

DEALER BOOK 2014

### \*TECH CONSPIRACY

Majesty was born out of a vision to create skis that are a perfect fusion of hi-technology and graphic design. We want to combine sport with art, and that is why we put a great emphasis on design, technology and sport performance. From the very beginning our main driving force was a clear vision of skis that will transform the freeskiing scene. We have never dismissed any, not even the most radical concepts without getting to know them inside out first. Join conspiracy and discover the extraordinary.

### TECHNOLOGY

\*The most advanced technologies and the best materials used in production of Majesty skis ensure top quality products.

\*Depending on a model, Majesty skis are built with BIAx or/and TRIAX fibres BIAx

combines flex and torsion to give smooth and comfortable ride. TRAX gives an aggressive, fast response and great flexibility.

\*We use UV lacquer for all our skis to protect the graphics from fading out.

\*Features:

Real Twin Tip - Equal geometry and flex at tips and tails. Whatever you ride. Switch or regular.

90° ABS Sidewall - the toughest construction that keeps you edges stronger and safer.

2,5 mm edges - steel impact-resistant edge for park rails.

Fang edge - special edge construction for extra grip in the iciest conditons.

High Quality Base - IS4400 - perfect mix of durability and speed.

High Speed Base - IS7200 - very fast base for freeride and big airs

Carbon-Kevlar fiber stringers from tip to tail give increased pop and long life flex.

Shock Absorbers - give the edges and core structure extra protection. Special gum protection zone binds the core, edges, ABS and base better than any glue. Thanks to that solution the edges will not blow off - even after many hours of rail shreddin'

Cat-back Profile - Camber - more confidence and control in takeoff and landing.

Cat-banana Profile - Hybrid (rocker/camber/rocker) - extraordinary solution for all terrain ride.

Banana Profile - Rocker - shape for deep powder and astonishing butters on the slopes.

Snowflake - skis designed for deep snow. Surf felling included.

Double Layer Wood Core - two kinds of wood (poplar and ash) provide flex and extreme durability. Paulownia woodcore - specially crafted core makes the skis even lighter.

Feather - Thinner sections in the wood core reduce the weight of skis.

99 millimeters ensures an ideal compromise between hard-packed snow and deep pow.

Versatility - tired of changing skis when switching between the park and BC? Not anymore.

This season we have applied three construction variations of the 90° ABS sidewall technology.

**FREERIDE** - 90° sidewall construction, which enhances riding properties and makes servicing easier. Freeride sidewall also offers better edge grip and enhance riding control.

**FREETOUR** - sidewall construction, which combines the 15°/90°ABS with fang edge to make it lighter and impact-resistant. Freetour sidewall also increases riding properties and makes ski servicing easier.

**FREESTYLE** - The 15°/90° freestyle sidewall, which protects the edges and makes servicing easier. As a bonus, the freestyle sidewall also limits damages from crossing the skis in tricks.

Majesty is a truly independent freeski company, set up to integrate the newest and most advanced ski manufacturing solutions with progressive graphic design.

From the very beginning, we were driven by a vision of skis that would transform the freeskiing scene. In this pursuit, we never steered clear of innovative, sometimes radical ideas and visionary projects. The most advanced technology and manufacturing process together with quality materials used guarantee the highest standard of our products.

All Majesty skis are tested on slopes by world class riders and instructors. We put great emphasis on adding final touches to our products - all this is done by hand. Thanks to our skis, everyone can quickly improve their skills, regardless of terrain features or level of experience. Whether you ride on icy slopes or urban rails - Majesty is the best possible choice!

Majesty is also very much involved in the Skis4Trees eco-initiative, as well as concepts such as 2D Hybrid Technology or Tech Conspiracy. The idea of linking sports technology with art and advanced graphic design is our bread and butter.

### OUR MISSION

In constant pursuit of innovative technologies and extraordinary design, our mission is to keep developing products that enhance the performance of freeskiers.

### OUR OBJECTIVE

In fulfilling our mission, we aim to achieve the following goals:

- focus on the research and development of ski technology
- stand for excellent craftsmanship and quality of design
- unite sports with art

www.facebook.com/MAJESTYSKIS

### CAMBER

Camber is a construction that supports power, pop and precision. The shape of ski is lifted between touching points of the ski at tips and tails. It gives responsiveness over the entire length of skis, grip on icy slopes and smooth edge over transmission.

Available in: Comic, Wolf XTR, Thunderbolt, Local Beauty, Local Hero, Local Hero Jr, Surplus

### ROCKER

Rocker supports easy spins in powder and the catch-free, forgiving feel. The part of the ski under foot is flat, nose and tail are risen on the major part. It improves the float and allows for an effortless all-terrain ride. Buttering and pillows shredding have never been easier.

Available in: Lumberjack

### SEMI HYBRID

We combined rocker and camber construction to create the blend of the best of both constructions. Rockered tip enhances playfulness and float, camber adds smooth snap and edge grip. Mixing entry rocker and camber under foot section gives high freeride performance, float improvement and enhanced control and stability in variable conditions.

Available in: Knife, Ace, Dirty Bear, Wolf

### 2D HYBRID

Rocker and camber merge brings benefits of both constructions. Rockered tips and tails enhance playfulness and float, camber adds control and edge grip. The secret of 2D Hybrid technology lays in transferring the widest points of the ski towards the centre and matching them with the ski profile (rocker/camber/rocker). This resulted in a shortened radius feeling, allowing for easy turns with extra control.

Available in: Rock'n'Rolla, Superior, Velvet

### FLEX ratio

Flex is the result of combining torsion and stiffness of the skis. Skiers who prefer speed and precision should pick stiffer skis with more responsive torsional twist. Park shredders and intermediate skiers should pick skis with softer flex. The flex ratio is based only on a benchmark comparison within the Majesty ski range.

Softest Most Responsive

FREE RIDE

**ACE**  
 Ace are genuine freeride machines for big mountain riding. As highly specialized hybrid skis combining rocker and camber construction, they will take you wherever you wish with a 100% accuracy. Long rockered tip supports smooth powder ride while camber shape gives you perfect responsiveness, power transmission and edge to edge ride. Swallow tail redistributes the flex in long and fast turns, enhancing the float and acceleration. Thanks to the carbon/kevlar stringer, Ace support dynamic responsiveness and stable ride even through the sketchiest conditions. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier.  
 The 2013 Ace jaw-dropping graphics will definitely catch an eye or two. When you think it is high time you made the best of both powder floating and hitting steep, icy couloirs, look no further! You've got our top cards in hand now! So, no holding back with Aces up your sleeve, please!

# KNIFE

## FREE RIDE

### KNIFE

This year's Knife's design has been inspired by some of the best carving artists out there. The warrior mask on the topsheet will empower you to carve deeper and harder, making mastering any mountain with speed and control no more than a walk in the park. Unique bullet-like tip and tail shape contribute to the overall very aerodynamic shape of the skis. Premium features include a rockered tip (150mm), camber under foot, ultra poppy carbon-kevlar stringer and x-shape carbon stabilizers. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier. The widest skis in the Majesty range support the grip in the iciest conditions, uncompromised flow and precision. New school of freeride – get ready for this cutting-edge experience and never look back!

- construction:** semi hybrid

- radius:** 23,8m
- extras:** carbon/kevlar stringer + X-shape carbon stabilizer
- designed for:** freeride
- top sheet finish:** gloss + Majesty emblem

# LUMBERJACK

## BACK COUNTRY + POWDER

### LUMBERJACK

Lumberjacks are the true powder floating machines made to satisfy the constant urge to search for backcountry kickers, log slides and snow pillows. Rocker supports easy spins in powder and effortless maneuvering between the trees. The new freeride sidewall increases the riding properties even more, and makes proper servicing much easier. Special matt finishing on the topsheet gives that extra touch to the overall design, and the graphics on the bases simply cannot go unnoticed. Riding powder switch, smooth landings, easy handling and surf feeling are all a part of the Lumberjack package, so jump for joy all you powder riding lovers! With his axe above his head, Lumberjack is ready for the new quests ahead. Deep woods? High mountains? Bring'em on!

- construction:** rocker
- shape:** directional twin tip
- flex:** directional
- flex ratio:** 4
- fiberglass:** triax
- rocker type:** rocker 300mm (tips&tails)
- core:** tip-to-tail woodcore (poplar and ash)
- base:** fast base IS7200
- sizes:** 175cm, 185cm, 194cm
- sidecut:** 155/120/145mm
- radius:** 17,6m; 20,0m; 22,1m
- designed for:** all terrain freestyle, powder
- top sheet finish:** matt + Majesty emblem

**WOLF**

Wolf are freetouring, semi-hybrid skis that perform equally well in powder and in more challenging terrain, and can be easily used as all-embracing freeride skis.

Camber supports responsiveness, better grip on icy slopes and smooth edge over transmission. Combining entry rocker (150mm/5mm) and camber under the boot section improves float and enhances control and stability in variable conditions. The 99mm-wide under the boot section is an ideal compromise for hard packed snow and deep powder alike. Special sidewall construction combines the 90°ABS with fang edge to make it more impact-resistant, increase riding properties and make ski servicing easier.

Unleash your inner beast for an ultimate ride...your Wolf is waiting for you!

- construction:** semi hybrid
- shape:** directional
- flex:** directional
- flex ratio:** 6
- rocker type:** rocker 150mm (tips)
- fiberglass:** triax + biax
- core:** tip-to-tail woodcore (poplar and ash)
- base:** fast base IS7200
- sizes:** 169cm, 177cm, 184cm
- sidecut:** 134/99/124mm
- radius:** 20,3m; 22,2m; 24,2m
- extras:** carbon/kevlar stringer, tip&tail
- designed for:** freeride, freetouring
- weight (one ski):** 1,60kg; 1,70kg; 1,85kg
- top sheet finish:** gloss

**WOLF XTR**

Wolf XTRs are true freetouring skis. Thanks to the Paulownia wood core they are XTremely light-weight skis, which is a great advantage for practically any conditions. The tips are shaped to lift the nose for improved float and speed through deep driving powder turns. A layer of carbon fiber adds torsion rigidity giving you a safe edge grip on steep slopes. Camber enhances responsiveness, provides for a better grip on icy slopes and smooth edge over transmission. Special freetouring sidewall construction combines the 90°ABS with fang edge to make it more impact-resistant, increase riding properties and make ski servicing easier. A unique matt varnish finishing sets new, more classy, freetouring standards.

Wolf XTRs easily bite through any barriers and allow you to explore the entire mountain – take the beast to the XTReme!

- construction:** camber
- shape:** directional
- flex:** directional
- flex ratio:** 7
- fiberglass:** triax + biax

- base:** fast base IS7200
- sizes:** 156cm, 163cm, 171cm
- sidecut:** 116/82/111mm
- radius:** 14,1m; 15,6m; 17,7m
- extras:** carbon/kevlar stringer, tip&tail re-engineered shape for mounting skins
- designed for:** freeride, freetouring
- weight (one ski):** 1,10kg; 1,20kg; 1,30kg
- top sheet finish:** matt

## DIRTY BEAR

### DIRTY BEAR

Dirty Bear are our most versatile skis, and combine the best of freeride and freestyle. In a nutshell - they are, most likely, the perfect all-terrain skis. Semi hybrid construction and the 150mm/5mm early rise at the tips enable top performance on hard packed snow without compromising on your terrain rides. Get ready to experience the true feel of the wood core, the snappy camber suspension and directional twin-tip shape and tick all boxes at once. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier. Special matt finishing on the topsheet gives that extra touch to the overall design, and the graphics on the bases simply cannot go unnoticed. Easy to handle and fast to respond, the Dirty Bears let you flourish wherever you roam. We guarantee our Bears never heard of winter hibernation, so let them growl this season even louder!

Attention: All Bears love trees, so we just couldn't separate them - check out our Skis4Trees eco-initiative [www.majestyskis.com/skis4trees](http://www.majestyskis.com/skis4trees)

**construction:** semi hybrid  
**shape:** directional  
**flex:** directional  
**flex ratio:** 5  
**rocker type:** 150mm (tips)  
**fiberglass:** triax + biax  
**core:** tip-to-tail woodcore (poplar and ash)  
**base:** fast base IS7200  
**sizes:** 175cm, 182cm, 189cm  
**sidecut:** 134/99/124mm  
**radius:** 20,3m; 22,2m; 24,2m  
**top sheet finish:** matt + Majesty emblem

## THUNDERBOLT

### THUNDERBOLT

Universal all-terrain skis with enhanced on-piste carving abilities. Thunderbolt skis are wide twin tips with an extra sidecut.

Thanks to camber construction the skis perform better on hard-packed snow without compromising on terrain rides! Triax fiberglass transfers power directly to the edges to make Thunderbolt respond faster and more precisely. Tip-to-tail woodcore with carbon-kevlar stringers adds lateral rigidity for better response and that extra grip. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier.

Brace yourself for a whole new level of all-mountain riding experience. And get ready to Thunder past everyone else on the slope like (a) Bolt!

**construction:** camber  
**shape:** true twin tip  
**flex:** directional  
**flex ratio:** 6  
**fiberglass:** triax  
**core:** tip-to-tail woodcore (poplar and ash)  
**base:** fast base IS7200

# SUPERIOR

## BACK COUNTRY + POWDER

### SUPERIOR

This season's stop in our Superior journey is South America. A top choice for backcountry powder action, these hybrid technology skis are a perfect combination of floating and ease of rocker with camber snappy suspension and control. Lively in powder and shock-absorbing in rough terrain or chewed-up conditions, the Superiors are an absolute must-have for BC, deep powder or off-piste enthusiasts. The new freeride sidewall increases the riding properties even more, and makes proper servicing much easier. Spin off the cliffs and kickers, blast from stash to stash, slash the wave... want more? Wait, there actually IS more! Switching between freeride and backcountry freestyle all the time? No need to change gear – our skis are so versatile that have it all covered. There's a reason for their superiority, after all.

**construction:** 2D hybrid  
**shape:** directional twin tip  
**flex:** directional  
**flex ratio:** 6  
**fiberglass:** triax+biax  
**rocker type:** 240mm (tips&tails)  
**core:** tip-to-tail woodcore (poplar and ash)  
**base:** fast base IS7200  
**sizes:** 178cm, 186cm  
**sidecut:** 135/115/130mm  
**radius:** 20,0m; 23,0m  
**designed for:** backcountry, freeride  
**top sheet finish:** gloss + Majesty emblem

# VELVET

## BACK COUNTRY + POWDER

### VELVET

Velvet are lightweight backcountry skis designed especially with all our adventure seeking ladies in mind. Hybrid technology enables effortless riding in any terrain. Rocker supports better float in powder, whereas camber increases responsiveness, makes landings smoother and edge grip more secure. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier. Versatility is definitely a great upshot here – dear ladies, no need to change gear when switching between freeride and backcountry freestyle. A combination of Triax and Biax fiberglass give you great flex and control. Velvet are perfect for floating in deep powder and riding fast lines on the wildest of slopes. Time to rule the mountain with a Velvet glove!

**construction:** 2D hybrid  
**shape:** directional twin tip  
**flex:** directional  
**flex ratio:** 5  
**fiberglass:** triax+biax  
**rocker type:** 200mm (162) and 240mm (170cm) (tips&tails)  
**core:** tip-to-tail woodcore (poplar and ash)  
**base:** fast base IS7200  
**size:** 162cm, 170cm  
**sidecut:** 120/100/115mm  
**radius:** 15,6m; 18,0m  
**designed for:** backcountry, freeride  
**top sheet finish:** gloss + Majesty emblem

# FREE STYLE

**COMIC**

Here comes your ultimate freestyle weapon to help you reign everything from park to pipe - Comic are genuine twin tip skis for advanced freestyle riders. Camber supports instant grip, ultra fast response, and cushions the impact of big air landings. Carbon-kevlar stringer gives you an increased tip-to-tail pop and response. Special 2.5mm steel impact edges will easily endure intense rail sessions. The 15°/90° freestyle sidewall cushions the edges and makes servicing easier. Real Twin Tip - equal scoop, geometry and flex. Whatever you ride. Switch or regular. Long life flex, power, precision, extra pop and an extremely fast (and now more durable) base are of course a part of the package. Add a glossy varnish finishing, dynamic graphic design and you'll have the full pic...err, comic strip. When it comes to freestyle, Comic are the undisputed rulers. Majesty prouiders' choice. Hats off!

- construction:** camber
- shape:** true twin tip
- flex:** twin
- flex ratio:** 5
- fiberglass:** biax
- core:** tip-to-tail woodcore (poplar and ash)
- base:** fast base IS7200
- extras:** carbon/kevlar stringer
- sizes:** 169cm, 175cm, 181cm
- sidecut:** 117/87/117mm
- radius:** 18,6m; 20,3m; 21,9m
- designed for:** freestyle - park&pipe
- top sheet finish:** gloss

# FREE STYLE

**ROCK'N'ROLLA**

Rock'n'Rolla are true twin tip skis dedicated to street jibbing and snowpark shredding. Thanks to their hybrid technology, the skis combine the buttery looseness of a rocker with camber sharp turn ability. Rock'n'Rolla make shredding easier, are more forgiving at landing, and unlikely to catch an edge. The 15°/90° freestyle sidewall cushions the edges and makes servicing easier. The extremely fast base is now more durable too. Special matt finishing gives that extra touch to the overall design. Smooth in trick initiation, Rock'n'Rollas will empower you to make all of your favourite devilish butters as easy as a pie. Camber allows for controlling the turns and absorbs impact at landings. The new graphic design with matt varnish adds even more style to freestyle, and will definitely make you stand out! A whole lot of (free)style up for grabs!

- construction:** 2D hybrid
- shape:** true twin tip
- flex:** twin
- flex ratio:** 3
- fiberglass:** biax
- rocker type:** 200mm (159cm) and 220mm (168, 177cm) (tips&tails)
- core:** tip-to-tail woodcore (poplar and ash)
- base:** fast base IS7200
- sizes:** 159cm, 168cm, 177cm
- sidecut:** 105/85/105mm
- radius:** 16,0m, 18,0m; 20,0m
- designed for:** freestyle - jib&rails
- top sheet finish:** matt

**LOCAL HERO**

Local Heroes are great for beginner freestylers. They will give you a good feeling of wood core, versatility, camber edge-hold, riding stability, enhanced carve abilities and pop. Camber supports suspension, absorbs the impacts of flat landings and choppy snow.

Local Heroes are our answer to the all-round fun, regardless of the conditions and terrain features. Simple yet very eye-catching graphics won't let you go unnoticed. Whether it is park, hard packed snow or off-piste fun, go from zero to Hero in no time!

- construction:** camber
- shape:** directional twin tip
- flex:** directional
- flex ratio:** 4
- fiberglass:** triax
- core:** tip-to-tail woodcore (poplar and ash)
- base:** durable base IS4400
- sizes:** 168cm, 176cm
- sidecut:** 116/82/111mm
- radius:** 15,6m; 17,7m
- designed for:** all mountain
- top sheet finish:** gloss

**LOCAL BEAUTY**

New best friend for all ladies who wish to embark on a freestyle adventure! Local Beauty have a soft and forgiving flex, are pretty lightweight (and pretty too!). Camber allows for an increased edge-hold, better riding stability and enhanced carve abilities. Local Beauty are fun, easy and comfortable to handle, and full of pop. Directional flex makes steering in every terrain as easy as ABC. Camber supports suspension and absorbs the impacts of flat landings and choppy terrain.

We threw in some sparkle for a good measure too!

So, dear Ladies – go wild this season. Put your lipstick on and enjoy the ride! A thing of (Local) beauty is a joy forever!

- construction:** camber
- shape:** directional twin tip
- flex:** directional
- flex ratio:** 3
- fiberglass:** triax
- core:** tip-to-tail woodcore (poplar and ash)
- base:** durable base IS4400
- sizes:** 150cm, 160cm, 168cm
- sidecut:** 116/82/111mm
- radius:** 12,0m; 14,1m; 15,6m
- designed for:** all mountain
- top sheet finish:** gloss

ALL MOUNTAIN FREESTYLE

LOCAL HERO JR

A must-have for all young all-mountain freestyle enthusiasts. Smaller version of Local Hero. And, true to that word, like father like son – the Local Hero Jr have the entire package. Camber construction, double layer wood core from tip to tail, shock absorbers, 15°/90° ABS sidewalls and durable base... all of our finest features included! Local Hero Jr skis are made for all-mountain fun, regardless of the conditions and terrain features. Park, slope or terrain – whatever you choose, Local Hero Jr have it covered. Time for all our young lads to ride free.

**construction:** camber  
**shape:** directional twin tip  
**flex:** directional  
**flex ratio:** 3  
**fiberglass:** triax  
**core:** tip-to-tail woodcore (poplar and ash)  
**base:** durable base IS4400  
**sizes:** 150cm, 160cm  
**sidecut:** 116/82/111mm  
**radius:** 12.0m; 14.1m  
**designed for:** all mountain  
**top sheet finish:** gloss

ALL MOUNTAIN FREESTYLE

SURPLUS

It's never too early to become a freeskier. To speed up the learning and boost up the joy factor, we give you specially designed kids-friendly skis. Great riding balance, the feel of a true wood core (no foam!), soft flex, control, edge-hold and versatility. And, it goes without saying, all of our finest features included - camber, shock absorbers, improved freestyle 15°/90° sidewalls and very durable base. Surplus are very versatile skis that will help the little ones ride big. A spot-on choice for young riders with high aspirations and Surplus of energy!

**construction:** camber  
**shape:** directional twin tip  
**flex:** directional  
**flex ratio:** 3  
**fiberglass:** biax  
**core:** tip-to-tail woodcore (poplar and ash)

# MAJESTICKS

## DESCRIPTION

**MAJESTICKS** multifunctional, high-quality and durable all-round skipoles that you can rely on. Our new, greatly improved telescopic ski poles have a comfortable hi quality race grip and extended touring abilities. MAJESTICKS are made of light, durable, eco-friendly and completely recyclable aluminum alloy 7075. Switching between freestyle and backcountry all the time? No need to change gear – MAJESTICKS are so versatile that have it all covered. MAJESTICKS are made in EU (Italy).

- They are equipped with:**
- thin shaft for a lighter and better balanced pole, with reduced swing effect and wind resistance.
  - new comfortable strap with Majesty logo
  - quick lock – new locking system recommended for ski-alpinism, easy to adjust the pole length + emergency twist lock inside
  - 2 sets of snow-rings (freeride and freestyle) available colour combinations:
    - camo/acid orange
    - aztec
    - black/mint/white

# YUKI JACKET

BACK

ICON

DESCRIPTION

**YUKI JACKET**  
Our Yuki jackets are perfect for all backcountry/freeride action, riding in deep powder and variable weather conditions. No need to cut your riding time short due to not-so-favourable weather – Yuki outerwear will cover your back (and everything else too).

- Semi-tall, very comfortable fit
- Windproof 2-layer technical coated fabric
- Duralight membrane (15.000mm/15.000mg/m<sup>2</sup>)
- Inner Silvershield lining
- Very comfortable semi-circle high chin guard with soft inner lining
- Two asymmetrical fully taped zips with brushed chin flaps
- Custom tailored sleeves with asymmetrical cuffs to keep the snow out
- New, wider velcros help you regulate cuff width
- Elastic wrist gaiters
- Helmet-compatible hood with a visor – easy to adjust in two dimensions, not limiting any movement
- Armpit ventilation – secured with rubber bands, easy to use
- Inner powder skirt, compatible with pants and easy to remove when necessary
- Ergonomic pockets, napoleon pocket + Inner audio/media pocket
- Side skipass pocket with waterproof zip
- Inner utility pouch (for beanie, goggles etc.)
- Sizes: S, M, L, XL, XXL

# YUKI PANTS

BACK

ICON

DESCRIPTION

**YUKI PANTS**  
Our Yuki pants are designed for deep powder rides, and offer the best in waterproof, breathable backcountry performance. Great for hiking up the mountains, without restricting your movement freedom. For even better comfort, pair up with Yuki jacket.

- Relaxed, tapered fit (slightly slimmer)
- Windproof 2-layer technical coated fabric
- Duralight membrane (15.000mm/15.000mg/m<sup>2</sup>)
- Inner Silvershield lining
- Ergonomic pockets in the extended waist stretch panel
- Adjustable braces can be worn in two ways – in parallel or crossed in the back
- Impermeable extended waist stretch panel seamlessly joined with pants
- Extended waist stretch panel easy to remove – Yuki pants can also be used as regular pants
- Cargo pockets
- Fully taped seams
- Sizes: S, M, L, XL, XXL

DESCRIPTION

### METATRON JACKET

An excellent freestyle jacket, which thanks to its properties (15.000/15.000) and the ability to attach it to snow pants, can also be used for backcountry rides in deep powder. The new zip-off sleeves will let you quickly and effectively transform your jacket into a great quality technical vest – ideal for a spontaneous snowpark session!

- Tall fit
- Windproof 2-layer technical coated fabric
- Duralight membrane (15.000mm/15.000mg/m<sup>2</sup>)
- Inner Silvershield lining
- Zip-off sleeves
- Fully taped seams
- Soft inner collar and chin guard
- Elastic stretchable wrist gaiters
- Adjustable, integrated hood, helmet-compatible
- Powder skirt with elastic stretchable movement panel
- Pants interface
- Ski pass pocket with waterproof zip
- A number of different inner and outer pockets
- Integrated media pocket
- Inner utility pouch (for beanie, goggles, sunglasses etc.)
- Sizes: S, M, L, XL, XXL

## SURFACE BASE LAYER

BACK

DESCRIPTION

### BASE LAYER

Surface clothing is our newest addition to the Majesty range. This multifunctional technical wear not only looks good but, more importantly, serves its purpose, and can be used either as first or second layer.

Our base layer tops and bottoms are both made from antibacterial, breathable yet warm and cosy material, which has excellent moisture-transmitting properties. An innovation in base layer wear is a high, adjustable and regulated chin guard, which protects from wind and, thanks to its shape, can be used as facemask. Tops have some additional features, such as:

- fitting, articulated cut
- armpit ventilation holes
- sleeves with thumbholes
- easy to access zip pocket
- available colour combinations:
  - black/mint
  - blue/orange/white
  - sand/purple (lady)
  - black/pink/orange (lady)

Sizes: S, M, L, XL

Each pair comes with Majesty pouch

Freeskiing is a sport that has a lot to do with natural environment. This is true not only for places we ride, but also for the equipment we use.

This is why here, at Majesty Skis, we all care about trees - they are not only the metaphorical lungs of our planet but also the true heart of our skis.

As an environmentally conscious freeskiing company, we are aware that green areas on our planet are shrinking rapidly. We would therefore like to encourage all skiers to appreciate and respect the beautiful natural landscapes we all enjoy while riding the slopes.

In this spirit, we launched the SKIS 4 TREES project.

The idea is very simple – with every pair of Majesty skis you buy, we plant a tree on your behalf! Trees for skis with SKIS4TREES - this is how it works.

The SKEES4TREES project was launched on 1 October 2010.

As a company, we wanted to reduce our carbon footprint by doing something more than just reducing the amount of paper used in the office.

Our goal is to inspire people to care and think seriously about the environment. Trees for skis with Skis4Trees!

We strongly believe it is absolutely crucial to match trees with the environment there are to grow in.

All our trees are planted in designated nature reserves, in line with existing forestry directives and regulations.

To produce one pair of Majesty skis, we need on average 0.09m<sup>3</sup> of carefully selected wood of highest quality.

That way, we are able to make a lot of pairs of skis from only one tree.

**KEEP AN EYE ON ANOTHER ROUND OF TREE PLANTING THIS YEAR  
AND HELP US MAKE THE WORLD A GREENER PLACE!**
