QUALITE

Les skis Rip'nWud « Limited Edition » sont fabriqués avec un noyau bois à 100% en frêne blanc, du talon jusqu'au bout de la spatule. Tous les skis Rip'nWud sont fabriqués avec les meilleures matières premières disponibles sur le marché.

Les noyaux en frêne blanc étaient déjà très appréciés par les premiers pionniers du ski du fait de leur solidité et de leur grande durabilité. Les skis en frêne blanc maintiennent leur forme pendant des années grâce au ressort et à l'élasticité du frêne blanc, et ceci même après les saisons de ski les plus exigeantes.

Nos skis « Limited Edition » ont une finition en bois de noyer, sélectionné à la main, traité et protégé par une huile biologique.

Notre construction avec une couche supérieure en pur bois de noyer apporte à notre « nouvelle » collection une finition naturelle en bois véritable, qui ne compromet ni la performance ni la durabilité du ski.

CONSTRUCTION

Nos méthodes de construction remontent aux racines des skis traditionnels. Le bois utilisé pour la construction de nos skis est sélectionné avec rigueur chez les fournisseurs de bois européens, puis traité à l'avance sur une certaine durée dans un environnement contrôlé. Une fois le bois traité, une deuxième sélection est effectuée afin d'extraire le bois de première qualité. Des sections entières de bois sont ensuite lamellées suivant les techniques utilisées par les premiers constructeurs de skis.

Les noyaux Rip'nWud sont ensuite formés et équilibrés, avant d'être insérés dans les moules que nous avons spécialement conçus, puis dans la presse.

Cette technique permet d'assurer à chaque paire de ski fabriquée, un flex équilibré et équivalent, et à chaque skieur une maniabilité et une stabilité performante.

RIPNWUD SKIS "LIMITED EDITION" 2011/12

Our 100% wooden ski cores are built with hand selected laminated Swiss white ash wood tip to tail.

We have fine tuned our "LIMITED EDITION" with a precision finished wooden top surface, made from the best hand selected organic American walnut wood. Our logo Rip'nWud is fire branded into the wood surface eliminating toxic ink printing.

Rip'nWud skis come with our very durable resistant Carbon hard base made from 100% Recycled composite material.

Our base has been developed for off piste riding conditions and slides VERY FAST. All ski models come finished with a diamond stone structure and prepared with 100% Biodegradable MAGIC POTION ski wax. Consider the environment you live to enjoy & RIDE on...

RNW FR TWIN:

<u>Length</u>	<u>boot center from the tail</u>	<u>sidecut</u>	<u>radius</u>
174cm	82.5 cm	132/98/124	19m
184cm	87.5 cm	132/98/124	21m

“LIMITED EDITION”

RNW POWDER BIG FAT SEMI TWIN

Product Specifications

Type of Ski: Powder Big Fat

Gender: Mens/Womens

Dimensions: 143/111/131mm

Turn Radius: 24m (@ 183cm)

Integrated Binding System: No

What Binding is recommended?
RNW FR V Series Step-in

Construction Type: Sandwich laminate
RNW ©LAM TECHNOLOGY.

Core Material: Full length white ash wood

Base Material: Carbon Hard Base (Recycled)

Tail: Semi Twin

Warranty: 2 Year

Skiing Range: Advanced intermediate/Exp.

Model Year: 2011/12

Product ID: 1832012

“LIMITED EDITION”

RNW FREERIDE TWIN (FR Series)

Product Specifications

Type of Ski: Freeride Twin Tip

Gender: Mens/Womens

Dimensions: 132/98/124mm

Turn Radius: 19m (@ 174cm)

Integrated Binding System: No

What Binding is recommended?
RNW FR V Series Step-in

Construction Type: Sandwich laminate
RNW ©LAM TECHNOLOGY.

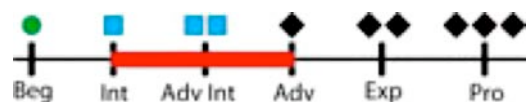

Core Material: Full length white ash wood

Base Material: Carbon Hard Base (Recycled)

Tail: Twin

Warranty: 2 Year

Skiing Range: Intermediate/Advanced

Model Year: 2011/12

Product ID: 1742012

“LIMITED EDITION”

RNW POWDER BIG FAT “PRO”

Product Specifications

Type of Ski: POWDER BIG FAT “PRO”

Gender: Mens

Dimensions: 139/106/128mm

Turn Radius: 28m (@ 193cm)

Integrated Binding System: No

What Binding is recommended?
RNW FR V Series Step-in

Construction Type: Sandwich laminate
RNW ©LAM TECHNOLOGY.

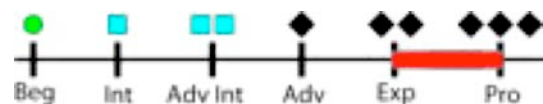

Core Material: Full length white ash wood

Base Material: Carbon hard base (Recycled)

Tail: Semi round

Warranty: 2 Year

Skiing Range: Expert/Pro

Model Year: 2012
Product ID: 1932012

Technical description - Rip'nWud Bindings

AUTO SOLE ADJUSTMENT

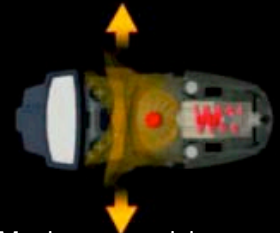

Automatic adjustment
 to the sole's height
 thanks to the secondary,
 lower spring.

4 ROLLER SAFTY SYSTEM

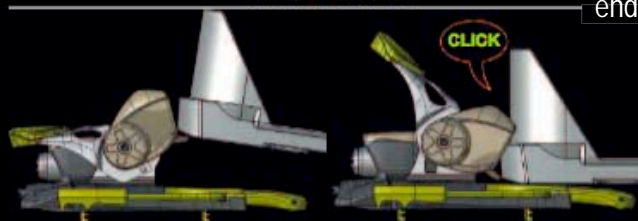

Minimal friction between
 Binding and boot thanks
 To the clever use of rolls
 → maximum safty

1 AXIS PIVOT JOINT

Maximum precision
 Thanks to the vice jaw
 which rotates on a center
 axis. Maximum vertical hold
 In case of falling on the ski
 end. → Freeride

SOLID STEP IN

Sure acknowledgment of step in
 thanks to the clear sound → **CLICK**

QUICKLOCK

SPORT PERFORMANCE SYSTEMS

“QUICKLOCK” SYSTEM BY VIST

Advantages:

Quicklock is the super quick adjustment of the bindings position for different Snow conditions.

Separate toe/heel adjustment.

Super lightweight 800gr./pair.

Rip'nwud's Quicklock system compliments all of our FR-V-series step-in bindings. Quicklock is a mounted adjustable plate.

With our easy push button adjustment tab, Rider's can choose a different binding placement that offers the rider to change his or her possession on the skis platform. This allows the rider to adapt the ski easily to piste or off piste snow conditions.

**Recommended for freeride & carving.*
