

DEALER BOOK
2015

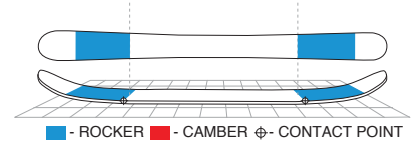

CAMBER

Camber is a type of construction that supports power, pop and precision. The shape of ski is arched up between touching points of the ski at the tip and tail. It gives responsiveness over the entire length of skis, grip on icy slopes and smooth edge over transmission.
Available in: Comic, Thunderbolt, Local Beauty, Local Hero, Local Hero Jr

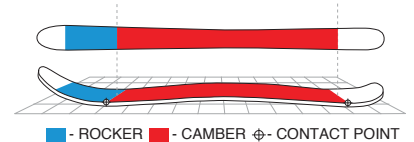

ROCKER

Rocker supports easy spins in powder and the catch-free, forgiving feel. The part of the ski under foot is flat, whereas both the nose and the tail of the ski are arched up. It improves the float and allows for an effortless all-terrain ride. Buttering and pillows shredding have never been easier.
Available in: Lumberjack

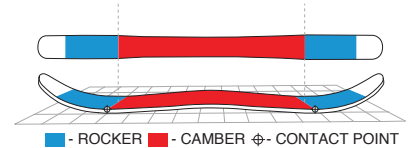

SEMI-HYBRID

Rocker and camber constructions combined to create the blend of the best features of both. Rockered tip enhances playfulness and float, camber adds smooth snap and edge grip. Mixing entry rocker and the under-the-foot section camber, gives great freeride performance, improved float and enhanced control and stability in variable conditions.
Available in: Dirty Bear, Wolf

2D-HYBRID

Merging rocker and camber brings benefits of both constructions together. Rockered tips and tails enhance playfulness and float, camber adds control and edge grip. The secret of the 2D Hybrid technology lays in transferring the widest points of the ski towards the centre and matching them to the ski profile (rocker/camber/rocker). This results in a shortened radius feeling, allowing for easy turns with extra control.
Available in: Rock'n'Rolla, Superior, Velvet

ELLIPTICAL ROCKER TECHNOLOGY

The new Elliptical Rocker Technology (ERT) is based on the radius of an ellipse rather than a standard circle radius. This means the ER arches up over a much longer section of the ski than in the case of a standard rocker. The new long rockered tip supports smooth powder ride without the effect of "riding up" the snow or terrain unevenness while pushing away the top layer of snow at the same time.
Available in: Werewolf, Vixen, Destroyer, Superior, Velvet, Rock'n'Rolla

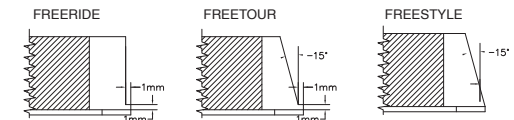

This season we have applied three construction variations of the 90° ABS sidewall technology.

FREERIDE - 90° sidewall construction, which enhances riding properties and makes servicing easier. Freeride sidewall also offers better edge grip and enhance riding control.

FREETOUR - sidewall construction, which combines the 15°/90°ABS with fang edge to make it lighter and impact-resistant. Freetour sidewall also increases riding properties and makes ski servicing easier.

FREESTYLE - The 15°/90° freestyle sidewall, which protects the edges and makes servicing easier. As a bonus, the freestyle sidewall also limits damages from crossing the skis in tricks.

FLEX ratio

Flex is the result of combining torsion and stiffness of the skis. Skiers who prefer speed and precision should pick stiffer skis with more responsive torsional twist. Park shredders and intermediate skiers should pick skis with softer flex. The flex ratio is based only on a benchmark comparison within the Majesty skis range.

Majesty is a truly independent freeski company, set up to integrate the newest and most advanced ski manufacturing solutions with progressive graphic design.

From the very beginning, we were driven by a vision of skis that would transform the freeskiing scene. In this pursuit, we never steered clear of innovative, sometimes radical ideas and visionary projects. The most advanced technology and manufacturing process together with quality materials used guarantee the highest standard of our products.

All Majesty skis are tested on slopes by world class riders and instructors. We put great emphasis on adding final touches to our products - all this is done by hand. Thanks to our skis, everyone can quickly improve their skills, regardless of terrain features or level of experience. Whether you ride on icy slopes or urban rails - Majesty is the best possible choice!

Majesty is also very much involved in the Skis4Trees eco-initiative, as well as concepts such as 2D Hybrid Technology or Tech Conspiracy. The idea of linking sports technology with art and advanced graphic design is our bread and butter.

OUR MISSION

In constant pursuit of innovative technologies and extraordinary design, our mission is to keep developing products that enhance the performance of freeskiers.

OUR OBJECTIVE

In fulfilling our mission, we aim to achieve the following goals:

- focus on the research and development of ski technology
- stand for excellent craftsmanship and quality of design
- unite sports with art

WEREWOLF

WAREWOLF

Werewolf is our new freetouring ski – extremely light, with its achieved flex and torsion corresponding with standard freeride skis when it comes to mounting light touring bindings. They also strike with their design simplicity and true elegance. We have designed Werewolf skis using the best components, like carbon and carbon-kevlar fibres. This allowed us to build light skis, which support dynamic responsiveness and riding stability even in the sketchiest weather conditions. Thanks to shifting the widest point of the ski, the ski's sidecut is reduced – this allows for better edge grip while traversing (and means you can now stand on the entire ski while going up the slope, rather than on ski's tips and tails as it is in the case of most touring skis). This stable support is extremely important especially in a very diverse terrain. Additionally, the tip rocker guarantees very comfortable powder riding, and the under-the-boot section of the ski can be effectively used in almost all snow conditions, regardless of the time of the season. Werewolf tails have also an extra feature – a solution most welcome by spring touring enthusiasts, who constantly ski in heavy snow. The tails are straight, but slightly arched up over a short segment of the ski. This allows to release the edge grip and slide down the slope in a controlled manner when needed. The textolite plate allows for mounting a range of freetouring bindings produced by different binding manufacturers.

Construction: semi hybrid + elliptical rocker
 shape: directional
 flex: directional
 flex ratio: 7
 rocker type: 220mm (tips)
 fiberglass: triax
 full carbon construction
 core: paulownia
 base: fast base IS7200
 sizes/sidecut/radius:
 166cm/118-88-108mm/20,4m
 175cm/120-90-110mm/23,3m
 184cm/122-92-112mm/26,2m
 extras: textolite plate, carbon/kevlar fibres
 designed for: freetouring, freeride

DESTROYER

Destroyer

Destroyer are hi-tech skis that meet all the requirements of modern freeride and freetouring. They are versatile freeride skis that have a lot to offer to freeriders, regardless of their style of skiing.

Destroyer skis feature the new Elliptical Rocker, which supports smooth powder ride without the effect of "riding up" the snow or terrain unevenness and pushing away the top layer of snow at the same time.

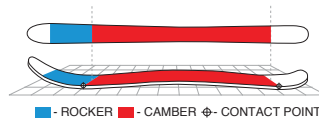

While riding on hard-packed snow, Destroyer use the entire tail-end of the ski. This allows for increased riding stability, even at faster speed. Camber shape still gives perfect responsiveness, power transmission and edge-to-edge ride.

Aerodynamic shape and riding properties make those new directional freeride skis prove their worth not only during adventures on wild ski slopes, but also in freeride competition events. Destroyer know no limits and make none for their riders. They are the perfect answer to a call for skis able to handle diverse and changing weather conditions.

construction: semi hybrid + elliptical rocker
 shape: directional
 flex: directional
 flex ratio: 8
 rocker type: 250mm (tips)
 fiberglass: triax
 full carbon/kevlar construction
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 size/sidecut/radius:
 164cm/140-111-121mm/20,2m
 173cm/142-113-123mm/23,4m
 182cm/144-115-125mm/26,3m
 191cm/146-117-127mm/29,6m
 designed for: freeride

VIXEN

Vixen

Hi-tech freeride skis for ladies. Easy in turn initiation, stable and with a perfect grip. Vixen flagship features are dynamic responsiveness and precise handling in difficult terrain. In a nutshell, versatility is their middle name. Thanks to our new solution, the elliptically rocker, the ski easily glides over the snow surface without creating any additional and unnecessary drag. ERT allows for a faster, lighter and more effortless ride. Camber allows for sure grip even in the iciest conditions, supports uncompromised riding flow and precision.

Vixen are our answer for even the most demanding freeriders. Wherever the limits of your ambition may lay, Vixen will take you there and never look back.

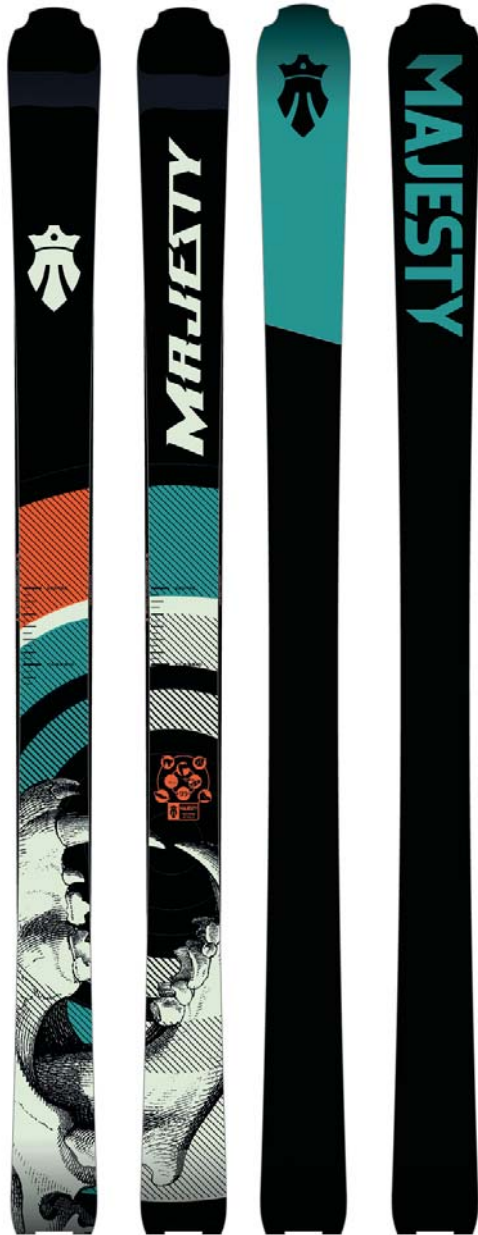

construction: semi hybrid + elliptical rocker
 shape: directional
 flex: directional
 flex ratio: 7
 rocker type: 250mm (tips)
 fiberglass: triax
 full carbon/kevlar construction
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 size/sidecut/radius:
 164cm/140-111-121mm/20,2m
 173cm/142-113-123mm/23,4m
 182cm/144-115-125mm/26,3m

WOLF

WOLF

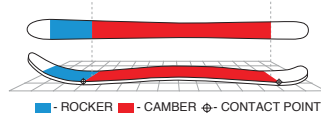

Wolf are freetouring, semi-hybrid skis that perform equally well in powder and in more challenging terrain, and can be easily used as all-embracing freeride skis.

Camber supports responsiveness, better grip on icy slopes and smooth edge over transmission. Combining entry rocker (150mm/5mm) and camber under the boot section improves float and enhances control and stability in variable conditions.

The 99mm-wide under the boot section is an ideal compromise for hard packed snow and deep powder alike. Special sidewall construction combines the 90° ABS with fang edge to make it more impact-resistant, increase riding properties and make ski servicing easier.

Unleash your inner beast for an ultimate ride...your Wolf is waiting for you!

construction: semi hybrid shape: directional
 flex: directional
 flex ratio: 6
 rocker type: rocker 150mm (tips)
 fiberglass: triax + biax
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 sizes: 169cm, 177cm, 184cm
 sidecut: 134/99/124mm
 radius: 20,3m; 22,2m; 24,2m
 extras: carbon/kevlar stringer
 designed for: freeride, freetouring

THUNDERBOLT

THUNDERBOLT

Universal all-terrain skis with enhanced on-piste carving abilities. Thunderbolt skis are wide twin tips with an extra sidecut. Thanks to camber construction the skis perform better on hard-packed snow without compromising on terrain rides! Triax fiberglass transfers power directly to the edges to make Thunderbolt respond faster and more precisely. Tip-to-tail woodcore with carbon-kevlar stringers adds lateral rigidity for better response and that extra grip. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier. Brace yourself for a whole new level of all-mountain riding experience. And get ready to Thunder past everyone else on the slope like (a) Bolt!

construction: camber
 shape: true twin tip
 flex: directional
 flex ratio: 6
 fiberglass: triax
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 extras: carbon/kevlar stringer
 size: 170cm, 180cm
 sidecut: 130/92/130mm
 radius: 18,0m; 20,0m
 designed for: all mountain

SUPERIOR

SUPERIOR

Being a top choice for backcountry powder action, these hybrid technology skis are a perfect combination of floating and ease of rocker with camber snappy suspension and control. Lively in powder and shock-absorbing in rough terrain or chewed-up conditions, the Superior are an absolute must-have for BC, deep powder or off-piste enthusiasts. The new freeride sidewall increases the riding properties even more, and makes proper servicing much easier. Spin off the cliffs and kickers, blast from stash to stash, slash the wave... want more? Wait, there actually IS more! Switching between freeride and backcountry freestyle all the time? No need to change gear – our skis are so versatile that have it all covered. There's a reason for their superiority, after all.

construction: 2D hybrid + elliptical rocker
 shape: directional twin tip
 flex: directional
 flex ratio: 6
 fiberglass: triax+biax
 rocker type: 240mm (tips & tails)
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 sizes: 178cm, 186cm, 194cm
 sidecut: 135/115/130mm
 radius: 20,0m; 23,0m; 26,0m
 designed for: backcountry, freeride

VELVET

VELVET

Velvet are lightweight backcountry skis designed especially with all our adventure seeking ladies in mind. Hybrid technology enables effortless riding in any terrain. Hybrid technology supports better float in powder, whereas camber increases responsiveness, makes landings smoother and edge grip more secure. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier. Versatility is definitely a great upshot here – dear ladies, no need to change gear when switching between freeride and backcountry freestyle. A combination of Triax and Biax fiberglass gives you great flex and control. Velvet are perfect for floating in deep powder and riding fast lines on the wildest of slopes. Time to rule the mountain with a Velvet glove!

construction: 2D hybrid + elliptical rocker
 shape: directional twin tip
 flex: directional
 flex ratio: 5
 fiberglass: triax+biax
 rocker type: 200mm (162) and 240mm (170cm) (tips & tails)
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 size: 162cm, 170cm
 sidecut: 120/100/115mm
 radius: 15,6m; 18,0m
 designed for: backcountry, freeride

LUMBERJACK

LUMBERJACK

Lumberjacks are the true powder floating machines made to satisfy the constant urge to search for backcountry kickers, log slides and snow pillows. Rocker supports easy spins in powder and effortless maneuvering between the trees. The new freeride sidewall increases the riding properties even more, and makes proper servicing much easier. Special matt finishing on the topsheet gives that extra touch to the overall design, and the graphics on the bases simply cannot go unnoticed. Riding powder switch, smooth landings, easy handling and surf feeling are all a part of the Lumberjack package, so jump for joy all you powder riding lovers! With his axe above his head, Lumberjack is ready for the new quests ahead. Deep woods? High mountains? Bring'em on!

construction: rocker
 shape: directional twin tip
 flex: directional
 flex ratio: 4
 fiberglass: triax
 rocker type: rocker 300mm (tips & tails)
 core: tip-to-tail woodcore (poplar and ash)
 base: fast base IS7200
 sizes: 175cm, 185cm, 194cm
 sidecut: 155/120/145mm
 radius: 17,6m; 20,0m; 22,1m
 designed for: all terrain freestyle, powder

DIRTY BEAR

DIRTY BEAR

Dirty Bear are our most versatile skis, and combine the best of freeride and freestyle. In a nutshell - they are, most likely, the perfect all-terrain skis. Semi hybrid construction and the 150mm/5mm early rise at the tips enable top performance on hard packed snow without compromising on your terrain rides. Get ready to experience the true feel of the wood core, the snappy camber suspension and directional twin-tip shape and tick all boxes at once. Special freeride 90° sidewall construction enhances riding properties and makes servicing easier. Special matt finishing on the topsheet gives that extra touch to the overall design, and the graphics on the bases simply cannot go unnoticed. Easy to handle and fast to respond, the Dirty Bears let you flourish wherever you roam. We guarantee our Bears never heard of winter hibernation, so let them growl this season even louder!

Attention: All Bears love trees, so we just could not separate them - check out our Skis4Trees eco-initiative www.majestyskis.com/skis4trees

construction: semi hybrid
 shape: directional

COMIC

FREE
STYLE

COMIC

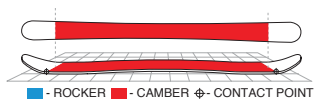

Here comes your ultimate freestyle weapon to help you reign everything from park to pipe - Comic are genuine twin tip skis for advanced freestyle riders. Camber supports instant grip, ultra fast response, and cushions the impact of big air landings. Carbon-kevlar stringers give you an increased tip-to-tail pop and response. Special 2,5mm steel impact edges will easily endure intense rail sessions. The 15°/90° freestyle sidewall cushions the edges and makes servicing easier.

Real Twin Tip - equal scoop, geometry and flex. Whatever you ride. Switch or regular.

Long life flex, power, precision, extra pop and an extremely fast (and now more durable) base are of course a part of the package. Add a glossy varnish finishing, dynamic graphic design and you'll have the full pic...err, comic strip.

When it comes to freestyle, Comic keep ruling with an iron fist. Majesty prouder's choice. Hats off!

construction: camber
shape: true twin tip
flex: twin
flex ratio: 5
fiberglass: biax
core: tip-to-tail woodcore (poplar and ash)
base: fast base IS7200
extras: carbon/kevlar stringer
sizes: 169cm, 175cm, 181cm
sidecut: 117/87/117mm
radius: 18,6m; 20,3m; 21,9m
designed for: freestyle - park&pipe

ROCK'N'ROLLA

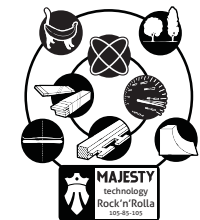

FREE
STYLE

ROCK'N'ROLLA

Rock'n'Rolla are true twin tip skis dedicated to street jibbing and snowpark shredding. Thanks to their hybrid technology, the skis combine the buttery looseness of a rocker with camber sharp turn ability. Rock'n'Rolla make shredding easier, are more forgiving at landing, and unlikely to catch an edge. The 15°/90° freestyle sidewall cushions the edges and makes servicing easier. The extremely fast base is now more durable too. Special matt finishing gives that extra touch to the overall design. Smooth in trick initiation, Rock'n'Rollas will empower you to make all of your favourite devilish butters as easy as a pie. Camber allows for controlling the turns and absorbs impact at landings. The new graphic design with matt varnish adds even more style to freestyle, and will definitely make you stand out!

A whole lot of (free)style up for grabs!

construction: 2D hybrid + elliptical rocker
shape: true twin tip
flex: twin
flex ratio: 3
fiberglass: biax
rocker type: 200mm (159cm) and 220mm (168, 177cm) (tips&tails)
core: tip-to-tail woodcore (poplar and ash)
base: fast base IS7200
sizes: 159cm, 168cm, 177cm, 182cm
sidecut: 105/85/105mm
radius: 16,0m, 18,0m; 20,0m; 21,6m
designed for: freestyle - jib&rails

LOCAL HERO

LOCAL HERO

Local Heroes are great for beginner and intermediate freestylers. They will give you a good feeling of wood core, versatility, camber edge-hold, riding stability, enhanced carve abilities and pop. Camber supports suspension, absorbs the impacts of flat landings and choppy snow.

Local Heroes are our answer to the all-round fun, regardless of the conditions and terrain features. Simple yet very eye-catching graphics won't let you go unnoticed.

Whether it is park, hard packed snow or off-piste fun, go from zero to Hero in no time!

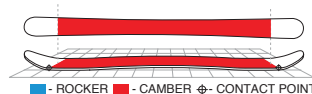

construction: camber
 shape: directional twin tip
 flex: directional
 flex ratio: 4
 fiberglass: triax
 core: tip-to-tail woodcore (poplar and ash)
 base: durable base IS4400
 sizes: 150cm, 160cm, 168cm
 sidecut: 116/82/111mm
 radius: 15,6m; 17,7m
 designed for: all mountain

LOCAL HERO JR

A must-have for all young all-mountain freestyle enthusiasts. A smaller version of Local Hero. And, true to that word, like father like son – the Local Hero Jr. have the entire package. Camber construction, double layer wood core from tip to tail, shock absorbers, 15°/90° ABS sidewalls and durable base... all of our finest features included!

Local Hero Jr. skis are made for all-mountain fun, regardless of the conditions and terrain features. Park, slope or terrain – whatever you choose, Local Hero Jr. have it covered. Time for all our young lads to ride free.

construction: camber
 shape: directional twin tip
 flex: directional
 flex ratio: 3
 fiberglass: triax
 core: tip-to-tail woodcore (poplar and ash)
 base: durable base IS4400
 sizes: 150cm, 160cm
 sidecut: 116/82/111mm
 radius: 12,0m; 14,1m
 designed for: all mountain

LOCAL BEAUTY

LOCAL BEAUTY

New best friend for all ladies who wish to embark on a freestyle adventure! Local Beauty have a soft and forgiving flex, are pretty lightweight (and pretty too!). Camber allows for an increased edge-hold, better riding stability and enhanced carve abilities. Local Beauty are fun, easy and comfortable to handle, and full of pop. Directional flex makes steering in every terrain as easy as ABC. Camber supports suspension and absorbs the impacts of flat landings and choppy terrain.

We threw in some sparkle for a good measure too! So, dear Ladies – go wild this season and enjoy the ride! A thing of (Local) beauty is a joy forever!

construction: camber
 shape: directional twin tip
 flex: directional
 flex ratio: 3
 fiberglass: triax
 core: tip-to-tail woodcore (poplar and ash)
 base: durable base IS4400
 sizes: 150cm, 160cm, 168cm
 sidecut: 116/82/111mm
 radius: 12,0m; 14,1m; 15,6m
 designed for: all mountain

MAJESTICKS

MAJESTICKS

Multifunctional, high-quality and durable all-round skipoles that you can rely on.

Our new, greatly improved telescopic ski poles (adjustable length: 100-140cm) have a comfortable high quality race grip and are great for touring. Majesticks are made of light, durable, eco-friendly and completely recyclable aluminum alloy 7075.

Majesticks are equipped with 2 sets of snowrings - freeride 85mm and freestyle 50mm. All skipoles have soft handles and completely new, comfortable wrist straps.

Switching between freestyle and backcountry all the time? No need to change gear – Majesticks are so versatile that have it all covered.

All Majesticks are made in EU (Italy).

They come equipped with:

- a thin shaft for a lighter and better balanced skipole, with reduced swing effect and wind resistance
- new comfortable strap with Majesty logo
- quick lock – a locking system recommended for ski-alpinism, easy to adjust the pole length + emergency twist lock inside - 2 sets of snow-rings (freeride and freestyle)
- stylish matt finishing

Available colour combinations:

- OPTI (black/red/white)
- SEA (turquoise/black/white)
- BOLT (black)

**DOUBLE
LOCK
TECHNOLOGY**

METATRON JACKET

METATRON JACKET

Metatron is an excellent freestyle jacket, which can also double up as a backcountry jacket for deep powder rides (thanks to its technical properties). The zip-off sleeves will let you quickly and effectively convert the jacket into a stylish ski vest, ideal for a spontaneous snowpark session.

Specs:

tall-fit
New fabric style
Windproof 2-layer technical coated fabric
10.000mm waterproof
10.000mg/m2 breathable
Inner Silvershield lining
Zip-off sleeves
Fully taped seams
Soft inner collar and chin guard
Elastic stretchable wrist gaiters
Adjustable, integrated hood, helmet-compatible
Powder skirt with elastic stretchable movement panel
Pants interface
Ski pass pocket with waterproof zip
A number of different inner and outer pockets
Integrated media pocket
Inner utility pouch (for beanie, goggles, sunglasses etc.)

Sizes: S, M, L, XL, XXL

Available colour combos: dark red/army green, army green/black, black/dark red

COMBAT PANTS

COMBAT PANTS

New Combat pants are a great match to both Combat and Metatron jackets. Brand new look and eye-catching herringbone fabric accents make the pants stand out from the crowd. Looks and functionality – that's what Combat pants are about.

Specs:

Custom tailored pants (narrower around the ankles)
Windproof technical coated fabric
Inner Silvershield lining
10.000mm waterproof
10.000mg/m2 breathable
Fully taped seams
Tights venting with mesh lining
Soft inner waist with adjustable waistband
Adjustable cuff gaiters with upper-end elastic stretch panel
Interface with jacket powder skirt
Splash-proof zips
3-D cargo pockets

Sizes: S, M, L, XL, XXL

Available colour combos: jeans/black, black/brown, army green/graphite, dark red/graphite, graphite/black

COMBAT JACKET

COMBAT JACKET

Combat jackets are the newest addition to our outerwear range. Stylish tall-fit parka-like jackets will definitely serve well on slopes and as a regular streetwear jackets. A combination of Herringbone fabric with our standard technical one gives Combat jackets a new, edgy look.

Specs:

Tall-fit custom tailored jacket
Herringbone fabric
Windproof technical coated fabric
Inner Silvershield lining
10.000mm waterproof
10.000mg/m2 breathable
Fully taped seams
Soft inner collar with brushed chin flap
Waterproof block zips
Elastic wrist gaiters
Integrated, helmet-compatible hood with cord adjustments
Armpit ventilation with mesh lining
Powder skirt with elastic stretch panel
Pants interface
Side skipass pocket with splash-proof zip
Inner audio/media pocket
Napoleon pocket
Front 3D cargo pocket
Inner utility pouch (for beanie, goggles, sunglasses etc.)

Sizes: S, M, L, XL, XXL

Available colour combos: black/jeans, brown/black, graphite/black, jeans/black

COMBAT PANTS

COMBAT PANTS

New Combat pants are a great match to both Combat and Metatron jackets. Brand new look and eye-catching herringbone fabric accents make the pants stand out from the crowd. Looks and functionality – that's what Combat pants are about.

Specs:

Custom tailored pants (narrower around the ankles)
Windproof technical coated fabric
Inner Silvershield lining
10.000mm waterproof
10.000mg/m2 breathable
Fully taped seams
Tights venting with mesh lining
Soft inner waist with adjustable waistband
Adjustable cuff gaiters with upper-end elastic stretch panel
Interface with jacket powder skirt
Splash-proof zips
3-D cargo pockets

Sizes: S, M, L, XL, XXL

Available colour combos: jeans/black, black/brown, army green/graphite, dark red/graphite, graphite/black

SKADI JACKET

SKADI JACKET

Women Skadi jackets are latest addition to our outerwear collection. Special, tailored fit and eye-catching design, combined with excellent technical properties should satisfy even the most demanding freerider ladies. Named after the mythological Nordic winter goddess, the Skadi outerwear is perfect for wild rides in the snowy backcountry scenarios.

Specs:
 Women custom tailored fit
 Herringbone material
 Windproof technical coated fabric
 Inner Silvershield lining
 10.000mm waterproof
 10.000mg/m2 breathable
 Fully taped seams
 Soft inner collar with brushed chin flap
 Waterproof block zips
 Elastic wrist gaiters
 Integrated, helmet-compatible hood with cord adjustments
 Armpit ventilation with mesh lining
 Powder skirt with elastic stretch panel
 Pants interface
 Side skipass pocket with splash-proof zip
 Inner audio/media pocket
 Napoleon pocket
 Front 3D cargo pocket
 Inner utility pouch (for beanie, goggles, sunglasses etc.)

Sizes: S, M, L, XL

Available colour combos: jeans/black, washed mint/brown, graphite/washed peach, graphite/dark red

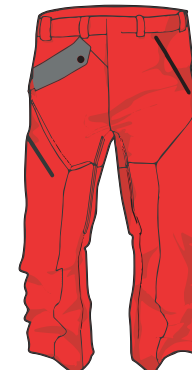

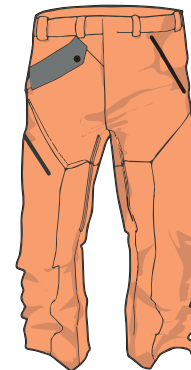

SKADI PANTS

SKADI PANTS

The pants complement Skadi jackets to give you a jaw-dropping, comfortable and functional set. Tailored fit and adjustable stretch panels let you decide how you want to wear the pants.

Specs:
 Custom tailored pants (narrower around the ankles)
 Windproof technical coated fabric
 10.000mm waterproof
 10.000mg/m2 breathable
 Fully taped seams
 Tights venting with mesh lining
 Soft inner waist with adjustable waistband
 Adjustable cuff gaiters with upper-end elastic stretch panel
 Interface with jacket powder skirt
 Splash-proof zips
 3-D cargo pockets
 Sizes: S, M, L, XL
 Available colour combos: jeans/black, washed mint/brown, washed peach/graphite, dark red/graphite

YUKI JACKET

YUKI JACKET

Yuki jackets are perfect for all backcountry/freeride action, riding in deep powder, regardless of weather conditions. No need to cut back on your riding time – our Yuki outerwear will cover your back (and everything else too!).

Specs:

semi-tall, very comfortable fit
 new, more durable fabric
 Duralight membrane (15000mm/15000mg/m²)
 Inner Silvershield lining
 Very comfortable semi-circular high chin guard with soft inner lining
 Two asymmetrical fully taped zips with brushed chin flaps
 Custom tailored sleeves with asymmetrical cuffs to keep the snow out
 New, wider velcros for better cuff regulation
 Elastic wrist gaiters
 Helmet-compatible hood with a visor – easy to adjust in two dimensions, not limiting any movement
 Armpit ventilation – secured with rubber bands, easy to use
 Inner powder skirt, compatible with pants and easy to remove when necessary
 Ergonomic pockets, napoleon pocket
 Inner audio/media pocket
 Side skipass pocket with waterproof zip
 Inner utility pouch (for beanie, goggles etc.)

Sizes:

S, M, L, XL, XXL

Available colour combos:

black/rainbow, red/turquoise, purple/cool grey, turquoise/red

YUKI PANTS

YUKI PANTS

Yuki pants are designed for deep powder rides. If top backcountry performance high quality, waterproof and breathable product is what you are looking for, look no further. Yuki pants are great for hiking up the mountains – they do not restrict your movements and are extremely comfortable.

Specs:

Relaxed, tapered fit (slightly slimmer)
 New, more durable fabric
 Windproof 2-layer technical coated fabric
 Duralight membrane (15.000mm/15.000mg/m²)
 Inner Silvershield lining
 Inner ankle reinforced fabric panels
 Ergonomic pockets in the extended waist stretch panel
 Adjustable braces – can be worn in two ways, regular or crossed in the back

ASGAARD DOWN JACKETS

ASGAARD DOWN JACKETS

Warm and functional mid-layer jackets, which are also extremely light and easy to fold down and take along in case you need to layer up during the day. Extremely useful in everyday use. Unreliable weather conditions? Sudden drop in temperature? Just take the Asgaard down jacket with you, and you are always on the safe (and warm!) side.

Specs:

Tailored fit
lining: 100% polyamide
padding: 90% eiderdown, 10% feathers
two side seam zip pockets
foldable, fits into a small bag (attached)

Sizes: S-XL (men), S-XL (women)

4 different colour combos

MEN

WOMAN

SURFACE BASE LAYER

BASE LAYER

Surface clothing is our newest addition to the Majesty range. This multifunctional technical wear not only looks good but, more importantly, serves its purpose, and can be used either as first or second layer.

Our base layer tops and bottoms are both made from antibacterial, breathable yet warm and cosy material, which has excellent moisture-transmitting properties. An innovation in base layer wear is a high, adjustable and regulated chin guard, which protects from wind and, thanks to its shape, can be used as facemask.

Tops have some additional features, such as:

- fitting, articulated cut
- armpit ventilation holes
- sleeves with thumbholes
- easy to access zip pocket

- available colour combinations:
- black/mint
 - blue/orange/white
 - sand/purple (lady)
 - black/pink/orange (lady)

Sizes: S, M, L, XL

SURFACE BASE LAYER

BASE LAYER LADY

Surface clothing is our newest addition to the Majesty range. This multifunctional technical wear not only looks good but, more importantly, serves its purpose, and can be used either as first or second layer.
