TRADIZIONE ed ESPERIENZA

La SKI TRAB è nata dall'intuizione e dalla passione di Giacomo Trabucchi che nel 1946 costruì i primi sci in legno massiccio. La SKI TRAB ha la sede produttiva a Bormio, nota stazione turistica, terra di professionisti e campioni. Da allora il costante e naturale contatto con la gente della montagna ha contribuito allo sviluppo di un prodotto vicino alle vere esigenze degli sciatori. Ora la famiglia Trabucchi è in grado di proporre dei prodotti altamente specializzati che fanno della SKI TRAB un'azienda leader del settore nello scialpinismo e nello sci da fondo.

TRADITION and EXPERIENCE

SKI TRAB started up thanks to Giacomo Trabucchi's intuition and enthusiasm. Trabucchi made his first solid wooden skis in 1946. The SKI TRAB factory is based in Bormio, a renowned skiing resort, boasting a tradition of professionals and champions given to the world of sport. Since its beginning there has always been a constant and natural contact with mountain experts. This has helped to contribute in the realization of the final product which meets the real skiers' requirements. The Trabucchi family is now able to offer high technical and specialized products making SKI TRAB a leading firm in the touring-ski and cross-country field.

TRADITION und ERFAHRUNG

Ihre Gründung verdankt die Firma SKI TRAB dem Ideenreichtum und Enthusiasmus von Giacomo Trabucchi, der bereits 1946 seine ersten Ski aus Massivholz hergestellt hat. Das SKI TRAB Werk hat seinen Sitz in Bormio, einem berühmten Skigebiet mit einer langen Tradition von Berg-Profis und Wettkampfsiegern, die sich dem Skisport verschrieben haben. Von Anfang an pflegte das Unternehmen einen engen Kontakt und Erfahrungsaustausch mit diesen Ski- und Bergexperten. So war es möglich, eine Produktpalette zu entwickeln, die genau den Anforderungen der passionierten Skiläufer entspricht. Heute ist die Familie Trabucchi dazu in der Lage, hochspezialisierte und technisch anspruchsvolle Produkte anzubieten, die SKI TRAB zu einem führenden Hersteller der Tourenski- und Langlaufski-Branche gemacht haben.

la TRADITION et l'EXPERIENCE

La société SKI TRAB est née en 1946 grâce à l'intuition et à la passion de Trabucchi Giacomo qui construisit les premiers skis en bois massif. La société SKI TRAB a son siège à Bormio, une station de sports d'hiver bien connue, terre de professionnels de la montagne et de champions. Depuis lors, le constant et naturel contact avec les gens de montagne a contribué au développement d'un produit très proche des exigences des skieurs. Maintenant la famille Trabucchi est à même de proposer des produits hautement spécialisés et techniques qui font de la société SKI TRAB une entreprise leader dans le secteur de ski de randonnée et de fond.

TECNOLOGIA del leggero

La Tecnologia del leggero SKI TRAB si caratterizza per aver individuato un processo produttivo in grado di utilizzare un' anima leggerissima e allo stesso tempo di dare la massima forza anti-torsione allo sci. Le diverse soluzioni tecnologiche necessitano delle migliori materie prime e una precisa e attenta lavorazione in ogni fase. Solo con la tecnologia del leggero SKI TRAB si può parlare di leggerezza senza compromessi.

RAW MATERIAL

FINITURE

FINISHING

ASSEMBLAGGIO ASSEMBLING

lightweight TECHNOLOGY

SKI TRAB "lightweight technology" distinguishes itself by having identify a productive process capable of using an extremely light core and of giving the utmost anti-torsional strength at the same time. The different technological solutions depend on the choice of the best raw materials and on a precise and careful process of each individual stage of the work. Thanks to SKI TRAB lightweight technology we can say lightweight without half-measures.

lightweight TECHNOLOGY

Die SKI TRAB Lightweight Technolgy zeichnet sich durch ein Verfahren aus, das es erlaubt, einen extrem leichten Kern zu verwenden und dem Ski dennoch höchste Verwindungssteifigkeit zu verleihen. Die verschiedenen technologischen Verfahren führen aber nur dann zum gewünschten Resultat, wenn man die besten Materialien auswählt und jeden einzelnen Arbeitsschritt sehr sorgfältig und exakt ausführt. Wir können mit gutem Gewissen sagen: die SKI TRAB Lightweight Technology ermöglicht minimales Gewicht ohne Kompromisse.

TECNOLOGIE de la légèreté

La Technologie de la légèreté SKI TRAB se caractérise par son procédé de production pouvant utiliser un noyau très léger tout en donnant au ski la force anti torsion la plus grande. Les différentes solutions technologiques dépendent du choix de matières premières et des soins constants apportés à chaque étape de l'élaboration et de la production du ski. Seulement avec la Technologie de la légèreté SKI TRAB, on peut parler de légèreté sans compromis.

TECHNOLOGIA

Con lo sci piatto la coda mantiene una rigidità che garantisce perfetta stabilità e sostegno.

With a flat ski the tail maintains its rigidity and the ski guarantees a perfect stability and support.

DIFFERENTIATED TAIL FLEXIBILITY

In curva la flessibilità della coda è maggiore migliorando la chiusura di curva e la facilità della sciata.

On turning the tail flexibility is greater, improving the steering and making skiing easier.

NEW **NANO** **protec**

Trattamento superficiale basato sulla nanotecnologia che riduce l'adesione della neve sulla superficie dello sci.

Surface treatment based on the nanotechnology which reduces snow from sticking to the ski surface.

TECNOLOGIA *del leggero*

Il successo di uno sci dipende dall'attenzione che si dedica ai particolari. Lo sci SKI TRAB è perfetto in ogni parte, dalla struttura alla finitura delle lamine e della soletta. Oltre ad utilizzare un attrezzatura all'avanguardia la SKI TRAB ha dedicato molta attenzione all'istruzione del personale e a sensibilizzare gli addetti verso la qualità del prodotto.

TECNOLOGIA *del leggero*

The success of a ski depends on the attention given to the details. Each part of a quality ski has to be perfect from the structure to the edge and base finishing. Beside the use of advanced equipment SKI TRAB has taken great care in the training of its staff and making them understand how important the quality of the product is.

TECNOLOGIA *del leggero*

Der Erfolg eines Skis hängt nicht zuletzt davon ab, wieviel Aufmerksamkeit man auf die Details verwendet. Jeder einzelne Bestandteil eines Qualitäts-Skis muß perfekt sein - vom Aufbau bis zur Feinbearbeitung der Kanten und des Belags. Deshalb arbeitet SKI TRAB nicht nur mit modernstem Equipment, sondern legt auch größten Wert auf die Schulung seines Personals und darauf, daß jeder Mitarbeiter begreift, von welcher entscheidender Bedeutung die Qualität unserer Produkte ist.

TECNOLOGIA *del leggero*

Le succès du ski dépend de l'attention qu'on voue aux détails. Le ski de qualité doit être parfait en toutes ses parties, de la structure au finissage des carres et de la semelle. La société SKI TRAB n'utilise pas seulement d'équipements sophistiqués mais elle a aussi dédié grande attention à la formation et à la sensibilisation de son personnel vis à vis de la qualité du produit.

DETAIL Anima leggera in legno con canali d'aria. Light wood core with air canals.

BENEFIT Buona leggerezza e massima forza. Good lightweight and maximum strength.

DETAIL Anima in composito alveolare in aramide. Aramide honeycomb compound core.

BENEFIT Massima leggerezza e forza in compressione. Maximum lightweight and strength in compression.

DETAIL Vari rinforzi in carbonio, fibra di vetro e ibridi. Various carbon, fiberglass and hybrid reinforcements.

BENEFIT Ottima resistenza torsionale e miglior curva di flessibilità. Excellent resistance to torsional stress and better flexibility curve.

DETAIL Rettifica solette e perfetto tuning lamine. Microfinish-grinding and perfect tuning of the edges.

BENEFIT Precisione in curva, maneggevolezza e scorrevolezza. Turning precision, easy to steer and excellent glide.

DETAIL Film di protezione in poliammide con ruvidità superficiale antigraffio. Scratch proof polyamide protection film.

BENEFIT Alta protezione della struttura e design. Structure and design protection.

DETAIL Rinforzo sotto la parte attacco. Reinforced under the binding section.

BENEFIT Massima garanzia tenuta viti attacco. Maximum guarantee for the security of the ski-binding screws.

EXPERT: atleti, guide, scialpinisti che amano la performance.

EXPERT: athletes, alpine guides and touring-skiers in search of performance.

CLASSIC: gli sciatori che fanno lo scialpinismo con lo scopo di vivere la montagna e cogliere sia in salita che in discesa tutte le sensazioni che questo sport può dare.

CLASSIC: the skiers that practise touring-skiing with the aim of enjoying the mountain and its environment and experiencing all the thrills that this sport can give both up and down the slopes.

TECNOLOGIA del leggero

La tradizione e l'esperienza hanno permesso alla SKI TRAB di sviluppare una tecnologia del leggero in grado di offrire allo stesso tempo massime prestazioni ed affidabilità. Gli sci risultano allo stesso tempo leggeri e maneggevoli in salita, facili e precisi in discesa.

Tradition and experience over the years have enabled SKI TRAB to develop a Lightweight Technology, permitting utmost performance and reliability at the same time. The skis are light and very easy to handle during the ascent, while at the same time easy-turning and precise during the descent.

Überliefertes Know-how und Erfahrung haben es SKI TRAB ermöglicht, eine Leichtgewicht Technologie zu entwickeln, die in der Lage ist, zur gleichen Zeit höchste Leistungsfähigkeit wie auch Zuverlässigkeit zu bieten. Die Skier sind gleichzeitig leicht und handlich bei Aufstiegen, drehfreudig und spurtreu bei Abfahrten.

La tradition et l'expérience ont permis à la société SKI TRAB de développer une "technologie de la légèreté" qui offre en même temps une grande performance et une excellente fiabilité. Le ski est léger et maniable en montée, facile et précis en descente.

Da alcuni anni la SKI TRAB propone dei particolari bastoni da scialpinismo e da sci da fondo. L'esigenza di leggerezza e la sicurezza dello scialpinista sono lo spirito con cui sono stati progettati: materiale leggero e resistente, manopole anatomiche, papere innovative e funzionali e sistemi di allungamento sicuri e pratici.

For some years SKI TRAB has been offering some special touring-ski and X-country ski poles. Our poles have been designed combining both the need for lightweight and the touring-skier's safety: light and resistant material, anatomic handles, innovative and functional baskets, safety and practical adjustment systems.

Da alcuni anni la SKI TRAB propone dei particolari bastoni da scialpinismo e da sci da fondo. L'esigenza di leggerezza e la sicurezza dello scialpinista sono lo spirito con cui sono stati progettati: materiale leggero e resistente, manopole anatomiche, papere innovative e funzionali e sistemi di allungamento sicuri e pratici.

For some years SKI TRAB has been offering some special touring-ski and X-country ski poles. Our poles have been designed combining both the need for lightweight and the touring-skiier's safety: light and resistant material, anatomic handles, innovative and functional baskets, safety and practical adjustment systems.
