OUR NEW 15/16 RANGE

As the world's number one ski brand, we want to provide every skier with all the equipment they need to progress and reach their next level – whether they're trying to win a World Cup, step into the Backcountry or just rock the piste.

To do that we group our range into four elements: Race, All Mountain, Freeski and Backcountry Touring. Each standing for a certain type of skiing. We also constantly innovate – pushing the boundaries of our sport forwards, upwards and outwards every year. And for 2015/16 our innovation includes:

- REDSTER XT** in Race skis
- VANTAGE** in All Mountain skis
- HAWX MAGNA** in All Mountain boots
- AUTOMATIC** helmets in All Mountain / Freeski
- BACKLAND** boots for Backcountry Touring

Wherever you want to ski, Atomic equipment can take you.

The smallest pack in our popular Freeski line.

AMT³ W

Lightweight aluminum pole with lady foam grip.

VANTAGE 90 CTI W

Grips like a high-performance piste ski, but with a progressive look and feel.

RIDGELINE FLEX JACKET W

A fully protective Ridgeline shell. Ideal to wear over your midlayer.

WAYMAKER CARBON 100 W

Super progressive, with Carbon Spine and Free/Lock System.

AUTOMATIC LF 3D

The first helmet with Live Fit 3D for an instant individual fit.

DISCOVER THE BACKLAND

EPIC MOVEMENT FOR CLIMBING. SUPERIOR CONTROL FOR SKIING. SERIOUS COMFORT FOR BOTH.

BACKLAND WITH MEMORY FIT
THE NEW TOURING BOOT BY **ATOMIC**

MEMORYFIT

BACKLAND PACK 30L

The highly technical backcountry rucksack.

BACKLAND TOUR

The pin binding that's incredibly light and easy to use.

BCT CARBON

The touring pole with carbon shaft and length adjustment.

MULTIFIT ROCKER SKINS

Optimized for rocker skis, lighter and with less friction.

BACKLAND 85

Light for climbing, stable for skiing – ideal for touring.

BACKLAND CARBON

Epic natural movement uphill with serious performance downhill.

SAVOR LF
Live Fit in a great-value all-mountain helmet.

SAVOR³ M
Top goggles with unbeatable field of vision, fit and clarity.

SKIS + BINDINGS

INSIDE OUR SKIS

How do we make the best skis in the world a bit better every year? By combining our tried-and-tested ski technology with bold innovation. But while each ski is painstakingly created to match the skiing it's made for, there are some things we believe in so strongly they go into every ski we make...

MEANINGFUL INNOVATION

We don't believe in innovation for the sake of it. If it doesn't help then it does not go in. What we do believe in is meaningful innovation like our new Carbon Tank Mesh for Vantage skis. Plus RAMP Tech for Race, ARC Technology for All Mountain, HRZN Tech for Freeski and Rocker Skins for Backcountry Touring.

PROGRESSIVE PERFORMANCE

We've always made skis that push the sport we love forward. To do that, there is no area of skiing where we're not driving progress. It's why we've created five types of rocker for different playgrounds and we continuously challenge and fine-tune our ski constructions to keep them ahead of the game.

STYLE WITH SUBSTANCE

What goes into a ski is the most important thing. But the guys in our design team put a lot of care into what goes on them, too. From clean, elegant lines on our women's piste skis to arty images on our Freeski lines.

REDSTER

- AUTOMATIC BODY POSITIONING
- ADVANCED SHOCK ABSORPTION
- KILLER ACCELERATION

MARCEL HIRSCHER

RACE ROCKER

Its strong camber provides precise edge grip while the very slight early rise in the tip means easier turn initiation and no unwanted edge-catching.

DOUBLEDECK 3.0

Doubledeck 3.0 includes a free gliding upper deck to better absorb shocks and increase stability. The connectors are softer at the front to make turn initiation even quicker, and stiffer at the back for killer acceleration.

RAMP TECH

Turning at top speed, RAMP Tech automatically lifts your heel by increasing the ramp angle by up to 10°. This pushes your bodyweight forward over the center of your ski, allowing you to maintain your momentum and carve precise turns on hard groomed slopes with less power and more control.

TAPERED SIDEWALL

Redster features a Tapered Sidewall. Thicker towards the rear of the lower ski, it gives more support for acceleration.

FOR THE RACER INSIDE

The Redster is Atomic's fastest ever ski series – for racers and serious speed junkies. Thanks to Doubledeck 3.0 it's smoother and more powerful to ride than ever. In addition, RAMP Tech actively manages your body position through turns to keep you perfectly centralized over your skis and in full control at all times. For powerful, precision skiing at consistently top speeds.

REDSTER DOUBLEDECK 3.0 GS

Our premium race ski for long, fast turns and precise steering on hard pack.

AASS00916 X 12 TL

SIZES 166, 172, 178, 184 cm

- Full Sidewall
- Power Woodcore
- Titanium Powered

RACE ROCKER 5/95/0

REDSTER XT

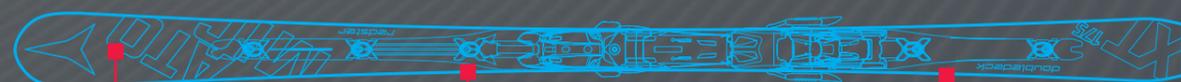

- SHORT TURN AGILITY
- LONG TURN STABILITY
- BEST EDGE GRIP

RIDE REDSTER

The Redster XT is our brand new performance piste ski powered by our Redster race technology. XT stands for 'Cross Turn' meaning it offers the perfect blend of GS and SL performance. But it also comes with a more all-mountain feel for playful smooth rides. This makes it ideal for people who love the high level performance of a Redster, but who don't want to rock the racing look on the piste all day.

RACE ROCKER

Its strong camber provides precise edge grip while the very slight early rise in the tip means easier turn initiation and no unwanted edge-catching.

POWER WOODCORE

A sporty, dynamic ash and poplar woodcore that adds a ton of stability and dampens vibrations at speed.

MULTI RADIUS SIDECUT

The best of slalom and giant slalom combined – the sidecut for playful, agile short turns and smooth long turns on the same ski.

SIDEWALL

For 100% power transmission. Plus strong edge grip and precise steering on piste even in icy conditions.

REDSTER DOUBLEDECK 3.0 XT

NEW

The top XT for performance piste skiing, complete with Doubledeck and RAMP Tech from our racing Redsters.

AA0025742
AAST00374 X 12 TL
AAST00372 X 16 VAR

SIZES 175, 182 cm

- Full Sidewall
- Power Woodcore
- Titanium Stabilizer

RACE ROCKER 5/95/0

CLOUD

- PERFORMANCE ON PISTE
- LIGHTWEIGHT FOR EASY HANDLING
- CLASSY DESIGN

PERFORMANCE MEETS STYLE

If our Century ski is a jazz tune, Cloud is a smooth, beautiful harmony. Underneath the classy design and stylish punched top sheet, it's a fabulous high-performance piste ski, similar to our Redster XT range for men.

MULTI RADIUS SIDECUT

The best of slalom and giant slalom combined – the sidecut for playful, agile short turns and smooth long turns on the same ski.

ARC TECHNOLOGY

ARC Technology uses only one mounting point in the center of the ski – the Anchor Point. This frees the ski to flex naturally like a bow, resulting in perfect traction and smooth, natural rides with less effort.

LIGHT WOODCORE

Dampens vibrations and keeps weight down for super easy handling, all without losing any performance.

RACE ROCKER

Its strong camber provides precise edge grip while the very slight early rise in the tip means easier turn initiation and no unwanted edge-catching.

CLOUD ELEVEN XT NEW

Top of the range in every way – with the same performance technology as the men's Redster XT.

AASS00976 XT 10 Ti

SIZES 148, 155, 162, 169 cm

RADIUS 13 m / 162 cm

WAIST WIDTH 71 mm / 162 cm

WEIGHT 1.86 kg per Ski / 162 cm

- Full Sidewall
- Light Woodcore
- Densolite Core
- Titanium Stabilizer

RACE ROCKER 5/95/0

WOMEN

CLOUD TEN

A premium Cloud ski, perfect for flowing down groomed pistes with ARC Technology.

AASS00982 LITHIUM 10

SIZES 144, 151, 158, 165 cm

RADIUS 12 m / 151 cm

WAIST WIDTH 74 mm

WEIGHT 1.56 kg per Ski / 151 cm

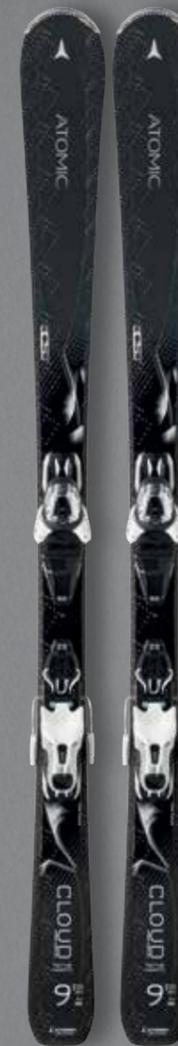

- ARC Technology
- Step Down Sidewall 2.0
- Densolite Core
- Titanium Stabilizer

PISTE ROCKER 10/90/0

WOMEN

CLOUD NINE

Our popular performance piste ski with a hint of forgiveness.

AASS00978 LITHIUM 10

SIZES 142, 149, 156, 163 cm

RADIUS 11 m / 156 cm

WAIST WIDTH 74 mm

WEIGHT 1.71 kg per Ski / 156 cm

- Step Down Sidewall
- Densolite Core
- Titanium Stabilizer

PISTE ROCKER 10/90/0

WOMEN

CLOUD EIGHT

Our popular energy-saving piste ski built for intermediate women skiers.

AASS00974 LITHIUM 10

SIZES 140, 147, 154, 161 cm

RADIUS 12.5 m / 154 cm

WAIST WIDTH 72 mm

WEIGHT 1.65 kg per Ski / 154 cm

- Full Cap
- Densolite Core
- Titanium Stabilizer

PISTE ROCKER 10/90/0

WOMEN

CLOUD SEVEN

Our entry-level Cloud, with a Bend-X zone in the binding area that helps bend your skis with less power.

AASS00980 LITHIUM 10

SIZES 141, 148, 155, 162 cm

RADIUS 12 m / 148 cm

WAIST WIDTH 72 mm

WEIGHT 1.35 kg per Ski / 148 cm

- Bend-X Technology
- Full Cap
- Densolite Core

PISTE ROCKER 10/90/0

WOMEN

ALL MOUNTAIN

AFFINITY

- EASY HANDLING ON AND SIDE PISTE
- GREAT EDGE GRIP
- SUPER STABILITY

BRIGHTEN UP THE MOUNTAIN

Affinity is our colorful and fun piste ski for women. It's for those days when you want to feel in balance – cruising smooth and easy down the piste or side piste, letting your skis and your body do the dance they know how to do, and just enjoying being out in the mountains.

V-SHAPE

Thanks to the women-specific V-shape body with its narrower tail than tip, turning becomes effortless from beginning to end.

LIGHT WOODCORE

Affinity features our lightweight poplar woodcore that optimizes the ski's weight without sacrificing any of its shock absorption or stability.

ALL MOUNTAIN ROCKER

A tip rocker for great versatility and performance in all conditions and over any snow.

ALL MOUNTAIN

AFFINITY STORM

The widest Affinity – best in the range for side-piste skiing.

AASS00972 XT 10 Ti

SIZES 151, 159, 167 cm

RADIUS 14.7 m / 151 cm

NOMAD

- NATURAL FEEL ON AND SIDE PISTE
- GREAT EDGE GRIP
- SUPER STABILITY

ALL MOUNTAIN. ALL DAY.

If Vantage is a straight piste and powder split, Nomads are perfect for mostly on piste and a bit off the side. One of the keys to Nomad's great piste feel is our ARC Technology, which frees the ski to flex naturally for a smooth natural ride even on the hardest groomers. Plus this year it comes with our brand new Carbon Tank Mesh for even more performance on hard packed snow.

CARBON TANK MESH

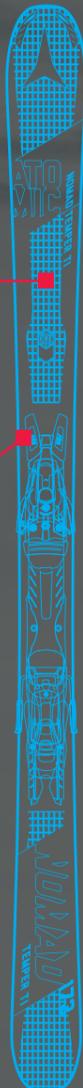

Like on Vantage, we've added a layer of rigid woven mesh to Nomad's ski construction to add a ton of strength and performance across the ski without adding weight.

ARC TECHNOLOGY

ARC Technology uses only one mounting point in the center of the ski – the Anchor Point. This frees the ski to flex naturally like a bow, resulting in perfect traction and smooth, natural rides with less effort.

ALL MOUNTAIN ROCKER

A tip rocker for great versatility and performance in all conditions and over any snow.

NOMAD TEMPER TI

The top model in our series – a really sporty ski built for harder groomed pistes.

INTRODUCING THE
NEW **VANTAGE SERIES**,
FEATURING CARBON TANK MESH.

POWER WOODCORE

Made from lightweight ash and poplar wood, Vantage's core adds overall value and performance.

TI BACKBONE 2.0

An ultra-lightweight Titanium insert runs the length of the ski and ensures exceptional running stability.

FIREWALL

Vantage's extra-full sidewall blocks disruptive vibration and transmits 100% power for solid edge grip.

CARBON TANK MESH

Totally new to ski construction – a layer of super rigid, woven mesh that adds strength across the ski while actually reducing weight.

VANTAGE

- LIGHTER AND STRONGER
- PERFORMS ALL OVER THE MOUNTAIN
- GRIPS IN ANY SNOW

SEE IT,
SKI IT.

The new Vantage range is our big news this year. True to its roots it's a fantastic progressive All Mountain ski, ready for hard pack and soft snow. But we've gone through every layer challenging ourselves to make them better. So it now features Carbon Tank Mesh for less weight and more strength. We've added the Firewall – an extra full sidewall to dampen vibrations and improve edge grip. Plus it has a more directional shape with less tail turn up. The result is a ski with even better piste performance, without sacrificing any of its play in the powder.

ALL MOUNTAIN ROCKER

A tip and tail rocker designed to give you great performance in varying conditions and over any snow.

CARBON TANK MESH

FIREWALL

TI BACKBONE 2.0

VANTAGE 100 CTI

NEW

The widest Vantage and the best performer in powder, but still awesome on hard pack.

- LIGHTER AND STRONGER
- PERFORMS ALL OVER THE MOUNTAIN
- GRIPS IN ANY SNOW

EXPAND YOUR ARENA

Women's Vantage lets you be comfortable and confident with the skiing you're familiar with. But when you're up for it, it also has the oomph to take you to new frontiers on the mountain. Our new Vantage women's range gets all the same ingredients as the men's range, including our state-of-the-art Carbon Tank Mesh and the new Firewall for even more effortless skiing on piste.

CARBON TANK MESH

Totally new to ski construction – a layer of super rigid, woven mesh that adds strength across the ski while actually reducing weight.

FIREWALL

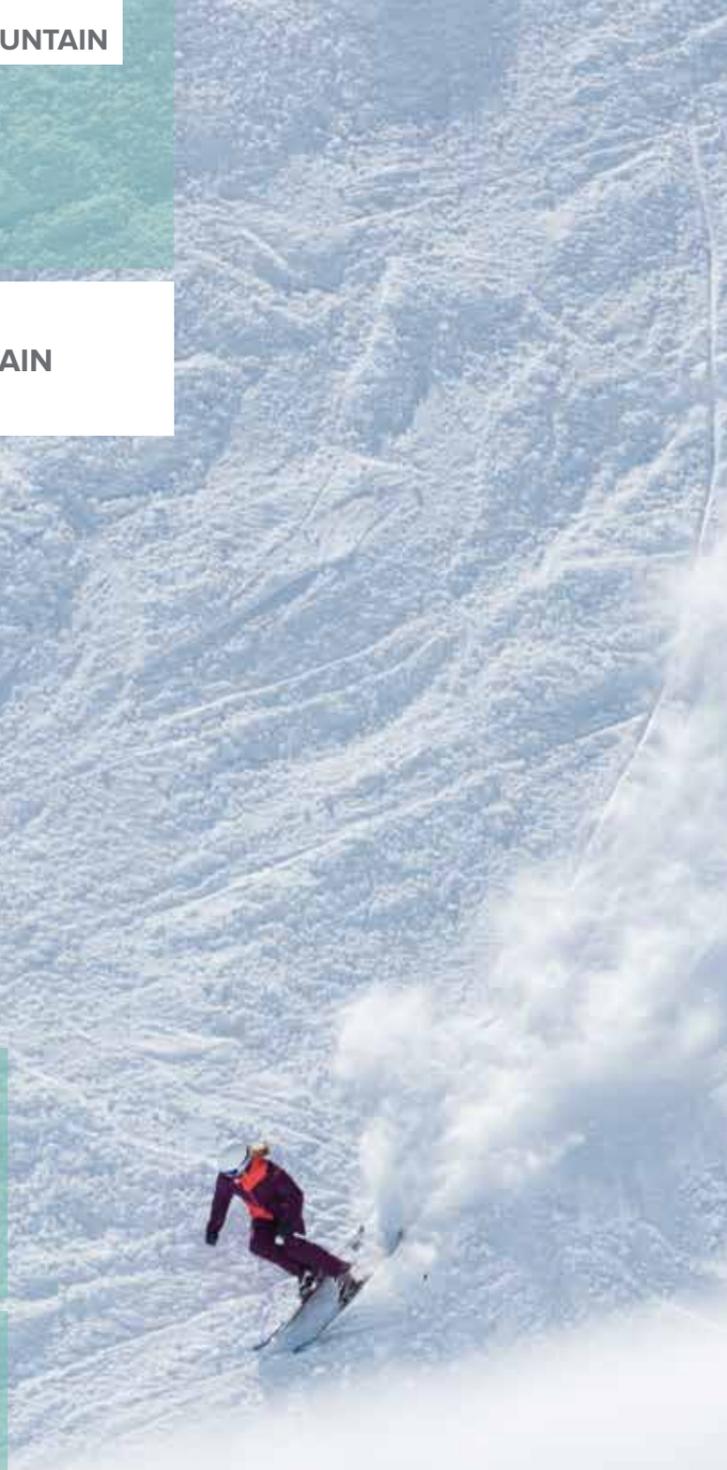

Vantage's extra-full sidewall blocks vibration and transmits 100% power for solid edge grip on hard pack.

TI BACKBONE 2.0

An ultra-lightweight Titanium insert runs the length of the ski and ensures exceptional running stability.

PUNX / INFAMOUS

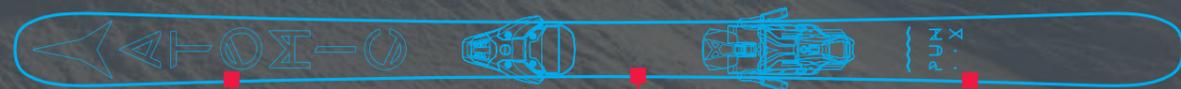

- CATCH-FREE TAKEOFFS
- CONFIDENT LANDINGS
- GREAT DURABILITY

THE CHOICE OF OUR FREESTYLE PROS

Park and pipe is always progressing, and the Punx and Infamous are two skis leading the way. Redefine what's possible in the park with Punx. Take urban skiing to new heights with Infamous. Whatever bumps and jumps you want to take on, these are the skis to take you.

PARK ROCKER

Slight early rise in the tip and tail allows for butters and catch-free takeoffs.

STOMP SIDECUT

Both the Punx and Infamous are straighter in the tip and tail with a tighter radius underfoot for predictable landings.

STEPDOWN SIDEWALL 2.0

This special one-piece sidewall construction creates the winning combination of perfect flex, durability, and shock absorption.

RESIST EDGE

For more durability all along the rails.

PUNX

The competition X-Games ski, leading the progression in park and pipe.

BENT CHETLER

- LIMITLESS FLOATATION
- SUPER PLAYFUL AND AGILE
- BETTER MANEUVERABILITY

EXPAND YOUR HORIZONS

For over six years Chris Benchetler has redefined what's possible on skis in the backcountry with the help of his pro model: the Bent Chetler. And now the latest generation carries on the charge. It's the only ski to feature revolutionary HRZN Tech, which gives it more surface area in tip and tail for even better floatation and an ultimate playful powder experience.

HRZN TECH

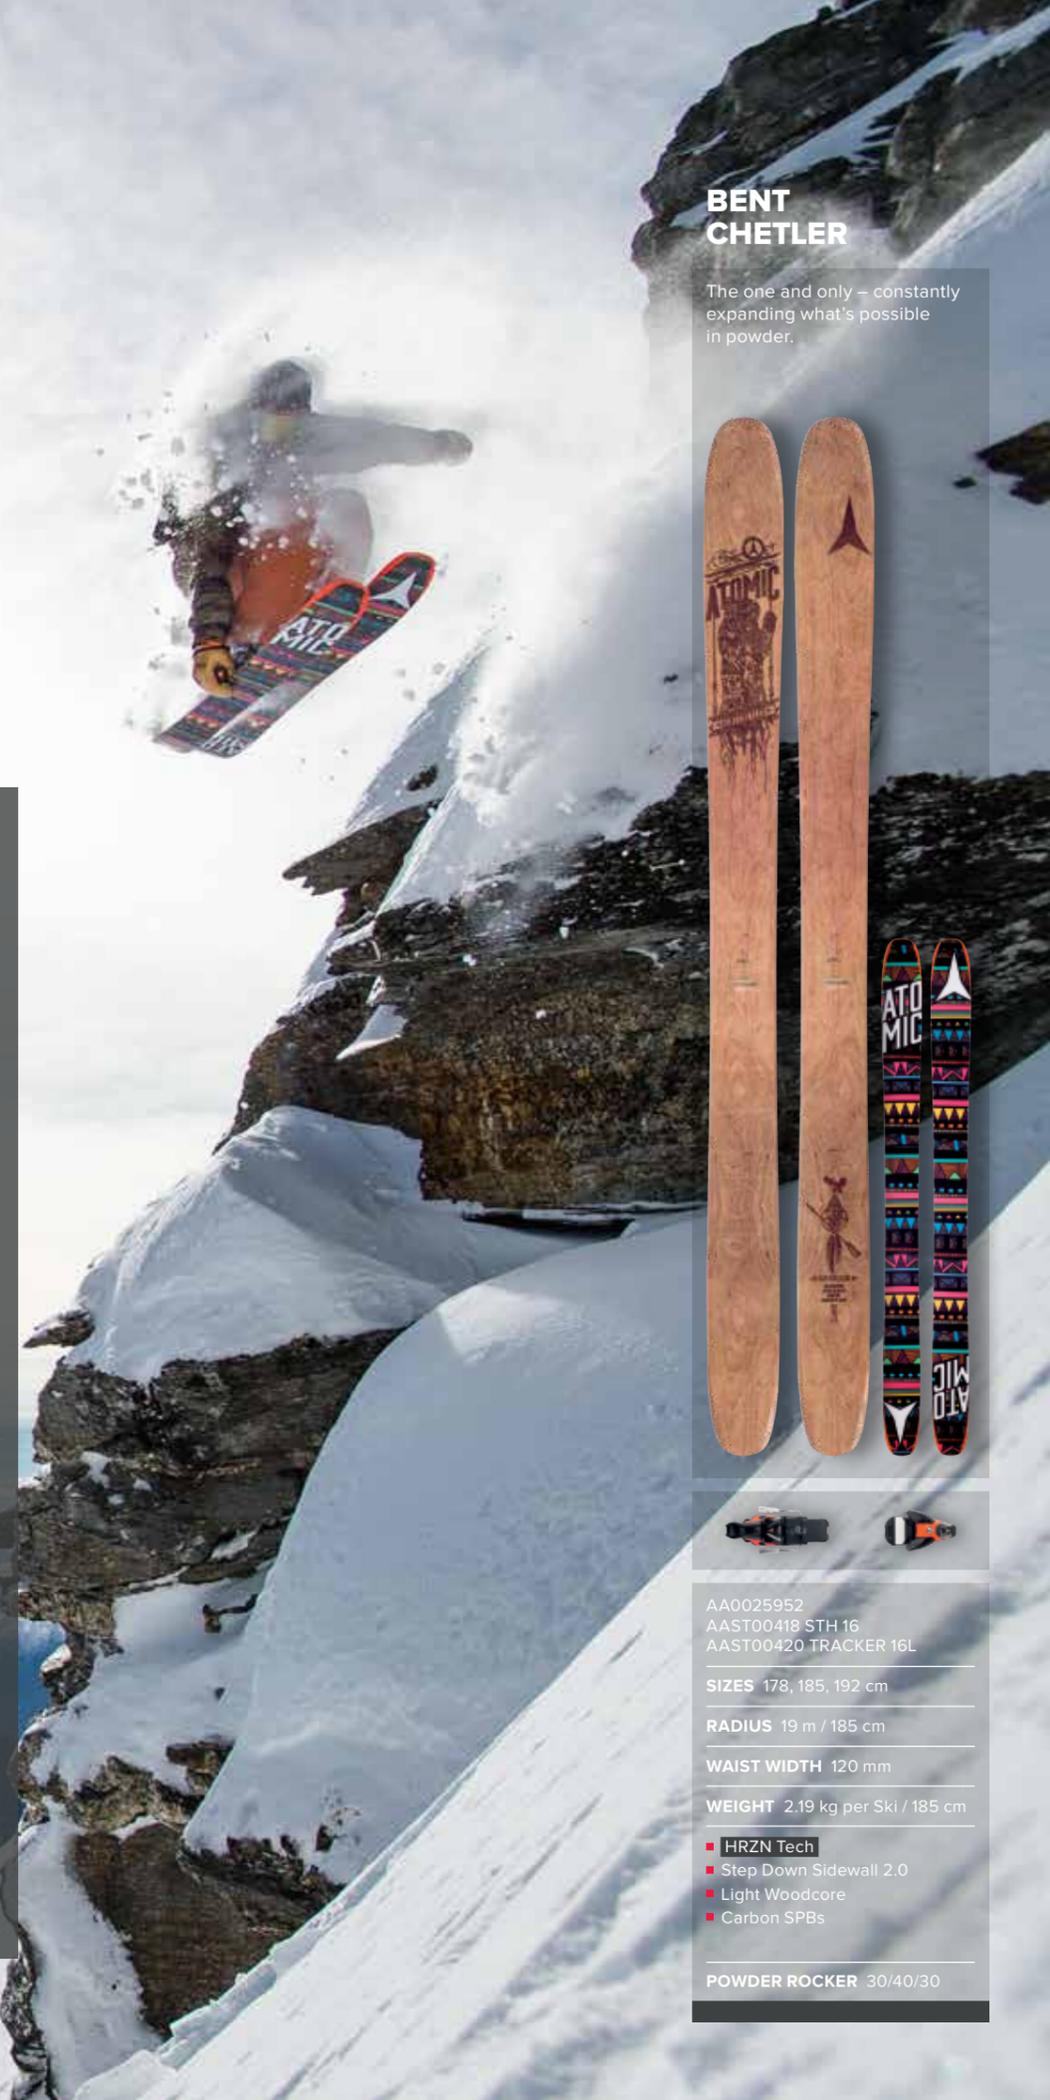

Blends an ABS sidewall construction with a revolutionary across-the-ski (horizontal) rocker to add 10% more surface area in tip and tail. This delivers less tip deflection and better tracking through chop and crud, without adding any swing weight – making it the best design yet for powder.

SPROCKET POWER BOOSTERS (SPB)

Carbon inserts laid directly onto the core in front and behind the binding area maximize rocker stability and allow you to charge the chop with confidence.

POWDER ROCKER

Tip and tail rocker with camber underfoot creates a supremely versatile platform that excels in powder, crud and everything in between.

BENT CHETLER

The one and only – constantly expanding what's possible in powder.

SKITRACER

- FINDS LOST SKIS IN POWDER
- WORKS WITH YOUR SMARTPHONE
- A FAVORITE WITH OUR ATHLETES

YOUR ONLY FRIEND ON POWDER DAYS

When a great powder day comes along then let's face it; friendship goes out the window. Everyone wants to get those first lines in untracked powder. And no-one wants to screw that up by losing a ski and spending hours digging for it – stuck while the fresh pow disappears around you. But hey – it happens. Except now with the SkiTracer attached to your ski, when you lose a ski all you have to do is bust out your smartphone and track it using the SkiTracer app.

+

It's the quickest and most advanced way to find your ski yet, and already a big favorite with our top powder athletes. No more lost skis. No more missed powder.

AUTOMATIC

- MASSIVE FLOATATION
- STABILITY ON HARD TERRAIN
- FREESKI/FREERIDE TOURING HYBRID

GO BIG, GO DEEP.

We created the Automatic when freeride pros Sage Cattabriga-Alosa and Dana Flahr came to us on a mission to build the best in Big Mountain powder performance. Our massively popular Automatic series is the result – an awesome pair of powder chargers including a versatile 102 as well as a full-fat 117. With their great performance-to-weight ratio, these skis are great hybrids: perfect for powder skiing and Freeride Touring depending on what bindings you mount.

POWDER ROCKER

Tip and tail rocker with camber underfoot creates a versatile platform that excels in powder, crud and everything in between.

SPROCKET POWER BOOSTERS (SPB)

Titanium inserts laid directly onto the core in front and behind the binding area maximize rocker stability and allow you to charge the chop with confidence.

LIGHT WOODCORE

The Automatic is constructed around a lightweight Poplar woodcore. This optimizes the ski's weight without sacrificing any shock absorption or stability.

AUTOMATIC 117

The original and fattest ski in the Automatic range, for deep storm days.

MOLLY BAKER

BACKLAND

- CLIMBS EASILY
- PERFORMS IN ANY SNOW
- GRIPS AND RIPS DOWNHILL

DISCOVER THE BACKLAND

Backland skis are perfect for the dual disciplines of touring. Very light with an Ultra Light Woodcore for climbing. Then super stable and versatile with a Carbon Backbone and All Mountain Rocker for skiing. And because not every day can be a powder day, we've made them as good on the hard pack as they are on soft snow. Combine them with our new Backland boots, bindings and skins and you've got all you need for your tour.

CARBON BACKBONE

An ultra-lightweight carbon insert that runs the length of the ski like a stabilizing backbone. This provides exceptional agility and edge hold with no extra weight.

ULTRA LIGHT WOODCORE

Incredibly lightweight Poplar and Caruba wood keeps Backland's weight down but without compromising downhill performance.

ALL MOUNTAIN ROCKER

A tip rocker designed to give you great performance in varying conditions and over any snow.

BACKLAND 95

The widest, most progressive ski in the range for especially strong downhill performance.

ULTIMATE

- ULTRALIGHT UPHILL
- STRONG DOWNHILL
- IDEAL FOR ENDURANCE TOURING

THE ORIGINAL SKI RUNNER

The Ultimate 65 is our out-and-out ski-runner, and this year we've managed to make it even lighter to give you a real competitive edge on the way up. At the same time the solid downhill performance of the Ultimate 78 means it's an ideal option for the growing world of Endurance Touring – particularly for tourers who appreciate staying really light.

ALL MOUNTAIN ROCKER

A tip rocker designed to give you great performance in varying conditions and over any snow.

RACE TIP

A cut-out tip specially made for fixing skins quickly when time matters.

ULTRA LIGHT WOODCORE

Made from Poplar and Caruba wood, this core keeps weight down to a minimum for a real competitive edge while climbing.

CARBON POWERED

Two ultra-lightweight carbon inserts create stability and transfer power to the snow for unmatched performance downhill.

ULTIMATE 65 WC

The original ski running powerhouse, and even lighter than before at just 680g.

CLIMBING SKINS

- BETTER GLIDE AND SAFE GRIP
- EASY TO HANDLE AND MAINTAIN
- LIGHTWEIGHT

ANOTHER STEP FORWARD FOR SKINS

We believe there are lots of improvements to be made with skins. Last year we started those improvements with our award-winning Rocker Skins. This year we've added our new hybrid glue – giving the skins stronger hold at low temperatures, and making them much easier to maintain.

ROCKER SKINS

Glide Zone: The zone in the tip-rocker is made from ski-base material. The result is better gliding and less friction when tracking in powder.

Grip Zone: The zone in the ski-camber area is made from 100% Mohair. It provides an extra strong grip in all snow conditions.

Lightweight: Rocker Skins are 10% lighter than regular skins and reduce water saturation, making climbing and carrying easier.

EASY HANDLING

New hybrid glue makes handling your skins a hundred times easier. They are easier to attach and detach. And you don't even need to renew the glue – just wash your skins and the glue renews itself.

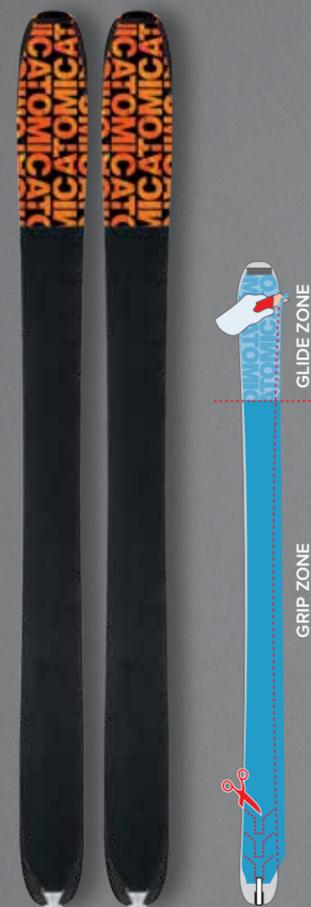

EASIER TRIM & FIT

Our Trim & Fit system makes trimming MultiFit and StraightFit skins quick and easy, with features like cut lines for different ski lengths. We also offer regular high-quality PreFit skins for our Backland series, made from 100% Mohair.

MULTIFIT ROCKER SKINS

NEW

Award-winning revolution in skins, now with new hybrid glue for easy handling. Can be quickly and easily trimmed with our Trim & Fit system.

KIDS

- EASIER FLEX FOR LIGHTER SKIERS
- DIMENSIONS MATCHED TO AGE GROUPS
- SAFE AND EASY HANDLING

AS KIDS GROW, SO DO THEIR SKIS

Getting kids interested in the best sport in the world is easy when they're able to control their skis. It's why our kids' range uses Bend-X Technology – so kids can bend their skis no matter how light they are. And because when kids grow the way they ski changes, we've created a range that adapts as sizes go up: as the ski length goes up the width, V-shape and camber changes. So each ski size has a shape that suits the ability and age group riding them.

BEND-X TECHNOLOGY

A special flex zone in the binding area enables even the lightest kids to bend their skis and get strong contact with the snow. This makes initiating turns easier even with little power from little legs.

ADAPTIVE DIMENSIONS

As the length of skis goes up, the dimensions and V-shape of the ski also changes – not just in ratio but specifically to match the skiing style of each age group.

REDSTER JR EDGE

The ski for young racers dreaming of the World Cup, delivering solid edge grip at high speeds.

SKI TECHNOLOGY

BASES

We use 7000-Series sintered bases that are fast on any snow, can stand up to anything, and are easy to maintain.

EDGES

Our edges are made from steel five times more wear resistant than standard steel, for strength and perfect grip.

TOPSHEETS

Our topsheets are lightweight and highly resistant (made 50% from rapeseed oil).

CORES

At the core of every ski are the materials – and particularly the different types of wood – that determine how it behaves.

ULTRA POWER WOODCORE

Made from strong beech and lightweight poplar – for supreme running stability and agility in our racing skis.

POWER WOODCORE

A combination of hard ash and light poplar that's stable and sporty for our high performance skis.

LIGHT WOODCORE

Made from poplar – ideal for our powder, all-mountain and freeride touring skis that need to be strong but really light.

ULTRA LIGHT WOODCORE

The poplar and caruba woodcore for skis that are all about low weight, like our touring skis.

DENSOLITE CORE

A foam core that's agile and dampens vibrations – for effortless skiing.

LAMINATES

Around the main core are the materials that fine-tune the performance of a ski.

TITANIUM POWERED

A titanium layer above and below the core creates supreme shock absorption, strong running stability and a high torsional flex.

TITANIUM STABILIZER

One titanium layer under the core for great shock absorption and torsional flex.

TITANIUM BACKBONE

A titanium insert runs the length of the ski on top of the core like a stabilizing backbone – really dynamic and stable for all-mountain skis.

TITANIUM SPB (SPROCKET POWER BOOSTERS)

Features titanium stringers laid directly on the core both sides of the binding area. Creates awesome tip and tail shock absorption and strong power transmission in powder skis like Automatic 117.

CARBON POWERED

A carbon layer above and below the core – for high strength at low weight in skis like the Ultimate.

CARBON TANK MESH

New in Vantage and Nomad – a layer of super rigid, woven mesh that adds strength across the ski without adding weight.

CARBON BACKBONE

A dynamic carbon insert for lightweight agile touring skis like Backland.

CARBON SPB (SPROCKET POWER BOOSTERS)

Lightweight carbon stringers laid directly on the core both sides of the binding area – for max power and pop in our lightweight powder chargers like Century 109.

FIBERGLASS LAMINATES

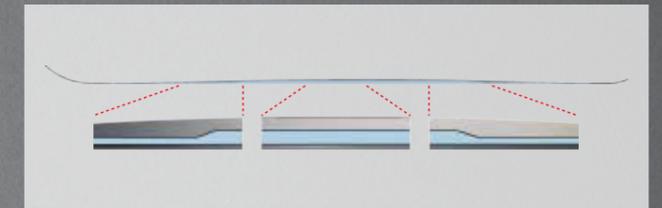

Fiberglass layers that are great for torsional stiffness across the length and width of the ski. Lightweight and very dynamic.

SIDEWALLS

Sidewalls affect how the ski dampens impacts and transmits power. We use five different types to suit different types of snow and skiing.

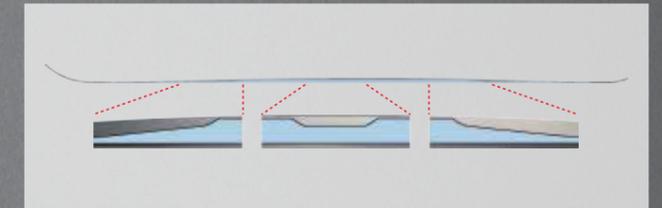

STEP DOWN SIDEWALL

Features a symmetrical step on each end that's stable, light and durable.

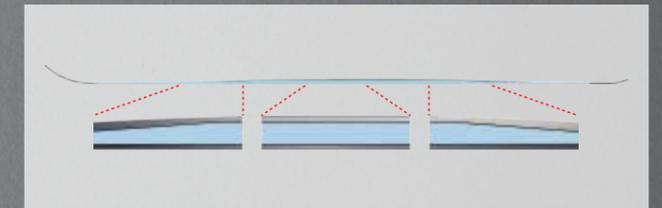

FIREWALL

Extra full under the binding with flex grooves for awesome power transmission and edge grip on hard pack.

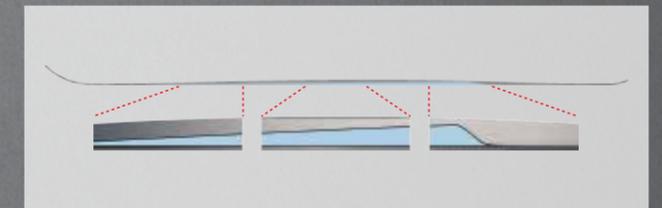

FULL SIDEWALL

Runs across the full length of the ski for precise steering, ideal for high-performing race and piste skis.

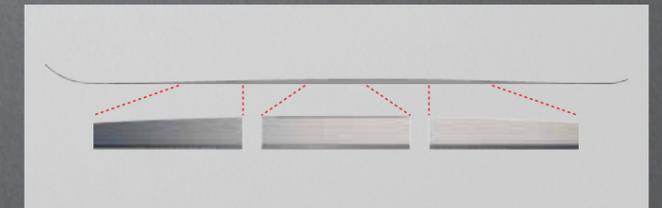

TAPERED SIDEWALL

Thicker towards the rear of the ski for extra acceleration and steering at high speed.

FULL CAP

A construction with no sidewall where the top sheet folds down over the edges, making it easy to handle.

PERFORMANCE TECHNOLOGY

Our skis consistently outperform other skis in their class. One reason is our constant strive for meaningful, targeted innovation that makes a genuine difference:

RAMP TECH

RAMP Tech is our performance technology for Redster. When you turn at top speed, the ramp angle under your heel automatically increases by up to 10°. This lifts your heel up and pushes your bodyweight forward over the center of your ski. So you can maintain your momentum and carve precise turns on hard groomed slopes – with less power and more control.

DOUBLEDECK 3.0

The third generation of our hugely successful Redster Doubledeck technology. It includes a free-gliding upper deck to increase stability and dampening, softer connectors at the front to make turn initiation easier, and stiffer connectors at the back for killer acceleration.

ARC TECHNOLOGY

Our Nomad and Cloud skis both feature ARC Technology. This technology means the ski has only one mounting point in the center of the ski – the Anchor Point. This frees the ski to flex naturally like a bow, resulting in perfect traction and smooth, natural rides with less effort.

HRZN TECH

Featured on the Bent Chetler, HRZN Tech takes an ABS sidewall construction and blends it with a revolutionary across-the-ski, horizontal rocker. It adds 10% more surface area in tip and tail, with less tip deflection and better tracking through chop. The ultimate design for powder skiers.

BEND-X TECHNOLOGY

Selected skis in our women's, kids' and rental ranges feature a special flex zone in the binding area. This helps skiers bend their skis with less power, making turn initiation easier even for beginners.

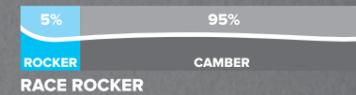

ROCKER TECHNOLOGY

Rocker is an early rise in the tip, and sometimes the tail, of a ski. In all our skis this rocker is combined with traditional camber for outstanding edge-hold and stability. Generally, the more rocker there is the more performance and floatation you get in powder, and the more maneuverability and versatility in any snow. The more camber a ski has the more grip and performance you get on hard terrain.

To make sure each ski in our range is set up for the snow it's going to be used on, our rocker technology features five specific rocker shapes:

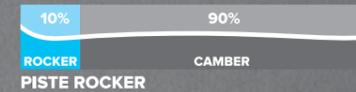

RACE ROCKER

The ideal rocker shape for hard pack slopes. Its strong camber provides precise edge grip while the very slight early rise in the tip means easier turn initiation and no unwanted edge-catching. For safety at high speeds.

PISTE ROCKER

The perfect rocker shape for prepared slopes. Its camber offers precise edge grip, while it has a slight early rise in the tip for easy turn initiation. The combination provides great stability.

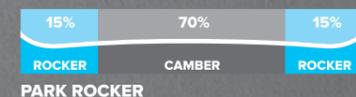

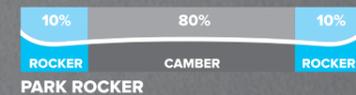

ALL MOUNTAIN ROCKER

For all snow conditions and any terrain, both on and off-piste. An early rise either just in the tip, or in both tip and tail, makes this rocker super versatile.

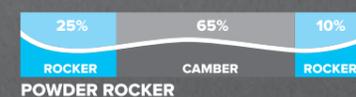

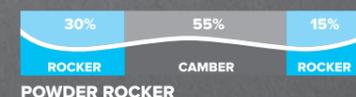

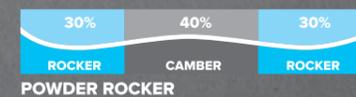

PARK ROCKER

Designed for the stability skiers need in the park: with a slight early rise in the tip and tail to allow for butters and confident landings.

POWDER ROCKER

The most pronounced rocker we have in tip and tail, combined with camber underfoot. For awesome floatation and maneuverability in deep powder, crud and anything in between.

BACKLAND TOUR

- EASY STEP-IN
- LIGHTWEIGHT
- PERFECT POWER TRANSMISSION

Pin bindings have come a long way in the last 20 years. They're now an essential part of the standard touring setup. What our new Backland Tour and Tour light bindings bring to the party is a convenient lightweight pin option that's incredibly durable, easy to step into and easy to use. They're also part of our bigger Backland range, offering keen tourers everything they need for the backcountry in a really accessible, user-friendly format.

DISCOVER THE BACKLAND

BACKCOUNTRY TOURING

BACKLAND TOUR

STEP-IN AID

A patented step-in aid at the front makes sure your boot is automatically positioned correctly to get the pin inserted, so the whole process is really intuitive.

EASY CLIMBING AIDS

The climbing aids work separately from the heel tower. This means they can be folded forward into any heel-rotation position. With a simple click you can choose between 0°, 7° and 13° climbing positions, for heel support on any climb.

LENGTH ADJUSTMENT

The binding comes with a 30mm long adjustment – longer than most other pin bindings. So it's easier to fit to more sizes of boot (great for rental).

CRAMPON COMPATIBLE

Compatible with standard crampons on the market.

WIDER SCREW IMPLEMENTATION

Extra broad 40 mm mounting maximizes performance on wide skis and cuts the risk of the screws pulling out.

LIGHTWEIGHT

One of the lightest bindings on the market, Backland Tour weighs 592 g.

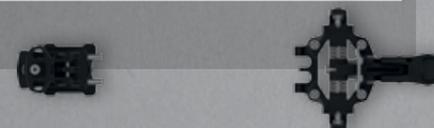

BACKLAND TOUR LIGHT

NEW

FREESKI

STH²

- COMPATIBLE WITH WTR BOOT SOLES
- REALLY STABLE DOWNHILL
- FORGIVING IN THE LANDING

A stout low-built binding that offers serious power transmission for wide power and progressive park skis. Its high-impact steel housing stands up against anything – the benchmark in big-mountain performance.

RACE

- MAXIMUM POWER TRANSMISSION
- INDIVIDUAL TUNING
- TESTED AND RIDDEN BY OUR WORLD CUP ATHLETES

Racing is in our DNA: the search for speed, stronger edge grip, more direct power transfer, anything that will deliver those extra one hundredths. With the help of our Atomic racers, we've created a range of bindings ideally set up to deal with the extra power you put in when racing.

BINDING FEATURES

STEP-IN AID

Our patented step-in aid guides your boot perfectly into position.

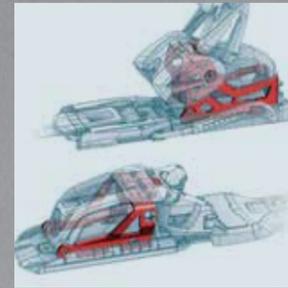

EASY CLIMBING AIDS

The climbing aids work separately from the heel tower. This means they can be folded forward into any heel-rotation position. With a flick of your pole, you have hassle-free and easy switching between the three climbing positions.

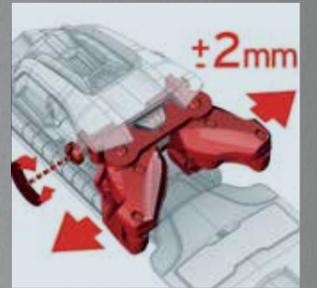

FORCE CAGE TRANSFER (FCT)

Our top race bindings feature a steel reinforcement cage at the toe and heel piece for maximum power transfer.

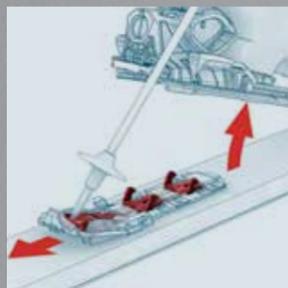

EDGE GRIP ALIGNMENT (EGA)

Fine-tune the position of your binding 2 mm each side to adapt to your body movement and skiing style.

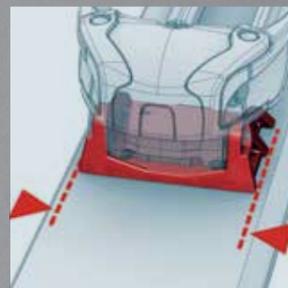

HIKE AND RIDE SWITCH

Switch between skiing and hiking mode instantly without having to take your skis off. Just use your pole to release the two metal hooks and the binding will pop up.

OVERSIZED PLATFORM

A super-wide platform allows for maximum lateral power transmission. We also have different platforms with different widths to choose from.

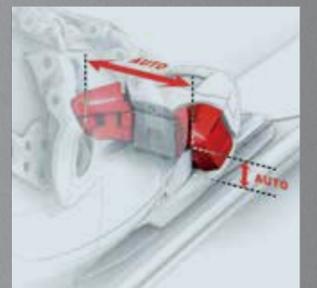

VARIABLE POSITIONING (VAR)

Move your toe and heel along the rail to customize your position forward or back on the ski.

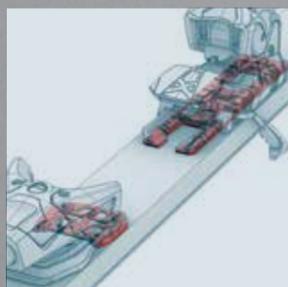

AUTOMATIC WING ADJUSTMENT

Adapts automatically and easily to your boot width and height. It also keeps release values constant for worn out boots.

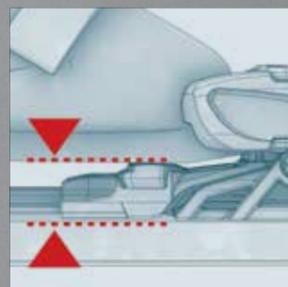

PROGRESSIVE TRANSFER PADS

Special inserts in the toe and heel increase dampening and forgiveness.

LOW-PROFILE CHASSIS

The low stand height increases your feel for the terrain, and also enhances power transmission to the ski.

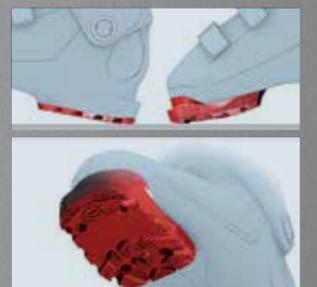

MNC / WTR

MNC (MULTINORM CERTIFIED)
Thanks to an adjustable toe height and sliding AFD toe piece, MultiNorm certified bindings are TÜV approved for all three types of soles: DIN (ISO 5355), Touring (ISO 9523) and Walk To Ride (WTR). That means they fit every normed boot in the market.

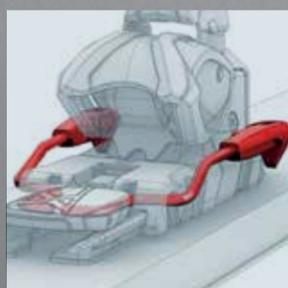

WTR (WALK TO RIDE)

WTR compatible bindings are compatible with new Walk To Ride (WTR) boots – boots with special grip pads for better walking. WTR boots and bindings are completely safe, just like any other DIN boot/binding combo.

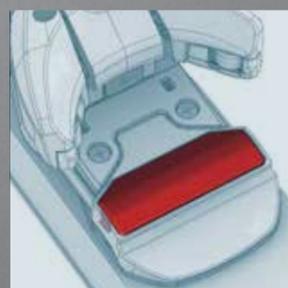

FREESKI BRAKES

Self retracting brakes, adapted to modern skis and practices, eliminate hang ups on switch landings.

STOMP PEDAL

A fixed, wide pedal ensures the best transmission from skier to ski.

BOOTS

INSIDE OUR BOOTS

We think one of the biggest steps anyone can take to improve their skiing is to get the right boots. They're the foundation all your skiing is based on. It's why we spend so much time working on exactly what goes into our boots. There are three things in particular:

FIT

We make sure there's an Atomic fit for everyone's footshape. That includes our 98mm narrow fit in Redster, 100mm medium fit in Hawx, and 102mm wide fit in the new Hawx Magna boots. And when you want to personalize your fit, Memory Fit and Live Fit make that easier than ever.

COMFORT

Boots can make or break a day. That's why we've made our boots lighter than ever and added 3M™ Thinsulate™ Insulation to keep feet warm. We want wearing our boots to be a pleasure, not a pain.

PERFORMANCE

Performance means different things in different types of skiing. For example, Racing it's about speed so we add extra power. Backcountry Touring it's also about climbing, so we take the weight out. Whatever type of skiing, our boots produce exactly the performance you need.

REDSTER FIS

- AUTHENTIC RACE-ROOM FIT
- ULTIMATE WORLD CUP ACCELERATION
- INDIVIDUAL TUNING

THE REDSTER RACING MACHINE

Redster FIS is for skiers at the top of their discipline. Co-developed and worn by Atomic top athletes like Marcel Hirscher and Mikaela Shiffrin, it's the fastest boot we've ever made. Powerful, responsive and adaptable to individual racers' needs, it has our authentic race-room fit, ultra-stiff flexes for explosive acceleration and comes in the iconic Redster racing colors. This year we've also added a new liner with more volume in the calf area, plus a better wrapping effect for a more precise fit.

MIKAELA SHIFFRIN

MEMORY FIT

Create the perfect personalized fit in minutes with our advanced heat-fitting technology.

ROTATIONAL POWER CONTROL

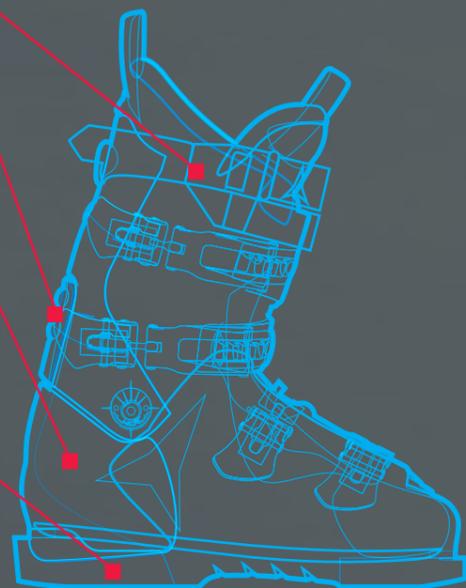

Rotational Power Control allows the cuff to rotate up to 5mm in each direction for lightning-fast turn initiation, plus customized control and comfort.

CARBON SPINE

Carbon-reinforced areas of the cuff and shell provide maximum power transfer and support on steep terrain, while still maintaining feel and sensitivity at the front of the boot.

FLEX FRAMES

Interchangeable Flex Frames tune the feel underfoot – with three grades of hardness to adjust the sensitivity of the sole.

REDSTER PRO

- PERSONALIZED NARROW FIT
- ULTRA-PRECISE POWER TRANSMISSION
- RACE INSPIRED, ALL MOUNTAIN FEEL

POWER TO THE PISTE

Redster Pro brings athlete-proven technology to the slopes. It features the Redster narrow fit and Carbon Spine for extra power. But it also comes with Memory Fit for a personalized finish, and more all-mountain performance and appearance than our classic racing Redsters. Like our new Redster XT ski, it's ideal for people who don't want to rock the racing look on the piste, but still want high performance technology.

3M™ THINSULATE™ INSULATION

Redster Pro W liners come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions.

MEMORY FIT

Create a completely personalized shell, cuff and liner in minutes with our advanced heat-fitting technology.

CARBON SPINE

Carbon-reinforced areas of the cuff and shell provide increased responsiveness and power transmission, while still maintaining feel and sensitivity at the front of the boot.

REPLACEABLE GRIP PADS

Redster Pro features new 4mm replaceable toe and heel grip pads for consistently good traction and a longer lasting boot.

HAWX

- PERSONALIZED MEDIUM FIT
- EXCEPTIONAL WARMTH
- BETTER BALANCE

BEST JUST GOT BETTER

It's so important everyone can find the perfect fitting boot. It's why we created Hawx in the first place – the world's best-selling medium fit boot. And why in the recently updated new Hawx we've added Memory Fit and 3M™ Thinsulate™ Insulation to make it as warm and comfortable as we could. We also made it lighter and improved the sole flex for even better balance. Still the best fit and skiing performance you can get from the moment you put it on.

3M™ THINSULATE™ INSULATION

A lightweight, hi-tech liner with 3M™ Thinsulate™ Insulation keeps feet warm and responsive even in extremely cold and damp conditions.

MEMORY FIT

Create the perfect personalized fit in minutes with our advanced heat-fitting technology.

POWER SHIFT

Forward lean can be quickly adjusted to 13° or 15° or 17° as well as the flex index by +/- 10 flex points. For a completely personalized set-up.

SOLE FLEX

The Hawx flex area on the sole of the boot provides a really natural bending line, promoting better balance, better feel underfoot and more control.

WOMEN

EQUAL BUT DIFFERENT

Our women's boots are designed to the very last detail, so they feel as good as they look. What's more, we've created a women's boot range that is specifically tailored to the anatomy and needs of female skiers. For example, we've built women-specific liners and put 3M™ Thinsulate™ Insulation into most of our women's boots to add extra warmth. We've developed wider, more fluted calf areas and shorter cuff heights to accommodate female calf shapes for a better fit. And we've made sure all components are accurately scaled down even in the smallest sizes to keep the quality high across the range.

HAWX MAGNA

- PERFECT PERSONAL FIT
- LEGENDARY HAWX FEEL IN A WIDE FIT
- EXCEPTIONAL WARMTH

HAWX HAS EXPANDED

Hawx has become the most popular medium fit boot on the market. And we've taken that great Hawx feel and for the first time put it into a 102mm wide fit – complete with Memory Fit for a perfect personal fit. Hawx Magna is also the lightest boot in its class and easy to get on and off. So now more skiers than ever can experience the comfort, warmth and control of Hawx.

3M™ THINSULATE™ INSULATION

Hawx Magna lightweight liners come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions.

MEMORY FIT

Create the perfect personalized fit in minutes with our advanced heat-fitting technology.

POWER SHIFT

Forward lean can be quickly adjusted to 13° or 15° or 17° as well as the flex index by +/- 10 flex points. For a completely personalized set-up.

SPECIAL FEATURES FOR WIDER FEET

The 102mm last comes with extra space at the forefoot and instep, plus a wide tongue and fluted calf.

LIVE FIT

- INSTANT WIDE FIT
- EXCEPTIONAL WARMTH AND COMFORT
- SUPER EASY HANDLING

STILL THE ONLY SELF ADAPTING FIT

Put on a Live Fit boot for the first time and it will instantly and automatically fit to your foot. It then continuously adapts as time goes on. Like Hawx it features 3M™ Thinsulate™ Insulation to keep your feet warm when it's well below zero. Without sacrificing foothold, it's super easy to get this boot on and off, which helps take the strain out of the beginning and end of your day. And this year we've added some bold colors and richness to our Velcro straps.

3M™ THINSULATE™ INSULATION

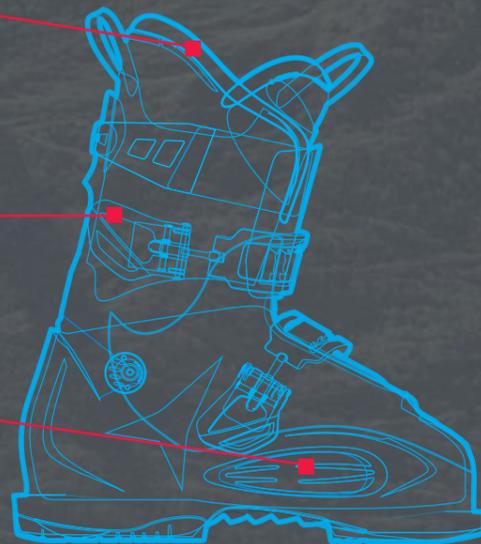

Live Fit liners come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions.

MEGA BUCKLES

Live Fit's successful twin-buckle design features light, easy-to-handle buckles that still provide secure foot hold.

LIVE FIT

These zones automatically adapt to your forefoot shape providing instant comfort, improved feel, better blood flow, warmer toes and happier feet.

WAYMAKER

- INSTANT MEDIUM FIT
- EXCEPTIONAL WARMTH
- ALL-MOUNTAIN VERSATILITY AND STRENGTH

GO ANYWHERE, SKI EVERYTHING

For progressive all-mountain skiing you need versatility, and the Waymaker is one of the most versatile boots you can get. Its three-buckle design wraps the foot as securely as a four-buckle boot, which means you get max power transmission and easy handling at the same time. The Free/Lock System and choice of grip pads makes walking and skiing anywhere super easy. This year we've also made all power straps richer and more detailed.

3M™ THINSULATE™ INSULATION

Waymaker liners come with 3M™ Thinsulate™ Insulation to keep feet warm and responsive even in extremely cold and damp conditions.

FREE/LOCK SYSTEM

Lift the lever and the cuff unlocks from the shell for easier walking, entry and exit. Press the lever back down and the cuff mechanically locks back, providing 100% power on the way down.

CARBON SPINE

Carbon-reinforced areas in cuff and shell increase responsiveness and power transmission, while keeping feel and sensitivity at the front of the boot.

LIVE FIT PERFORMANCE

We've put a special Live Fit zone on the lateral side of the foot to eliminate this common hot spot, while the medial side of the boot remains solid for power transfer and edge grip.

MULTI-NORM CHASSIS

Waymaker Carbon's unique shell-grip pad interface allows it to be equipped with all 3 TÜV approved grip pads: Alpine DIN (ISO 5355) (installed), Touring (ISO 9523) and the new WTR with Low Tech inserts.

MOLLY BAKER

**THE DIFFERENT
TYPES OF TOURING**

We're seeing three distinct types of Backcountry Touring emerge, each attracting a different type of skier and each requiring different types of equipment. Backland sits firmly in the middle. The complete range for Adventure Touring.

**ENDURANCE
TOURING**

For Endurance Tourers it's all about distance, vertical meters, speed – and really light gear like our Ultimate ski series for an easy and rapid ascent.

**ADVENTURE
TOURING**

The largest segment in touring and the biggest contributor to its rapid growth. Adventure Touring is influenced by both the Endurance and Freeride worlds – the attraction for Adventure Tourers is tackling the whole mountain, uphill and down. They look for the best balance of lightness, comfort and performance, and this is where Backland really comes into its own.

**FREERIDE
TOURING**

For Freeride Tourers it's all about chasing the fresh snow. They're after versatile products that will enable them to tour but more importantly charge down wherever they end up – like our Automatic skis and Waymaker FR Tour boot.

BACKLAND

- EPIC NATURAL MOVEMENT
- PERFECT PERSONAL FIT
- WARM AND BREATHABLE

DISCOVER THE BACKLAND

Our brand-new Backland boots make touring much more efficient and a better experience for everyone – pros and rookies alike. What makes them really stand out is the way they move: they offer an impressive range of motion that feels so natural, it's epic. This is thanks to our new Free/Lock 2.0 mechanism that frees the cuff from the shell for incredible 74° cuff mobility. Plus a Frictionless Pivot for a super smooth movement and a removable tongue for climbing.

Like the leading touring boots they are super light, with the Backland Carbon Light weighing in at just 987 g. But unlike any other touring boot they're packed with our all-mountain boot technology like Memory Fit to make them super comfortable. Plus a Carbon Spine for the powerful skiing you expect from any Atomic boot.

98 MM NARROW FIT

ULTRALIGHT SHELL & CUFF DESIGN

DARON RAHLVES

INTUITION LINER

Our high-grade liner that's compatible with all Waymaker models. It's ultra-lightweight and provides exceptional power transmission and comfort through special Touring Flex zones.

FREE/LOCK SYSTEM

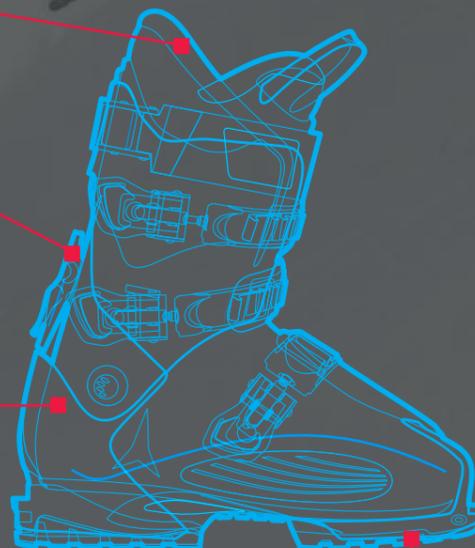

Lift the lever and the cuff unlocks from the shell for easier walking, entry and exit. Press the lever back down and the cuff mechanically locks back, providing 100% power on the way down.

CARBON SPINE

Carbon-reinforced areas in cuff and shell increase responsiveness and power transmission, while keeping feel and sensitivity at the front of the boot.

WTR GRIP PADS WITH LOW TECH INSERTS

The WTR Grip Pads come with Low Tech inserts. The rockered sole makes walking easier without losing performance out skiing. Thanks to the Multi-Norm Chassis they're also interchangeable.

KIDS

- ADJUSTABLE AS FEET GROW
- EXCEPTIONAL WARMTH
- SUPER-COMFY FIT

For kids to love skiing they've got to have boots that are warm. Fact. That's why our kids' boots feature full-on 3M™ Thinsulate™ Insulation, even at the lower end of the range. On top of that, as young skiers get bigger our boots don't just go up in size – the design of the cuffs and flex adapt to the changes in their strength and skiing style. Plus with our new size adjuster in each boot you can add an extra half size as feet grow. So boots last longer, it's easier to progress and it's easier to have fun.

INSPIRE THE NEXT GENERATION

3M™ THINSULATE™ INSULATION

All our Kids' range features world-class insulation, not just in cold spots but from top to toe. This keeps little feet warm well below zero.

PROGRESSIVE CUFF AND FLEX

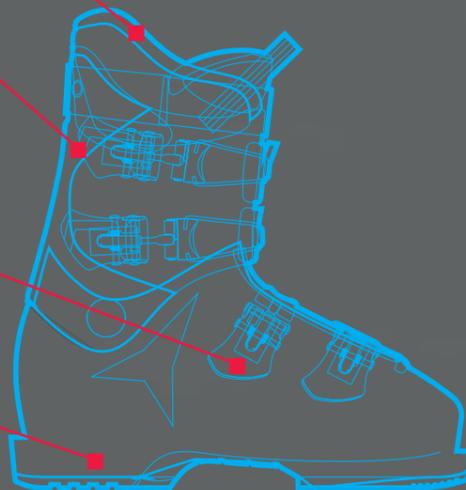

As our boot sizes get bigger, the level of support in the cuff changes and so does the level of flex. That way, while a kid's skiing style is developing and they're getting stronger, they always get the 100% support they need.

NEW BUCKLES

The new buckles on our kids boots feature a narrower catch which stops the buckles from catching and scratching each other.

SIZE ADJUSTER

With our new Size Adjuster insert in every kid's boot, you can now add an extra half size to a boot when you need it. So now the boot lasts longer as feet grow.

SIZING

FOOT SEGMENTATION

There is no such thing as an 'All Mountain' or 'Touring' footshape – different people have different footshapes. So we're making sure you'll always have the choice of a narrow, medium or wide fit, whether you're looking for a boot for racing, freeski, touring or whatever.

SIZE ADJUSTER

This year we've developed a new Size Adjuster. Compatible with all after-market footbeds, it helps retailers provide the right sizes for customers, but reduce the amount of boots they need to stock by half. It also means skiers can adapt their boot by half a size whenever they need to. It's very simple:

ADULT BOOTS

Adult boots come with a pair of Size Adjusters in the box. When you add these inserts under the footbed they make the boot precisely half a size smaller. So people who need a whole size can just choose the bigger half-size boot and adjust it down.

KIDS BOOTS

Our kids boots also come with a Size Adjuster – but it's already in the boot under the footbed, so when their feet grow they can just take the Size Adjuster out and add half a size for longer use.

THE FOLLOWING BOOTS WILL FEATURE A SIZE ADJUSTER IN 2015/16:

Backland, Redster FIS, Redster Pro, Hawx Magna, Live Fit, Waymaker FR Tour, Redster JR, Waymaker JR and Waymaker Girl.

FIT TECHNOLOGY

Some of the biggest advances we've made over the last few years has been in fit technology, particularly Live Fit and Memory Fit:

LIVE FIT

Live Fit is a special adaptive zone we put on the sides of some of our boots – lateral and medial for Live Fit and lateral for Live Fit Performance. When you put the boot on, these zones instantly adapt to your forefoot shape and continuously readapt throughout the day for instant comfort, improved feel, better blood flow, warmer toes and happier feet. Live Fit is featured on all Waymaker and Live Fit models.

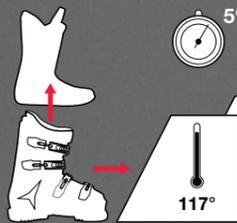

MEMORY FIT

Atomic Memory Fit is one of the quickest heat-fitting technologies around, so you can totally personalize boots in a matter of minutes. Memory Fit is available in the following boots: Redster FIS, Redster Pro, Hawx, Hawx Magna and Backland boots – a big chunk of our whole range.

PROCESS ALPINE BOOTS

1. HEAT

Remove the liner from the boot and place the shell into the Atomic Memory Fit Oven for five minutes (at a preset temperature of 117°C).

2. MEMORIZE

Take the shell out of the oven, insert the liner and let your customer step into the heated boot while standing on the Memory Fit Cooling Mat. Close the buckles on the loosest setting then ask your customer to hold still for two minutes to allow the boot to memorize their footshape.

3. COOL

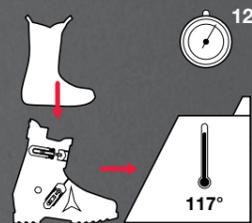

Wrap the Memory Fit Cooling Pack around the boot. Cool the boot for five minutes to complete the perfect personal Memory Fit.

PROCESS BACKLAND BOOTS

1. HEAT

Put the liner into the boot and place both - the shell and the liner - into the Atomic Memory Fit Oven for twelve minutes (at a preset temperature of 117°C).

2. MEMORIZE

Take the boot out of the oven and let your customer step into the heated boot while standing on the Memory Fit Cooling Mat. Attach the Cross Lace on the loose setting then ask your customer to hold still for two minutes to allow the boot to memorize their footshape.

3. COOL

Wrap the Memory Fit Cooling Pack around the boot. Cool the boot for ten minutes to complete the perfect personal Memory Fit.

NEW IN ALL ATOMIC BACKLAND, HAWX MAGNA, HAWX AND REDSTER BOOTS:

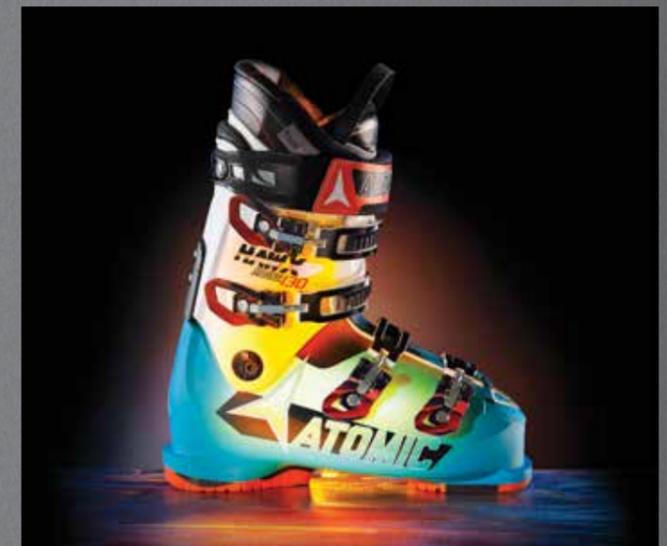

REDSTER PRO

BACKLAND

HAWX

HAWX MAGNA

COMPLETE ADAPTATION

With Memory Fit all three elements of the boot adapt to the foot – shell, cuff and liner – and memorize the entire footshape. Expansion can be up to 6mm in total forefoot width and up to 10mm in total ankle width. The result is a permanent and complete anatomical fit, just choose the bigger half-size boot and adjust it down.

MEMOLINK

Memolink is one of the keys to Memory Fit – it's our special plastic additive that's been developed to work within Atomic boots. Memolink improves the moldability and stretch characteristics of our plastics and guarantees adhesion during and after the Memory Fit process.

MEMORYFIT

LINER TECHNOLOGY

All our boots feature an Asymmetric Liner Construction (ASY). It's the most anatomical liner construction on the market, and the best for supporting your feet while skiing. It features an asymmetric tongue, toe box, collar shape and high-quality lining materials, all geared towards creating a better fit and more comfort than ever.

PLATINUM – GOLD – SILVER – BRONZE

Our liners come in Platinum, Gold, Silver and Bronze grades. You'll see these labels written on the tongue. As our liners go up from Bronze to Platinum they provide the firmer fit better skiers need. They also become longer lasting, warmer and more personalizable.

FIRMER FIT

The number one thing for first timers and intermediate skiers is to have boots that fit comfortably. As skiers get better, that fit can get firmer and more responsive. Our liners support that progression, with firmer foam and higher-performance Alcantara liner textiles as our boots go up in flex numbers.

LONGER LASTING

We add Dynashape foam to our liners to make sure they don't pack out and start feeling loose. The better the liner the more Dynashape we add. As a general rule Silver has Dynashape on the ankle, Gold on the ankle and side, Platinum on ankle, sides and tongue.

WARMER

From Silver upwards many of our liners feature 3M™ Thinsulate™, the world's best-known insulation. This means you get Thinsulate™ on Redster Pro W, Hawx, Hawx Magna, Waymaker and Live Fit. We've also added it to all our Kids boots, as little feet get colder quicker.

3M™ THINSULATE™ INSULATION

We're working in partnership with 3M to create the warmest ski boots ever made. Specifically, we use Thinsulate™ Platinum Insulation all over our Platinum and Gold liners to surround the whole foot. And standard Thinsulate™ in the toe box of our Silver liners (where people get cold first).

HOW IT WORKS

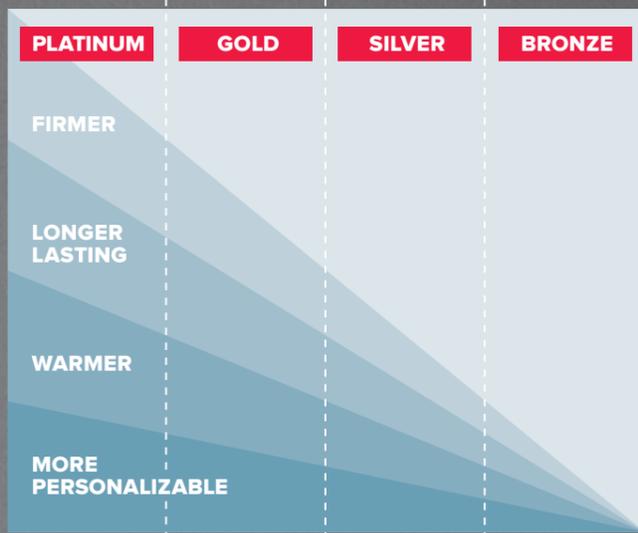

The more air a material traps in a given space, the greater its insulating value. The microfibers in 3M™ Thinsulate™ Insulation are far finer than any other fibers. It means they trap more insulating air in less space, even when wet. This keeps feet warm and responsive even in extremely cold and damp conditions.

3M™ THINSULATE™ INSULATION:

- Microfibers trap warm insulating air
- Exceptionally thin to retain a perfect fit
- Placed in the toe box where your body cools down first

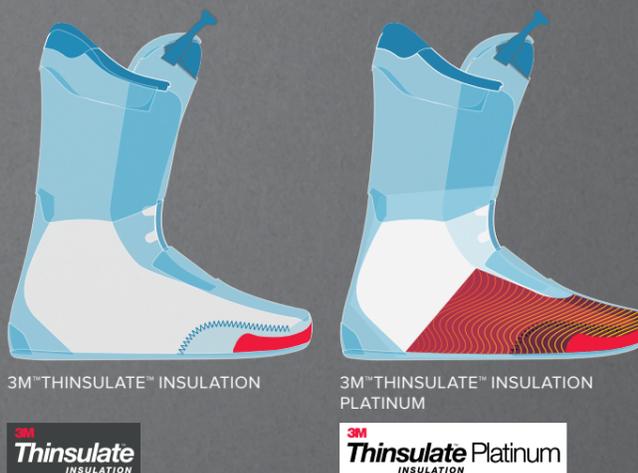

3M™ THINSULATE™ INSULATION PLATINUM:

- Microfibers trap warm insulating air
- Exceptionally thin to retain a perfect fit
- Surrounds the whole foot for maximum warmth

MORE PERSONALIZABLE

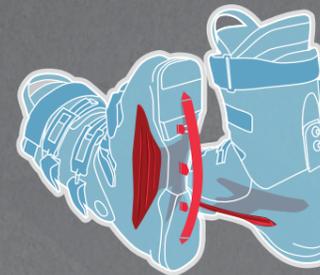

All our liners are heat moldable for a personalized fit. Different liners have different amounts of heat moldable foam, labeled on the tongue: T1 has foam in the ankle, T2 in the ankle and side, T3 on the ankle, side and tongue.

SHELL TECHNOLOGY

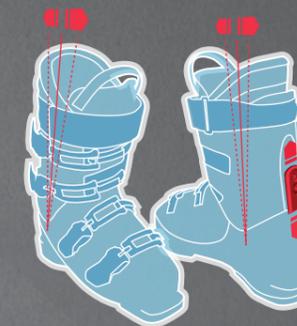

SOLE FLEX

This special flex area on Hawx provides a more natural bending line of the boot, promoting better balance, better feel underfoot and greater control.

POWER SHIFT

On our Hawx and Hawx Magna boots the forward lean can be adjusted to 13° or 15° or 17° simply by moving the power control up and down. You can also alter the flex index by +/- 10 flex points by adding or removing a screw. For a completely personalized set-up.

FREE/LOCK

Featured on all Waymaker, Waymaker Carbon and Waymaker FR Tour boots: lift the lever and the cuff unlocks from the shell for optimum walking, entry and exit. Press the lever back down and the cuff mechanically locks back for 100% power on the way down.

FREE/LOCK 2.0

Featured on our new Backland boot, this is an advanced version of Free/Lock with 74° cuff movement and 13°-15° adjustable forward lean settings for skiing.

CARBON SPINE

On Redster FIS, Redster Pro, Waymaker Carbon, Waymaker FR Tour and Backland Carbon, carbon-reinforced areas of the cuff and shell provide increased responsiveness and power transmission while maintaining feel and sensitivity at the front of the boot.

FRICTIONLESS PIVOT

Featured on Backland, this is a pivot with Igus polymer bushings that makes forward and backward movement of the cuff natural and friction free – making climbing and walking smoother and less clunky.

CROSS LACE

A new closure system used on Backland that wraps the foot from three points to hold it securely.

QUICK CLICK TONGUES

Featured on Backland, this easy system means you can switch from no tongue for climbing to a supportive soft or hard tongue for skiing.

SOLES AND NORMS

Technology has come a long way on the soles of ski boots. Our range features different types of grip pads, each designed for a specific use:

ALPINE DIN

These are the traditional flatter alpine soles you'll see on most standard boots. They follow ISO 5355 and work safely with traditional alpine bindings following ISO 9462.

WTR

WTR stands for Walk To Ride and there are two parts to the technology: WTR Grip Pads on your boots and WTR compatible bindings. WTR makes walking in your boots easier and less clunky. With WTR Grip Pads the toe grip pad is rockered like a touring boot and the heel grip pad's geometry is also adjusted, which makes walking relaxed and natural. The extra benefit is that WTR Grip Pads provide a safe release when paired with WTR compatible bindings. The safe release is certified by the TÜV, just like any DIN boot/binding combination.

TOURING

Certified Touring Grip Pads follow ISO 9523. They have a rockered toe and lugged rubber soles allowing you to walk more naturally and improve grip on tricky surfaces. Boots with ISO 9523 soles are not compatible with traditional Alpine DIN bindings – even if they fit, the release values may not be consistent. So only use touring boots with bindings that are approved for boots following ISO 9523.

INTERCHANGEABLE GRIP PADS

For many of our boots we offer interchangeable alpine, WTR and/or touring grip pads. But remember: not all types of soles and grip pads are compatible with all boots/bindings, even if they look as if they fit. Check the norm that they follow. Or if in doubt, ask your dealer or Atomic contact.

POLES

Like our skis and boots, our poles are made to suit specific types of skiing. For example, our race pole is made from a lightweight carbon composite material. While our Backcountry Touring poles come with adjustable length so you can shorten or extend them depending on the snow and steepness.

AUTOMATIC PACKS

- BACKCOUNTRY READY
- ABS COMPATIBLE
- SKI FIT

FEEL AT ONE WITH YOUR PACK

Our new Automatic backpacks are specially designed for full-on powder skiing and freeride touring. They have ABS compatibility to keep skiers safe, Live Fit straps to keep skiers comfortable, and colors perfectly matched to go with our skiwear.

DEDICATED COMPARTMENTS

Be ready for the whole mountain with an easy-access compartment for your avalanche gear, external tool fixations and room for a hydration system.

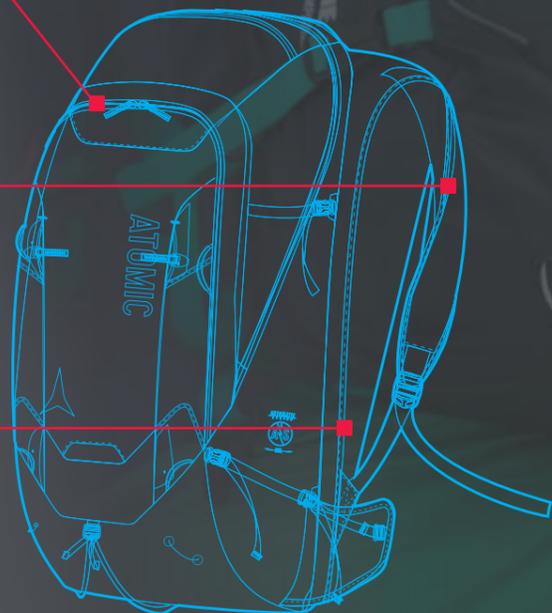

LIVE FIT STRAPS

Live Fit shoulder and waist straps expand and contract when you ski, so your pack sits snug and central on your back without restricting you.

LIVEFIT

ABS COMPATIBILITY

Automatic is compatible with the ABS base unit – the original avalanche airbag system – that keeps you at the surface during an avalanche.

FREESKI

TECHNICAL PACKS-FEATURES

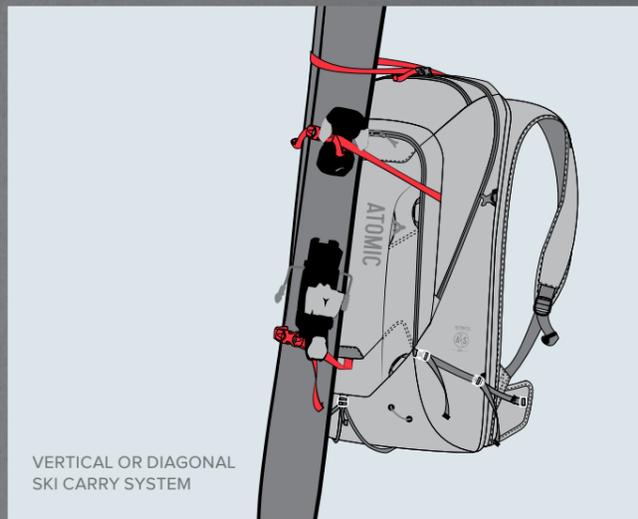

AUTOMATIC PACK 25L ABS COMPATIBLE

ABS VARIO BACK UNIT COMPATIBLE

This Automatic Pack is compatible with the ABS vario back unit – the original avalanche airbag system – that keeps you at the surface during an avalanche.

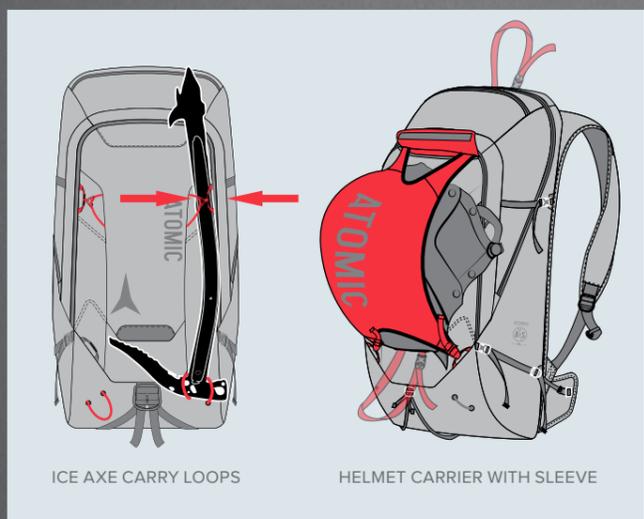

SKI CARRY SYSTEM

VERTICAL OR DIAGONAL SKI CARRY SYSTEM

The pack comes with a vertical or diagonal ski carry system and even stays in shape with skis mounted by using a stabilizing and protective EVA molded back panel.

CARRY SYSTEMS

ICE AXE CARRY LOOPS

HELMET CARRIER WITH SLEEVE

External tool fixations such as ice axe carry loops and a helmet carrier with sleeve make it the perfect companion for the backcountry.

LIVE FIT SHOULDER & WAIST STRAPS

For a great fit when skiing it features our unique Live Fit shoulder and waist straps that expand and contract when you ski, so your pack sits snug and central on your back without restricting you.

RENTAL

ONE RANGE, FOUR LEVELS

Different skiers want different things out of their rented equipment. So we offer four levels of rental skis and boots:

LEVEL 4 – HIGH PERFORMANCE

LEVEL 3 – PERFORMANCE

LEVEL 2 – COMFORT

LEVEL 1 – ECONOMY

INSIDE OUR RENTAL RANGE

The rental world is growing, so we're putting loads of time and effort into providing a great rental offering. First and foremost, all our regular in-line skis and boots are 100% rental ready. In addition we offer a range of products specially tailored for rental. All with three essential things in mind:

DURABILITY

Rental skis and boots get knocked about, so we've made sure all our rental products come with added durability features like scratch-resistant surfaces and thicker edges and bases. So they still look good at the end of the season.

INNOVATION

Lots of skiers love renting because it gives them the chance to try out the latest technology each year. With that in mind we've made sure our top rental products come with all our latest technical advances.

CONVENIENCE

Rental skis and boots have to be easy to handle. Our range is quick to set up and adjust for the guys in the shop for ultimate efficiency. The skis, boots and binding systems are easy for skiers to use. And everything is color-coded.

SKIS

STRONG, STYLISH AND EASY TO USE

Extra thick edges and bases, easy-to-use ski systems, quick and easy binding adjustment, bright and colorful designs... Our rental skis are optimized for the rigors of a long season, and totally rental ready.

HEAVY DUTY TOPSHEET

The highly scratch-resistant topsheet protects the ski from mechanical damage.

THICK BASES AND EDGES

Our skis come with sintered bases and Dura Edge technology for more grinding cycles and greater durability.

COLOR CODE SYSTEM

Appropriate color codes allow any ski binding to be correctly adjusted to the boot straight away. This also helps keep your rental stock organized.

RENTAL ALU PATCH

A special patch for adding a barcode.

BEND-X TECHNOLOGY

A flex zone in the binding area of the ETL R and Cloud R makes it easier to bend the ski using less power. This makes turning easier, even for beginners.

REDSTER XT R

NEW

Our premium rental option for high-performance piste skiing, with Power Woodcore and Titanium Stabilizer.

LEVEL 4

AASS00962 XT 10

SIZES 149, 156, 163, 170, 177 cm

RADIUS 14 m / 170 cm

WAIST WIDTH 71.5 mm / 170 cm

WEIGHT 1.96 kg per Ski / 170 cm

WEIGHT 1.46 kg per Ski / 156 cm

- Bend-X Technology
- Full Cap
- Rental Color Coded Sizing

PISTE ROCKER 10/90/0

BOOTS

RENTAL BOOTS THAT DON'T LOOK RENTAL

Our rental range contains some of our most successful, best fitting designs and constructions – available in durable colors with sanitized liners, color coded sizing and barcodes.

POLYURETHANE SHELLS

Our durable, highly scratch-resistant shells make radiant colors and transparent designs possible.

SANITIZED LINERS

Soft and warm liners retain their high-grade appearance and remain extremely comfortable for years. They're also sanitized with an anti-microbial treatment to stay fresh all season through.

COLOR CODE SYSTEM

Appropriate color codes allow any ski binding to be correctly adjusted to the boot straight away. This also helps keep your rental stock organized.

TOOLLESS ADJUSTABLE BUCKLES

We use buckles featuring adjustable tooth plates that can be easily shifted to fit different leg shapes.

BARCODE HOLDERS

Dedicated barcode panels on the boot help the barcode stickers stay put throughout the season.

POLES

ALL YOU NEED FROM POLES

Some renters want high-quality poles. But most people just want them to do the job, look good and not scream rental! Our range of poles caters to both those needs: with a top-class composite pole at one end and strong graphics across everything.

COLOR CODE SYSTEM

This helps the guys and girls on the floor to quickly pick the right poles for each customer.

HARD-WEARING COMPONENTS

These include thicker tubes, strong baskets and hard-wearing anodized graphics.

LIGHTWEIGHT

We make all our rental poles from composite material or aluminum. Both really light and durable.

RENTAL COMPOSITE

BINDINGS

ALL YOU NEED FROM A BINDING

Tough, stable, simple to mount, easy to adjust without tools... that's how we've built our FFG and XTE rental bindings. They also work well with our entire ski range, both in-line and rental.

EASY TO MOUNT

Really simple mounting saves you loads of time throughout the season.

TOOLLESS ADJUSTMENT

Easily adjustable sole lengths along with toe and heel components mean you can fine-tune a skier's position on their ski quickly and without tools.

EASY TO READ DIN VALUES

Lets you read DIN values on toe and heel in a second, then adjust to suit skier's weight, height, age and skiing level.

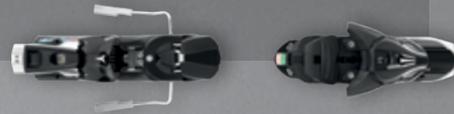

COLOR CODE SYSTEM

Appropriate color codes allow any ski binding to be correctly adjusted to the boot straight away. This also helps keep your rental stock organized.

HELMETS

THE RENTAL HELMET THAT REALLY FITS

More and more people are buying their own helmets, but there are still plenty of people renting. And the most important things for them? That their helmet is safe, but also clean, comfy and cool to look at.

LIVE FIT

For Savor LF R we've added a wide band of breathable memory foam that adapts comfortably and precisely to the head. So skiers get an instant individual fit and all-day comfort. And one helmet will fit a variety of different headshapes – ideal for rental.

COLOR CODE SYSTEM

This really easy system makes it quicker and easier to find the right size for every customer.

LIGHTWEIGHT

All our rental helmets are light, but still come with all the protection skiers need against impact and shock.

CERTIFICATION

- CE EN 1077:2007 CLASS B
- ASTM F 2040
