NAS MAGNE-TRACTION

NARROW ASS SNOWBOARDS SOLD AS SINGLES!

ALMOST EVERY SNOWBOARDER KNOWS SOMEONE OR HAS SEEN SOMEONE ON THE MOUNTAIN CARRYING TWO DANGEROUS HARPOONS. WE'VE OBSERVED THEM AFFIXING A SNOWBOARD TO EACH FOOT. MIKE WILSON AND TORY BLAND HELPED US DESIGN SOME NARROW ASS SNOWBOARDS SPECIFICALLY TAILORED TO THE NEEDS OF THESE HARPOONERS.

MAGNE-TRACTION: WIGGLES THAT WORK!

MTX 14: 7 SERRATIONS ON EACH SIDE, EACH WITH A SPECIFIC PURPOSE.

Magne-Traction shifts the control, edgehold, and power from your tip & tail to under your foot where your balance is centered. The nose and tail are no longer the primary tools used in turn initiation. The bumps in front and behind your feet are progressively less aggressive. This results in a more catch-free tip and tail, better control for freestyle tricks and less falls. The most aggressive bumps are under your feet for maximum edgehold and control where you need it.

- CATCH-FREE TIPS
- BETTER EDGEHOLD
- LESS FATIGUE
- MORE FUN

MAGNE-TRACTION FREESTYLE ADVANTAGE:

The extra edgehold you get allows you to ride your narrow ass boards de-tuned for the park and rails and still get great edgehold all over the mountain. Take a file and round your edges so they don't hang up on the rails, boxes or ledges. Then go ride everywhere!

CUT UP THE MOGULS LIKE CORD WOOD WITH OUR NEW CHAINSAW SIDECUT!

NAS PARK SERIES

SIZES: 156, 168, 176, 183

Freestyle, Bar, Ditch, and Wedge Narrow Ass Snowboards with Magne-Traction handcrafted by Lib Technologies near Canada in the USA. Designed by Mike Wilson.

NAS CONSTRUCTION:

MAGNE-TRACTION.75: Smooth riding! Turns ice into shave ice!

CORRECT SANDWICH: Low spin weight!

DUAL LAYER STP: Super Tough Polyamide top skin.

ULTRA HIGH MOLECULAR WEIGHT P.E. SPEED WALLS: Tough! Great wax retention.

ANVI-TECH DAMPING LAYER: Dampening!

NASKAR: Narrow-Ass Snowboard Kontrollered Active Response. Cores from hand-selected dead trees.

QUASI-ISOTROPIC FIBERGLASS POWER LAYERS: Strength, power, and pop!

STEEL (METAL) EDGES OTB: On The Bottom. Coming in hot!

SINTERED UHMW BASE: Fast!

PRO SET UP STANCE REFERENCE: What Mike and Tory ride.
