization.

ANY FOOT, ANY PERFORMANCE

MULTIPLE LAST OPTIONS FOR A PERFECT FIT

With our diverse last offerings, from the narrow low volume (LV) 97mm, standard 100mm or the wide high volume (HV) 102mm lasts, your foot shape no longer determines your boot model.

LINER - FOOT FIT

- 1 INTUITION® LINER OFFERING**
All liners include INTUITION® foam
- 2 HYBRID LINERS**
A traditional upper liner with a left/right specific heat moldable tongue for ultimate customization.
- 3 LASTED LINERS**
All liners come lasted to a standard foot shape to ensure the most comfortable "out-of-the-box" fit.
- 4 HEAT MOLDABLE OPTIONS**
The use of INTUITION® liners allow the lower to be customized through a heat molding process.

SHELL - LINER FIT

- 1 HYBRID LINERS**
The traditional upper with reinforced power collar and tongue ensure the best interaction between the cuff and liner for optimized power transfer.
- 2 NAVICULAR PUNCH**
A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.
- 3 FORGIVING SHELL MATERIALS**
The use of more forgiving shell and cuff materials making getting the boots on and off easier.
- 4 ASYMMETRICAL TOE BOX**
Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

INTUITION® LINER CONSTRUCTION

All liners are made with INTUITION® foam renowned for its moldability, warmth, comfort and durability. The thermo-forming, cross-linked, closed cell foam is more resistant to heat-related shrinkage and packing out than any other foam in the world.

INNER LAYER: Open cell foam for comfort and breathability.

MIDDLE LAYER: Regular density INTUITION® foam designed to spread loads more evenly, lessen impacts and reduce hotspots.

OUTER LAYER: A performance layer of high density INTUITION® which is extremely durable and rigid for transmitting power directly to the shell.

The premium, heat-moldable liner.

FEATURES:

Molded/Lasted Design, INTUITION® Foam Lower, Moldable Asymmetric Tongue, Power Collar, Power Wedge

Strategically combined heat-moldable, INTUITION® foam and traditional PVC liner.

FEATURES:

Lasted Design, INTUITION® Foam Lower, Strategically placed INTUITION® EVA Foam, Moldable Asymmetric Tongue, Power Collar, Power Wedge

Combining standard open and closed cell EVA foam combined with INTUITION®.

FEATURES:

Lasted Design, INTUITION® Foam at ankle pockets Asymmetric Tongue, Power Collar

ADDITIONAL TECH

REPLACABLE OUTSOLES

Dual-injected soft and hard Thermo Plastic Urethane (TPU) for secure footing and increased life of the boots.

PADDED MID-GRIP

Dual-injected TPU for added grip and traction.

POWER WEDGE

A removable spoiler for adjustable forward lean angle from 12 to 14 degrees.

POWER STRAP

40mm wide, strong, and powerful cam-lock strap, or a Powerstrap - Durable Velcro Powerstraps in varying widths for support and strength on all other models

CUFF ALIGNMENT INDEX

Dual sided cuff alignment for +/-2 degrees of cuff adjustment.

ALLOY BUCKLES

6060-T6 Extruded Hardened Aluminum Alloy built with a minimalist lightweight design.

Spyne 130

precisionfit
INTUITION

K2's flagship All-Mountain performance powerhouse, fueled by the rivet-less Energy Interlock and reinforced by the Powerfuse SpYne. Offered in a 97mm(LV), 100mm or 102mm(HV) last, your foot width no longer determines the performance level of your boots. The high-end molded and lasted PrecisionFit INTUITION® liners and the PowerCinch Strap produce the highest performing ski boot in the collection with a true 130 flex for All-Mountain skiers.

Flex:	130
Last:	97mm (LV), 100mm, 102mm (HV)
Liner:	PrecisionFit INTUITION® (molded/lasted)
Sizes:	24.5, 25.5, 26.5, 27.5, 28.5, 29.5, 30.5

Energy Interlock, PowerFuse SpYne, Dual Cuff Alignment, Replaceable Outsoles, Padded Mid-Grip, 40mm PowerCinch Strap

Spyne 110

luxfit
INTUITION

Emphasizing a balance between performance and comfort, the Spyne 110 offers skiers a forgiving 110 flex on a high-performance platform. The LuxFit INTUITION® liner gives you a last fit with customizable areas for those who need it. The Spyne 110 offers all three last options at 97mm, 100mm and 102mm for a dialed fit without compromising any performance.

Flex:	110
Last:	97mm (LV), 100mm, 102mm (HV)
Liner:	LuxFit INTUITION® (lasted)
Sizes:	24.5, 25.5, 26.5, 27.5, 28.5, 29.5, 30.5

Energy Interlock, PowerFuse SpYne, Dual Cuff Alignment, Replaceable Outsoles, Padded Mid-Grip, 45mm Velcro Powerstrap

Spyne 90

cushfit
INTUITION

The most forgiving men's All-Mountain boot in the line is built with a 90 Flex, 102mm last and incorporates the CushFit INTUITION® liner to ensure the most comfortable fit. The fully replaceable outsoles provide an added level of durability and color pop on this stealthy looking boots.

Flex:	90
Last:	102mm
Liner:	CushFit INTUITION® (lasted)
Sizes:	24.5, 25.5, 26.5, 27.5, 28.5, 29.5, 30.5

Replaceable Outsoles, 45mm Velcro Powerstrap, Dual Cuff Alignment

A woman's lower leg and foot shape is fundamentally different than a man's. To ensure the best, most comfortable and precise fit, we designed a women's specific last that is:

- A.) LOWER VOLUME
- B.) NARROWER IN THE HEEL
- C.) 15MM LOWER CUFF HEIGHT TO ACCOMMODATE A WOMAN'S LOWER CALF INSERT POINT

Spyre 110

The Spyre 110, featuring a women's specific last, is the most aggressive, highest performing, stiffest boot in the collection. It is made for expert women with the Energy Interlock, PowerFuse SpYne, and a molded and lasted PrecisionFit INTUITION® liner. Now offered in a 97mm (LV) and 100mm last to accommodate more foot shapes and widths.

Flex:	110
Last:	97mm (LV), 100mm
Liner:	PrecisionFit INTUITION® (molded/lasted)
Sizes:	22.5, 23.5, 24.5, 25.5, 26.5, 27.5

Energy Interlock, PowerFuse SpYne, Dual Cuff Alignment, Replaceable Outsoles, Padded Mid-Grip, 35mm Velcro Powerstrap

Spyre 100

Offering a forgiving yet powerful 100 flex on the highest performance platform. The Spyre 100 is matched with higher volume last options, 100mm or 102mm, LuxFit INTUITION® liners, replaceable outsoles and padded mid-grips for all day comfort and performance.

Flex:	100
Last:	100mm, 102mm (HV)
Liner:	LuxFit INTUITION® (lasted)
Sizes:	22.5, 23.5, 24.5, 25.5, 26.5, 27.5

Energy Interlock, PowerFuse SpYne, Dual Cuff Alignment, Replaceable Outsoles, Padded Mid-Grip, 35mm Velcro Powerstrap

Spyre 80

The SpYre 80 is the most forgiving boot in the women's line. The high volume 102mm last combined with the CushFit INTUITION® liner takes home the award for the most comfortable fit.

Flex:	80
Last:	102mm
Liner:	CushFit INTUITION® (lasted)
Sizes:	23.5, 24.5, 25.5, 26.5, 27.5

Replaceable Outsoles, Dual Cuff Alignment, 35mm Velcro Powerstrap

VERSATILITY UP AND DOWN THE HILL

Since K2 Ski Boots are designed with the Energy Interlock, not rivets, we are able to add a functional walk mode, the Synchro Interlock, that maintains 100% of the flex index, resulting in a collection of freeride boots with efficient walk capabilities and uncompromised All-Mountain performance.

synchrointerlock

Innovative Walk-Mode Feature

WHEN DISENGAGED

- 1 Unlocks the upper cuff from the lower shell for fore aft mobility.
- 2 Removes the wedge and opens the V-notch in the shell which increases the forward flex for more efficient movement.

WHEN ENGAGED

Functionally creates an all-mountain boot, with 100% of the flex index and uncompromised downhill performance.

FREERIDE INTUITION® LINER CONSTRUCTION

All liners are made with INTUITION® foam renowned for its moldability, flexibility and durability. The thermo-forming, cross-linked, closed cell foam is more resistant to heat-related shrinkage and packing out than any other foam in the world.

precisionfit TOUR
INTUITION®

Our premium, heat-moldable liner with the addition of Tour Flex Notches at the main hinge points for a natural flex and optimized range of motion when in walk mode.

FEATURES:

Molded/Lasted Design, Lace-up eyelets, Multi-Layer INTUITION® Foam Lower, Moldable Asymmetric Tongue, Power Collar, Power Wedge

luxfit TOUR
INTUITION®

Strategically combined heat-moldable, INTUITION® foam and traditional PVC liner with the added benefit of Tour Flex Notches at the main hinge points for optimized range of motion and comfort.

FEATURES:

Lasted Design, Lace-up eyelets, Multi-Layer INTUITION® Foam Lower, Strategically placed EVA Foam, Moldable Asymmetric Tongue, Power Collar, Power Wedge

cushfit TOUR
INTUITION®

The combination of standard open and closed cell EVA foam with INTUITION® around the heel for warmth, comfort, and performance as well as Tour Flex Notches for walk mode.

FEATURES:

Lasted Design, INTUITION® Foam in ankle pockets, Asymmetric Tongue, Power Collar, Tour Flex Notches

ADDITIONAL TECH

POWERBUCKLE

Extra-wide powerstrap transforming the three-buckle boot design into a four-buckle, hard-charging Freeride boot.

WIDER THIRD BUCKLE

A wider catch and ladder for a more secure fit and keeps your catch in place when your boots are unbuckled in walk mode.

INTEGRATED TECH FITTINGS

Fully integrated into the shell injection, instead of just the outsole pods, makes our outsoles compatible with both DIN-alpine and Tech bindings.

REPLACEABLE DIN-COMPATIBLE OUTSOLES

DIN-compatible eliminates having to swap your outsoles for different binding setups.

VIBRAM® ROCKER OUTSOLES

Vibram® ISO 9523 rubber touring sole upgrade available for added grip, traction and security when climbing or hiking more technical terrain. Sold separately.

Pinnacle 130

precisionfit
INTUITION

The Pinnacle 130 is the highest performance freeride boot in the collection. It combines the power of a high performance alpine boot with the range of motion of a touring boot, thanks to the innovative K2 Synchro Interlock. Furthermore, the fit and function of the molded/lasted PrecisionFit Tour INTUITION® liners offer top-level performance without compromising warmth or comfort.

Flex:	130
Last:	97mm (LV), 100mm
Liner:	PrecisionFit Tour INTUITION® (molded/lasted) Tour Flex Notch
Sizes:	25.5, 26.5, 27.5, 28.5, 29.5, 30.5

Synchro Interlock, PowerFuse SpYne, Integrated Tech Fittings, Cuff Alignment, Replaceable DIN-Compatible Outsoles, Padded Mid-Grip, 45mm K2 Memory Power-Buckle, Vibram® ISO 9523 Rocker Touring Outsoles Upgrade

Pinnacle 110

luxfit
INTUITION

The Pinnacle 110 features the same Synchro Interlock that gives the Pinnacle 130 exceptional skiing and walking performance, but in a slightly more forgiving 110 flex. The boot features a new velcro adjust Power Buckle for added performance. When you combine the 100mm or the wider HV 102mm last, with the warm, comfortable lasted LuxFit Tour INTUITION® liner, you're rewarded with a custom-fit boot that you can leave buckled until the final bell.

LOW PROFILE LIGHT WEIGHT

K2's 2015/16 Helmet collection offers optimal ventilation solutions, lightweight designs, excellent goggle compatibility and a diverse pallet of colors to match your individual style. Protection and comfort drive the technological advancements in our helmet offering. Achieving the perfect fit is essential to comfort and function, and with the innovative K2 fit systems you will discover the plush customizable fit for your head, as well as seamless integration with our goggles.

MAGNA STRAP

New magnetic retention clip that easily flips up and over the goggle strap for a secure hold that you don't have to fumble for.

LINER

CONVERTIBLE FULL-WRAP LINER

Same coverage as a full-wrap liner but easily pops out, leaving the fit system and minimal padding to accommodate wearing a thin beanie while retaining the helmet's fit system.

FULL-WRAP LINER

A comfortable, washable, full-coverage, breathable liner design that wicks away moisture to prevent overheating and seamlessly integrates with 360 K2dialed™ Fit Systems and K2 Baseline Audio.

INTEGRATED AUDIO

BASELINE AUDIO SYSTEMS

Pre-installed ear pads with a low-profile speaker that easily connects to your mobile device without hindering the fit or comfort. The on-cord controller is designed for on-the-go usability at your fingertips for talk or tunes.

BLUE TOOTH OPTIONS:

All K2 Helmets now are compatible with the Outdoor Tech® Blue Tooth audio system, as well as other after-market audio options.

VENTING

DUAL ACTIVE MATRIX VENTING

Perfect combination of user/switch regulated Active Matrix Venting and integrated Passive Channel Venting.

ACTIVE MATRIX VENTING

Climate control at the flip of a switch, Active Matrix Venting allows you to regulate the airflow of the helmet vent system with the push of a finger.

PASSIVE CHANNEL VENTING

Channels on the inside surface of the EPS direct air-flow between your head and the helmet, removing moisture and excess heat for all day comfort.

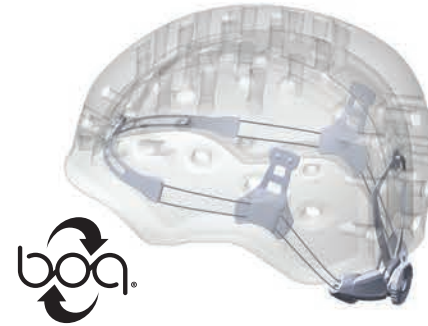

DUAL ACTIVE MATRIX

ACTIVE MATRIX

PASSIVE CHANNEL

FIT SYSTEMS

BOA® FS360 FIT SYSTEM

This has all the benefits of the 360 K2dialed™ Fit System with the precision and quality that you have come to know and expect from Boa® Technologies.

360 K2DIALED™ FIT SYSTEM

The 360 K2DIALED™ Fit System is an evolution of the K2dialed™ Fit System, delivering unparalleled comfort around your entire head. An intricate web design results in 360 degrees of even pressure distribution for a secure and snug fit that you customize with the twist of a dial.

K2DIALED™ FIT SYSTEM

The K2dialed™ Fit System creates a custom-fitting helmet no matter what your head shape. An ergonomically inspired three-point adjustable interface maximizes fit and customization with the twist of a dial. This allows for the ultimate convenience of being able to make fit adjustments on the fly.

CONSTRUCTION

HYBRID CONSTRUCTION

This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for more advanced Active Matrix Venting™ and increased durability.

IN-MOLD CONSTRUCTION

In-Mold is the premium construction for ultra-lightweight performance and is characterized by an EPS liner that is molded directly to a lightweight poly-carbonate (PC) shell. The result is a construction so light you'll forget it's even there.

HARD SHELL CONSTRUCTION

Hard-Shell helmets are built to last and will look good no matter how many trips they make in and out of your gear bag. Hard-Shell helmets protect you from impact thanks to lightweight EPS foam bonded to an injection molded and durable ABS shell.

CERTIFICATION

ASTM (F2040): The North American ski and snowboard helmet safety standard.
 CE (EN1077: 2007 Class B): The European ski and snowboard helmet safety standard.
 ROUTE, THRIVE, STASH, VERDICT, MERIDIAN & ENTITY also compliant with:
 CPSC 16 CFR 1203: The North American bicycle helmet safety standard.
 CE (EN1078): The European bicycle and skateboard helmet safety standard.

Diversion

Best in class for fit, function and style. The Diversion is the only Men's model that offers a Hybrid construction to keep it lightweight yet highly durable. The Diversion features the Active Matrix Venting system for enhanced control of temperature and airflow. Beyond customizing ventilation, users also achieve a customized fit through the integration of the 360 K2dialed™ Fit System. Complete with a Baseline Audio System, the Diversion has your helmet needs covered.

Construction:	Hybrid
Sizes:	Small (51-55cm), Med (55-59cm), L/XL (59-62cm)
Colors:	Green, Gray, Black
Weight:	430g
Features:	Dual Active Matrix Venting, 360 K2Dialed™ Fit System, Washable Full-Wrap Liner System, Baseline Audio System
Certification:	ASTM F2040, EN1077:2007 CLASS B

Route

The lightest snow helmet on the market at a mere 320 grams, the Route is quickly gaining attention for its lightweight, highly ventilated design that won't overheat or weigh you down. The PowFly™ will keep you covered in stormy weather and the Boa® FS360 fit system will cradle any size or shape of head, whether you choose to wear a thin beanie or not. Removable ear pads and side-mounted clips (for goggles and headlamp) allow for tool-free, on-the-go versatility. Bike and snow certified.

Construction:	In-Mold
Sizes:	Small (51-55cm), Med (55-59cm), L/XL (59-62cm)
Colors:	Black, Green, White
Weight:	320g
Features:	Passive Channel Venting, 360 BOA® dialed Fit System, Tool Free Removable Goggle & Headlamp Clips, Removable Earpads, Pow Fly
Certification:	ASTM F2040, EN1077: 2007 Class B, CPSC 16 CFR 1203, EN1078: 2012+A1:2013

Stash

Matching the requirements of fit, style, functionality and use, the new Stash makes a bold introduction as the newest member of the K2 Helmet collection. The lightweight Stash unveils new features such as the convertible full-wrap liner, granting those who prefer to wear a thin beanie the ability to pop out the liner but still reap the benefits of the 360 K2dialed™ Fit System. The magnetic strap on the goggle clip makes fumbling with your goggle strap behind your head a thing of the past. Also bike certified, the Stash is ready for any adventure, may it be on skis or wheels.

Construction:	In-Mold
Sizes:	Small (51-55cm), Med (55-59cm), L/XL (59-62cm)
Colors:	White, Black, Smoke, Moss, Lightning Blue
Weight:	380g
Features:	Passive Channel Ventilation, 360 K2dialed™ Fit System, Convertible Full-Wrap Liner System, Baseline Audio System, Magna-Snap Goggle Clip
Certification:	CPSC 16 CFR 1203, EN1078: 2012, ASTM F2040, EN1077: 2007 Class B

Rival

The fine art of simplicity takes on a style of its own with minimal weight. The streamlined design of the Rival leaves the helmet feeling light and unobtrusive while staying comfortable and protective. It is the easy choice for a simple helmet that keeps you safe and looking good on the hill.

Construction:	In-Mold
Sizes:	Small (51-55cm), Med (55-59cm), L/XL (59-62cm)
Colors:	Gray, Black, Red
Weight:	394g
Features:	Passive Channel Venting, 360 K2dialed™ Fit System, Washable Full Wrap Liner
Certification:	ASTM F2040, EN1077: 2007 Class B

Phase Pro

The Phase Pro offers a low profile, hard-shell design and clean style that provide safety and comfort. The comfort is discovered with the combination the Active Matrix Ventilation and the perfect fit of the K2dialed™ Fit System. The seamlessly integrated K2 Baseline Audio System lets you call your boss on a “sick day”, and keeps your music flowing too.

Construction:	Hard-Shell
Sizes:	Small (51-55cm), Med (55-59cm), L/XL (59-62cm)
Colors:	Bleached Orange, White, Blackout, Blue, Navy Blue, Black/Red
Weight:	490g
Features:	Active Matrix Ventilation, K2dialed™ Fit System, washable Full-Wrap Liner System, Tool free removable goggle strap, Baseline Audio System

FACE FIT FOAM

1 DUAL DENSITY + ULTRA PLUSH MICRO FLEECE

Tow densities of foam for comfort and stability while K2's UltraPlush Micro Fleece fabric that wicks moisture and delivers the highest level of coziness for your cheeks.

2 DUAL DENSITY MICRO FLEECE

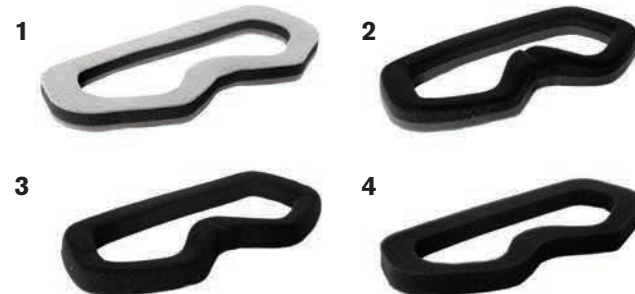

The ultra cozy two densities of foam provide both comfort and stability that is topped off with comfy Micro Fleece fabric.

3 SINGLE DENSITY + ULTRAPLUSH MICRO FLEECE

Premium grade compression foam with a Micro Fleece laminate keeps snow out and your goggles comfortably seated on your face.

4 SINGLE DENSITY

Premium grade compression foam bonded to the frame with a fit necessary to keep your focus on the hill, not on your gear.

LENS TECHNOLOGY

All K2 lenses are double layer, spherical hard-coated lenses with industry leading anti-fog treatments, 100% UVA/B/C protection and Grade 1 certified optics. K2 Goggles use high performance lenses for enhanced vision and style. Many of our goggles feature Lenses by ZEISS complete with Ri-Pel coatings, a trusted optics brand and technology for maximum performance and field of vision in any condition.

RI-PEL®

Ri-Pel® is a hydrophobic coating that is applied to each one of our ZEISS lens offerings. It is designed to minimize scratching and smudging, expel residue from water, sweat and fingerprints; as well as enhance overall visibility. Ri-Pel offers the necessary lens protection to keep you on the hill all day long in any condition.

LENSES BY

ZEISS

The creators of the world's most advanced optics bring their incredible quality and experience to the optics of K2 Goggles. Each lens is made of a tough polycarbonate and treated with a hard-coating for superior performance and extreme scratch resistance.

Sonar™

by ZEISS®

A sophisticated lens tint designed specifically to offer maximum contrast and visibility across the largest possible range of light conditions. If you want one lens that works great in nearly all light conditions, look no further than our Sonar Lenses by ZEISS.

 Features: LockJaw Adjustable Mechanism, Bubble Inclinometer (measures slope angle)

Speedlink 135/125

Grip: Ultra Lightweight Adventure Grip with Utility Hook
 Strap: Sewn Ergo Straps
 Shaft: Adjustable- 7075 Aluminum
 Basket: Ultra Packable Powder Baskets
 Tip: Carbide
 Sizes: 135: 105-135cm- Adjustable, and 125: 95-125cm- Adjustable
 Features: New stiffer and stronger 3-piece Speedlink system for extending/collapsing, LockJaw Adjustable Mechanism with secure pins for retracting on the fly, Bubble Inclinometer, Extended Grip Sleeve

All Season Speedlink Kit

Seems crazy to store two sets of backcountry poles in your gear shed for the winter and summer. Now with the new All-Season Speedlink kit you can easily change up the tips and baskets, without any tools, to make them compatible for backcountry exploration in the summer or winter.
 Features: 2 Rubber Summer Tips, 2 Mini Baskets for Summer Travel

Shaxe Rescue Shovel Plus Ice Axe

What do you get when you combine an ice axe and a K2 Rescue Shovel Plus? The Shaxe, of course! The rescue shovel comes with an interchangeable ice axe head that meets CE standards for B-rated ice axes. It will save weight and space in your pack, and comes with the rescue kit hardware for sled construction.

Weight:	Shovel Only- 670 grams
	Ice Axe Head only- 180 grams
	Ice Axe Head Pouch - 300 grams
	Ice Axe only- 365 grams
	Rescue Sled Hardware: 60g
	Ice Axe- 50cm long (19 3/4")
Handle Length:	Shovel Handle Length- 41cm (16")
Blade Dimensions:	Shovel Blade- 25cm X 28cm (9 1/2" X 11")

Rescue Shovel Plus

Durability builds trust, a key component of our backside collection. Combining the powers for utility and durability, the Rescue Shovel Plus features a heat-treated aluminum platform and 6061 T6 shaft to host the multi-uses of shoveling, hoe mode, an emergency sled, a deadman anchor or a flat platform for your stove.

Weight:	795g
	Rescue Sled Hardware(additional option): 60g
Handle Length:	Extended 64cm (25 1/4"), Collapsed 41cm (16")
Blade Dimensions:	25cm x 28cm (9 1/2" x 11")

RESCUE SLED: When combined with certain K2 skis, all shovel parts can be used to quickly build a backcountry rescue sled. The Rescue Shovel Plus and Shaxe come with the hardware included in the shaft and/or pouch, or the Rescue Kit can also be purchased separately.

Rescue Shovel

Does everything our Rescue Shovel Plus does—works as a hoe, deadman anchor or stove platform—but doesn't come with the hardware for building a rescue sled. You can add the Rescue Kit hardware later if desired.

Weight:	795g
Handle Length:	Extended 64cm (25 1/4"), Collapsed 41cm (16")
Blade Dimensions:	25cm x 28cm (9 1/2" x 11")

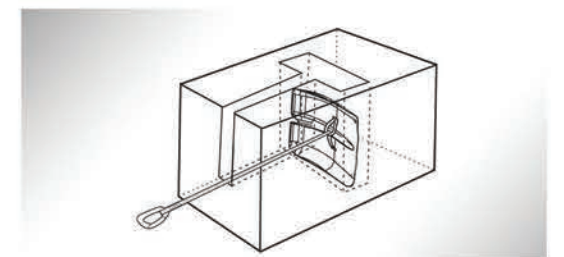

HOE MODE: Shovel blade can be used at a 90-degree angle, which is ideal for moving lots of snow quickly, as well as shovel shear tests (Rescue Shovel and Rescue Shovel Plus only).

Speed Shovel

Built with a lightweight "T" handle for comfort and efficiency, but with the same durable blade and shaft construction of our Rescue Shovel. The ideal minimalist, lightweight solution to your shoveling needs.

Weight:	700g
Handle Length:	Extended 64cm (25 1/4"), Collapsed 41cm (16")
Blade Dimensions:	25cm x 28cm (9 1/2" x 11")

DEAD MAN ANCHOR: Removing the flat blade from the shovel and attaching a sling or accessory cord to it provides a sturdy anchor in the backcountry.

Avalanche Probes

K2 probes are as light as anything else on the market, but more importantly, they're among the strongest and stiffest available, making them less prone to deflecting and breaking in hard, uneven avalanche debris. Available in either a super lightweight carbon or durable aluminum construction, both are offered in either 230cm or 300cm lengths.

Length: Extended 300cm/Packed size: 42cm or Extended 230cm/Packed size: 42cm
 Weight: 300cm Carbon: 290g, 230cm Carbon: 230g, 300cm Alu: 360g, 230cm Alu: 280g

ADDITIONAL TECH

RULER
 1 cm markings for precise recording of snow pit data.

BACKSIDE AUTO LOCK
 Secure auto-locking hardware and non-slip textured shaft allow for easy assembly with gloved hands.

TRIGGER PULL HANDLE
 A secure handle for deployment of the probe also keeps the probe packaged neatly when not in use.

Climbing Skins

K2 Skins are made with Pomoca 70% Mohair Blend for the best combination of glide, grip, glue and durability. Available in either pre-cut or trim-to-fit versions, K2 Skins are super easy to prepare and get ready for a tour.

ADDITIONAL TECH

TRIM TO FIT SKINS
 Available in 125mm and 150 mm widths, K2's Trim-to-Fit skins come with our Offset Skin Cutter that makes trimming skins quick and easy. These skins come with a new universal attachment to accommodate any skins within these measurements:

125mm Width: Works for skins with a tip width of 131mm and narrower.

150mm Width: Works for skins with a tip width narrower than 156mm.

Compatible with these K2 Skis: Pinnacle 118, Pinnacle 105, Pinnacle 95, Shreditor 120, Shreditor 112, Shreditor 102, Luv Boat 108, FullUVit 98Ti, Remedy 112, Remedy 102

Z-CLIP/ UNIVERSAL SKIN CONNECTION KIT
 A Z-clip connection kit is available to convert the new universal attachment to the K2 Z-clip system that integrates with the K2 Backside tip and tail grommets.

Z CLIP ATTACHMENT
 Precision-cut skins are ready to tour on all our Backside skins, right out of the box, with the Z-Tip and adjustable tail strap that seamlessly integrates with K2's tip and tail grommets.

UNIVERSAL ATTACHMENT
 K2 Trim-To-Fit skins now come with low profile self centering universal tip hooks and tail clasp that can be used on any ski.

SKIN CUTTER
 Our skin cutter comes with K2's trim-to-fit skins to make the process easy, fast and in the convenience of your own home.

MULTI-FUNCTIONAL SAFETY

With the steady rise in backcountry travel, more and more people have started carrying airbag backpacks to stay safe. In the unfortunate occurrence of an avalanche, preventing or minimizing burial depth is a key component to reducing fatalities. An airbag is intended to keep you at or near the surface to minimize excavation time and provide additional trauma protection. K2 teams up with BCA to integrate a market-leading float system into the highest quality packs designed for the K2 Skier or Snowboarder.

FLOAT BAG TECHNOLOGY

- 1 GOGGLE POCKET**
Fleece-lined goggle pocket allows for easy access to your goggles without completely taking off your pack. Goggles slide into the arced pocket opening, matching the contoured back panel shape with the curvature of its lenses. When not in use for goggles, it provides as easy access storage for a 32oz/ 1 Liter water bottle.
- 2 INTERNAL TOOL POCKET**
Large wet storage tool pocket stores avi tools and climbing skins. The long pocket length and full length zip makes for easy in and out of climbing skins without having to fold them more than twice. Dedicated tool sleeves have heavy-duty tarpaulin bottom caps to protect the tools and the pack. A bottom moisture drain hole doubles as a large ice axe storage slot to allow the shaft and spike to protrude below the pack and stay clear of the air bag.
- 3 HELMET HOLDER**
Helmet sling easily deploys from Velcro pocket and can be used in standard location or diagonal ski carry location at the upper right corner.
- 4 ICE AXE SHEATH**
Clean and simple Ice axe storage with the pick in protective sheath.
- 5 COMPRESSED AIR**
2,700psi compressed air, a single-chamber airbag and patented super-efficient venturi system, can be refilled at certified K2/BCA refill locations.
- 6 MOLDED BACK PANEL**
Shaped back panel is designed to naturally match the contour of your back for best possible off the shelf fit, supported by reinforced metal stays which can be formed for a customized fit.
- 7 WAIST BELT STASH POCKETS**
On both sides of the adjustable waist belt are ample stash pockets to hold things you need to get to quickly while on the move: tools, gloves, energy bar or a camera.
- 8 HYDRATION SLEEVE**
The airbag trigger and hydration hose can be used on alternate shoulders and may be switched for personal preference. The hydration sleeve is insulated to keep the fluid flowing and uses a double zipper so you can locate the valve where you want it with minimal exposure to the cold.
- 9 SHOULDER STRAPS**
Shaped back panel is designed to naturally match the contour of your back for best possible off the shelf fit, supported by reinforced metal stays which can be formed for a customized fit.
- 10 SKI AND SNOWBOARD CARRY**
Proper adjustable straps and compression for a secure diagonal ski carry or a horizontal board carry.

Float 30

The largest offering from the K2 Float packs, the Float 30 hosts a 30-liter bag with the biggest main compartment for very long day tours, overnight excursions or guides carrying group gear.

Colors:	Black
Volume:	30 Liters/1830 Cubic Inches
Weight:	2kg/4.4 lbs
Airbag System:	0.77 kg / 1.69 lbs
Cylinder:	0.57 kg / 1.25 lbs
Materials:	100% Nylon Exterior/Lining/Webbing, 420D Ballistic/210D RipStop Cordura exterior with DWR and PU coated backing, Fully-lined Compartments
Features:	Molded Back Panel, Ski & Snowboard Carry, Shoulder Straps, Helmet Holder, Ice Axe Sheath, Goggle Pocket, Waist Belt Stash Pocket, Hydration Sleeve, Internal Tool Pocket

Float 15

The Float 15 features the same carry and organizational layout as the Float 30, just with half the volume in the main compartment. Despite the decreased volume, this pack, surprisingly, has plenty of room left for more snacks or layers, even after packing your essential backcountry gear.

Colors:	Silver
Volume:	15 Liter / 915 cubic inches
Weight:	1.9 kg / 4.2 lbs
Airbag System:	0.77 kg / 1.69 lbs
Cylinder:	0.57 kg / 1.25 lbs
Materials:	100% Nylon Exterior/Lining/Webbing, 420D Ballistic/210D RipStop Cordura exterior with DWR and PU coated backing, Fully-lined Compartments
Features:	Molded Back Panel, Ski & Snowboard Carry, Shoulder Straps, Helmet Holder, Ice Axe Sheath, Goggle Pocket, Waist Belt Stash Pocket, Hydration Sleeve, Internal Tool Pocket

Float 8

Designed to fit all your gear to the tee without any extra space. Ideal for those with assisted access into the backcountry via heli or lift to out of bounds. Our goal was to create a super lightweight airbag with the smallest possible profile to ride the lift, but still have space to pack the essentials.

Colors:	Charcoal/Orange
Volume:	8 Liters / 488 cubic inches
Weight:	1.5 kg / 3.3 lbs
Airbag System:	0.77 kg / 1.69 lbs
Cylinder:	0.57 kg / 1.25 lbs
Materials:	100% Nylon Exterior/Webbing, RipStop Cordura with DWR and PU coated backing
Features:	Helmet Holder, Ski & Snowboard Carry, Poles Attachment, Shovel/Probe Internal Sleeves, Clam Shell Easy Access, 15 Liter Conversion Option

BackSide 24

Focused on every detail to make adventures into the back and side country as efficient and comfortable as possible. The 24-liter pack is built with none of the excess and all of what is required on a single day tour. Very similar design and layout as the Float bags, without the airbag, the Backside 24 guarantees a comfortable fit, easy carry and dedicated compartments for tools. The compartments are intelligently designed to isolate tools and climbing skins from the main compartment where extra layers and food can be kept dry. The added "Clear View" pocket makes it easy to find small items like your multi-tool or extra batteries.

Features: Storage, Ski & Snowboard Carry, Goggle Storage, 2 Position Helmet Holder, Ice Axe Storage, Molded Back Board

Colors: Black

Volume: 24 Liters

Weight: 1.3kg / 2.8 lb

Materials: 420D/210D Cordura Nylon exterior with DWR and PU coated backing

BackSide 24 Kit

When pushing the limits and seeking access into the backcountry the perfect pack can only get you so far; the goods inside the pack matter too. K2 has designed a kitted pack that perfectly fits everything you need for a safe day in the backcountry. The 24-liter Backside pack comes complete with some of the best tools in the collection including the Rescue Shovel with a hoe mode and a 230cm Aluminum Probe. Since the pack was designed to accommodate these exact tools, you are not only getting a one-stop deal, but a system that works together for added comfort, efficiency and ease of use.

Features: Rescue Shovel with Hoe Mode, 230cm Avalanche Probe, Goggle Storage, Dedicated Tool Pocket, 2 Position Helmet Holder, Insulated Hydration Sleeve, Diagonal or A-Frame Ski Carry, Ice Axe Storage, Molded Back Board

Colors: Black

Volume: 24 Liters

Weight: 1.3kg / 2.8 lb + Rescue Shovel (795g) and 230cm Avalanche Probe (280g)

Materials: 420D/210D Cordura Nylon exterior with DWR and PU coated backing

Jefferson Pack

Everyone needs a solid day pack designed for off-hill activities. The Jefferson pack, complete with both a padded laptop sleeve and skateboard mounting system, is the perfect pack for tackling the daily grind.

Features: Storage Ski & Snowboard carry, goggle storage helmet sling, ice axe storage, back board, waist belt, shoulder straps

Colors: Olive, Black

Volume: 15 Liters

Mountain Roller

The Mountain Roller is ready to roll into any destination your skiing addiction takes you and makes the transport easy with large multi-compartments to pack all your gear for the mountain and then enough room for plenty of winter clothes to hit the town after.

Dimensions: 75cm x 40cm x 44cm

Colors: Black

Volume: 107 Liters

Mountain Duffel

A slightly smaller version of the Mountain Roller, the Mountain Duffel is large enough for all your gear. Featuring a reinforced bottom and reliable shoulder strap to withstand any length of journey from weekend ski trips to powder-chasing road trips.

Dimensions: 71cm x 38cm x 40cm

Colors: Black

Volume: 102 Liters

All Ski Roller Bag

Ski travel is great when you get there, but lugging heavy gear through the airport, not so much. Make it that much easier with this All Ski Roller Bag. It fits two pairs of skis, poles, boots, ski clothing and extra room for smuggling back all those duty free goodies.

Colors: Black
Size: 140L - 190cm + 20cm Adjustment

All Ski Roller Lite Bag

This roller will fit two pair of skis, poles, boots and your ski clothing to a tee, easily making it your ski bag solution trip after trip.

Colors: Olive, Black
Size: 95L - 200cm

Deluxe Double Ski Bag

This durable bag has been tested time and time again and always comes out of the airport conveyor belt unscathed and looking strong. Fully padded and a beefy strap make it easy to carry the two pair of skis, poles and added gear it fits.

Colors: Black, Olive
Size: 76L - 180cm + 20cm Adjustment
69L - 160cm + 20cm Adjustment

Deluxe Single Ski Bag

The Deluxe Single Ski bag is all you need to haul your gear. An integrated shoulder strap makes it easy to move your skis, poles and other items from place to place in this fully padded bag.

Colors: Black, Olive
Size: 68L - 180cm + 20cm Adjustment

Simple Ski Bag 195cm & 175cm

The Simple Ski Bag makes it easy to pack the essentials for a ski trip: your skis and your poles.

Colors: Black, Olive
Size: 61L - 175cm, 195cm

Simple Ski Sleeve 195cm & 175cm

The simple sleeve is by far the most minimalistic, easiest transportation solution to traveling with one pair of skis and poles.

Colors: Black
Size: 60L - 175cm, 195cm

Deluxe Boot Helmet Bag

This fully padded carry-on-ready bag can be worn like a backpack and has the room to fit your boots, helmet and then some.

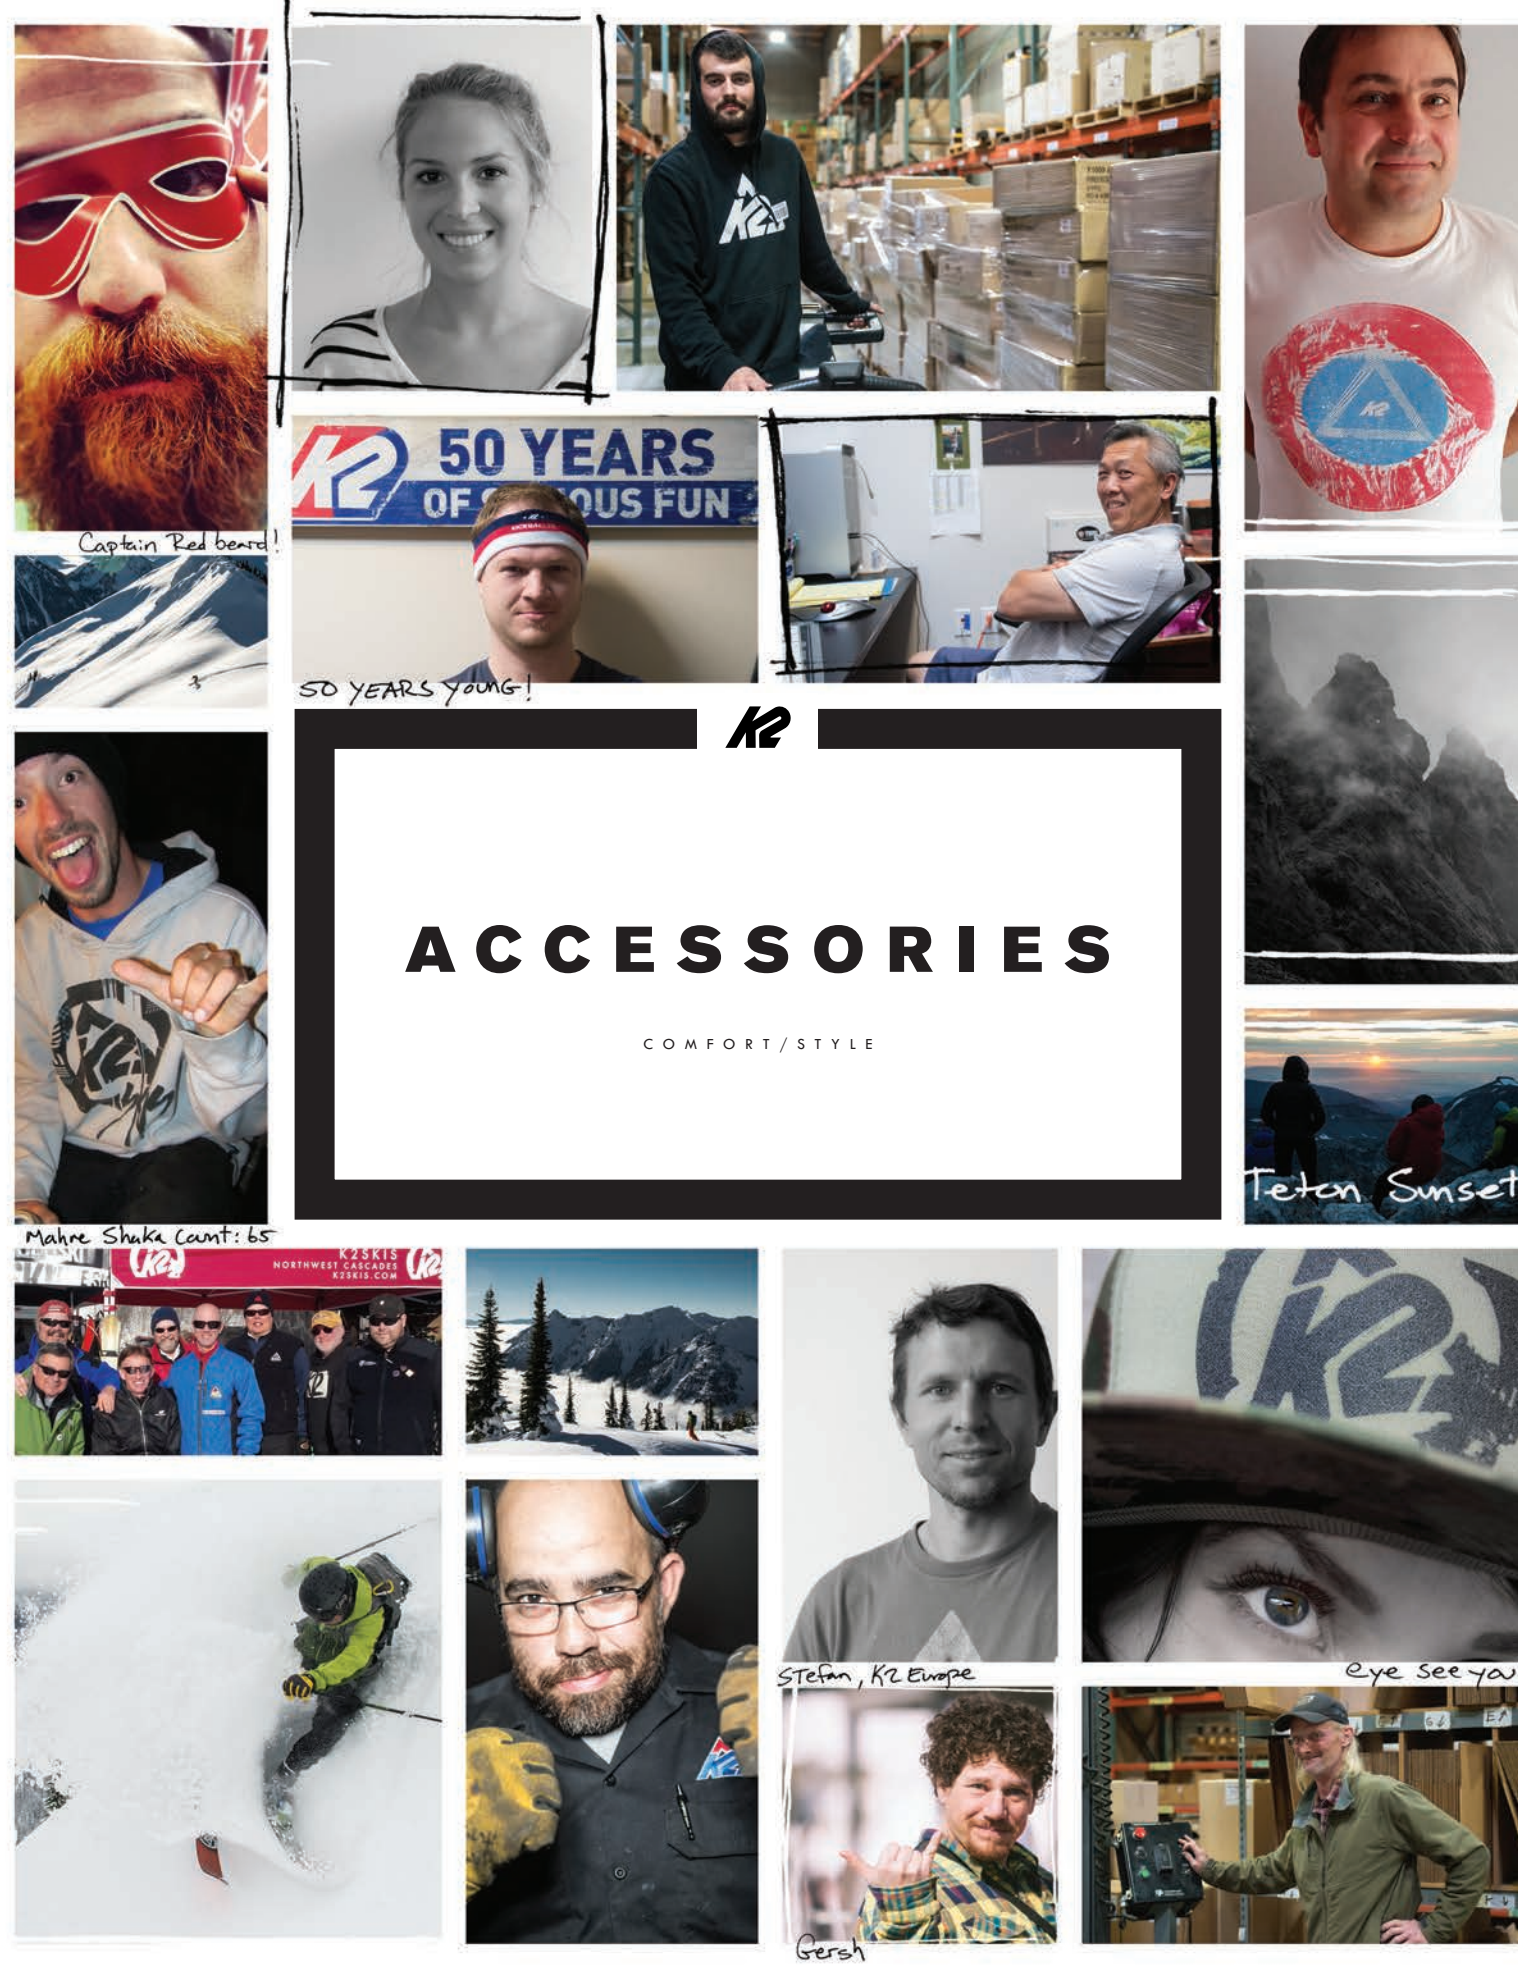

Dimensions: 24cm x 34cm x 45cm
 Colors: Olive, Black
 Size: 40 Liters

Boot Helmet Bag

Carry on your boots and helmet. This bag has the dimensions to safely store all your gear and still fit smoothly into overhead binds without any hassle.

Dimensions: 35.5cm x 23cm x 38cm
 Colors: Olive, Black
 Size: 29 Liters
