**The New Collection**

Season 2009-2010

photo: kornelphotography@gmail.com

We proudly present our new collection. In season 2009/2010 Majesty has launched new skis for ladies – LS, skis for juniors – JS and fat skis for reverse camber enthusiasts – VF. Of course we still have our core products - FS and BC skis. These skis represent what Majesty is all about.

 **Majesty**  
*09/10*

Recently we received a lot of inquiries concerning components of our skis. The most frequently asked question was: „What is the core of Majesty skis?“. After longer consideration we decided to reveal the secret.

-----  
Yes, our skis are made of wood!  
-----

For more information about specs of Majesty skis go to page no.2.

We care about the environment. Therefore we've decided to print our catalog on recycled newsprint paper.

# Majesty

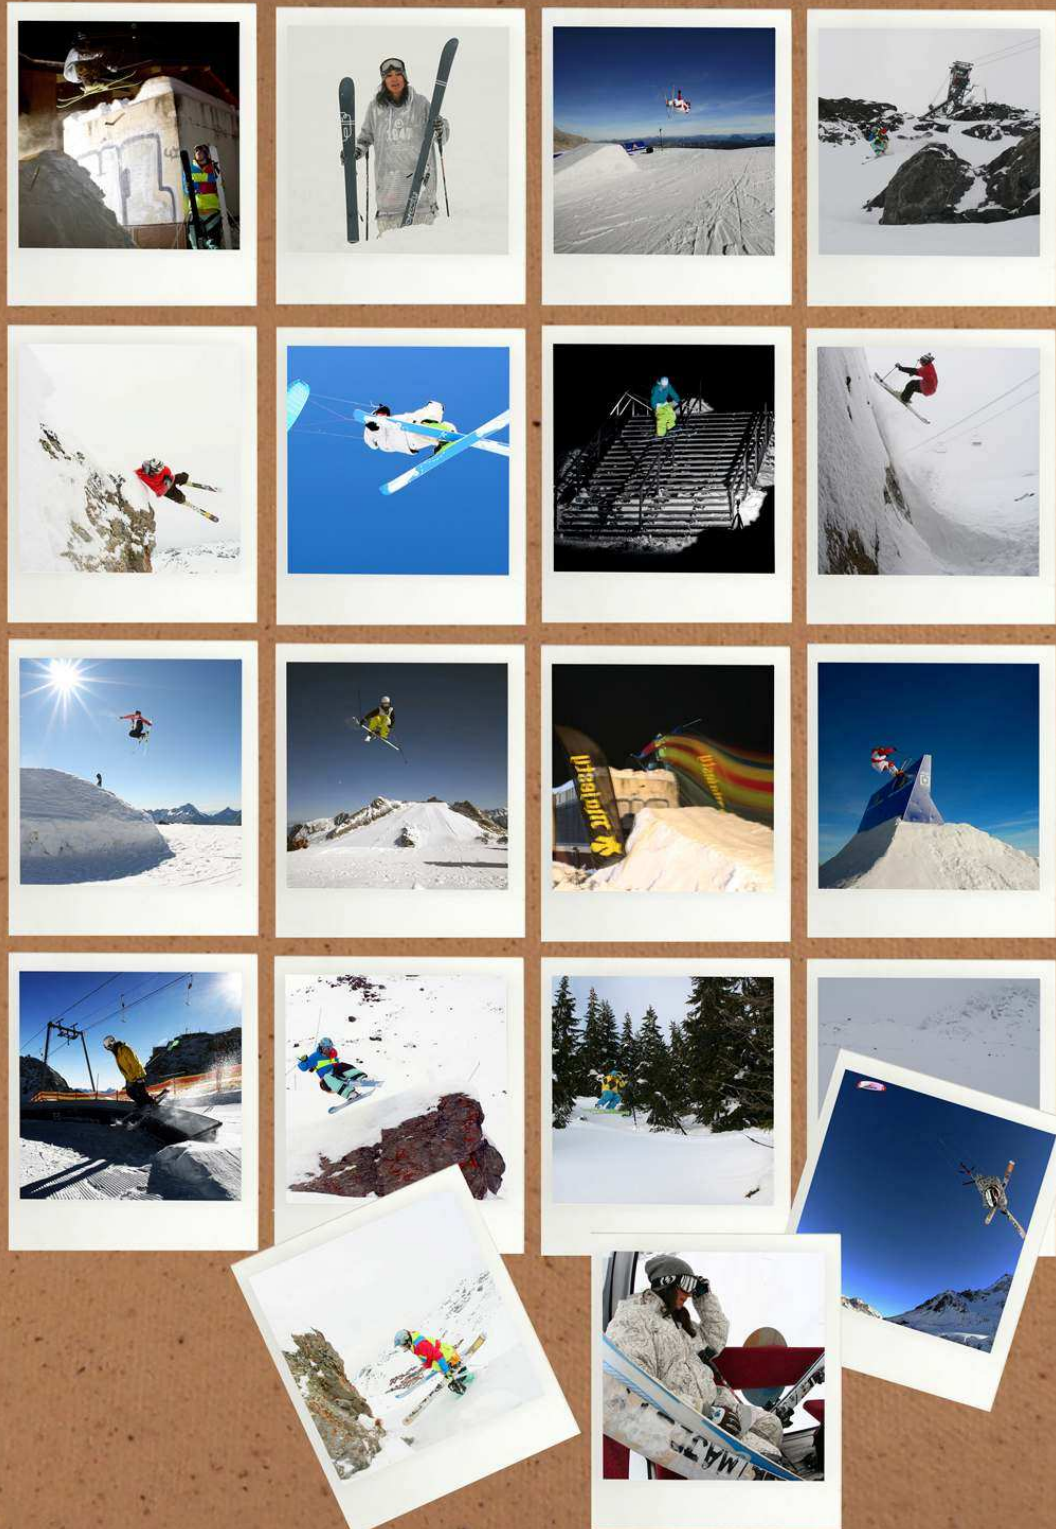

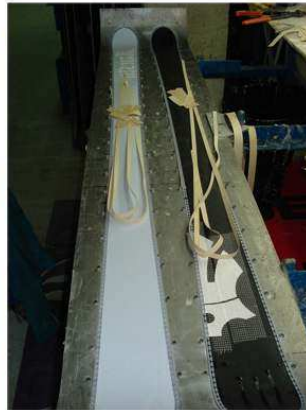

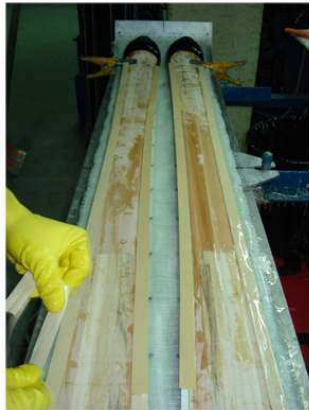

technology

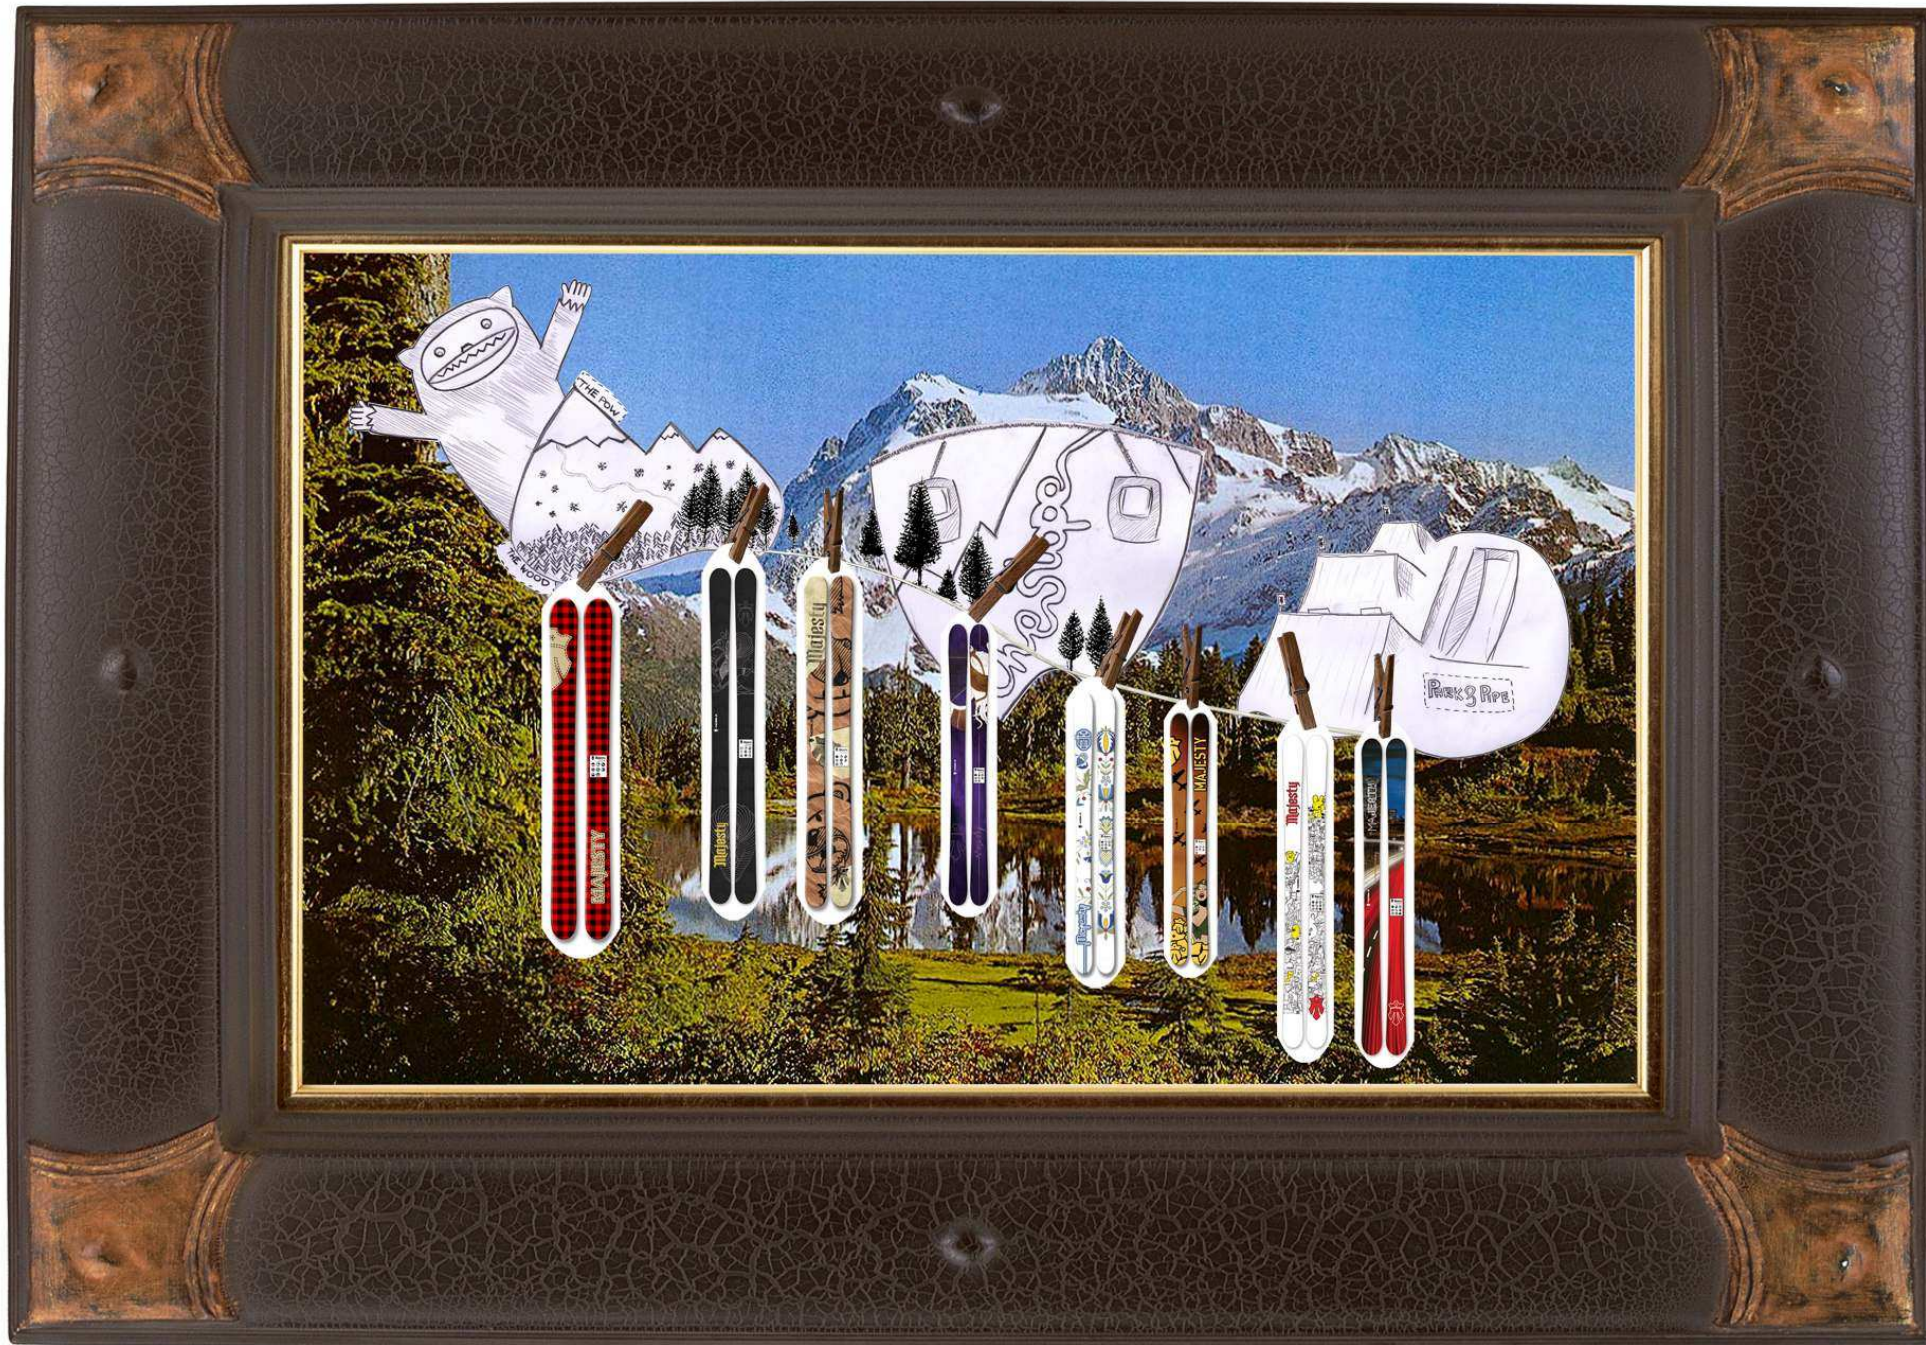

-  Real Twin Tip - Equal scoop, geometry and flex. Whatever you ride. Switch or normal.
-  90° ABS Sidewall - the toughest construction that keeps you edges stronger and safer.
-  2.5 mm edges - 2.5 mm steel „impact“ edge for rails in park.
-  High Quality Base - The unusual thick and race specific base is a perfect mix of durability and speed.
-  Carbon-Kevlar fiber stringers from tip to tail give increased pop and long life flex.
-  Shock Absorbers - tips, tails and binding section have extra protection of core structure.
-  Cat-back Profile - To take off and land with more confidence.
-  Leather top sheet - it doesn't change the performance but certainly makes it stylish.
-  Banana - reverse camber shape for deep pow and astonishing butters on the slopes.
-  Snowflake - skis destined for deep snow. Don't be fooled by that.
-  Double Layer Woodcore - two kinds of wood (poplar and ash) provide flex and extreme durability.
-  Feather - lightweight makes it easier. Thinner sections in wood core reduce the weight of skis.
-  99 millimeters under the boot section is an ideal compromise between hard snow and deep pow.
-  Versality - need to change skis when leaving park or BC? Not anymore.

Majesty brand combines manufacturing experience of Nobile company and deep knowledge of the latest freestyle and backcountry skis' trends. The most advanced technologies used while production of Majesty skis cause offering top quality product. Skis are tested both by technicians under laboratory conditions and by best riders and instructors on snow.

Great structure and excellent workmanship of the skis guarantee durability during rail tricks, give amusement in snow parks and thrill during off-piste skiing as well as in regular down the slope ride.

What and where to use!

### LS Local Beauty

Local Beauty is inspired by the Polish folk art. It is the fusion of culture, fashion and sport. It is also the old-school essence of femininity. The pattern used on Majesty skis comes from northern Poland. Ladies, enjoy the ride!

Majesty LS skis are all mountain skis designed for ladies. They're light, have the looks and are stuffed with our best technology. LS have the response, support the stability and comfort. It is pleasure to ride Majesty!

 160cm and 14,1m

### JS Surplus

Youth is the future! Why not to give kids the best product on the market?! Tip to tail woodcore, carbon-kevlar stringers, durable and fast base, shock absorbers, ABS sidewall, lightweight. Don't forget about the looks. The shape of JS skis allows you to ride wherever you like - slopes, park and backcountry. This is Surplus. This is the bomb of youth.

### LS Storm

Be aware - Storm coming! These skis are destined for ladies with the attitude. They're definitely different than other "candy" products. Girls...go show them all how to ride!
