ATOMIC.

BE IN YOUR ELEMENT

OUR NEW 14-15 RANGE

WHEREVER YOU WANT TO SKI, ATOMIC EQUIPMENT CAN TAKE YOU. AND TO HELP YOU FIND THAT PERFECT GEAR, WE GROUP OUR RANGE INTO FOUR SKIING ELEMENTS.

FOR EACH OF THESE ELEMENTS WE ALSO HAVE A CONCEPT OR TWO – THEMES THAT DRIVE ALL THE INNOVATION AND IMPROVEMENT WE'VE MADE THIS YEAR:

RIDE REDSTER IN RACE.

BUILT FOR SKIERS AND BEST JUST GOT BETTER IN ALL MOUNTAIN.

EXPAND YOUR HORIZONS IN FREESKI.

REACH YOUR PEAK IN BACKCOUNTRY TOURING.

**DOUBLEDECK 3.0 NOW WITH RAMP TECH.
FEEL THE POWER.
ENJOY THE PRECISION.**

REVEL³ M RACING

Brand new race goggles with ZEISS lenses and epic field of vision.

REDSTER PRO 130

Lightweight and rigid with the Redster Rubber Grip

The most dynamic ski boot we've ever made, now with Memory Fit.

REDSTER CARBON COMPOSITE

RACE SHIRT

Our FIS-approved, high-performance protector.

REDSTER WC

Meets all new FIS rules for World Cup protection.

REDSTER DOUBLEDECK 3.0 GS
Third-generation Redster Doubledeck brings even more power, precision and stability. Also the first ski with RAMP Tech for automatic body positioning.

BUILT FOR SKIERS

SKIWEAR THAT DOES WHAT SKIERS NEED.

BUILT BY ATOMIC

CLIFFLINE STORMFOLD JACKET M

CLIFFLINE STORMFOLD JACKET M

The first ski jacket with a skiable midlayer and storm shell folded away. All the protection you need, now with none of the weight.

LIVE SHIELD VEST

Ultra-protective – made from flexible, lightweight soft-foam segments.

VANTAGE RITUAL + WARDEN 13 MNC

A ski for awesome floatation in powder and great edge-grip on piste.

The first binding to be TÜV approved for all three types of sole norms.

Lightweight pole with Freeski Grip for easy handling.

AMT³

WAYMAKER CARBON 130

Super progressive, with Carbon Spine and Free/Lock System.

NOMAD LF

Low-profile helmet that adjusts to your head with Live Fit Technology.

SAVOR²

New oversize goggles with Live Fit for the perfect, personal fit.

AUTOMATIC PACK 25L ABS COMPAT.

ABS compatible with Live Fit straps.

BEST JUST GOT BETTER

NEW **HAWX**

THE LEGENDARY HAWX FIT. NOW WITH MEMORY FIT, 3M™ THINSULATE™ AND SOLE FLEX.

LIVE SHIELD BP

Ultra-protective – made from flexible, lightweight soft-foam segments.

MENTOR LF

Our lightweight helmet with Live Fit that adjusts to your head.

NOMAD BLACKEYE TI

Exceptional All Mountain performance, with ARC Technology for a smooth, natural ride.

SAVOR²

New oversize goggles with Live Fit for the perfect, personal fit.

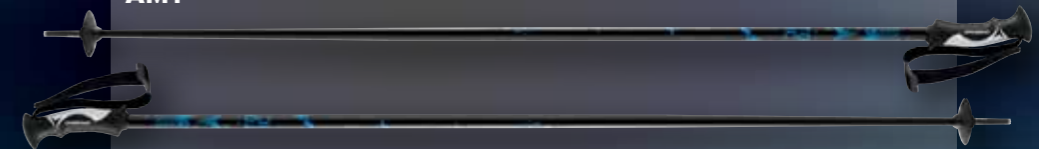

HAWX 2.0 120

HAWX 2.0 120

The next generation of the world's best-selling medium fit boot, now with 3M™ Thinsulate™ Insulation and Memory Fit.

AMT²

All Mountain ski pole with a soft rubber grip.

BEST JUST GOT BETTER

NEW
HAWX

THE LEGENDARY HAWX FIT,
NOW EVEN BETTER.

ROCKER SKINS

ROCKER SKINS
Optimized for rocker skis, also lighter and with less friction.

BACKLAND DRIFTER

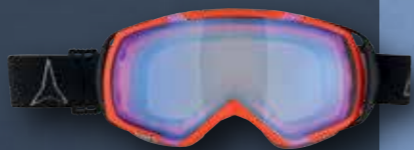

BACKLAND DRIFTER
Our new touring ski with a Carbon Backbone and Lite Woodcore. Light for climbing, strong for skiing.

WAYMAKER TOUR 110

Climbs as well as it skis, with Pebax, Carbon Spine and Free/Lock System.

REVEL² M

Featuring Live Fit Technology and spherical ZEISS lenses.

MENTOR LF

Lightweight helmet with Live Fit, designed to adjust to your head.

BACKLAND PACK 18L

The lightweight backcountry day pack, with special ergonomic back panel.

BCT CARBON

The touring pole with carbon shaft and length adjustment.

REACH YOUR PEAK

FINE TUNE YOUR TOURING WITH LIGHTWEIGHT BACKLAND SKIS AND REVOLUTIONARY ROCKER SKINS.

**DON'T
INNOVATE
FOR TODAY,
INNOVATE FOR
TOMORROW**

SKIS + BINDINGS

How do we make the best skis in the world that little bit better every year? By combining the tried-and-tested with bold innovation. The result is a range built not just for now, but for the future of our sport ...

Our factory in Altenmarkt makes a huge variety of different skis each year. Different materials, different shapes, different graphics.

EACH SKI CAREFULLY CREATED TO MATCH THE TYPE OF SKIING THEY'RE MADE FOR.

But there are some things we believe in so strongly they go into every ski we make. Our skiing DNA if you will...

MEANINGFUL INNOVATION

We don't believe in doing innovation for the sake of it. If it doesn't help, it doesn't go in. What we do believe in is meaningful, targeted innovation that makes a genuine difference: innovation like ARC Technology for All Mountain skiing, new HRZN Tech for Freeski, Doubledeck and new RAMP Tech for Racing, and our new Rocker Skins for Backcountry Touring.

PROGRESSIVE PERFORMANCE

We've always made skis that push the sport we love forward – and we're not about to stop now. It's why we've created five types of rocker for different playgrounds. Special V-shapes for women skiers. And why we match the weight of every ski to both the skier and skiing it's made for ... continuous improvements that help skiers break new boundaries all the time.

STYLE WITH SUBSTANCE

What goes into a ski is the most important thing. But the creative guys in our design team also put a lot of care into what goes on them. We offer a huge variety of graphics, from clean, elegant lines and colors on our women's piste skis to super creative, arty images on our Freeski lines. We all spend a lot of time looking at our tips on chairlifts after all – we might as well make that a good thing.

REDSTER

- AUTOMATIC BODY POSITIONING
- ADVANCED SHOCK ABSORPTION
- KILLER ACCELERATION

FEEL THE POWER. ENJOY THE PRECISION.

The Redster is Atomic's fastest ever ski series, and thanks to our brand new third-generation Doubledeck technology it's even easier and smoother to ride. In addition, our new RAMP Tech now actively manages your body position through turns to keep you perfectly centralized over your skis and in full control at all times. For powerful, precision skiing at consistently top speeds.

DOUBLEDECK 3.0

Doubledeck 3.0 innovations include a new free-gliding upper deck to better absorb shocks and increase stability. We've made the connectors softer at the front to make turn initiation even quicker, and stiffer at the back for killer acceleration.

RAMP TECH

Redster features the first ever RAMP Tech. Turning at top speed, RAMP Tech automatically lifts your heel by increasing the ramp angle by up to 10°. This pushes your bodyweight forward over the center of your ski, allowing you to maintain your momentum and carve precise turns on hard groomed slopes with less power and more control.

TAPERED SIDEWALL

Redster now features a Tapered Sidewall. Thicker towards the rear of the lower ski, it gives more support for acceleration.

RAMP TECH

**FOR POWERFUL PRECISION
SKIING**

RAMP Tech is our new performance technology for Redster. When you turn at top speed, the ramp angle under your heel automatically increases by up to 10°. This lifts your heel up and pushes your bodyweight forward over the center of your ski. So you can maintain your momentum and carve precise turns on hard groomed slopes – with less power and more control.

**FEEL THE
POWER.
ENJOY THE
PRECISION.**

WITH RAMP TECH
PERFECT BODY
POSITIONING

WITHOUT

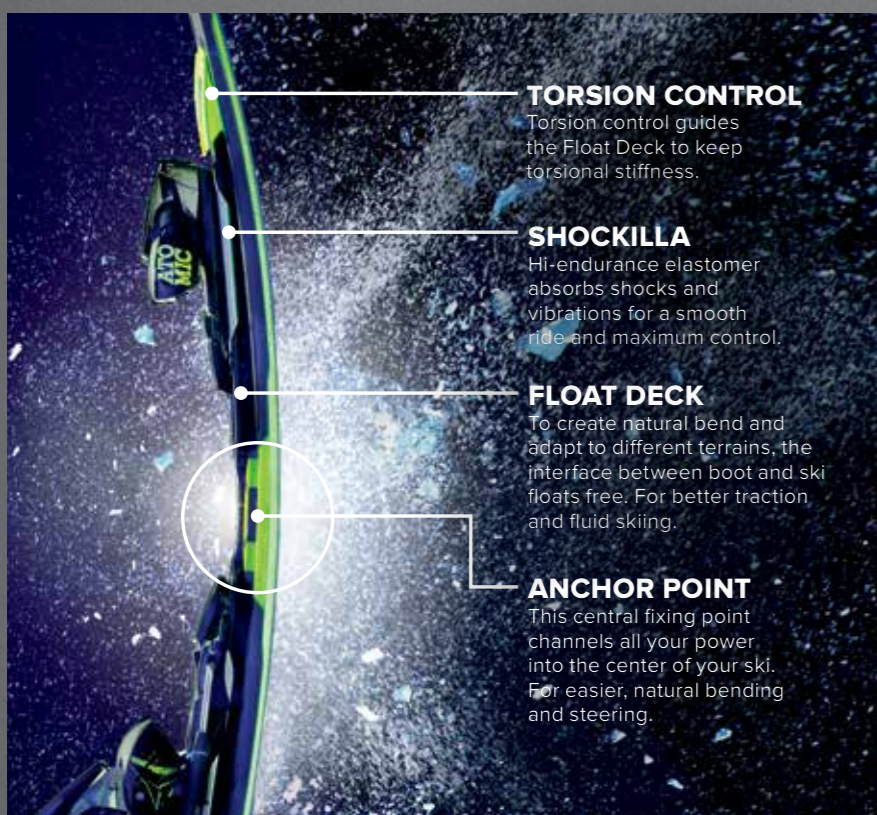

NOMAD [S]

- NATURAL FEEL ON PISTE
- GREAT EDGE GRIP
- UNMATCHED AGILITY

ENGINEERED FOR THE PISTE

The Nomad [S] series really comes into its own on the piste. Its super sporty constructions are purpose built for harder, groomed slopes – including waist widths under 76mm, a stiff piste flex and a Step Down Sidewall 2.0. Most importantly, Nomad [S] features our hugely popular ARC Technology that allows the ski to flex naturally for a smooth, natural ride.

TORSION CONTROL

Torsion control guides the Float Deck to keep torsional stiffness.

SHOCKILLA

Hi-endurance elastomer absorbs shocks and vibrations for a smooth ride and maximum control.

FLOAT DECK

To create natural bend and adapt to different terrains, the interface between boot and ski floats free. For better traction and fluid skiing.

ANCHOR POINT

This central fixing point channels all your power into the center of your ski. For easier, natural bending and steering.

ARC TECHNOLOGY

Unlike conventional skis, ARC Technology uses only one mounting point in the center of the ski. Because your entire power is concentrated in that single point – the Anchor Point – the ski is able to flex easily and naturally, just like a bow. The free-floating deck between boot and ski supports that natural flex. This makes the ski stay in contact with the ground. The result is perfect traction and smooth natural rides with less effort, whatever the snow conditions.

NOMAD

- NATURAL FEEL ON AND SIDE PISTE
- PERFORMANCE IN ANY SNOW
- SUPER STABILITY

ALL MOUNTAIN. ALL DAY.

The Nomad series is one of our global bestsellers, and with the recent addition of ARC Technology we've made it even stronger. It's perfect for people who ski mostly on piste, but who also like to venture off the side into softer snow. Nomad's waist widths of up to 86 mm, All Mountain flex and Step Down Sidewall 2.0 take all snow conditions in their stride, while ARC Technology frees the ski to flex naturally for a smooth, natural ride.

ARC TECHNOLOGY

Unlike conventional skis, ARC Technology uses only one mounting point in the center of the ski. Because your entire power is concentrated in that single point – the Anchor Point – the ski is able to flex easily and naturally, just like a bow. The free-floating deck between boot and ski supports that natural flex. This makes the ski stay in contact with the ground. The result is perfect traction and smooth, natural rides with less effort, whatever the snow conditions.

VANTAGE

- PERFORMS ALL OVER THE MOUNTAIN
- GRIPS IN ANY SNOW
- FITS ANY BINDINGS

SKIS

SKIS

SEE IT, SKI IT.

The Vantage range is as versatile as you get. Good for any binding. Awesome floatation in powder. Great edge hold and stability on hard snow. Agile in any terrain. Progressive all-mountain skiing is the future. The Vantage is ready for it.

BACKBONE TECHNOLOGY

One reason Vantage is so versatile is the Backbone Technology. It's an ultra-lightweight Titanium or Carbon insert that runs the length of the ski like a stabilizing backbone, minimizing weight and adding a ton of strength to the entire construction.

TWIN PROGRESSIVE SIDECUT

A bigger radius at the tip and a smaller radius at the tail makes for easier turn initiation and optimum grip out of turns.

CLOUD

- NATURAL FEEL ON PISTE
- LIGHTWEIGHT FOR EASY HANDLING
- SUPER STYLISH DESIGN

PERFORMANCE, MEET STYLE.

Cloud is our top piste series for women. It's popular because it combines ski technology purpose-built for women – like a lightweight, V-shape construction – with an elegant black-and-white design on a stylishly embossed top sheet. This year we've added a pop of color, plus ARC and Bend-X Technology. Making skiing on Cloud brighter, more natural and even easier to handle on piste.

ARC TECHNOLOGY

ARC Technology uses only one mounting point in the center of the ski – the Anchor Point. This frees the ski to flex naturally like a bow, resulting in perfect traction and smooth, natural rides with less effort.

BEND-X TECHNOLOGY

A special flex zone in the binding area helps you to bend your skis with less power. This makes it easier to initiate turns on piste.

LIGHTWEIGHT CONSTRUCTION

New constructions keep Cloud's weight down for super easy handling, but without compromising skiing performance.

CLOUD ELEVEN ARC

NEW

AFFINITY

- GREAT PERFORMANCE IN ANY SNOW
- EASY, LIGHT HANDLING
- BRIGHT AND COLORFUL

MIX IT UP

The Affinity series works like a dream on piste, but it also looks after you when you venture off the side. It's tailored specifically to complement the way women ski, with a V-shape body, plus an All Mountain Rocker and colorful design that's one part stylish, three parts fun.

V-SHAPE

Thanks to the women-specific V-shape body with its narrower tail than tip, turning becomes effortless from beginning to end.

ALL MOUNTAIN ROCKER

The Affinity range features an All Mountain Rocker in the tip for great versatility and performance in all conditions and over any snow.

AFFINITY STORM

CENTURY

- MASSIVE FLOATATION
- STABILITY ON HARD TERRAIN
- RIDDEN BY THE WORLD'S BEST FEMALE SKIERS

TURN ON THE STYLE

Century skis look amazing, but more importantly when you're in powder they feel amazing too. Both Century skis are completely new and built exclusively to help female skiers rip in powder – with a super light build, fat 109 or 102 waist widths and a Powder Rocker in tip and tail for awesome floatation.

SPROCKET POWER BOOSTER (SPB)

Carbon inserts laid directly onto the core in front of and behind the binding area maximizing rocker stability and allowing you to charge the chop with confidence.

LITE WOODCORE

The Century's new construction around the lightweight Poplar woodcore optimizes the ski's weight without sacrificing any of its shock absorption or stability.

POWDER ROCKER

A progressive profile consisting of tip and tail rocker with camber underfoot creates a supremely versatile platform that excels in powder, crud and everything in between.

Century skis come with a Lite Woodcore which also makes them awesome Freeride Touring skis. Great for reaching those best spots – both by boot packing and skinning.

PUNX + INFAMOUS

- CATCH-FREE TAKEOFFS
- CONFIDENT LANDINGS
- GREAT DURABILITY

THE CHOICE OF OUR FREESTYLE PROS
 Park and pipe is always progressing, and the Punx and Infamous are the two skis leading the charge. Whether you prefer redefining what is possible on the Punx or progressing your focus on style with the Infamous, Atomic has the park ski for your needs.

PARK ROCKER

Slight early rise in the tip and tail allows for butters and catch-free takeoffs.

STOMP SIDECUT

Stomp with confidence. Both the Punx and Infamous are straighter in the tip and tail with a tighter radius underfoot for predictable landings.

STEPDOWN SIDEWALL 2.0 WOODCORE

This special one-piece sidewall construction with woodcore creates the winning combination of perfect flex, durability, and shock absorption.

PUNX

POWDER: A NEW HORIZON

Featuring all new HRZN Tech, the new Bent Chetler provides the ultimate playful powder experience. Along with Chris's input, we have created a ski that not only floats better in deep snow but now allows you to have more fun and expand on the possibilities in powder.

HRZN TECH

We've taken rocker and expanded its horizons. By blending proprietary technologies of ABS sidewall construction with revolutionary across the ski (horizontal) rocker, we have created the ultimate design for powder skiers. Without sacrificing swing-weight, we have added 10% more surface area in tip and tail and delivered less tip deflection and better tracking through chop and crud.

SPROCKET POWER BOOSTER (SPB)

Titanium or Carbon inserts laid directly onto the core in front of and behind the binding area maximizing rocker stability and allowing you to charge the chop with confidence.

POWDER ROCKER

A progressive profile consisting of tip and tail rocker with camber underfoot creates a supremely versatile platform that excels in powder, crud and everything in between.

AUTOMATIC

The Automatic has expanded. Built on the huge success of its directional shape we've added one new waist width of 102 to the range and made the original Automatic 117 10% stiffer for more aggressive skiing. Automatic skis come with a Lite Woodcore which makes them awesome Freeride Touring skis. Great for reaching those best spots – both by boot packing and skinning.

BACKLAND

- CLIMBS EASILY
- PERFORMS IN ANY SNOW
- GRIPS AND RIPS DOWNHILL

FINE-TUNE YOUR TOURING

Backland is perfectly built for the dual disciplines of touring: very light with a Ultralite Woodcore for climbing up; super stable with a Carbon Backbone and extremely versatile with an All Mountain Rocker for skiing down. It's as good on the piste as it is in the backcountry, too. All you need wherever you're going – wrapped into one All Mountain Touring ski series.

ULTRALITE WOODCORE

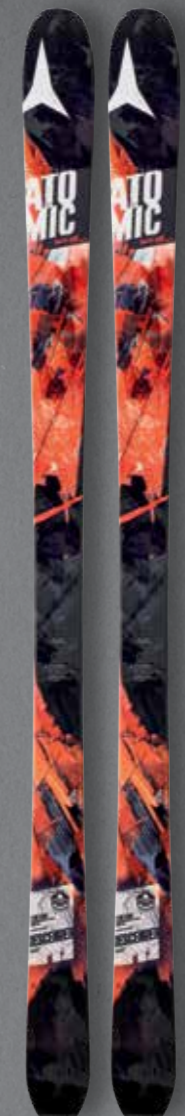

Incredibly lightweight Poplar/Caruba woods keep Backland's weight down but without compromising downhill performance.

CARBON BACKBONE

One reason Backland is so versatile is the Carbon Backbone – an ultra-lightweight carbon insert that runs the length of the ski like a stabilizing backbone. This provides exceptional agility and edge hold, but also keeps the ski's weight right down.

ALL MOUNTAIN ROCKER

A tip rocker designed to give you great performance in varying conditions and over any snow.

SKI RUNNING

ULTIMATE

LIGHTWEIGHT

ULTIMATE

- ULTRA-LIGHT UPHILL
- STRONG DOWNHILL
- FAST AND FUNCTIONAL

FROM SKI RUNNING TO FIRST DESCENTS

Ultimate is one of the lightest ski running skis on the market with a strong downhill performance despite its minimal weight. We created the original Ultimate with multiple ski mountaineering world champion, Kilian Jornet, who used it to win an overall World Cup. Now we're introducing a second Ultimate with a wider waist – inspired by Kilian's development as an athlete away from ski running into more extreme alpinist ski mountaineering, including first descents. Ideal for endurance ski tourers who want to stay super light up, and really quick down.

RACE TIP

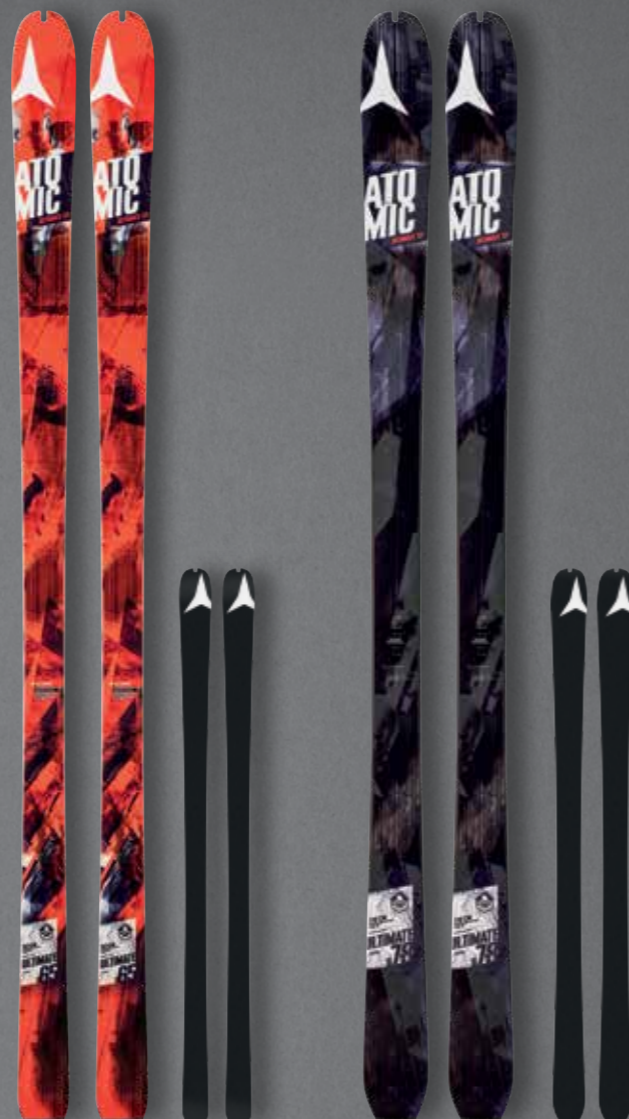

For fixing skins quickly when time matters.

ULTRALITE WOODCORE

Made from ultralight Poplar/Caruba wood, this core keeps weight down to a minimum – giving you a real competitive edge while climbing.

CARBON LAMINATES

Ultimate's carbon laminates create stability and transfer power to the snow. For unmatched performance downhill.

CLIMBING SKINS

SKINS ARE SKINS ARE SKINS, RIGHT?

Well we don't think so. In fact, we believe skins are an area where there are loads of improvements to be made. And we've started those improvements with the invention of our new Rocker Skins.

NEW ROCKER SKINS

Better Glide

The Glide Zone in the tip-rocker area is made from ultra-fast ski-base material. The result is better gliding and less friction when tracking in powder.

Safe Grip

The Grip Zone in the ski-camber area is made from 100% Mohair. It provides an extra strong grip in all snow conditions.

Lighter

Rocker Skins are 10% lighter than regular skins and reduce water saturation, making climbing and carrying easier.

EASIER TRIM & FIT

Our new Trim & Fit system makes trimming the MultiFit and StraightFit skins to the right shape super quick and easy, with features like cut lines for different ski lengths.

As well as new Rocker Skins we also offer regular high quality PreFit skins for our Backland series, made from 100% Mohair.

KIDS

- EASIER FLEX FOR LIGHTER SKIERS
- DIMENSIONS THAT ADAPT AS KIDS GROW
- SAFE AND EASY HANDLING

AS KIDS GROW, SO DO THEIR SKIS

Getting kids interested in the best sport in the world is easy when they're able to control their skis. It's why our kids' range uses Bend-X Technology – so kids can bend their skis no matter how light they are. And because when kids grow the way they ski changes, we've created a range that adapts as sizes go up: as the ski length goes up the width, V-shape and camber changes. So each ski size has a shape that suits the ability and age group riding them.

BEND-X TECHNOLOGY

A special flex zone in the binding area enables even the lightest kids to bend their skis and get strong contact with the snow. This makes initiating turns easier even with little power from little legs.

ADAPTIVE DIMENSIONS

As the length of skis goes up, the dimensions and V-shape of the ski also changes – not just in ratio but specifically to match the skiing style of each age group.

SKI TECHNOLOGY

Our skis consistently outperform other skis in their class. One of the reasons for that is our constant strive for meaningful, targeted innovation that makes a genuine difference. The result is unique Atomic technology across all skiing elements and playgrounds.

RAMP TECH

RAMP Tech is our new performance technology for Redster. When you turn at top speed, the ramp angle under your heel automatically increases by up to 10°. This lifts your heel up and pushes your bodyweight forward over the center of your ski. So you can maintain your momentum and carve precise turns on hard groomed slopes – with less power and more control.

DOUBLEDECK 3.0

The third generation of our hugely successful Redster Doubledeck technology. Innovations include a new free-gliding upper deck to increase stability and dampening, softer connectors at the front to make turn initiation easier, and stiffer connectors at the back for killer acceleration.

ARC TECHNOLOGY

Our Nomad and Cloud skis both feature ARC Technology. This technology means the ski has only one mounting point in the center of the ski – the Anchor Point. This frees the ski to flex naturally like a bow, resulting in perfect traction and smooth, natural rides with less effort.

BACKBONE TECHNOLOGY

Skis like our Vantage and Backland include an ultra-lightweight Titanium or Carbon insert that runs the length of the ski like a stabilizing backbone, minimizing weight and adding a ton of strength to the entire construction.

HRZN TECH

Featured on the new Bent Chetler, HRZN Tech takes an ABS sidewall construction and blends it with a revolutionary across-the-ski, horizontal rocker. It adds 10% more surface area in tip and tail, with less tip deflection and better tracking through chop. The ultimate design for powder skiers.

BEND-X TECHNOLOGY

Selected skis in our women's, kids' and rental ranges feature a special flex zone in the binding area. This helps skiers bend their skis with less power, making turn initiation much easier – even for beginners.

ROCKER TECHNOLOGY

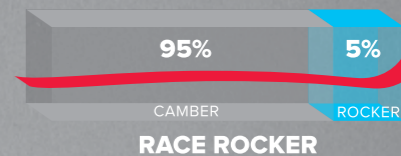

WHAT ROCKER ARE YOU?

Wherever skiers love to ski the most, rockers precisely tailored to the terrain will improve their performance. Which is why all our skis boast the advantages of our Rocker technology.

Simply put, a rocker is an early rise in the tip (and sometimes the tail) of a ski. In all our skis, this rocker is combined with traditional camber for outstanding edge-hold and stability. Generally, the more rocker there is, the more performance and floatation you get in powder, and the more maneuverability and versatility in any snow. While the more camber a ski has, the more grip and performance you get on hard terrain. As well as our four specific rockers from last year, this year we're introducing a new Race Rocker at the top end of our range.

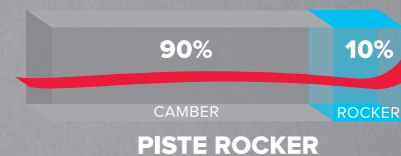

RACE ROCKER

A new rocker shape with a very slight early rise in the tip that is ideal for hard pack. Its camber provides extra-precise edge grip, while the rocker means easier turn initiation and no unwanted edge-catching. For increased safety at high speeds.

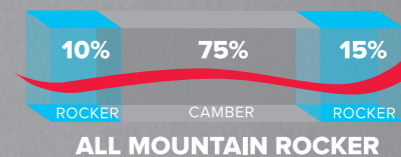

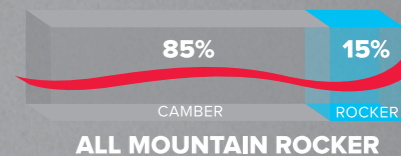

PISTE ROCKER

The perfect rocker for prepared slopes. Its camber offers extra-precise edge grip, while the slight early rise in the tip means easy turn initiation. The combination provides great stability.

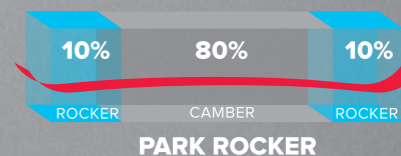

ALL MOUNTAIN ROCKER

An early rise either just in the tip, or in both tip and tail. A rocker that's super versatile, providing performance on all snow conditions and any terrain, both on and off-piste.

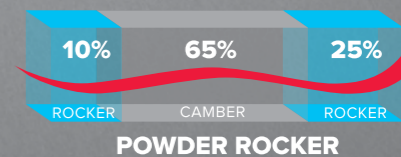

PARK ROCKER

A rocker designed for the stability skiers need in the park: with a slightly early rise in the tip and tail to allow for butters and confident landings.

POWDER ROCKER

The most pronounced Rocker we have in tip and tail, combined with camber underfoot. For awesome floatation and maneuverability in deep powder, crud and anything in between.

WARDEN MNC

- TÜV CERTIFIED FOR ANY SOLE
- WTR COMPATIBLE FOR BETTER WALKING
- POWERFUL AND PRECISE IN ONE

THE BINDING FOR ALL SOLES

Warden is a whole new generation of binding. Inspired by the backcountry it has the same oversized platform and toe as our Tracker binding, but is actually the first binding to be TÜV approved for all three types of soles: DIN, Touring and Walk To Ride (WTR). That means it fits every normed boot in the market. It also combines the strength and precision you need on-piste with the smooth, progressive power transfer and control you need when skiing all over the mountain and through any snow.

MNC (MULTINORM CERTIFIED)

Thanks to an adjustable toe height and sliding AFD toe piece, Warden is TÜV safety approved for all three boot sole norms on the market: DIN (ISO 5355), Touring (ISO 9523) and WTR.

WTR (WALK TO RIDE) COMPATIBILITY

Warden is compatible with new Walk To Ride (WTR) boots – boots with special grip pads for better walking.

OVERSIZED PLATFORM + U-POWER TOE

Provides the maximum power transmission and strong, precise steering you need – but also natural flex and strong dampening.

Table with columns: ART.NO. SKI, SKI, SIZES (cm), BRAKE, ART.NO. BINDING, BINDING, SET NO. Rows include various ski models like REDSTER DOUBLEDECK XT, VANTAGE RITUAL, etc.

BOOTS

Narrow, wide, for all-mountain skiing, for backcountry touring. Whatever your footshape and wherever you're going, we've got an Atomic boot for you.

**ONE OF
THE BIGGEST
STEPS YOU
CAN MAKE
IS TO FIND
THE RIGHT
BOOT**

Everyone spends time thinking about what skis to ride, and that's great. But here's the thing – one of the biggest steps anyone can make to take their skiing forward is to get a pair of boots that fits them perfectly.

IT'S WHY WE SPEND SO MUCH TIME WORKING ON EXACTLY WHAT GOES INTO OUR BOOTS

To make sure everyone can find the perfect Atomic boot for them, whatever their style and footshape.

FIT

From our trademark narrow fit on Redster to our legendary Hawx medium fit to our comfortable wide fit in our Live Fit boots, we've got a fit for any footshape. Thanks to our technologies like Live Fit and Dynashape, our boots instantly adapt to your feet. And now our new Memory Fit even memorizes your foot shape for a permanent personalized fit.

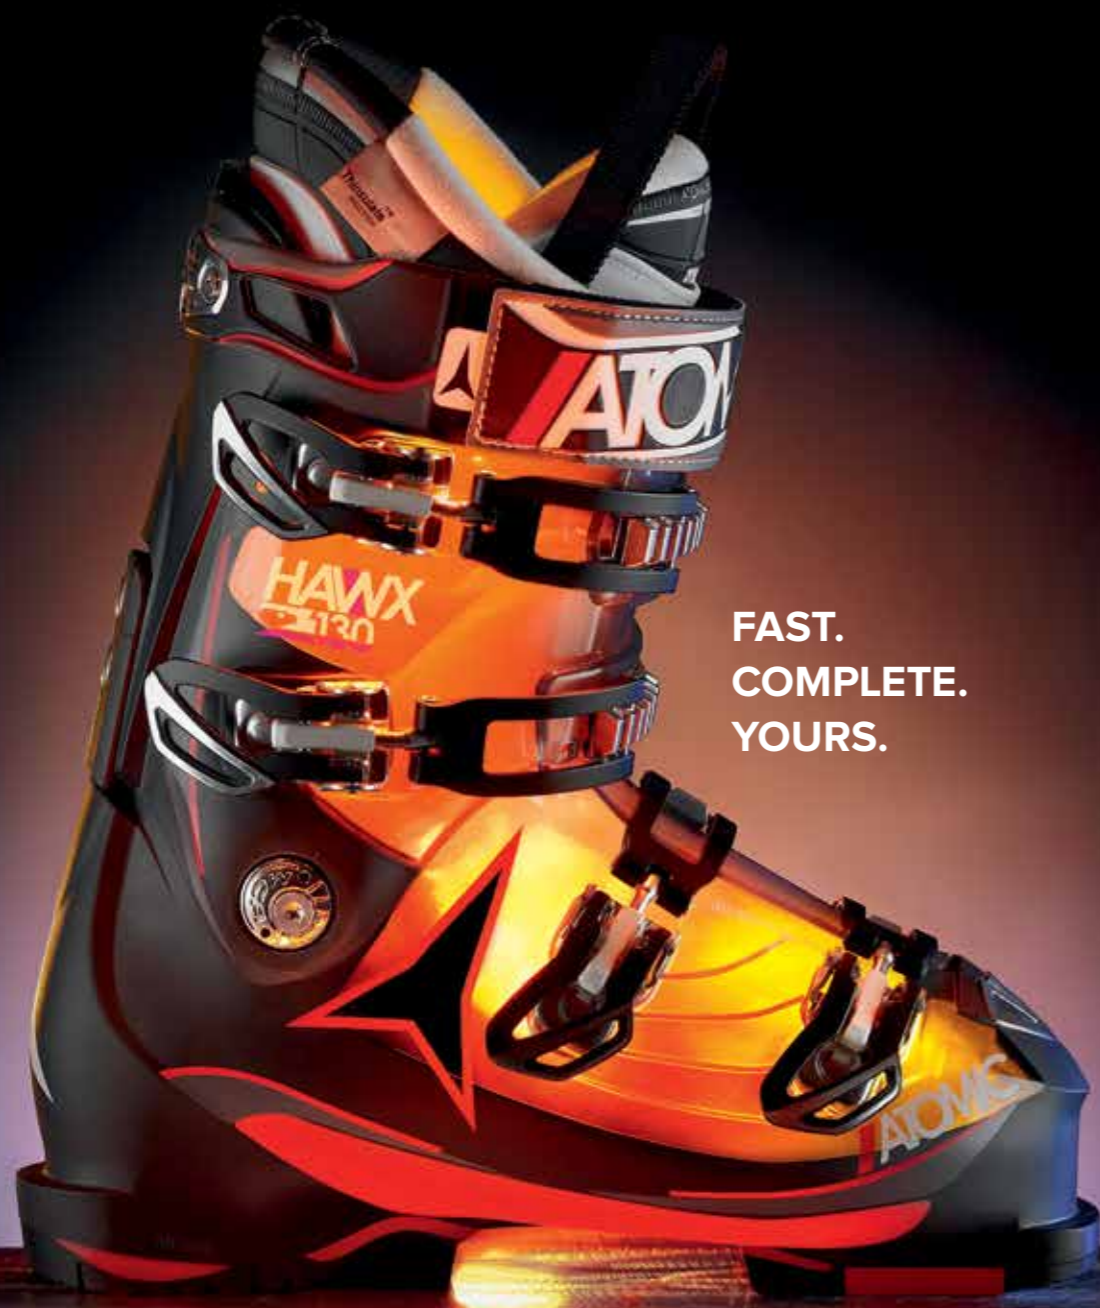

COMFORT

Boots can make or break a day. So we always look for ways to make our boots even more comfortable. We've added 3M™ Thinsulate™ to keep feet warm. We've also made our boots lighter than ever. We use plush linings for the women's range and constantly make stepping in and out even easier. We want wearing our boots to be a pleasure, not a pain.

PERFORMANCE

Performance means different things in different types of skiing. For example, Racing it's about speed so we add Carbon Spine for extra power. Touring it's about boots that help you climb as well as they help you ski, which is why we invented our Free/Lock System. Whatever type of skiing, our boots are purpose built to produce the performance you need.

**FAST.
COMPLETE.

THE FIT THAT MEMORIZES YOUR FOOT SHAPE.**

NEW IN ALL ATOMIC HAWX 2.0 AND REDSTER BOOTS.

THE PERFECT PERSONAL FIT. NOW FASTER.

THE NEXT STEP IN BOOT FITTING

Atomic Memory Fit is an advancement in heat-fitting technology that takes fit, comfort and performance to the next level. And because it's a faster process and available on two of the market's top selling boots, it's a great addition to the fitting service you can offer your customers.

COMPLETE ADAPTATION

With Memory Fit all three elements of the boot adapt to the foot – shell, cuff and liner – and memorize the entire foot shape. Expansion can be up to 6 mm in total forefoot width and up to 10 mm in total ankle/navicular width. The result is a permanent and complete anatomical fit for your customers.

MEMOLINK

Memolink is our special plastic additive that has been developed to work within Atomic boots. Memolink improves the moldability and stretch characteristics of our plastics and guarantees adhesion during and after the Memory Fit process.

MEMORY FIT TOOLS

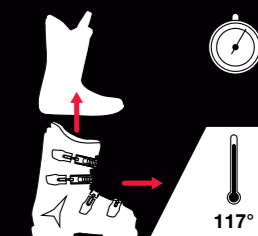

From start to finish, we offer the complete array of professional grade tools required to get the job done right:

A SIMPLE 12-MINUTE PROCESS.

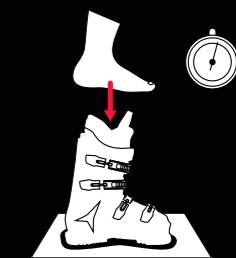

1. HEAT

Remove the liner from the boot and place the shell into the Atomic Memory Fit Oven for five minutes (at a preset temperature of 117°C).

2. MEMORIZE

Take the shell out of the oven, insert the liner and let your customer step into the heated boot onto the Memory Fit Cooling Mat. Close the buckles on the loosest setting. Then ask your customer to hold still for two minutes to allow the boot to adapt and memorize their foot shape.

3. COOL

Wrap the Memory Fit Cooling Pack around the boot. Cool the boot for five minutes to complete the perfect, personal Memory Fit.

REDSTER WORLD CUP

- AUTHENTIC RACE-ROOM FIT
- ULTIMATE WORLD CUP ACCELERATION
- INDIVIDUAL TUNING

THE REDSTER RACING MACHINE

Redster World Cup is for skiers at the top of their discipline. Co-developed and worn by Atomic top athletes like Marcel Hirscher and Mikaela Shiffrin, it's the fastest boot we've ever made. Powerful, responsive and adaptable to individual racers' needs. It has our authentic race-room fit, ultra stiff flexes for explosive acceleration and comes in the iconic Redster racing colors.

CARBON SPINE

Carbon-reinforced areas of the cuff and shell provide maximum power transfer and support on steep terrain, while still maintaining feel and sensitivity at the front of the boot.

FLEX FRAMES

Interchangeable Flex Frames tune the feel underfoot – with three grades of hardness the racer can adjust the sensitivity of the sole.

ROTATIONAL POWER CONTROL

Rotational Power Control allows the cuff to rotate up to 5 mm in each direction for lightning-fast turn initiation, plus customized control and comfort.

MEMORY FIT

The next step in boot fitting. Creates a completely personalized shell, cuff and liner in a matter of minutes.

REDSTER PRO

- PERSONALIZED NARROW FIT
- ULTRA-PRECISE POWER TRANSMISSION
- AMAZING SNOW FEEL

ATOMIC'S TRADEMARK NARROW FIT

Redster Pro brings athlete-proven technology to the slopes. With a trademark narrow fit plus Memory Fit for a personalized finish and a Carbon Spine for extra power, it's the boot for anyone looking for a healthy dose of high performance technology. For the first time we also offer a specific women's Redster Pro version. For female skiers who like to show the men exactly how to rip.

MEMORY FIT

The next step in boot fitting. Creates a completely personalized shell, cuff and liner in a matter of minutes.

CARBON SPINE

Carbon-reinforced areas of the cuff and shell provide increased responsiveness and power transmission, while still maintaining feel and sensitivity at the front of the boot.

3M™ THINSULATE™ INSULATION

Redster Pro W liners now come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions. Thinsulate™ Platinum surrounds the whole foot while standard Thinsulate™ is placed in the toe box only.

HAWX

- LEGENDARY MEDIUM FIT, NOW PERSONALIZED
- EXCEPTIONAL WARMTH
- BETTER BALANCE

BEST JUST GOT BETTER

At Atomic we're big on people finding the perfect fitting boots. It's why we created Hawx in the first place – now the world's best-selling medium fit boot. And it's why we've now updated Hawx with Memory Fit and 3M™ Thinsulate™ Insulation. We're also making it lighter and tweaking the flex area for even better balance. So it continues to provide the best fit and skiing performance you can get from the moment you put it on.

MEMORY FIT

The legendary Hawx fit hasn't changed, but we've added Memory Fit to create a completely personalized shell, cuff and liner in minutes.

POWER SHIFT

Forward lean can be adjusted to 13° or 15° or 17° as well as the flex index by +/- 10 flex points. For a completely personalized experience.

3M™ THINSULATE™ INSULATION

A lightweight, completely re-engineered liner with 3M™ Thinsulate™ Insulation keeps feet warm and responsive even in extremely cold and damp conditions. Thinsulate™ Platinum surrounds the whole foot while standard Thinsulate™ is placed in the toe box only.

SOLE FLEX

The Hawx flex area has moved from the side of the shell to the sole of the boot. This area provides a more natural bending line, promoting better balance, better feel underfoot and more control.

WAYMAKER

- INSTANT MEDIUM FIT
- EXCEPTIONAL WARMTH
- ALL-MOUNTAIN VERSATILITY AND STRENGTH

GO ANYWHERE, SKI EVERYTHING

For progressive all-mountain skiing you need versatility, and the Waymaker is one of the most versatile boots you can get. Its innovative three-buckle design wraps the foot as securely as a four-buckle boot, which means you get maximum power transmission and easy handling at the same time. Waymaker now also features world-class 3M™ Thinsulate™ Insulation to keep your feet warm when it's well below zero. While the lightweight construction, Free/Lock System and choice of grip pads makes walking and skiing anywhere super easy.

LINER CONSTRUCTION

CARBON SPINE

Carbon-reinforced areas in cuff and shell increase responsiveness and power transmission, while still keeping feel and sensitivity at the front of the boot.

FREE/LOCK SYSTEM

Lift the lever and the cuff unlocks from the shell for optimum walking, entry and exit. Press the lever back down and the cuff mechanically locks back, providing 100% power on the way down.

LIVE FIT PERFORMANCE

A Live Fit zone is purposefully placed on the lateral side of the foot to eliminate common 'hot spots', while the medial side of the boot remains solid for power transfer and edge grip.

3M™ THINSULATE™ INSULATION

Waymaker liners now come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions. Thinsulate™ Platinum surrounds the whole foot while standard Thinsulate™ is placed in the toe box only.

LIVE FIT

- INSTANT WIDE FIT
- EXCEPTIONAL WARMTH AND COMFORT
- SUPER EASY HANDLING

THE BOOT THAT FITS AUTOMATICALLY

Put on a Live Fit boot for the first time and it will instantly and automatically fit to your foot. It then continuously adapts as time goes on. This year we've added 3M™ Thinsulate™, the world's premium insulation, to keep your feet warm when it's well below zero. And we've upgraded the two buckle set-up with lighter, sportier buckles so entry and exit is easier than ever without sacrificing performance or foot hold.

3M™ THINSULATE™ INSULATION

Live Fit liners now come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions. Thinsulate™ Platinum surrounds the whole foot while standard Thinsulate™ is placed in the toe box only.

LIVE FIT

These zones automatically adapt to your forefoot shape providing instant comfort, improved feel, better blood flow, warmer toes and happier feet.

MEGA BUCKLES

We've revamped Live Fit's successful twin-buckle design with lighter, sportier, easier to handle buckles.

OVERLOAD

- INSTANT MEDIUM FIT
- INDIVIDUAL TUNING OF GEOMETRY AND FLEX
- ULTRA-LOW STAND HEIGHT

THE ULTIMATE FREESTYLE BOOT

Developed with the world's best freestyle skiers, the Overload represents the pinnacle of freestyle boot design: with an adaptable fit thanks to Live Fit Performance zones, a high and supportive cuff, adjustable geometry, adjustable flex, fully replaceable soles and an ultra-low stand height.

CARBON HIGH BACK

A truly freestyle Carbon Spine that provides the perfect blend of big-air support and buttery flexibility.

FLIP CHIP

An exchangeable plastic insert on the Carbon High Back allows for complete individualized tuning of flex and geometry. Soft and hard chips allow flex to be adjusted +/- 10 flex points.

STABILIZER BUCKLE

Super oversized buckle profile has a unique three-pronged design that provides epic hold and security.

ULTRA-LOW STAND HEIGHT

We've optimized Overload to give it the lowest stand height possible – making it the most sensitive and precise freestyle boot ever created.

LIVE FIT PERFORMANCE

A Live Fit zone is purposefully placed on the lateral side of the foot to eliminate common 'hot spots', while the medial side of the boot remains solid for power transfer and edge grip.

- 101 MM MEDIUM FIT + LIVE FIT PERFORMANCE
- 2-COMPONENT SHELL WITH CARBON HIGH BACK
- 1 MM OFFSET SHELL
- 3° SHELL ROTATION
- FORWARD LEAN ANGLE 13° - 17°
- FLAT BOTTOM CHASSIS

WAYMAKER TOUR

- INSTANT MEDIUM FIT
- LIGHT UPHILL AND SUPER STRONG DOWNHILL
- TOTALLY MOBILE FOR AN OPTIMUM STRIDE

CARBON SPINE

Carbon-reinforced areas of the cuff and shell provide increased responsiveness and power transmission while maintaining feel and sensitivity at the front of the boot.

FREE/LOCK SYSTEM

Lift the lever and the cuff unlocks from the shell for optimum walking, entry and exit. Press the lever back down and the cuff mechanically locks back, providing 100% power on the way down.

MULTI-NORM CHASSIS

Our Touring Grip Pads are made of genuine Skywalk Rubber, complete with industry standard Tech Inserts. They're also interchangeable with Multi-Norm Chassis DIN Grip Pads.

TOURING LOCK BUCKLE

This brand-new buckle clicks into an open position while climbing, allowing for maximum range of cuff movement without buckles coming undone.

LIVE FIT PERFORMANCE

A Live Fit zone is purposefully placed on the lateral side of the foot to eliminate common 'hot spots', while the medial side of the boot remains solid for power transfer and edge grip.

REACH YOUR PEAK

Waymaker Tour is our premium touring boot that climbs as well as it skis. It has our Free/Lock System that lengthens your stride and makes walking all natural. A Pebax shell to make it really light. And a Carbon Spine for awesome power transmission downhill. This year we've also improved the liner fit, added a new power strap, plus a Touring Lock Buckle you can undo when climbing without it rattling around your legs.

KIDS

- EXCEPTIONAL WARMTH
- SUPER-COMFY FIT
- SUPPORT TAILORED TO AGE GROUP

INSPIRE THE NEXT GENERATION

For kids to love skiing they've got to have boots that are warm. Fact. That's why we've updated our kids' boots with full-on 3M™ Thinsulate™ Insulation, even at the lower end of the range. On top of that, as young skiers get bigger our boots don't just go up in size – the design of the cuffs and flex adapt to the changes in their strength and skiing style. So it's easier to learn, easier to progress and easier to have fun.

- OPTIMIZED JUNIOR LAST
- 1-COMPONENT SHELL
- 1 MM OFFSET SHELL
- 0° SHELL ROTATION
- FORWARD LEAN ANGLE 15°

3M™ THINSULATE™ INSULATION

All our Kids' range features world-class insulation, not just in cold spots but from top to toe. This keeps little feet warm well below zero.

PROGRESSIVE CUFF DESIGN

As our boot sizes get bigger, the level of support in the cuff changes. That way, while a kid's skiing style is developing, they're always getting 100% support in all the right places.

EASY, PROGRESSIVE FLEX

Like the cuff, as boot sizes get bigger their flex levels also change to match the changing needs of a skier as they get stronger.

WTR TECHNOLOGY

- EASIER WALKING
- SUPER SKIING
- TÜV SAFETY APPROVED

WALK TO RIDE

First of all, WTR stands for Walk To Ride. It's been developed to make walking in your boots easier and less clunky, without losing performance out while skiing. There are two parts to the technology: WTR Grip Pads for boots and WTR compatible bindings. With WTR Grip Pads, the sole of your boot is rockered in the toe like a touring boot. This makes walking really relaxed and natural. But the extra benefit is that WTR Grip Pads also work with DIN Alpine bindings – as long as those bindings are WTR compatible. WTR compatibility is also certified by the TÜV, so our WTR boots and bindings are completely safe, just like any other DIN boot/binding combo.

COMPATIBLE BOOTS

The following Atomic boots are compatible with ISO 9523 norm compliant WTR Grip Pads:

- Hawx 1.0
- Hawx 2.0
- Waymaker
- Live Fit
- M-Tech
- Overload

COMPATIBLE BINDINGS

With adjustable toe heights and sliding AFD toe pieces, the following Atomic bindings are WTR compatible and ISO 9426 compliant:

- Warden 13 MNC
- STH² 16 WTR
- STH² 13 WTR
- Tracker 16 MNC
- Tracker 13 MNC

LINER TECHNOLOGY

LINER CONSTRUCTIONS

All our boots feature an Asymmetric Liner Construction (ASY). It's the most anatomical liner construction on the market, and the best for supporting your feet while skiing. It features an asymmetric tongue, toe box, collar shape and high-quality lining materials, all geared towards creating a better fit and more comfort than ever.

PLATINUM – GOLD – SILVER – BRONZE

In our boot range we have a new liner hierarchy: Platinum, Gold, Silver and Bronze. You'll see these labels written on the tongue. Our liners get better as they go up from Bronze to Platinum. In particular, they provide the firmer fit better skiers need. They also become longer lasting, warmer and more personalizable.

FIRMER FIT

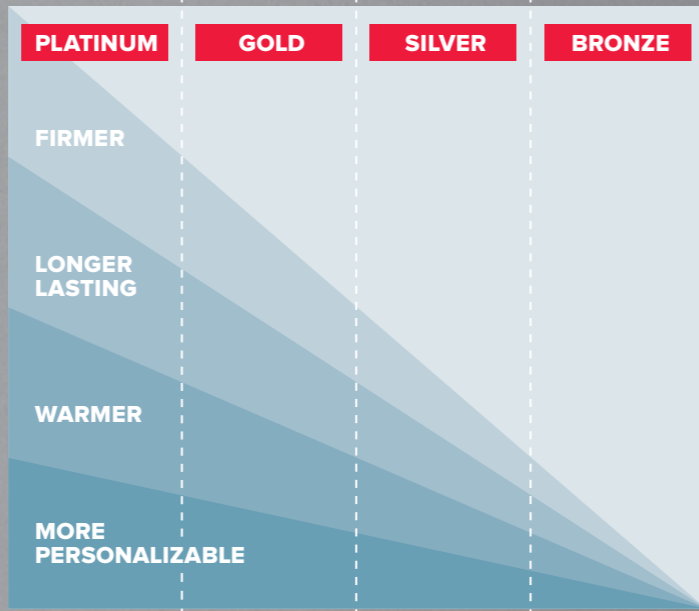

The number one thing for first timers and intermediate skiers is to have boots that fit comfortably. As skiers get better, that fit can get firmer and more responsive. Our liners support that progression, with firmer foam and higher-performance Alcantara liner textiles as our boots go up in flex numbers.

LONGER LASTING

We add Dynashape foam to our liners to make sure they don't pack out as quickly. It instantly molds to your foot then constantly re-adapts. The better the liner the more Dynashape we add: generally, Silver has Dynashape on the ankle, Gold on the ankle and side, Platinum on ankle, side and tongue.

WARMER

From Silver upwards, many of our liners now feature 3M™ Thinsulate™, the world's best-known insulation. The higher the liner, the more Thinsulate it has. This means you now get Thinsulate™ on Redster Pro W, Hawx 2.0, Waymaker, Live Fit, M-Tech and Overload. We've also added Thinsulate to all our Kids boots, as little feet get colder quicker.

MORE PERSONALIZABLE

All our liners are heat moldable for a personalized fit. Different liners have different amounts of heat moldable foam, labelled on the tongue: T1 has foam in the ankle, T2 in the ankle and side, T3 on the ankle, side and tongue.

3M™ THINSULATE™ INSULATION

We're working in partnership with 3M to create the warmest ski boots ever made. As a big first step, we've added this world-class insulation to many of our liners. Specifically, we use Thinsulate™ Platinum all over our Platinum and Gold liners to surround the whole foot. And standard Thinsulate™ in the toe box of our Silver liners (where people get cold first).

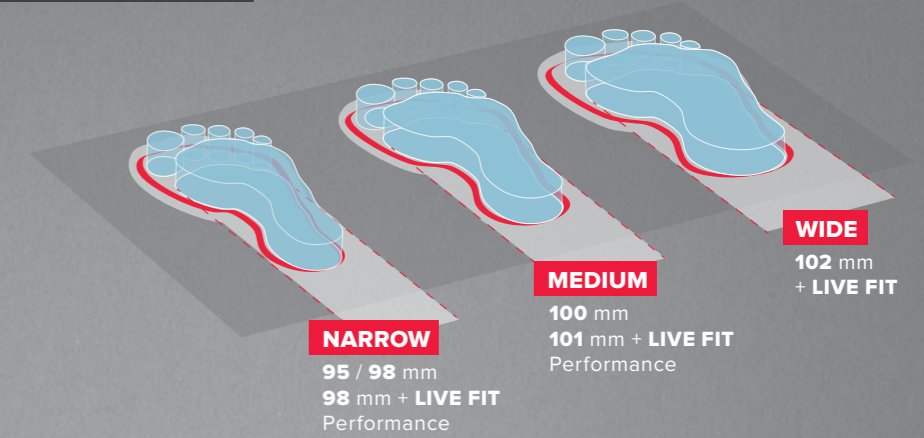

How it works: The more air a material traps in a given space, the greater it's insulating value. The microfibers in 3M™ Thinsulate™ Insulation are far finer than any other fibers. It means they trap more insulating air in less space, even when wet – keeping feet warm and responsive, even in extremely cold and damp conditions.

SHELL TECHNOLOGY

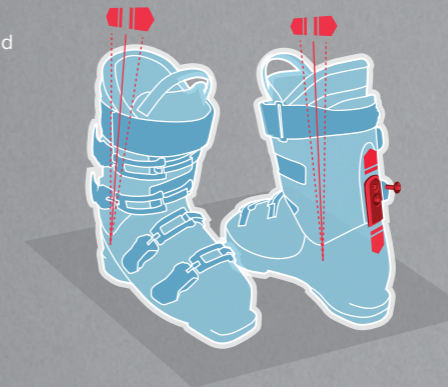

FOOT SEGMENTATION

There is no such thing as an 'All Mountain' or 'Touring' footshape. Different people have different footshapes – ranging from narrow to medium to wide – regardless of where they love to ski. This is why we've designed our range to make sure whatever your type of skiing, we have the perfect fitting boot for you.

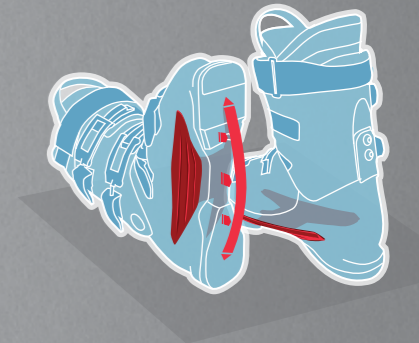

POWER SHIFT

On our Hawx 2.0 boots, forward lean can be adjusted to 13° or 15° or 17° as well as the flex index by +/- 10 flex points. For a completely personalized experience.

SOLE FLEX

The flex area on Hawx 2.0 provides a more natural bending line of the boot, promoting better balance, better feel underfoot and greater control.

CARBON SPINE

On Redster and Waymaker, carbon-reinforced areas of the cuff and shell provide increased responsiveness and power transmission while maintaining feel and sensitivity at the front of the boot.

FREE/LOCK SYSTEM

Featured on all Waymaker boots: lift the lever and the cuff unlocks from the shell for optimum walking, entry and exit. Press the lever back down and the cuff mechanically locks back, providing 100% power on the way down.

LIVE FIT

These zones automatically adapt to your forefoot shape providing instant comfort, improved feel, better blood flow, warmer toes and happier feet. Featured on all Waymaker, Live Fit, Overload and Tracker models.

FLIP CHIP

An exchangeable plastic insert on Overload's Carbon High Back allows for complete individualized tuning of flex and geometry. Soft and hard chips allow flex to be adjusted +/- 10 flex points.

LIVEFIT

**THE
RIGHT KIT.
WHEREVER
YOU WANT
TO GO.**

POLES, PACKS + BAGS

The difference between a good day's skiing and the perfect day's skiing is all in the details. The right pole. The right kit. The right shaped backpack. It's why our range of bags and poles includes lots of different options, each designed for different types of skiing. So wherever you want to go, you'll have the right kit to go with you.

AUTOMATIC PACKS

FEEL AT ONE WITH YOUR PACK

OUR NEW AUTOMATIC BACKPACKS ARE SPECIALLY DESIGNED FOR FULL-ON POWDER SKIING AND FREERIDE TOURING. THEY HAVE ABS COMPATIBILITY TO KEEP YOU SAFE, AND LIVE FIT STRAPS TO KEEP YOU MOBILE AND COMFORTABLE.

BACKCOUNTRY READY

Be ready for the whole mountain, with an easy-access compartment for your avalanche gear, external tool fixations and room for a hydration system.

ABS COMPATIBILITY

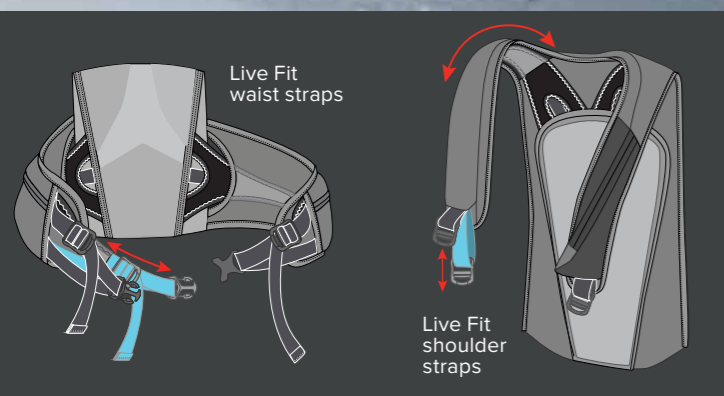

Automatic is compatible with the ABS base unit – the original avalanche airbag system – that can keep you at the surface during an avalanche.

SKI FIT

Live Fit shoulder and waist straps expand and contract when you ski, so your pack sits snug and central on your back without restricting you.

RENTAL

- EXTREMELY DURABLE
- EASY TO USE
- SUPER COLORFUL

STRONG, STYLISH AND EASY TO USE

Extra thick edges and bases. Easy-to-use ski systems. Quick and easy binding adjustment. Bright, colorful designs. Our rental skis are designed to look stylish, ski well, fit easily and last for years.

HEAVY DUTY TOPSHEET

Highly scratch-resistant topsheet to protect the ski from mechanical damage.

THICK BASES AND EDGES

For more grinding cycles and greater durability.

COLOR CODE SYSTEM

Appropriate color codes allow any ski binding to be correctly adjusted to the boot straight away.

BEND-X TECHNOLOGY

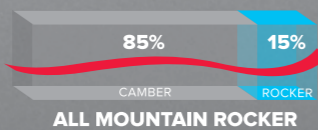

A special flex zone in the binding area of the ETL Plus and Cloud Plus makes it easier to bend the ski using less power. This makes turning easier, even for beginners.

RENTAL BOOTS THAT DON'T LOOK RENTAL

Our rental range contains some of our most successful, best fitting designs and constructions – available in durable colors with sanitized liners, color coded sizing and barcodes.

POLYURETHANE SHELLS

Our durable, highly scratch-resistant shells make radiant colors and transparent designs possible.

SANITIZED LINERS

Soft and warm sanitized liners retain their high-grade appearance and remain extremely comfortable for years.

COLOR CODE SYSTEM

Appropriate color codes allow any ski binding to be correctly adjusted to the boot straight away.

3M™ THINSULATE™ INSULATION

Our high performance rental boots feature 3M™ Thinsulate™ Insulation in the liner. This keeps your feet warm and responsive even in extremely cold and damp conditions.
