Quality

TMRip'nWud Skis "Limited Edition" are produced with 100% white ash wood cores from tip to tail. All TMRip'nWud skis are produced with the best raw materials available.

White ash wood cores have been a favorite since the time of the first ski pioneers because of its strength and long durability. Skis made from White ash wood give a springy rebound action that maintains its form for years, even after the hardest and most demanding ski seasons.

Our „Limited Edition“ come finished with our hand selected, organically treated walnut wood top sheets. Our PURE walnut wood top sheet construction gives our new collection a real wood touch and natural wood look without compromising performance or durability.

Construction

Our construction methods go back to the core of traditional ski building. TMRip'nWud hand selects all of its wood from European wood suppliers then cures the selected wood in an controlled environment for a certain period of time in advance. Once the wood is fully cured, we do a second N° 1 quality selection, then laminate full length pieces using certain techniques of the ancient ski building pioneers.

TMRip'nWud ski cores are then shaped and balanced, then put in our specially designed moulds before entering the press.

This technique ensures each pair of skis we produce, an equal balanced flex that allows the rider very easy handling and stability.

RNW ALL MOUNTAIN SEMI TWIN

Product Specifications

Type of Ski: All Mtn. semi Twin

Gender: Mens/Womens

Dimensions: 118/84/107mm

Turn Radius: 19.1m (@ 162cm)

Integrated Binding System: No

What Binding is recommended?

RNW FR V412 Step-in

Construction Type: Sandwich laminate

RNW © LAM TECHNOLOGY.

Core Material: Full length white ash wood

Base Material: Ptex 2000

Tail: SEMI TWIN

Size available: 162cm/173cm

Model Year: 2010

Product ID: 1622010

Skiing Range: Intermediate/Advanced
