2014

HARDGOODS

A large, dark circular graphic centered on the page. It is divided into four quadrants by two white diagonal lines that cross at the center. The top-left quadrant contains the year '2013', the top-right contains '2014', the bottom-left contains a white mountain peak icon, and the bottom-right contains a white snowflake icon. The word 'WINTER' is arched across the top edge, and 'HARDGOODS' is arched across the bottom edge.

WINTER 2013/2014 - HARDGOODS

SCOTT SKIS

FOR OVER A DECADE, SCOTT HAS BEEN AT THE FOREFRONT OF SKI DEVELOPMENT AND INNOVATION, CONTINUALLY PROVIDING SKIERS WITH UNIQUE TECHNOLOGIES SPECIFICALLY DEVELOPED TO ENHANCE THEIR SKIING EXPERIENCE. FOR 2014, SCOTT IS PROUD TO DELIVER A COMPLETE FREESKI LINE, FEATURING INNOVATIVE ROCKER SHAPES AND THE PROVEN 3DIMENSION SIDECUT DESIGN. SCOTT IS A COMPANY MADE OF INDIVIDUALS WHO ARE MORE THAN JUST EMPLOYEES; THEY ARE USERS DEVOUTLY PASSIONATE ABOUT BEING IN THE MOUNTAINS.

SCOTT ROCKER TECHNOLOGY

In 2002, SCOTT developed the Santiago, a ski designed to perform in deep snow while maintaining edge control at high speeds. SCOTT designers achieved this by building a ski with a raised tip, moving the point where the ski comes in contact with the snow farther back. Today, the ski industry calls this Rocker, a technology that has been part of the SCOTT ski line for over 10 years.

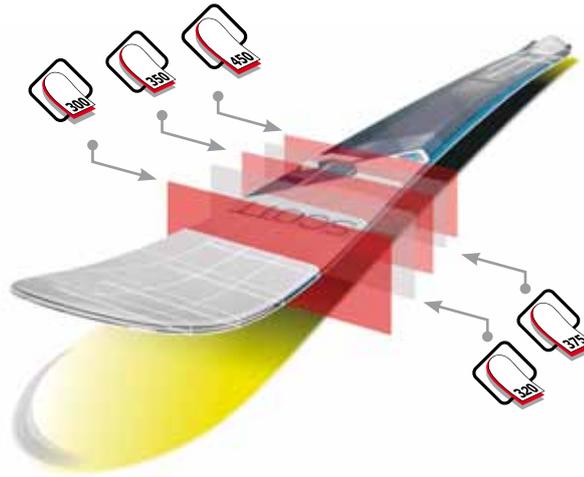

SCOTT builds rockered skis with the goal of producing the best performing skis in the industry, products that improve the overall experience of any skier in any condition. The rocker technology found on SCOTT skis has undergone extensive testing and development to assure the perfect balance. We are proud to deliver three specific Rocker Technologies in our 2014 line: Pro-Tip Rocker, Venturi-Tip Rocker and Twin-Tip Rocker.

PRO-TIP ROCKER

Combining a progressive shape with increased tip height and radius creates Pro-Tip Rocker. SCOTT's Pro-Tip provides a more versatile and forgiving ski in all conditions. Scott's Pro-Tip produces a more consistent ski flex and predictable turns.

FEATURES

- + Improves ski agility and progressiveness
- + Increases stability in powder and deep snow
- + Provides forgiveness, allowing skier to adjust turn shape

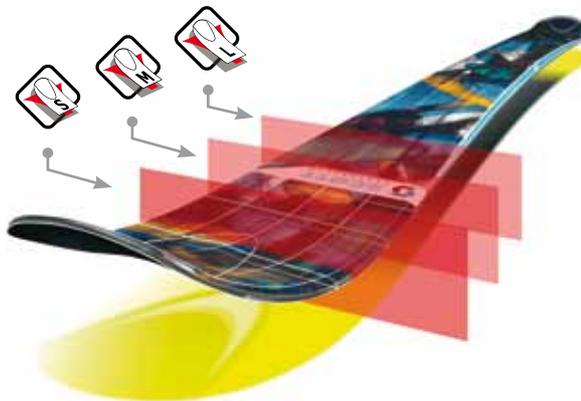

VENTURI-TIP ROCKER

Venturi-Tip Rocker combines a hollowed shape with a rocker tip. The resulting Venturi-Tip Rocker design effectively decreases the ski's surface pressure in deep snow, while Rocker allows the tip to be elevated to the surface, yielding a highly versatile performer in variable conditions.

FEATURES

- + Excellent float and turn initiation
- + Offers stability at high speeds in all conditions
- + Reduces surface pressure resulting in improved ski handling

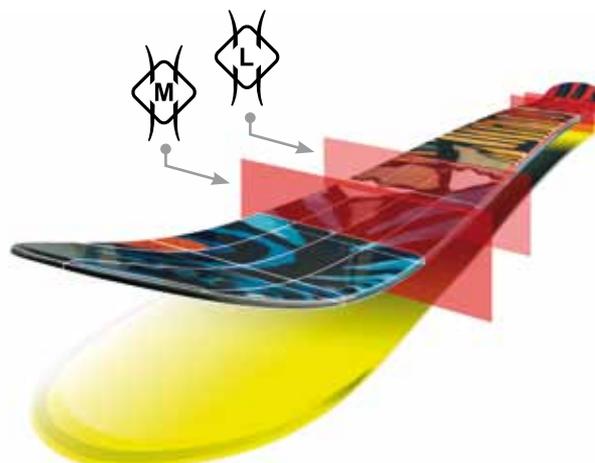

TWIN-TIP ROCKER

Having a rocker in both the tip and tail allows for optimal float in deep snow and creates a playful "floaty" ski, while traditional camber underfoot maintains edge hold and stability.

FEATURES

- + Improves ski flotation in powder
- + Creates a forgiving and playful ski
- + Maintains performance and versatility

3DIMENSION 3D

SIDECUT

3DIMENSION SIDECUT

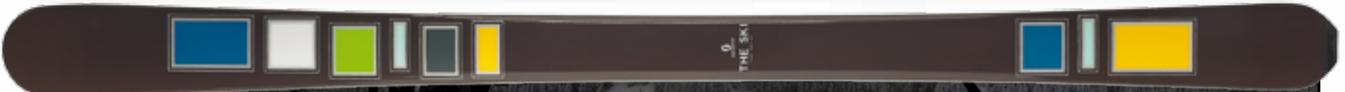

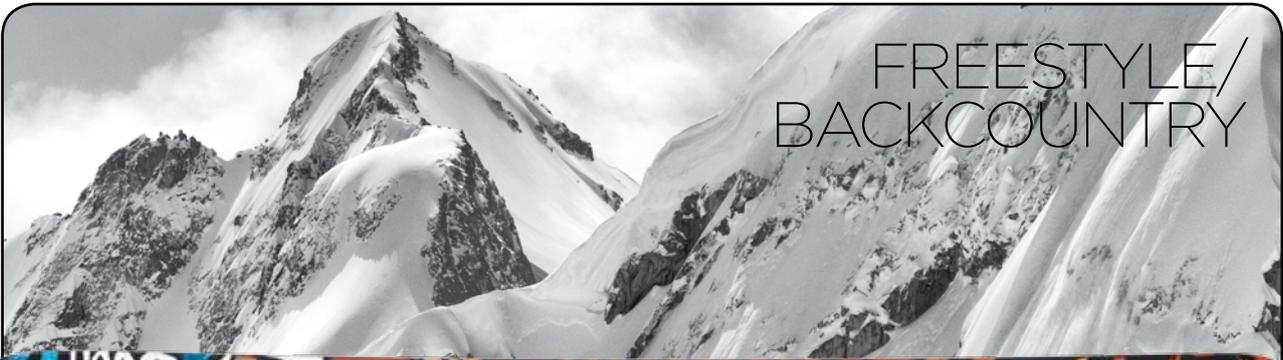

This revolutionary sidecut design combines a tip and tail radius with either a central flat line or a small amount of sidecut under foot. The tip and tail radii allow for easy turn initiation while the flat line (freeski) or a larger radius (all conditions) provides stability, power and precise edge hold. This proven design has earned accolades in the form of X-Games golds and multiple ski test awards.

For 2013/14 SCOTT brings this 3Dimension design into the world of all conditions skiing with the introduction of THE SKI, providing the next level of versatility, balance, and power that meets the demands of an all in one ski.

3Dimension Sidecut is utilized in two different forms, a centralized flat line for the freestyle/progressive oriented skier or as a larger radius under foot for an all condition skier looking for a versatile high performing ski.

FEATURES

- + Improved edge control and power underfoot
- + Adds stability and predictability to the ski
- + Improved pivot point for a playful ski

ALL CONDITION SKIS

VERSATILITY AND SUPREME PERFORMANCE
IN VARIOUS TERRAINS

THE SKI

IT ALL STARTS IN SUN VALLEY, ID

SUN VALLEY, ID, THE BIRTHPLACE OF SCOTT, IS HOME TO MANY ICONIC SKIING FIGURES AND HAS ALWAYS PLAYED A HUGE PART IN THE DEVELOPMENT OF THE SCOTT BRAND. IN 1958, USING SUN VALLEY'S FAMED TERRAIN AND SKI-FOCUSED COMMUNITY AS INSPIRATION, ED SCOTT DEVELOPED THE FIRST TAPERED ALUMINUM SKI POLE AND CREATED THE SCOTT BRAND.

SUN VALLEY SOON BECAME A COMMUNITY BUILT AROUND THE SKI INDUSTRY AND HAS PRODUCED SOME OF SKIING'S MOST INFLUENTIAL MEMBERS. ONE SUN VALLEY LOCAL BY THE NAME OF BOBBIE BURNS, OTHERWISE KNOWN AS THE "ORIGINAL HOT DOGGER," RIPPED THE SLOPES OF THE SUN VALLEY RESORT, SHOWING THE SKIING COMMUNITY A NEW STYLE OF SKIING THAT CAUGHT THE WORLD'S ATTENTION.

AS BOBBIE BROKE NEW GROUND AND DEVELOPED AS ONE OF SKIING'S PIONEERS, HE ALSO STARTED PRODUCING HIS OWN SKIS, WITH HIS FLAGSHIP MODEL KNOWN SIMPLY AS "THE SKI." BURNS' "THE SKI" SOON BECAME A STAPLE IN THE EARLY 70'S FREESTYLE CIRCUIT AND WAS FREQUENTLY ON TOP OF THE PODIUM NEXT TO LEGENDS OF THE SPORT, LIKE SPIDER SAVAGE. FREESTYLE SKIING STARTED TO EMERGE AS A TREND THAT WAS HERE TO STAY. "THE SKI," ALONG WITH SEVERAL SCOTT PRODUCTS, SUCH AS BOOTS AND POLES, BECAME THE ULTIMATE "HOT DOGGER" SET UP AND PAVED THE WAY FOR MANY MORE SKI INNOVATIONS TO COME. THE SUN VALLEY CONNECTION CONTINUES TO INFLUENCE SCOTT, AND WITH THE HELP OF BOBBIE BURNS, HAS INSPIRED THE COMPANY TO REVIVE "THE SKI" IN THE SCOTT 2013/14 SKI COLLECTION.

SCOTT THE SKI

230737

"THE ALL IN ONE" - The Ski has been specifically developed to handle all types of skiing and terrain conditions. The Ski features a unique elliptic sandwich construction offering exceptional torsional stiffness, as well as a true, full-length wood core for an unmatched homogenous flex. With 3Dimension sidecut and a Pro-Tip rocker profile, The Ski provides unmatched performance and versatility in all conditions.

SCOTT REVERSE 230738

SCOTT's "SUV" (Snow Utility Vehicle) - The Reverse is ideal for the advanced skier looking for a ski that offers precise edge control and performance on the groomers, while still performing in mixed conditions. SCOTT's proven Venturi construction and Dual Radius shape allow for excellent versatility and two layers of Titanal create a stable ride and powerful flex.

SKI TECHNOLOGY

PRO-TIP ROCKER

SCOTT's Pro-Tip Rocker produces a more consistent ski flex and predictable turns, by using a progressive tip height radius. SCOTT skis that feature Pro-Tip Rocker simply track better than the competition and are available in four heights catering specifically to the skis intended use: Pro-Tip Rocker 300 / 320 / 350 / 375 and 450.

VENTURI-TIP ROCKER

This unique design utilizes a rockered concave tip design, which decreases the amount of friction from ski to snow, allowing the ski to effortlessly track through different snow conditions while improving torsional rigidity. Venturi Tip Rocker is available in three sizes S, M, and L.

TWIN-TIP ROCKER

Having rocker in both the tip and tail allows for optimal float in deep snow and creates a playful "floaty" ski, while traditional camber underfoot maintains edge hold and stability. Twin-Tip Rocker comes in two different sizes M and L.

3DIMENSION SIDECUT

This revolutionary sidecut design combines a tip and tail radius with either a central flat line or a small amount of sidecut under foot. The tip and tail radii allow for easy turn initiation while the flat line (freeski) or a larger radius (all conditions) provides stability, power and precise edge hold. This proven design has earned accolades in the form of X-Games gold's and multiple ski test awards.

DUAL RADIUS

Traditional skis have a fixed radius that determines the length of every turn. Scott skis combine two radii (dual radius) to create the sidecut or "shape" of the ski. This Dual Radius creates a more versatile ski, which is not confined to one type of skiing or terrain. Having a bigger front radius provides great stability and forgiveness in every snow condition.

VENTURI TIP & TAIL

The Venturi Tip and Tail concept is found exclusively on SCOTT skis. The Venturi geometry decreases the running surface pressure, allowing the ski to track better with less effort, meaning the ski will be more forgiving without sacrificing performance.

VENTURI TAIL

Since the first generation of the legendary Pure, Venturi Tail technology has been a success. The Venturi Tail provides excellent stability and tracking in all conditions.

PRE-TRACK

SCOTT's Pre-Track technology allows a variable effective edge depending on terrain. The unique shovel and tail geometry offers a smaller effective edge for short radius turns on groomed slopes and a longer effective edge when making bigger turns or skiing off-piste. The result is a more precise, stable and versatile ski.

3D CARBON FRAME

Using a 3D frame, this innovative carbon laminate ski construction found in our Xplor'Air, Crus'Air and Powd'Air skis, creates an exceptionally lightweight freeride mountaineering ski, while dramatically increasing torsional rigidity for steep terrain.

WOMEN'S SPECIFIC DESIGN

All Women's skis feature women's specific construction, meaning they are designed to be light and lively while meeting the levels of performance that serious women skiers demand.

FACTORY FINISH

SCOTT skis come direct from the factory ready to ski with Scott's factory finish. Factory finish offers an effective edge angle of 88°, resulting from a 3° side and 1° base angle for an exceptional performance. The base is finished with a micro structured CNC stone grind so you can mount your skis and hit the hill, no tuning required.

FREESTYLE FINISH

SCOTT Freestyle Finish is especially designed for a more playful freestyle ski. The main difference from the factory finish is the bigger base edge angle of 1.6°. This larger angle makes the ski easier to spin and more forgiving on landings and rails.

REINFORCED STEEL EDGE

SCOTT Freestyle skis use a durable oversized height steel edge. This reinforced steel edge is far more resistant to breaking.

HIGH-SPEED BASE

SCOTT's High Speed Base is a sintered ultra-high molecular weight and high wax part base. The best combination for speed.

RENTAL TOP SHEET

The Rental Top Sheet minimizes the contact with the foil top by using little hole patterns to disperse potential scratches and abrasions. The result is increased durability, which is ideal for rental shop use.

TITANAL INLAY

A Titanal inlay directly underfoot offers maximum durability to stand up to the repetitive impact inflicted on the ski when riding rails.

FULL SKI LENGTH WOOD CORE

The full-length, wood core produces a more consistent ski flex and creates a homogeneous transition between middle part and rockered tip and tail.

SKIN FIXATION SYSTEM

The Scott Skin Fixation System provides an easy and fast skin attachment in all weather conditions.

SKI CONSTRUCTIONS

SCOTT SKI CONSTRUCTIONS:

SCOTT combines wood cores with Sandwich sidewall construction (SSC) and additional technologies optimized for each ski. A mix of different wood cores (beech, poplar and paulownia) provides a variety of flex patterns throughout SCOTT's ski line, guaranteeing the best possible construction for its intended use.

SSCL

SANDWICH SIDEWALL CONSTRUCTION LAMINATE

FORGIVENESS & VERSATILITY
SSCL combines a laminate top and bottom sheet with a traditional sandwich sidewall construction. SCOTT optimized material usage to provide a construction that drastically reduces the weight of the ski. A specific braiding and different combination of laminates guarantee the best possible construction for their intended use.

+ SKIS: Pure, Venture, Scrapper, Punisher, Jib TW, Jib, Rebel, Rook, Mission Rental

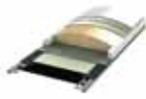

SSCL CARBON

SANDWICH SIDEWALL CONSTRUCTION LAMINATE CARBON

TECHNOLOGY & EXPERIENCE
SCOTT's newly developed SSCL Carbon is a result of the company's long-standing heritage as carbon experts, reaching new levels of lightweight performance. The combination of a sandwich Paulownia wood core construction with carbon laminates, results in a lightweight performance construction ideally suited for demanding ski touring endeavors.

+ SKIS: Xplor'Air, Crus'Air, Powd'Air

SSCL E

SANDWICH SIDEWALL CONSTRUCTION LAMINATE ELLIPTIC

SANDWICH SIDEWALL CONSTRUCTION LAMINATE LIGHT

FORGIVING & LIGHTWEIGHT
The SSCL Light is specifically designed for high performance, lightweight, women's skis. The 100% poplar wood core with 5 milled air channels combined with a top and bottom laminate results in a construction that offers minimal weight without sacrificing performance.

+ SKIS: Layla, Maya Rental

SSCL TRIAX

SANDWICH SIDEWALL CONSTRUCTION LAMINATE TRIAXIAL

STABILITY & PRECISION
The SSCL Triaxial provides torsional rigidity for wider skis. This technology creates exceptionally strong and stable skis.

+ SKIS: Crusade

SSCL P

SANDWICH SIDEWALL CONSTRUCTION LAMINATE PAULOWNIA

LIGHTNESS & EFFICIENCY
By combining a Paulownia wood core with new carbon stringer laminates, SCOTT created a super lightweight ski with a great flex and torsional rigidity.

+ SKIS: Fly'Air, Surf'Air, Rock'Air

SSC TIT

SANDWICH SIDEWALL CONSTRUCTION WITH DOUBLE TITANAL

PERFORMANCE & AGILITY
The classic sandwich sidewall is paired with a titanal top and bottom sheet, providing exceptional power and rebound. The semi-cap finish protects the top sheet, guaranteeing maximum durability.

+ SKIS: Reverse, Luna, Neo Rental, Aztec Rental

▲ | SAFETY AND PERFORMANCE

Blue

SCOTT BC 16 GUARDIAN B100

SIZE L (305-360MM) 224433
SIZE S (265-320MM) 224435

The SCOTT GUARDIAN BC 13 and 16 pairs the performance features of an alpine binding with lightweight materials and improved design, resulting in the most reliable touring binding on the market. An improved walking mechanism, lower ski boot positioning, and reliable release make the SCOTT GUARDIAN BC 13 and 16 one of the most advanced bindings on the market.

FEATURES

- + DIN: 7-16
- + Ski pole can be used to switch easily between hike & ride
- + Increases skiing performance achieved by using double freeflex construction
- + 90° pivot and flat nose design for optimal climbing capacity
- + Adjustable toe height
- + Stand height 26 mm

SCOTT BOOTS

SCOTT BOOTS COMBINE SUPERIOR FIT AND PERFORMANCE. SCOTT'S INNOVATIVE FIT IS ANATOMICALLY CORRECT, CLOSEFITTING AND RESPONSIVE, WITH ALL-DAY COMFORT. OUT OF THE BOX SCOTT BOOTS HAVE THAT "CUSTOM BOOTFITTER" FIT, BECAUSE THEY WERE DEVELOPED AROUND THE FOOT. LIGHTNING LATERAL RESPONSE WITH A SMOOTH, PROGRESSIVE FORWARD FLEX CHARACTERIZES THE FREESKI BOOT LINE.

POWERFRAME

RACE-BOOT PERFORMANCE WITH TOURING-BOOT COMFORT

The PowerFrame Boots redefined what is possible in freeskiing, offering race-boot performance, touring-boot comfort, with the versatility of interchangeable binding norms. The unique High Overlap shell design—the PowerFrame—cradles the foot and lower leg comfortably and closely for lightning-fast race-boot response. The overlap is a seamless part of the shell, with no tongues or riveted-on pieces that flex, create gaps, and dissipate energy. The overlap improves touring as well, rotating naturally out of the way when walking to allow more freedom of movement than any tongue design. The PowerFrame shell structure has superior lateral and torsional rigidity with a solid, progressive forward flex. Its “forma” is pre-punched to accurately follow the foot’s anatomy and accommodate the bunions and bone spurs so prevalent with skier’s feet. PowerFrame boots give real alpine-boot performance in a comfortable, walkable package.

- + The PowerFrame shell structure has superior lateral and torsional rigidity with a solid, progressive forward flex.
- + High overlap provides remarkable leverage with perfect power transfer
- + Maximum comfort with the highest precision

BOOTS: G1 FR 130, G2 FR 110 H/M, G2 FR 90 H/M, DELIRIUM, ASYLUM

POWERLITE

INSTANT COMFORT—EASY WALKING WITH POWERFUL SKIING PERFORMANCE

The ski mountaineer’s dream. SCOTT’s PowerLite 4-buckle and 3-buckle ski mountaineering boots make no compromise in skiing performance for their incredibly light weight. Ergonomic fit and easy to use, these boots don’t just ski well for how light they are, they flat-out ski incredibly well, period. The PowerLite Frame uses reinforcing ribs throughout the shell and cuff to give maximum rigidity while maintaining incredibly light weight.

- + Deliver precise, solid skiing performance with their superlight and stiff Grilamid® shell
- + Instant comfort with highly-refined EZ Fit PowerLite liner
- + These boots are made for walking with huge range of motion

BOOTS: COSMOS, CELESTE, ORBIT, NOVA

POWERWRAP

SCOTT’s PowerWrap overlap ski mountaineering boots have set a new standard in ski mountaineering boots. Their unique overlap more closely follows the anatomy of the foot and lower leg for crisp, precise downhill performance, while cradling it comfortably and securely for touring comfort. PowerWrap design eliminates the restrictive tongue to allow more independent movement between the cuff and lower shell. That means better walking, climbing, and skinning, with a progressive downhill flex. The High Overlap panel spreads contact evenly over the tibia for a progressive forward flex and the quickest, most responsive ski control. PowerWrap Ski Mountaineering shells’ fit has evolved for maximum comfort, including a roomier toe, wider forefoot, and narrower heel.

- + Unique overlap follows more closely the anatomy of the foot
- + More independent movement between the cuff and the lower shell
- + Comfortable, easy-walking, with incredible skiing performance

BOOTS: RADIUM, LUSTER, PHANTOM, SUMMIT, VODOO, MINERVA

EZ FIT LINERS

SCOTT'S ground-breaking EZ Fit liners are comfortable out of the box, and are 100% thermoformable for those who prefer more customization. The EZ Fit's unique construction requires only half the normal thermoforming time, ≤ 6 minutes at ≤ 120 °C, making the thermoforming process particularly quick and easy. SCOTT offers three liner models, each in Men's- and Women's-specific fit, using the innovative EZ Fit design:

- + The EZ Fit is fully lined to eliminate seams and hard spots
- + The highly-reinforced tongue uses SCOTT's T-Bar reinforcement for shin protection and power
- + The low-profile lace system offers the lacing option for mountaineering

EZ FIT: DELIRIUM, ASYLUM
 EZ FIT POWERLITE: COSMOS, CELESTE, ORBIT, NOVA
 EZ FIT RAPID: RADIUM, LUSTER, VOODOO, MINERVA

EZ FIT POWERLITE

ZETA PRO LINERS

Zeta Pro Liners, offered in the Freeski Performance boots (G1 FR 130, G2 FR 110 and G2 FR 90) were designed with innovative features that make them the most comfortable, highest-performance freeride liners available.

- + Attached Velcro spoiler to fit different leg shapes
- + Pebax - reinforced tongue to disperse pressure for shin comfort and power
- + A supple outer skin that conforms comfortably to the foot and maximizes the anatomic shape of the shells.

ZETA PRO 130: G1 FR 130
 ZETA PRO 110: G2 FR 110

PAD-LOCK LINERS

SCOTT Pad-Lock Liners, offered in specific PowerWrap and tongue-design for Freeski Touring boots (Phantom and Summit) and Telemark boots (Excursion and G-Rex Junior). This combination guarantees the best performance and comfort in a lightweight package.

- + The best EVA foams are used for warmth, support and comfort
- + The durable outer skin offers maximum abrasion resistance
- + Low-profile lacing system is positioned so that it doesn't inhibit circulation

PAD-LOCK MID: PHANTOM, SUMMIT
 PAD-LOCK EXCURSION: EXCURSION

SCOTT FREESKI BOOTS

COMBINING SUPERIOR FIT AND PERFORMANCE.

SCOTT'S INNOVATIVE FIT IS ANATOMICALLY CORRECT, CLOSEFITTING AND RESPONSIVE, WITH ALL-DAY COMFORT. OUT OF THE BOX SCOTT BOOTS HAVE THAT "CUSTOM BOOTFITTER" FIT, BECAUSE THEY WERE DEVELOPED AROUND THE FOOT. LIGHTNING LATERAL RESPONSE WITH A SMOOTH, PROGRESSIVE FORWARD FLEX CHARACTERIZES THE FREESKIING BOOT LINE.

FREERIDE TECHNOLOGY

QUICK-CHANGE SOLE SETS

For the most versatility, our Freeride boots have two Quick-Change sole sets that are compatible with all 3 binding norms. The Alpine Sole Set is compatible with the ISO Alpine Norm. The optional Touring Sole Set is compatible with the ISO Touring Norm (UNI) and the Tech Norm. They have a Vibram® outsole specially formulated for cold-weather grip and durability and for torsional support during hard edging. These soles can be changed in a flash, snapping securely into place, and fixed with only three hex bolts per boot. No other manufacturer has such easily-interchangeable soles.

EASY³ MAGNESIUM SKI/WALK MECHANISM

The Easy³ Magnesium Ski/Walk Mechanism has 3 forward lean positions that can be quickly and precisely adjusted with one hex bolt. Its asymmetric lever's ergonomic design makes it easy to open and close with gloves. Adjust the mechanism to your lean preference and, when skiing, you can click into the right position easily without searching for your choice.

MAGNESIUM FR BUCKLES

The Magnesium FR buckles are low-profile, light, and easy to operate with gloves. Their asymmetric design keeps a low-profile without sacrificing ease of use. Buckles are field-replaceable.

EZ LOCK CATCHES

First developed for the Radium, the EZ Lock buckle catches on the cuff keep the buckles in place when hiking.

SCOTT DELIRIUM FR 130+

TN* 232064
232065

This is the "ALL-IN ONE" of freeride boots. Powerful, progressively flexed, and potent. The last guarantees plenty of room in the forefoot, while offering a secure heel for solid edge control. The High Overlap transmits power directly to the medial mid-foot, exactly where you need it for precise ski control. Soles are quickly changed, snapped-in and secured with three bolts per boot.

MOUNTAINEERING BOOTS

BEST COMFORT AND TECHNICAL
PERFORMANCE - NEVER STOP EXPLORING

SCOTT MOUNTAINEERING BOOTS

SCOTT SKI MOUNTAINEERING BOOTS SATISFY EVERY SKI MOUNTAINEER'S PASSION FOR EXPLORATION. IT'S SCOTT'S REQUIREMENT THAT ALL BOOTS THROUGH OUT THE DIFFERENT CATEGORIES OF FREERIDE MOUNTAINEERING PERFORM ADMIRABLY IN ALL OF THE UNPREDICTABLE CONDITIONS ENCOUNTERED IN THE HIGH MOUNTAINS, REGARDLESS OF THE TOUR OR TERRAIN, UPHILL OR DOWNHILL.

MOUNTAINEERING TECHNOLOGY

MAGNESIUM AND ERGAL MICRO-ADJUSTABLE BUCKLES

The Magnesium and Ergal Buckles provide the best weight to durability ratio, and use SCOTT's Wide Open design that maximizes the boot opening, making it easy to slip in and out of the boots.

ADJUSTABLE FORWARD LEAN

SCOTT Adjustable Forward Lean on the 4-buckle models allows the skier to customize the forward lean with two easily-adjustable positions. Once adjusted, one flip of the lever changes modes from walk to ski without searching for the right position.

FULL-LENGTH VIBRAM® BI-DENSITY RUBBER

Ski mountaineering sole covers the instep area for maximum grip when scrambling over rocks. Bi-density composition uses black, firmer rubber around the sole's perimeter for durability and for superior edging power in step-in bindings. Softer red rubber in the sole's midsection provides maximum grip.

EZ OPEN BUCKLE STRAPS

These buckle straps are very easy to manage, hinging out of the way for quick, easy, wide-open entry and exit.

SCOTT COSMOS

232068

SCOTT's Cosmos is a 4-buckle boot that achieves harmony between the two key needs of the ski mountaineer: very light weight and confident 4-buckle performance. The Cosmos brings lightweight touring performance to new levels.

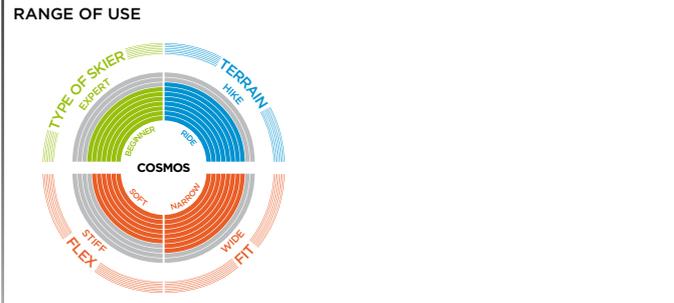

White/Black

USER PROFILE:	LIGHTWEIGHT PERFORMANCE
TECHNOLOGY:	POWERLITE

SIZES: 23-27.5

SCOTT VOODOO

232077
NTN® 232295

SCOTT's beefiest Men's Telemark model, the Voodoo's unprecedented lateral stiffness works in harmony with a smooth, progressive forward flex. Telemark or alpine turn to your heart's content, these boots rip. The key is in SCOTT's multiple injections: four different injections that laterally reinforce the lower shell like an alpine boot, while working in unison with perfectly-placed flex zones for the proper telemark flex. The Voodoo is offered in two different versions: 75 mm and NTN norm.

Red/Night blue

USER PROFILE: TELEMARK PERFORMANCE

TECHNOLOGY: POWERWRAP
LAST WIDTH: 100 mm
FLEX INDEX: 130 TM
SHELL: Pebax®
FORWARD LEAN: 13° + free walking
CUFF ROTATION: 46°
LINER: EZ Fit Rapid
CLOSURE: 3 Wide Open Buckles + Power Strap, Adjustable Spoiler
WEIGHT: 1820 g (size 27.5)
SYSTEM: 75MM, NTN

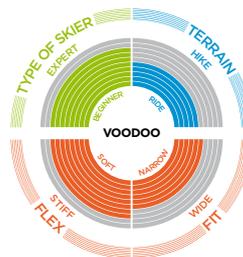

FEATURES

- + High Overlap Panel
- + Four Different Injections
- + Asymmetric Ergo Bellows Design
- + Velcro® Power Strap
- + Wide-Open Buckles and EZ Lock Catches
- + Adjustable Spoiler

SIZES: 25-30.5

RANGE OF USE

WINTER 2013/2014

HARDCOODS | BOOTS

SCOTT MINERVA

232078
NTN® 232296

The Minerva is SCOTT's burliest women's freeride telemark design. The Minerva's unprecedented lateral stiffness works in harmony with a smooth, progressive forward flex. The Minerva is offered in two different versions: 75 mm and NTN norm.

White/Pearl blue

USER PROFILE: WOMEN'S TELEMARK PERFORMANCE

TECHNOLOGY: POWERWRAP
LAST WIDTH: 100 mm
FLEX INDEX: 120 TM
SHELL: Pebax®
FORWARD LEAN: 13° + free walking

- + Velcro® Power Strap
- + Wide-Open Buckles and EZ Lock Catches
- + Women's Fit

SIZES: 22-27.5

RANGE OF USE

SCOTT EXCURSION

232079

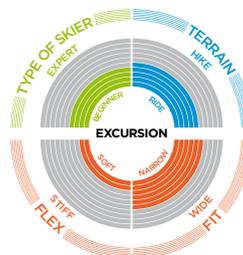

The Excursion brings the benefits of plastic to the backcountry. It defines the backcountry category with its warmth, light weight, and secure ski control. The Excursion has evolved with a stiffer tongue for skiing performance, and more bellows protection for touring compatibility with today's new generation of lightweight, edged touring skis.

USER PROFILE:	TELEMARK BACKCOUNTRY
SHELL:	Pebax®
LINER:	Pad-Lock Women's, Pad-Lock Men's
CLOSURE:	2 Buckles + Power Strap
WEIGHT:	Women's 1090 g (size 24.5), Men's 1400 g (size 27.5)
SYSTEM:	75 mm

FEATURES
+ Asymmetric Ergo Bellows Design
+ Velcro® Power Strap
+ Wide-Open Buckles and EZ Lock Catches

SIZES: Women's 23-26, Men's 26-30.5

SCOTT'S PATENTED SHOCK DAMPER SHELL

The Shock Damper Shell has flex ribs in the instep that provide a subtle longitudinal flex that allow it to absorb shock and vibration, resulting in better ski flex and edge hold, with less vibration and chatter.

UNIQUE HIGH PROFILE SHELL

The Unique High Profile Shell acts as a double cuff that ties the lower shell and cuff together as one. This high-profile shape improves forward response and offers unprecedented rearward support.

HIGH PROFILE CUFF RIVETING

Maximizes the shell's High Profile shape by securing the cuff and shell together as one solid, responsive structure.

CONTOUR CUFF

The Contour Cuff is shaped to follow the form of the inner leg to increase contact and eliminate play between the leg and cuff. The result is the quickest response possible with the most leverage and support.

RUBBER SNOW DAM

Prevents snow from entering lower shell.

BUCKLE SAVERS

Provide solid protection for lower shell Buckles.

FIELD REPLACEABLE BUCKLES

And catches, cuff rivets, and Power Straps are all attached with T-nuts.

ADJUSTABLE SPOILER

Men's models have an adjustable spoiler for optimum lower-leg fit and additional forward lean adjustment.

MULTI-INJECTED CONSTRUCTION

SCOTT Multi-injected Construction using Selected Technical Polymers (both PU and Pebax*) provide the most damp, solid, "alpine boot" feel. The multi-injected insert inside each shell allows us to isolate the most sensitive areas of the foot so that we can most accurately follow the foot's anatomy, and accommodate the bunions and bone spurs so prevalent with skiers' feet. The insert is a stiffer "pod" that surrounds the foot to provide incredible lateral leverage without inhibiting the shell's forward flex. Freeride cuffs are multi-injected with a very stiff frame for maximum lateral and rearward support, while the softer overlap wraps the leg more closely for instant response.

WATER DAM AND WATER SEAL

The gasket works together to seal out snow and keep your feet dry. Two separately injected, softer PU components work together in different planes to better conform to the shell's opening and provide the best seal.

WOMEN'S FIT

All Women's Ski Boots feature women's specific shapes. SCOTT women's boots are designed to be light and comfortable while meeting the levels of performance.

SHOCK DAMPER INSERTS

The Shock Damper Inserts are expanded PU inserts in the shell's inner sole that act as a shock absorber when skiing, adding insulation, comfort, and increased ski feel.

HIGH OVERLAP'S FLEX INSERT

The High Overlap's Flex Insert is a separate injection that allows it to move with you for easy walking. This multi-injected flex insert is tuned specifically for different models' intended use and performance. With no tongue that must be flexed backwards with each step, the lower shell and cuff can operate more independently for improved walking freedom and comfort.

EASY ENTRY

The high, supportive High Overlap provides a "handle" that can be spread for very easy entry.

SOFT WATER SEAL GASKET

The gasket between the shell's overlap seals out snow and moisture. An additional rubber dam has been added behind the overlap for an even tighter seal.

MULTI-INJECTED "BUMPER"

Protect the buckles and lower shell.

RAPID OUTSOLE

For maximum grip with the proper contact area as determined by the ISO norm for the best step-in binding function. The sole has self-cleaning lugs. Its unique rubber compound is grippy yet highly durable, with the maximum toe thickness allowed within the ISO Norm for longevity. It extends under the instep for protection and grip when rock scrambling.

WIDE-OPEN BUCKLES AND EZ LOCK CATCHES

Works flawlessly for easier, unrestricted touring. The Wide-Open levers are designed with an off-center pivot that opens as wide as possible while they are held securely by the EZ Lock buckle catches.

VELCRO® POWER STRAP

The Velcro® Power Strap is wide for a secure closure and broad, powerful pressure distribution. It wraps securely around the outside of the cuff to bring the cuff as close as possible to the lower leg.

HIGH OVERLAP PANEL

The High Overlap Panel provides close, gap-free contact with the lower leg and instep, better-distributing shin pressure for comfort and instant response.

FOUR DIFFERENT INJECTIONS

Fine-Tune the lower shell for comfort and performance. The Voodoo and Minerva have a high, double-injected cuff that wraps closely around the leg for quick response with support from the super-stiff rear frame.

ASYMMETRIC ERGO BELLOWS DESIGN

It is wider for more travel, and for a progressive forward flex. It extends rearward for the foot contact that results in better rear ski control. The Ergo Bellows has a separate, stiffer Power Rib injected at the crest of the bellows for abrasion resistance and the most consistent flex.

SCOTT NTN POWERWRAP

SCOTT unique PowerWrap overlap construction works better than an instep buckle to close securely around the foot and allows the ankle and bellows to flex freely. Its high overlap stays in close contact with the lower leg for the quickest response and leverage with no tongue-gap and subsequent lag time. SCOTT's are the only NTN boots with a replaceable "second heel", the under-foot interface with the NTN binding. It boasts our Ergo Bellows design for the smoothest, most ergonomic forward flex. SCOTT NTN boots are offered with the EZ Fit Rapid liner that is comfortable out of the box, as well as 100% thermoformable for those who choose a more customized fit.

BOOT MECHANICS

ADJUSTABLE FORWARD LEAN

SCOTT Adjustable Forward Lean on the 4-buckle models allows the skier to customize the forward lean with two easily-adjustable positions. Once adjusted, one flip of the lever changes modes from walk to ski without searching for the right position.

EZ LOCK CATCHES

First developed for the Radium, the EZ Lock buckle catches on the cuff keep the buckles in place when hiking.

SCOTT TECH INSERTS

The SCOTT Tech Insert significantly improves upon the current industry standard for durability and quality control. These SCOTT Tech Inserts have reinforcement ribs for additional tensile strength, with oval holes that pass more plastic during the injection process for maximum strength. The retention cones have been designed for friction-free rotation when walking, while allowing maximum binding retention in ski mode.

SCOTT POLES

1958 MARKED THE BIRTH OF SCOTT AND THE REVOLUTION OF SKI POLES. WITH ED SCOTT'S INVENTION OF THE FIRST TAPERED ALUMINUM SHAFT, FOREVER CHANGING THE WAY WE TURN. SCOTT IS PROUD OF THIS HERITAGE AND CONTINUES TO INNOVATE AND DEVELOP THE BEST POLES IN THE MARKET. IN 2013, WITH THE HELP OF SCOTT ATHLETES TOM WAL-LISCH, DANE TUDOR, SEB MICHAUD AND PHIL MEIER, SCOTT IS PROUD TO INTRODUCE AN OUTSTANDING COLLECTION, DEVELOPED AND INSPIRED BY THE WORLD'S BEST ATHLETES.

SCOTT ZEO 18

230754

Design meets Technology. The ZEO 18 is lightweight, strong and has an improved feel and light swing weight.

- + 16-13 mm Shaft Diameter
- + Rubber Grip
- + Adjustable Comfort Strap
- + Snag-Proof Trek, Winter Basket
- + Duraflex Steel Tip

SIZES:

- One size (75-130 cm)

Yellow

PRECISION CONSTRUCTION PROCESSES

ELECTRO-STATIC PAINT PROCESS

SCOTT aluminum ski poles undergo an electro-static paint process, delivering a clean, contemporary, highly durable finish.

FILAMENT-WOUND ENGINEERING PROCESS

SCOTT composite poles undergo an automated filament-winding process whereby the shafts are machine-spun, producing an extremely consistent product.

SWAGED SHAFTS

SCOTT aluminum ski pole shafts are engineered with an exclusive "swage", giving the pole a dual-taper design. Swaging is a process that utilizes a series of dies to reduce the outside diameter (creating the taper) and increase the wall thickness (adding strength). The taper results in an improved aerodynamic profile, lighter swing weight, and increased strength.

ENGINEERED SHAFT MATERIALS

CARBON FIBER

Carbon fiber, with its minimal weight and significant strength, is an ideal material for ski pole shafts. Carbon fiber reduces vibration and absorbs shock while improving feel and swing weight.

CARBON MATRIX

Carbon matrix ski poles maintain all the positive attributes of carbon fiber while integrating fiberglass to create a carbon matrix that is both light-weight and strong.

S4 ALUMINUM

Constructed with the strongest commercially available, aircraft-grade aluminum alloy, S4 aluminum poles are twice as strong as the industry standard, rated to 75,000 PSI.

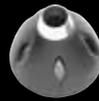

S3 ALUMINUM

S3 aluminum shafts are computer engineered and manufactured with high-grade aluminum that is rated to 65,000 PSI.

S2 ALUMINUM

S2 aluminum shafts utilize the same technical swaging and design features found in the s4 and s3 series and are rated to 45,000 PSI.

AERODYNAMICALLY ENGINEERED POLE BASKETS

DH CONE

The DH cone was engineered and developed in a wind tunnel using computer-aided design. The optimal integration of ultra-lightweight engineering and flowing aerodynamic lines, the DH cone is intended to be no more than a shadow on the end of your ski pole.

RACE BASKET

The race basket is designed to minimize drag and wind resistance when racing. This basket is featured on our slalom race poles.

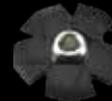

POWDER BASKET

The powder basket is designed for powder performance, excelling in traversing situations. The basket is a solid 90 mm in diameter and has strategic holes to maintain a swing weight that is comfortable for everyday use. Available In Two Colors: White And Black.

DEEP POW BASKET

Designed for bottomless pow, The deep pow basket uses a 9 cm disk provides extra flotation preventing the pole from sinking any deeper than needed.

3.6 DISC BASKET

The 3.6 Disc Basket blends aerodynamic efficiency, durability and design. The 3.6 disc basket is 60 mm in diameter. Available in two colors: White and black.

3.8 DISC BASKET

The 3.8 Disc Basket is identical to the 3.6, but with a 80mm in diameter for better performance in powder. Available in two colors: White and black.

TÜV BASKET

The TÜV basket is a high-performance, aerodynamic basket and is found on the JR/Kid 540 poles and aluminum rental poles.

SNAG-PROOF TREKKING BASKET

This unique Life-Link design slides through brush and boulders without getting snagged. It also grips on steep slopes and protects the flex tip.

WINTER BASKET

The quick release ferrules mounted on all the Life-Link poles allow baskets to be easily removed and interchanged.

ENGINEERED POLE TIPS

CARBON DIAMOND TIP

Carbon Diamond Tip is a compound containing equal parts of tungsten and carbon and is approximately three times stiffer than steel. This high performance tip enhances traction on ice and guarantees better durability.

RACING TIP

The Racing Tip is engineered specifically for racing.

ICE TIP

The Ice Tip is diamond shaped for unbeatable hold in extreme conditions.

CONE TIP

The Cone Tip is manufactured from hardened steel and designed for strength and durability.

ANODIZED TIP ADAPTER WITH ICE TIP

The Anodized Tip Adapter is designed to strengthen the tip of composite poles and is manufactured from aluminum alloy and pairs with the ice tip.

PA ADAPTER WITH AXE TIP

The Pa Adapter is designed to strengthen the tip section of composite poles and is manufactured from polyamide, with an axe tip. Available in two SIZES: 11 mm and 9 mm.

DURAFLEX CARBIDE TIP

The Duraflex Carbide Tip offers greater flexibility and reduces stress on pole tip.

EC-1 GRIP

SCOTT's EC-1 Grip perfectly integrates grip and strap to provide an ergonomically correct fit for both hands, a combination of injected plastics makes this grip extremely comfortable and easy to hold.

NOTCH STRIKE GRIP

The Notch Strike Grip has been anatomically engineered using soft thermoplastic rubber and polypropylene. The lightweight, streamlined profile facilitates the wrist articulation necessary.

P-CORE GRIP

The P-Core Grip features injection-molded, soft thermoplastic rubber, significantly increasing your grip on the pole.

P-LITE GRIP

The P-Lite Grip is engineered to blend ergonomic comfort with durability.

JUNIOR NOTCH GRIP

The Junior Notch Grip is our Notch Strike Grip for smaller hands.

JUNIOR JOYSTICK GRIP

Put down your video games, grab onto the Joystick grip and go skiing. SCOTT's anatomically engineered Joystick Grip is the answer for smaller hands.

EG-GRIP

The EG-Grip is designed for going bigger and wider. The low profile makes this grip extremely comfortable and easy to hold.

SHOCK-ABSORBING FOAM GRIP

The ergonomically Shock-Absorbing Foam Grip features additional padding for multi-season use with bare hands.

RUBBER GRIP

The Rubber Grip is ergonomically designed with a six-degree corrective angle for best comfort.

LITE STRAP

The Lite Strap is lightweight and anatomic, providing minimal interference. The Lite Strap and EC-1 GRIP, was developed in coordination with our athletes to ensure function and comfort, while maintaining a sleek and elegant style.

LITE EC-1 STRAP

The Lite EC-1 straps are built with the same high performance PU Kevlar material as the Lite strap. The ergonomically engineered left and right straps guarantee the best comfort and performance.

STRIKE RC

Strike RC straps are ergonomically engineered right and left grips. They also feature a neoprene platform for increased hand support and a Velcro fastener for easy adjustment. Strike RC straps are found on the racing series poles.

RE-ENTRY STRAP

SCOTT's Re-entry Strap System features fast and easy adjustment buckle system. The Re-entry strap is found in combination with the P-Core Grip on selected S3 poles.

COMFORT STRAP

The Comfort Strap incorporates a molded rubber platform for your hand, coupled with a woven nylon strap, ensuring a comfortable grip.

FX 15X32 STRAP MALE

The FX 15X32 straps are designed with a 32 mm wide strap on the back of the hand for additional support and comfort. The injection-molded nylon buckle that exceeds 800 psi tensile strength

FX 15X32 STRAP FEMALE

The FX 15X32 straps are designed with a 32 mm wide strap on the back of the hand for additional support and comfort. This female version is available in two colors: black and light grey.

FX 15X32 MJ STRAP

The FX 15X32 straps are designed with a 32 mm wide strap on the back of the hand for additional support and comfort. The stitched patch gives the strap a unique design. Available in white and black.

FX 15X25 STRAP / FX15X25 ICON STRAP

The FX 15X25 straps are feature an increased strap width on the back of the hand for additional support. the injection-molded nylon buckle exceeds a tensile strength of 800 psi. The FX 15X25 Icon is found on the 720.

FX 24 STRAP

The FX 24 strap is a parallel strap. It features an over-molded buckle and is slightly slimmer than the FX 15X25 strap.

JUNIOR ADJUSTABLE STRAP

The length and shape of the JR Adjustable strap is engineered to fit children's hands.

EG-STRAP

The EG-Straps are built with the same high performance PU Kevlar material as the Lite strap. The ergonomically engineered left and right straps guarantee the best comfort and performance.

BREAKAWAY STRAP

The Breakaway Strap is dedicated for mountaineering and features a fast and easy adjustment buckle system.

ADJUSTABLE COMFORT STRAP

The Adjustable Comfort Strap guarantees with the neoprene padding best wearing comfort.

SCOTT GOGGLES

| CLARITY, PERFORMANCE AND COMFORT

SCOTT KNOWS OPTICS. CLEAR, UNDISTORTED VISION IS PARAMOUNT TO ENJOYING YOUR TIME IN THE MOUNTAINS. THANKS TO SCOTT PRECISION OPTICS, THE HIGHEST QUALITY STANDARD IN THE INDUSTRY, OPTICAL PERFORMANCE IS ACHIEVED AND MAINTAINED THROUGHOUT SCOTT'S LINE OF WINTER GOGGLES. WITH A NEW LENS CHANGE GOGGLE (LCG) FEATURING THE PATENT PENDING LENS CHANGE SLIDER AND FIT SYSTEM, SCOTT GOGGLES HAVE ONCE AGAIN RAISED THE BAR FOR COMFORT AND PERFORMANCE.

SCOTT LCG

SCOTT'S PATENT PENDING LENS CHANGE SLIDER SYSTEM OFFERS QUICK AND EFFORTLESS LENS INTERCHANGEABILITY. THE MECHANICAL SLIDER ON THE SIDE OF THE GOGGLE RAISES THE LENS OFF THE FRAME, MEANING THE LENS CAN EASILY BE CHANGED WITHOUT HAVING TO TOUCH THE SURFACE OF THE LENS OR TAKE OFF YOUR GLOVES.

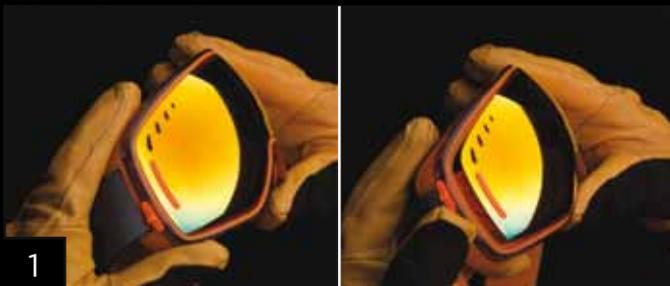

SEE IT IN MOTION

INCLUDES EXTRA LENS AND LOW-PROFILE MOLDED LENS CASE

STEP BY STEP

LENS REMOVAL

1

1. TO START, HOLD THE GOGGLE ON THE OUTSIDE OF THE FRAME AND SLIDE THE SCOTT LENS CHANGE SLIDER ALL THE WAY UP TO EJECT THE LENS.

2

2. NEXT, TO DISENGAGE THE LENS, GRASP THE OUTER RIM OF THE LENS AND RELEASE THE TWO HOOKS FROM THE SLIDER DOCK.

LENS INSTALLATION

3

3. INSERT THE SINGLE LENS HOOK INTO THE SLOT ON THE RIGHT HAND SIDE OF THE GOGGLE. THEN ATTACH THE OPPOSITE SIDE OF THE LENS TO THE 2 LENS HOOKS LOCATED ON THE SLIDER DOCK.

4

4. WITHOUT PINCHING THE NOSE AREA, SLIDE THE LEVER OF THE SCOTT LENS CHANGE SLIDER SYSTEM ALL THE WAY DOWN MAKING SURE IT CLICKS INTO THE LOCKED POSITION AND THE RED DOT IS FULLY COVERED.

SCOTT LCG

230806

Welcome to the new standard of versatility. SCOTT is proud to introduce the new Lens Change Goggle (LCG) featuring SCOTT's Lens Change Slider system. SCOTT's engineers were determined to redefine the interchangeable lens game by developing a product that is simple, reliable, and enables the user to quickly change lenses without having to touch the surface of the lens. Thanks to the new LCG goggle and its portable low-profile molded lens case, you can now quickly and confidently adapt to the changing light conditions on the hill.

SCOTT JUNIOR VOLTAGE OTG

224172

Don't let glasses slow-down your budding ripper. The JR Voltage OTG is specially designed for kids' faces with glasses. Now you just have to worry about keeping up with the little guy!

FIT:Optimized for prescription glasses

FEATURES

- + Single-Layer Face Foam
- + PNS strap clip with PU strap extender for perfect helmet fit
- + Revolutionary Air Management (RAM) for active frame venting
- + No-Slip silicone strap

LENS FEATURES

- + SCOTT TruView Double Lens
- + No Fog™ Anti-Fog Lens Treatment
- + ACS Air Control System for active lens venting

SCOTT TECHNOLOGIES

FACE FOAMS

SINGLE-LAYER FACE FOAM
Soft, single density face foam delivers a precise fit around facial features while sealing out the elements.

2-LAYER MOLDED FACE FOAM
Deluxe, 2-layer open celled face foam has excellent moisture absorbing, and thermal properties, guaranteeing that you stay warm, dry, and comfortable all day.

3-LAYER MOLDED FACE FOAM
Scott's premium face foam integrates 3 layers of ultra plush, molded foam. The first two layers provide moisture wicking properties to keep you warm and dry. The 3rd layer is a plush flock material that seals out the elements providing an unmatched fit and the highest level of comfort.

FIT SYSTEM

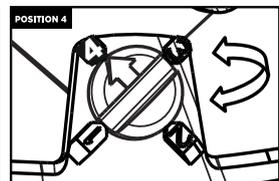

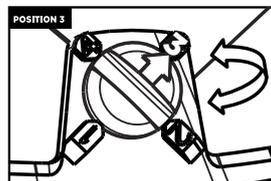

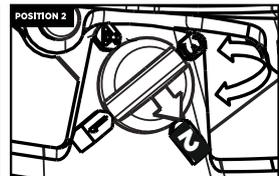

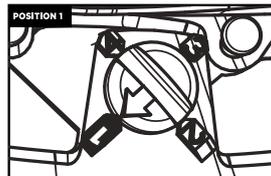

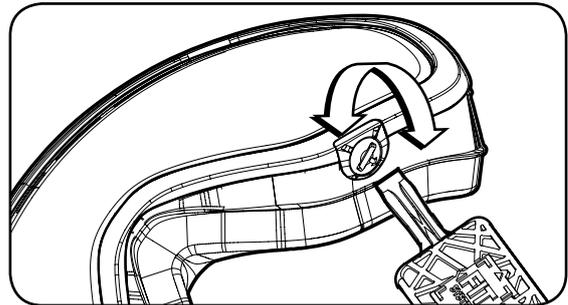

THE PATENT PENDING SCOTT FIT SYSTEM IS A ONE TIME MECHANICAL ADJUSTMENT THAT CREATES A CUSTOM FACE AND NOSE FIT. TWO PIVOT POINTS LOCATED AT THE BOTTOM OF EACH SIDE OF THE GOGGLE CAN BE ADJUSTED IN FOUR POSITIONS ALLOWING THE GOGGLE TO FIT TIGHTLY AGAINST THE RIDER'S FACE.

WITH MULTIPLE FIT OPTIONS AND UNBEATABLE PERFORMANCE, THE FIT SYSTEM EQUIPPED GOGGLES HAIL A NEW GENERATION OF SCOTT GOGGLES. **FEATURED ON LCG, OFF-GRID, NAV-R-2, AVIE AND NOTICE OTG.**

FIT SYSTEM

WATCH HOW IT WORKS ON THE OFF-GRID GOGGLE

SCOTT PRECISION OPTICS

SCOTT PRECISION OPTICS IS A QUALITY LABEL WHICH STANDS FOR PREMIUM MATERIALS AND INNOVATIVE MANUFACTURING TECHNIQUES. THIS UNIQUE COMBINATION ENABLES US TO OFFER DISTORTION FREE, UV PROTECTED, HIGH PERFORMANCE LENSES OF THE BEST QUALITY.

LENS TECHNOLOGY

100% UV PROTECTION

All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

NO FOG™ ANTI-FOG LENS TREATMENT

SCOTT lenses undergo a permanent No Fog™ treatment process to prevent condensation and fogging.

AIR CONTROL SYSTEM (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

SCOTT OPTIVIEW

These European manufactured lenses are made of **polycarbonate** ensuring comfort and high impact resistance. Scott's proprietary **injection molding process** and hard coat treatment guarantees that every OptiView lens is **optically correct** and distortion free. Scott OptiView lenses are available as **spherical** or **cylindrical**.

Spherical Scott OptiView Double Lens

Cylindrical Scott OptiView Double Lens

SCOTT TRUVIEW

These European manufactured lenses are made of **extruded and thermoformed sheets** of selected **celluloses** (CA/CP/PC). TruView lenses pass Scott's strict testing procedures delivering **high quality, performance** lenses. Scott TruView lenses are available as **cylindrical double** or **single lens**.

Scott TruView Double Lens

Scott TruView Single Lens

ILLUMINATOR

EXCEPTIONAL CONTRAST IN FLAT LIGHT AND LOW LIGHT CONDITIONS

The illuminator lens is designed to perform in low and flat light conditions. Illuminator lens construction consists of; SCOTT's patented amplifier lens technology, yellow tint to improve depth perception and a chrome finish helping to minimize glare. This combination provides clarity, enhances definition and improves depth perception. The 50% light transmission guarantees a bright view on stormy days.

LIGHT SENSITIVE

ONE LENS FOR ALL LEVELS OF LIGHT

SCOTT Light Sensitive lenses engage photochromic technology and adapt automatically to sunlight intensity. Light Sensitive lenses react to light changes; within seconds the lens will darken if the sunlight gets stronger or lighten if the sunlight gets weaker.

NATURAL LIGHT

ENHANCED CLARITY AND CONTRAST WITHOUT COLOR DISTORTION

With Natural Light lenses, SCOTT has achieved neutral lenses that portray true color while significantly enhancing clarity and contrast. The result is a clear view of your environment. SCOTT Natural lenses also eliminate "eye shock." Your eyes will be more relaxed as they are not forced to adjust to dominant colors found in traditional lenses.

AMPLIFIER

MULTI-PURPOSE LENS FOR GUARANTEED DEFINITION AND CONTRAST PERCEPTION

SCOTT Patented Amplifier Lenses redefine how lenses cut through light and glare to deliver unprecedented levels of terrain definition in all light conditions. The secret to Amplifier technology is its ability to add contrast while increasing clarity and definition.

SOLAR BLOCKER

SUPERIOR EYE PROTECTION AGAINST INTENSE SUNLIGHT

Scott Solar Blocker lenses are designed specifically to block high-energy visible light and are for use on the brightest of days. Solar Blocker lenses enhance clarity and contrast by reducing the dazzling effect of the sunlight and eliminating the blur caused by unfocused blue light.

FRAME FEATURES

SCOTT FIT SYSTEM

The patented SCOTT fit system is a mechanical adjustment located at the bottom of each side of the goggle allowing you to choose between four positions providing a customized face and nose fit.

HELMET COMPATIBILITY

SCOTT goggles are engineered to engage flawlessly with a variety of helmets.

OVER THE GLASSES (OTG)

OTG goggles offer protection from the elements and an optimized fit for people requiring prescription glasses.

REVOLUTIONARY AIR MANAGEMENT SYSTEM (RAM)

Ram is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.

LENS CHANGE SYSTEM (LCG)

SCOTT's patent pending lens change slider system offers quick and effortless lens interchangeability. The mechanical slider on the side of the goggle raises the lens off the frame, meaning the lens can easily be change without having to touch the surface of the lens or take off your gloves.

SILICONE STRAP

An adhered silicone strip on the inside of the goggle strap ensures the goggles stay right where they should on a helmet or hat.

SCOTT LENS MATRIX

SUNNY TO MEDIUM LIGHT DAYS

NATURAL LIGHT

NL-15 BLACK CHROME
LIGHT TRANSMISSION: 15%

NL-15 Black Chrome delivers proper contrast and a glare-cutting chrome coating for sunlight conditions and performs in all levels of medium to bright light.

NL-20 GOLD CHROME
LIGHT TRANSMISSION: 20%

NL-20 Gold Chrome excels on sunny to medium light days.

NL-32 BLACK CHROME
LIGHT TRANSMISSION: 32%

Whether it is a sunny morning or a cloudy afternoon, the NL-32 Black Chrome lens is the choice for everyday optical perfection with a glare cutting chrome coating.

NL-40
LIGHT TRANSMISSION: 40%

NL-40 performs in a variety of light conditions. The exceptional contrast detail allows the NL-40 to excel on overcast and flat light days.

AMPLIFIER

PURPLE CHROME
BASE COLOR: LIGHT AMPLIFIER
LIGHT TRANSMISSION: 20%

Purple Chrome is a solid choice for variable days and works great in a variety of light conditions.

YELLOW CHROME
BASE COLOR: LIGHT AMPLIFIER
LIGHT TRANSMISSION: 20%

Yellow Chrome is a solid choice for variable days and works great in a variety of light conditions.

TEAL CHROME
LIGHT TRANSMISSION: 25%

Teal chrome is an ideal choice for variable days and works great in a variety of light conditions.

GREEN CHROME
BASE COLOR: LIGHT AMPLIFIER
LIGHT TRANSMISSION: 30%

Green Chrome is a solid choice for variable days and works great in a variety of light conditions.

BLUE CHROME
BASE COLOR: SKY BLUE
LIGHT TRANSMISSION: 30%

Blue Chrome is great for days when the weather keeps changing.

MEDIUM TO LOW LIGHT DAYS

AMPLIFIER

SILVER CHROME
BASE COLOR: LIGHT AMPLIFIER
LIGHT TRANSMISSION: 20%

Silver Chrome is a great option for sunny to medium light days.

AMPLIFIER
LIGHT TRANSMISSION: 32%

The patented Amplifier lens is capable of deciphering exceptional detail in low light conditions while adapting perfectly for use on sunny days.

LIGHT AMPLIFIER
LIGHT TRANSMISSION: 45%

Light Amplifier delivers proper contrast and correct light transmission for flat light and storm days.

RED CHROME
BASE COLOR: LIGHT AMPLIFIER
LIGHT TRANSMISSION: 44%

When it's dumping or overcast but you want a chrome lens, Red Chrome is the answer.

ILLUMINATOR

ILLUMINATOR
BASE COLOR: SUPER LIGHT AMP
LIGHT TRANSMISSION: 50%

The Illuminator lens has one purpose, to dominate on extreme low light and flat days. It achieves this goal by delivering the highest possible contrast along with a chrome coating.

EXTREME LIGHT CONDITIONS

SOLAR BLOCKER

SOLAR 4
LIGHT TRANSMISSION: 5%

The Solar 4 lens is the darkest Scott lens available and the answer for extreme sun situations.

SOLAR 3
LIGHT TRANSMISSION: 12%

The purpose of the Solar 3 lens is to enhance your visual comfort on bright days.

SUNNY TO LOW LIGHT DAYS

LIGHT SENSITIVE
LIGHT SENSITIVE AMP BRONZE CHROME
LIGHT TRANSMISSION: 15%-45%

Light transmission adjusts automatically with Light Sensitive lenses. This allows the lens to cut glare, provide definition and enhance clarity in all light conditions.

SCOTT PRECISION OPTICS

SCOTT PRECISION OPTICS IS A QUALITY LABEL WHICH STANDS FOR PREMIUM MATERIALS AND INNOVATIVE MANUFACTURING TECHNIQUES. THIS UNIQUE COMBINATION ENABLES US TO OFFER DISTORTION FREE, UV PROTECTED, HIGH PERFORMANCE LENSES OF THE BEST QUALITY.

LENS TECHNOLOGY

LIGHT SENSITIVE

ONE LENS FOR ALL LEVELS OF LIGHT

SCOTT Light Sensitive lenses engage photochromic technology and adapt automatically to sunlight intensity. Within seconds Light Sensitive lenses will darken if the sunlight gets stronger or lighten if the sunlight gets weaker.

POLARIZED

NO DAZZLING REFLECTIONS FOR OPTICAL PERFECTION

SCOTT Polarized lenses are designed to diminish dazzling reflections caused by reflected light off of flat surfaces such as snow and water. Polarization separates useful light from the glaring light that distorts color, but also guarantees depth perception and improves vision. This delivers a lens with proper clarity and contrast, achieving optical perfection.

SOLAR BLOCKER

SUPERIOR EYE PROTECTION AGAINST INTENSE SUNLIGHT

SCOTT Solar Blocker lenses are designed specifically to block high-energy visible light and are for use on the brightest of days. Solar Blocker lenses enhance clarity and contrast by reducing the dazzling effect of the sunlight and eliminating the blur caused by unfocused blue light.

NATURAL LIGHT

ENHANCED CLARITY AND CONTRAST WITHOUT COLOR DISTORTION

With Natural Light lenses, SCOTT has achieved neutral lenses that portray true color while significantly enhancing clarity and contrast. The result is a clear view of your environment. SCOTT Natural lenses also eliminate "eye shock." Your eyes will be more relaxed as they are not forced to adjust to dominant colors found in traditional lenses.

SCOTT Optiview lenses are manufactured in Europe and adhere to the strictest testing standards. SCOTT's proprietary injection molding process and hard coat treatment to guarantee that every lens is optically correct, durable, lightweight, and resistant to impact.

SCOTT glass sets the standard for optical performance. SCOTT utilizes premium Italian glass and adheres to the most stringent manufacturing and testing standards to deliver the finest glass lenses on the market. All SCOTT glass are produced exclusively for SCOTT, are shatter and scratch resistant and guarantee optically correct lenses.

100% UV PROTECTION

All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

OVERCAST

CAT 1
Lenses suitable for partially cloudy to snowy conditions.

MEDIUM LIGHT

CAT 2
Lenses suitable for medium light or partially cloudy.

SUNNY

CAT 3
Lenses suitable for sunny or bright days.

CLOUDY/SUNNY

CAT 1-2 / 1-3 / 2-3
Photochromic lenses suitable for both cloudy and sunny conditions, automatically adapting to sunlight intensity.

EXTREME LIGHT CONDITIONS

CAT 4
Lenses suitable for extremely sunny or bright days.

FRAME FEATURES

FUSION FRAME

The Fusion Frame construction integrates virtually indestructible, lightweight, abrasion resistant materials that are exceptionally flexible and extremely comfortable. Fusion Frame is an exclusive feature of all SCOTT Sport sunglasses.

THERMAL FRAME

Thermal Frames are specifically engineered to deliver sunglasses with a distinct personality and a unique combination of durability and style. The Thermal Frame construction is used exclusively in SCOTT Sport Fashion sunglasses.

EASY CHANGE LENS SYSTEM

Gone are the days of struggling to change your lenses, SCOTT's new Easy Change Lens System makes lens changing easy. Simply push the grey button located on the inside of the frame above the nose piece and gently remove the lens or lenses. Place the new lens in, press the button back into place and you're good to go. It's that simple.

SCOTT HELMETS

FOR OVER TWO DECADES, SCOTT'S ENGINEERS HAVE BEEN PUSHING THE LIMITS OF HELMET DESIGN WITH INNOVATIONS THAT HAVE NOT ONLY INCREASED SAFETY BUT HAVE ALSO IMPROVED PRODUCT PERFORMANCE AND COMFORT. FOR 2013.14 SCOTT CONTINUES TO RAISE THE STANDARDS OF HELMET DESIGN, WITH A PRODUCT LINE THAT REDEFINES STYLE AND COMFORT. SCOTT IS ALSO INTRODUCING SEVERAL NEW MODELS WHICH FEATURE MIPS® TECHNOLOGY, MAKING IT THE SAFEST LINE TO DATE.

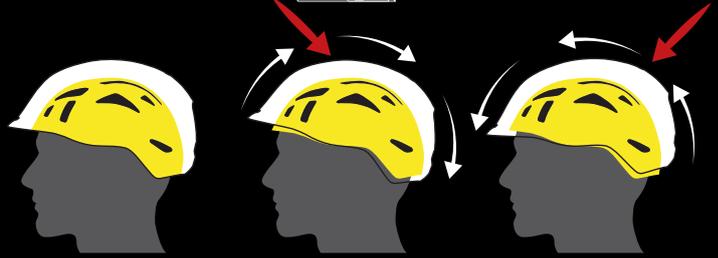

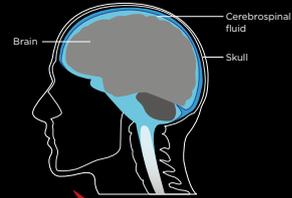

MIPS TECHNOLOGY

FOR 2013/14 SCOTT AND MIPS WORKED CLOSELY TOGETHER TO EXTEND MIPS® (MULTI DIRECTIONAL IMPACT PROTECTION SYSTEM) INTEGRATION INTO FOUR OF OUR KEY HELMET STYLES, THREE ADULT AND ONE JUNIOR HELMET.

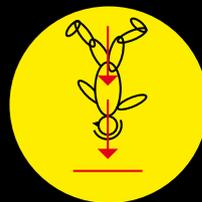

WINTER 2013/2014 HARBOODS | HELMETS

CHASE HELMET FEATURING MIPS™ TECHNOLOGY

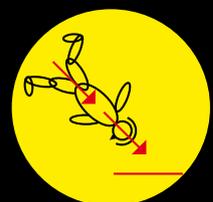

EXPLANATION OF IMPACT

ACCIDENT STATISTICS* SHOW THAT MANY ACCIDENTS INVOLVE AN OBLIQUE IMPACT TO THE HEAD; THIS CAN CAUSE MORE SEVERE INJURIES DUE TO THE ROTATIONAL ACCELERATION INFLICTED ON THE BRAIN.

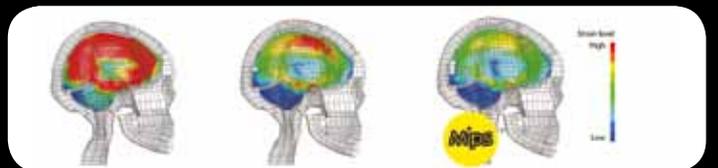

VERTICAL IMPACT

OBLIQUE IMPACT

*OTTE D, CHINN B, DOYLE D, MÄKITUPA S, STURROCK K AND SCHULLER E. (1999). CONTRIBUTION TO FINAL REPORT OF COST 327 PROJECT, UNIVERSITY OF HANNOVER.

NO HELMET

HELMET WITHOUT MIPS

KLEIVEN, S. (2006). EVALUATION OF HEAD INJURY CRITERIA USING AN FE MODEL VALIDATED AGAINST EXPERIMENTS ON LOCALIZED BRAIN MOTION, INTRA-CEREBRAL ACCELERATION, AND INTRA-CRANIAL PRESSURE. INTERNATIONAL JOURNAL OF CRASHWORTHINESS, 11 (1): 65-79.

MIPS

MIPS® IS A TECHNOLOGY THAT MIMICS THE HUMAN ANATOMY THE HUMAN BRAIN IS SUSPENDED IN LOW FRICTION CEREBROSPINAL FLUID, WHICH ALLOWS THE BRAIN TO SLIDE WITHIN YOUR SKULL, PROTECTING IT UPON IMPACT. MIPS® IS A UNIQUE TECHNOLOGY INTENDED TO PROTECT YOUR BRAIN AGAINST OBLIQUE BLOWS BY MIMICKING THIS LOW FRICTION BARRIER, THEREBY REDUCING THE FORCES TRANSMITTED TO YOUR BRAIN.

IMPACT ANALYSIS

IF THE HELMET IS SUBJECTED TO AN OBLIQUE IMPACT, THE LOW FRICTION LAYER ALLOWS THE SHELL TO ROTATE RELATIVE TO ONE'S HEAD. RESEARCH HAS SHOWN A REDUCTION OF THE FORCES IMPARTED ON THE BRAIN WITH MIPS® EQUIPPED HELMETS.

SCOTT SYMBOL

230794

The SCOTT Symbol is the next generation of freeskiing helmet design. Thanks to the integrated MIPS® brain protection system, the Symbol delivers unmatched protection, while maintaining a low profile and modern look.

FEATURES

- + MIPS® Technology
- + Full inner padding, removable and washable
- + G-vent System on front
- + Active S-vent System on crown
- + 2 passive vents
- + M-R.A.S Fit System
- + Removable ear covers
- + Removable visor
- + Goggle retainer
- + Side release chinstrap buckle
- + Comfort chinstrap
- + Helmet pouch

CONSTRUCTION

- + PC in-mold with EPS liner
- + MIPS® low friction layer
- + PC bottom wrap

SIZE: Small (51.5-55.5) Medium (55.5-59.5) Large (59.5-63.5)

STANDARD: Class B according to EN 1077 2007

NEW

SCOTT JERVIS

230795

The SCOTT Jervis has all the same great features found on the SCOTT Symbol, but without the visor, offering a cleaner all-mountain look.

FEATURES

- + MIPS® Technology
- + Full inner padding, removable and washable
- + G-vent System on front
- + Active S-vent System on crown
- + 2 passive vents
- + M-R.A.S Fit System
- + Removable ear covers
- + Goggle retainer
- + Side release chinstrap buckle
- + Comfort chinstrap
- + Helmet pouch

CONSTRUCTION

- + PC in-mold with EPS liner
- + MIPS® low friction layer
- + PC bottom wrap

SIZE: Small (51.5-55.5) Medium (55.5-59.5) Large (59.5-63.5)

STANDARD: Class B according to EN 1077 2007

NEW

SCOTT COULOIR

224571

SCOTT introduces a new generation of helmets which are especially designed for those who want to explore beyond boundaries. The Couloir is the ultimate helmet for those seeking protection for climbing and skiing.

SAFETY FOR ASCENT AND FOR SKIING

The Couloir provides optimum safety according to the mountaineering standard, EN 12492, and the winter helmet standard, EN 1077.

MOUNTAINEERING VERSION

The Couloir has been designed to shine during all vertical endeavors, up or down. The helmet can easily be converted from ski mode to mountaineering by simply removing the ear pads and inner lining. The minimalist permanent pads provide ventilation and comfort. The chinstrap's position ensures the helmet will securely fasten to the neck and minimize the helmet's forward and backward movement, allowing for a snug fit. Side fixation points are designed to hold either a headlamp or goggles, and a small brim around the helmet keeps moisture out of the face.

SCOTT M-R.A.S FIT SYSTEM

The Couloir also features the new and lightest version of the well-known SCOTT M-R.A.S FIT SYSTEM, providing uniform comfort throughout the helmet.

SCOTT L.P.D (LOW PROFILE DAMPING) CONSTRUCTION

Located on the crown of the helmet, the L.P.D. construction provides the maximum level of protection by maintaining just the right amount of damping material. L.P.D is a low profile construction resulting in one of the thinnest mountaineering helmets on the market.

FEATURES

- + SCOTT L.P.D (Low Profile Damping) Construction
- + Winter version - full inner padding
- + removable and washable
- + Mountaineering version - permanent inner pads
- + G-vent System on front
- + 14 passive vents
- + M-R.A.S Fit System
- + Removable ear covers
- + Goggle retainer
- + Lamp fixation
- + Side release chinstrap buckle
- + Comfort chinstrap
- + Helmet pouch

CONSTRUCTION

- + ABS Top shell
- + PC in-mold with EPS liner

SIZE: Small (51.5-55.5); Medium (55.5-59.5); Large (59.5-63.5)

STANDARD: Class B according to EN 1077 2007, according to EN 12492

White/Grey Matt

Black Matt

Equipped with cutting edge technology and unrivaled styling, the Envy is the ideal choice for riders looking for innovative protection. With BIOMEX Construction, M-R.A.S Fit System and SCOTT's exclusive G and S Vent System, riders will not only one of the highest performing helmets on the mountain—it also gives them one of the best looking ones, too.

White Matt

HELMET TECHNOLOGY

PC IN-MOLD CONSTRUCTION

During the in-mold manufacturing process, the outer shell of polycarbonate material is fused with the helmet's impact absorbent foam liner, creating a super lightweight outer shell. With reduced weight and bulk surrounding the head, in-mold helmets are more comfortable than traditional helmets.

Models built using PC in-mold construction include:
 + ROVE/ ROAM
 + ANTI
 + CHASE/ JEWEL/ TRACKER
 + KEEPER

ABS CONSTRUCTION

ABS construction provides optimal strength, shock absorption and maximum durability, while a unique and carefully engineered EPS liner provides comfort and added protection.

Models built using ABS construction include:
 + COULOIR
 + ENVY
 + SCREAM
 + TROUBLE
 + WC PRO/ WC COMP
 + CAMBLE
 + PICTON

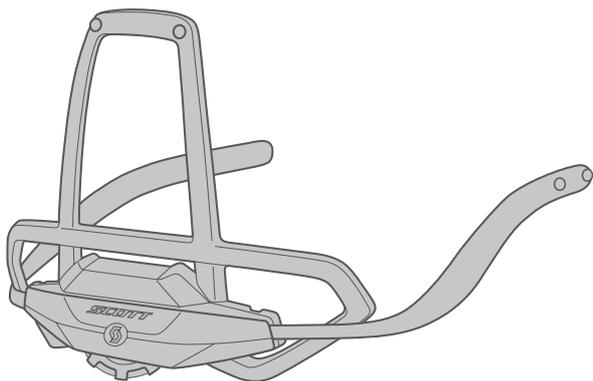

THE SCOTT COOL PLUG SYSTEM

The SCOTT Cool Plug is an innovative venting solution for progressive helmets. More than a common vent plug, the SCOTT Cool Plug is integrated on top of the helmet. By simply adjusting the Cool Plug inside the helmet, the right amount of airflow can easily be achieved. Exhaust ports remove stagnant air helping to circulate fresh air inside the helmet.

FIT TECHNOLOGY

M-R.A.S. FIT SYSTEM

M-R.A.S. FIT SYSTEM (ADD LOGO M-R.A.S)

The Micro Rotary Adjustment System (M-R.A.S) offers unparalleled adjustment, comfort and stability. An automatic locking system, ensures that the desired helmet fit is held securely. The Micro Rotary Adjustment System (M-R.A.S) offers uniform comfort throughout the helmet (270° head wrap). With an oversized molded wheel, the M-R.A.S Fit System makes adjusting with one hand easy. Height adjustment personalizes individual fit on the following models: JEWEL, TRACKER, KEEPER, COULOIR, COULTER and VANGUARD.

RENTAL TECHNOLOGY

PRODUCT DESCRIPTION

The new SCOTT Camble is the solution for all rental helmet needs. It has a rugged ABS hardshell construction for relentless durability, with ample venting and comfort all in a clean, modern style, making the Camble one of the best looking rental helmets out there.

BULLET PROOF COSTRUCTION

The SCOTT CAMBLE provides maximum durability designed with an injected ABS hardshell. The CAMBLE is designed with strong and durable ear covers and a goggle strap retainer, both of which are easily replaceable.

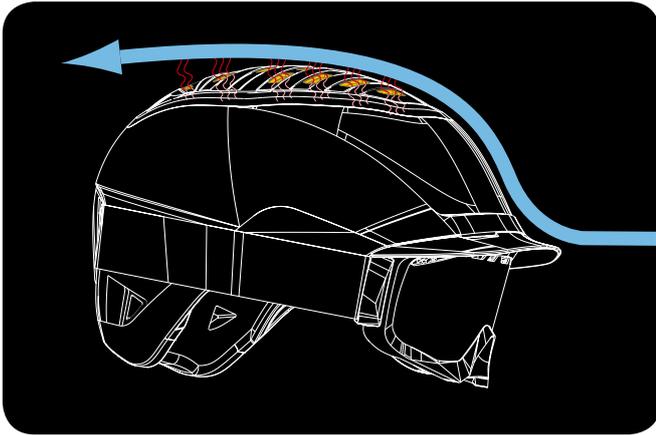

THE PERFECT FIT

The CAMBLE has the perfect inner fit thanks to a longer head-form shape matched with the well-known SCOTT M-R.A.S fit system.

SIZING AND COLOR MODE

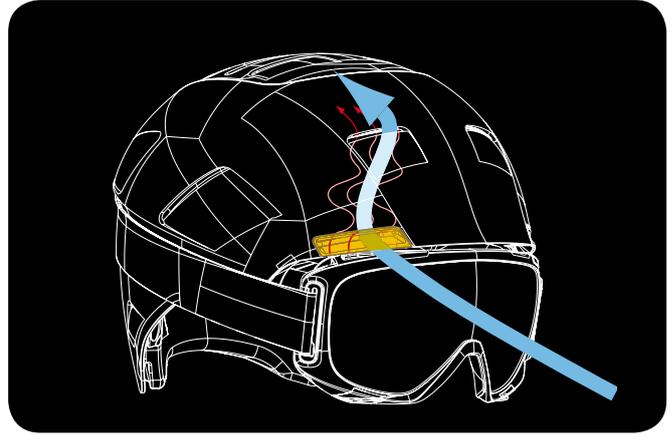

The Scott CAMBLE is available in 4 sizes, covering the whole range of head sizes from small kids to adult. One size per shell size, one color per size, making easy work for your rental team.

VENT TECHNOLOGY

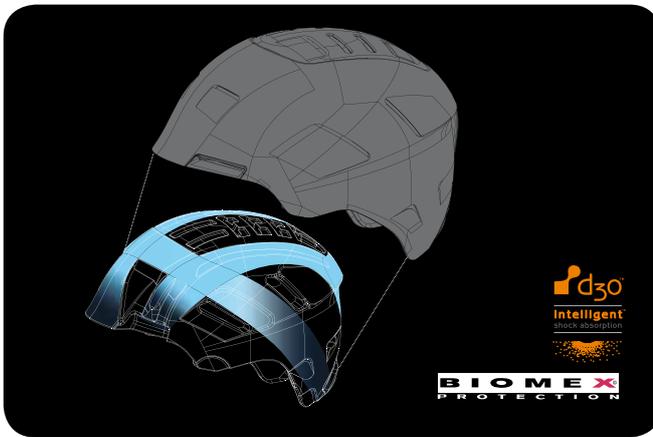

THE SCOTT ACTIVE S-VENT SYSTEM

The adjustable Active S-Vent system channels air over and around the rider's head removing stagnant air from the helmet. The vacuum effect created when the S-vents are open, is even more easily adjustable thanks to an all new shell construction, allowing the rider to determine the right amount of airflow.

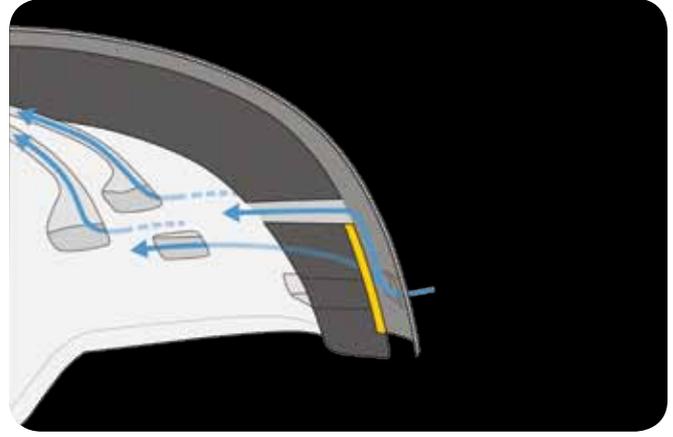

THE SCOTT G-VENT SYSTEM

The G-Vent system is SCOTT's most advanced helmet venting system. Intake vents placed on the front of the helmet, just above the goggle, pull air through the goggle frame removing stagnant air that causes fogging. The result is a venting system that allows your goggle and helmet to breathe more efficiently.

BIOMEX TECHNOLOGY

SCOTT helmets using BIOMEX Technology feature a structural inner dual roll band which provides protection on the front, side and rear, to increase the strength and integrity of the helmet. A new shock absorbing pad made from D3O™ material has been added to the back of the inner lining providing additional protection from impacts to the back of the head.

VENT STOPPERS

Similar to the SCOTT Cool Plug ventilation system, the inner pads can be folded below the inner padding to unblock the top vents, thereby allowing warm air to move out of the helmet.

JUNIORS

SCOTT PROTECTION

THE NEW 2013/14 PROTECTION LINE DEMONSTRATES SCOTT'S COMMITMENT TO DEVELOPING BODY PROTECTION THAT OFFERS BOTH PERFORMANCE AND COMFORT. SCOTT'S LINE CONSISTS OF DIFFERENT BACK PANEL DESIGNS THAT SPECIFICALLY CATER TO THE INTENDED USER NEEDS: WOMEN, MEN, KIDS, AND PROFESSIONALS. WE USED OUR EXPERIENCE GAINED FROM OUR SUCCESSFUL APPAREL STORY TO PROVIDE SOPHISTICATED AND TECHNICAL MATERIALS TO OFFER THE BEST GARMENT WITH THE BEST PROTECTION.

WOMEN'S SPECIFIC

DEVELOPED FOR HER

WOMEN RIDE AS HARD AS MEN; THEREFORE THEY NEED BODY PROTECTION THAT IS SPECIFICALLY DESIGNED TO KEEP THEM SAFE IN THE MOUNTAINS.

❶ **SPECIFIC SMALLER SIZE FOR WOMEN:** THE S SIZE OF OUR COLLECTION IS SPECIFICALLY DEVELOPED FOR SMALL WOMEN AND HAS THE SMALLEST BACK LENGTH IN OUR RANGE.

❷ **SPECIFIC BELT AND STRAPS:** THE WAIST BELT AND SHOULDER STRAPS ARE NARROWER AND SHORTER TO PROVIDE A BETTER FIT FOR WOMEN.

❸ **SPECIFIC STYLE AND FINISHING:** SOPHISTICATED COLOR PALETTE AND DETAILED FINISHING TO PROVIDE STYLE AS WELL AS SAFETY.

SIZES

THE TORSO LENGTHS ARE ADAPTED FOR
155 TO 175CM TALL WOMEN:

	S	M
HEIGHT (cm)	155-165	165-175
WAIST (cm)	65-73	73-81
TORSO LENGTH (cm)	39-41	41-42.5

SOFT PROTECTIVE SYSTEMS

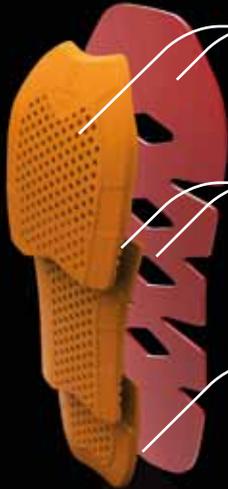

SOFT-SHELL CONSTRUCTION OFFERS THE BEST FLEXIBILITY AND COMFORT.

SCOTT SOFT FLEX

COMBINING TWO INNOVATIVE COMPLEMENTING MATERIALS - D30® AND DEFLEXION™ - THE SCOTT SOFT FLEX SYSTEM DELIVERS UNPARALLELED SAFETY AND FREEDOM OF MOVEMENT WHILE REMAINING HIGHLY BREATHABLE. THE ERGONOMIC FIT AND THE INCREASED PROTECTION MAKE THIS BACK PANEL ONE OF THE BEST PERFORMING BACK PROTECTORS ON THE MARKET.

LEVEL 1 ACCORDING TO EN 1621-2

1 MAXIMUM AIRFLOW: THE HEXAGONAL HOLES IN THE D30® PLATES AND OPEN WEAVE STRUCTURE OF THE DEFLEXION™ MATERIAL PROVIDE FOR EXCELLENT AIR CIRCULATION.

2 TOTAL FREEDOM OF MOVEMENT: 3 INTERLOCKED PLATES ALLOW FOR LIBERAL MOVEMENT AND FOLLOW YOUR BACK AT EVERY POINT. THE 'V' CUT INTO THE DEFLEXION™ LAYER ENHANCES ROTATION AND BENDING MOVEMENTS.

3 INCREASED PROTECTIVE COVERAGE: LONGER THAN OTHER PROTECTORS, IT PROTECTS THE BOTTOM OF YOUR BACK BUT IS SOFT ENOUGH NOT TO DISTURB YOU WHEN SEATED.

WINTER 2015/2014

ARBOCOURS | PROTECTION

SCOTT SOFT ACTIFIT

VERY FUNCTIONAL AND VERY COMFORTABLE THE SCOTT SOFT ACTIFIT IS A BACK PROTECTOR FOR RIDERS OF ALL ABILITIES. FEATURING D30® TECHNOLOGY IT OFFERS A SMART 'WAVED' DESIGN THAT IS EXCLUSIVE TO SCOTT AND ALLOWS THE BACK PANEL TO PERFECTLY MOLD TO THE CURVATURE OF YOUR BACK. UNLIKE OTHER SOFT BACK PROTECTORS, ITS PERFORMANCE IS NOT HINDERED IN COLD CONDITIONS AND IT'S INVISIBLE UNDER YOUR JACKET.

LEVEL 1 ACCORDING TO EN 1621-2

1 EFFICIENT VENT HOLES: LARGE HOLES OFFER UNMATCHED VENTILATION.

2 ULTRA LOW PROFILE: AT 14 MM IT OFFERS AMPLE PROTECTION WITHOUT UNNECESSARY BULK.

3 WAVED FLEX ZONE: WHILE MANY PROTECTORS COVER ONLY THE SPINE, THE SOFT FLEX PLATE IS LONGER AND PROTECTS EVEN THE LOWER PORTION OF YOUR BACK BUT IS SOFT ENOUGH NOT TO DISTURB YOU WHEN SEATED.

HARD PROTECTIVE SYSTEMS

SCOTT'S HARD-SHELL PROTECTORS ARE BUILT BY COMBINING A DURABLE OUTER SHELL WITH A HONEYCOMB STRUCTURE AND EVA FOAM LINERS. THE HARD-SHELL DESIGN CATERS TO THOSE WHO VENTURE INTO EXTREME, ROCKY TERRAIN AND NEED PROTECTION FROM PENETRATING INJURIES. THEY ARE ALSO MORE VENTILATED THAN THE SOFT-SHELL PROTECTORS TO AVOID OVERHEATING WHEN YOU'RE HIKING FOR THE GOODS.

SCOTT VERTEBRAE

THE SCOTT VERTEBRAE SYSTEM WAS AWARDED SEVERAL TIMES FOR ITS INNOVATIVE AND UNIQUE CONSTRUCTION. THE PLATE SYSTEM MIMICS THE VERTEBRAE, ARTICULATING IN 3 AXES TO ENSURE FREE LATERAL EXTENSION AND COMPRESSION MOVEMENTS, RESULTING IN COMPLETE FREEDOM OF MOVEMENT AND THE HIGHEST LEVEL OF PROTECTION.

LEVEL 2 ACCORDING TO EN 1621-2

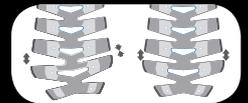

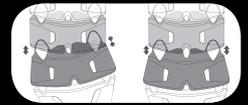

1 THE BEST ARTICULATING HARD PROTECTION: THE HARD PLASTIC PLATES ARE JOINED USING AN INNOVATIVE RIVET SYSTEM ALLOWING THE PLATES TO MOVE FREELY WITH THE BODY, MAXIMIZING COMFORT AND FREEDOM OF MOVEMENT.

2 MOISTURE MANAGEMENT: AIR CIRCULATES THROUGH THE HOLES OF THE DIFFERENT LAYERS TO EFFICIENTLY MANAGE THE MOISTURE FROM YOUR BACK.

3 THE BEST PROTECTION: THE VERTEBRAE SYSTEM ADHERES TO THE HIGHEST LEVEL SAFETY STANDARDS SO YOU GET ALL THE COMFORT WITHOUT SACRIFICING SAFETY.

4 STRUCTURAL FOAM LINER: THE SPECIFIC 'V' SHAPED FOAM PROMOTES MOVEMENT AND ALLOWS THE PLATES TO FLEX EASILY WITH YOUR BODY.

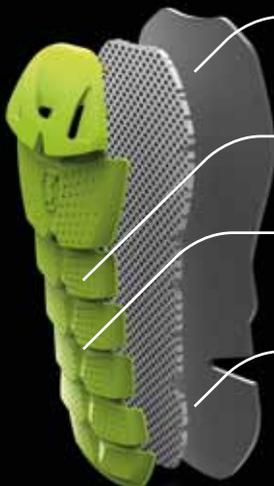

WINTER 2013/2014

SCOTT FEATURES KEY

PROTECTION TYPE

SOFT-SHELL

SOFT-SHELL CONSTRUCTION OFFERS THE BEST FLEXIBILITY, BREATHABILITY AND COMFORT.

HARD-SHELL

HARD-SHELL CONSTRUCTION PROVIDES SUPERIOR PROTECTION AGAINST PENETRATION AND IMPACT, FOR A GREAT PRICE.

CONSTRUCTION

MULTI PLATE

THE MULTILAYER CONSTRUCTION ENHANCES THE FLEXIBILITY OF THE PROTECTION BY DIVIDING THE MOVEMENT AND FORMING TO THE CONTOURS OF YOUR BODY.

ONE PLATE

THE ONE PLATE CONSTRUCTION IS A SIMPLE PROTECTION OPTION WITH DESIGN FEATURES THAT ALLOW THE SYSTEM TO FLEX EASILY.

PROTECTION TYPE

D3O*

D3O* MATERIAL IS A UNIQUE MATERIAL THAT FOCUSES ON ENERGY DISPERSION IN CRITICAL AREAS FOR MAXIMUM SHOCK ABSORPTION AND PROTECTION. THE FUNCTIONALITY OF THE RAW MATERIAL ORIGINATES FROM THE SYNERGETIC EFFECTS OF THE POLYMER-BASED DILATANT. ENERGY IS DISTRIBUTED THROUGHOUT THE SYNTHETIC ELASTOMERIC POLYMER AND THE ENHANCED CHEMISTRY CONTINUES TO DISPERSE THE ENERGY THROUGHOUT THE MATRIX, SIGNIFICANTLY REDUCING THE EFFECT OF IMPACT.

DEFLEXION™

DEFLEXION™ TECHNOLOGY, A SHOCK ABSORBING, HIGH PERFORMANCE MATERIAL THAT USES SILICONE TECHNOLOGY TO CREATE UNIQUE IMPACT PROTECTION SOLUTIONS. IT PROVIDES PROTECTION WITHOUT THE STIFFNESS OF TRADITIONAL PADDING AND BODY ARMOR AND IS MUCH MORE BREATHABLE THAN OTHER PROTECTIVE MATERIAL.

HONEYCOMB STRUCTURE LAYER

A HONEYCOMB SHAPED STRUCTURE PROVIDES A MATERIAL WITH MINIMAL DENSITY AND HIGH IMPACT ENERGY ABSORBING PROPERTIES. THIS ALLOWS EXCELLENT SHOCK ABSORPTION AND BREATHABILITY WITHOUT ANY EXCESS WEIGHT.

SCOTT FEATURES KEY

FEATURES

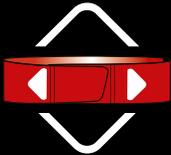

THORACIC ERGO VEST

THE THORACIC VEST SYSTEM IS DESIGNED TO AVOID ANY PRESSURE ON YOUR STOMACH BY ANCHORING THE BACK PROTECTOR TO THE CURVE OF YOUR BACK.

DOUBLE ADJUSTMENT BELT

THE DOUBLE ADJUSTMENT SYSTEM OF THE BELT PROVIDES A SEAMLESS FIT AND PREVENTS ANY VOID BETWEEN YOU AND YOUR BACK PROTECTION.

REMOVABLE BELT

REMOVE THE BELT OF THE JACKET OR VEST PROTECTOR TO WEAR THE VERSATILE GARMENT AS CASUAL WEAR.

REMOVABLE SHOULDER STRAPS

FIS RULES COMPATIBLE

LEG LOOPS

THE LEG LOOPS PREVENT THE PLATE FROM RIDING UP YOUR BACK.

EASILY WASHABLE

THE INSERTED PROTECTIVE PLATE IS EASILY REMOVABLE FROM THE POCKET.

MOISTURE CONTROL PANEL

VENTILATED AND QUICK DRYING BACK MESH PANEL.

WOMEN'S

TO BETTER CATER TO THE FEMALE FORM, WE OFFER WOMEN'S SPECIFIC FEATURES SUCH AS THINNER BELTS, PRE SHAPED SHOULDER STRAPS AND SPECIFICALLY SMALLER SIZING.

SCOTT PACKS & BAGS

FOR 2013 SCOTT IS PROUD TO PRESENT A TOTALLY REDESIGNED BAG COLLECTION FEATURING INNOVATIVE TECHNICAL DETAILS DESIGNED TO HELP YOU ENJOY YOUR TIME IN THE MOUNTAINS. THESE DESIGNS, LIKE SCOTT'S PATENT PENDING DIACOMP SKI-CARRY SYSTEM, AND THE DUOFIX HELMET CARRYING DESIGN SET SCOTT'S PACK LINE APART FROM THE REST.

AIR TECHPAGE

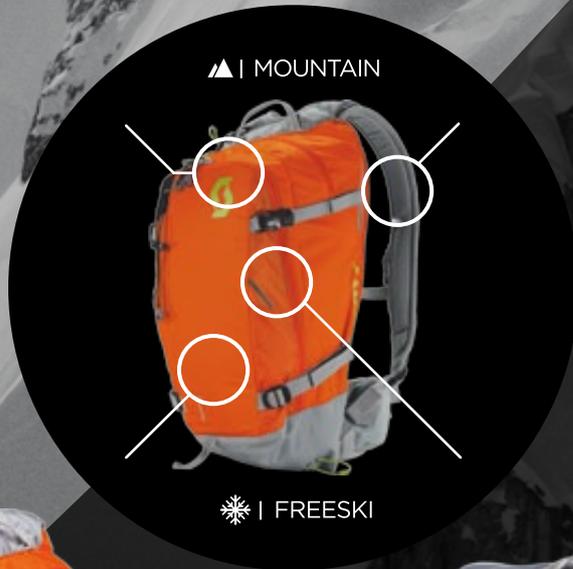

GOGGLE POCKET

THE BIG GOGGLE POCKET CAN EASILY FIT TWO PAIRS OF GOGGLES. THE FLEECE LINING OF THE POCKET PREVENTS THE LENSES FROM GETTING SCRATCHES.

HYDRO READY

THERE IS AN INTERIOR SLEEVE SPECIFICALLY FOR A HYDRATION BLADDER. THE DRINKING TUBE CAN BE EASILY INTEGRATED WITHIN THE SHOULDERSTRAP. THE INTEGRATED FIXED STRAPS ALLOW THE ZIPPER TO OPEN THE ENTIRE LENGTH OF THE STRAP.

▲ | MOUNTAIN

❄ | FREESKI

SEPARATE AVALANCHE EQUIPMENT POCKET

THE FAST ACCESS POCKET OFFERS DESIGNATED SPACES FOR A PROBE, SHOVEL, SHOVEL HANDLE AND OTHER VITAL GEAR. THE OUTER POSITIONING OF THE POCKET ALLOWS FOR THE EMERGENCY EQUIPMENT TO BE ACCESSED AT A MOMENT'S NOTICE.

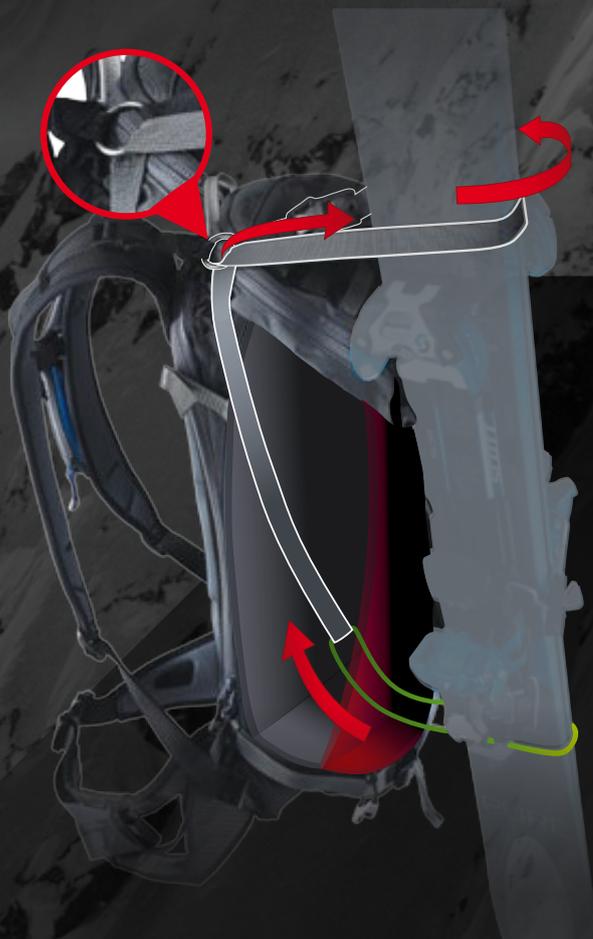

DUOFIX HELMET CARRY

THE STOWABLE HELMET SLEEVE OFFERS TWO POSSIBILITIES: TOP-FRONT OR TOP-SIDE POSITION. IT GUARANTEES, THAT THE HELMET CAN BE MOUNTED ON THE PACK, EVEN WHEN SKIS ARE FIXED DIAGONAL. THIS DESIGN ENSURES THAT THE HELMET IS SECURELY ATTACHED AND CAN NOT FALL OUT.

DIACOMP SKI CARRY SYSTEM

SCOTT'S UNIQUE, PATENT PENDING, DIACOMP SKI CARRY SYSTEM OFFERS A WHOLE NEW LEVEL OF PERFORMANCE AND COMFORT.

ONCE THE SKIS ARE PLACED IN THE CABLE LOOP, THEY CAN BE SECURED AT THE TOP OF THE PACK WITH WEBBING STRAP.

BY INTERNALLY CONNECTING THE TOP-WEBBING LOOP TO THE BOTTOM CABLE SYSTEM, THE SCOTT DEVELOPMENT TEAM HAS ACHIEVED OPTIMAL WEIGHT DISTRIBUTION ACROSS THE BACK. CONNECTING THE TWO FIXED POINTS THROUGH THE PACK, ALLOWS THE SYSTEM TO COMPRESS THE SKIS TO THE BACK OF THE PACK WHEN THEY ARE TIGHTENED DOWN, THUS ELIMINATING ANY UNWANTED MOVEMENT AND PROVIDING EVEN WEIGHT DISTRIBUTION.

THESE TECHNICAL FEATURES ARE AVAILABLE ON THE AIR PACKS SERIES

SCOTT PACK TECHNOLOGY

SCOTT PACK FEATURES

DUOFIX HELMET CARRY

The stowable helmet sleeve offers two possibilities: top-front or top-side position. It guarantees that the helmet can be mounted on the pack, even when skis are fixed diagonal. This design ensures that the helmet is securely attached and can not fall out.

GOGGLE POCKET

The big goggle pocket can easily fit two pairs of goggles. The fleece lining of the pocket prevents the lenses from getting scratches.

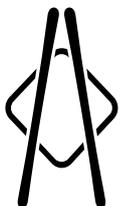

HYDRO SLEEVE

There is an interior sleeve specifically for a hydration bladder. The drinking tube can be easily integrated within the shoulderstrap. The integrated fixed straps allow the zipper to open the entire length of the strap.

THE FAST ACCESS POCKET

The fast access pocket offers designated spaces for a probe, shovel, shovel handle and other vital gear. The outer positioning of the pocket allows for the emergency equipment to be accessed at a moment's notice.

A-FRAME SKI CARRY

Once the skis are placed in the cable loop, they can be secured at the top of the pack with webbing strap.

DIACOMP SKI CARRY SYSTEM

SCOTT's unique, patent pending, Diacomp ski carry system offers a whole new level of performance and comfort. By internally connecting the top-webbing loop to the bottom cable system, the SCOTT development team has achieved optimal weight distribution across the back. Connecting the two fixed points through the pack, allows the system to compress the skis to the back of the pack when they are tightened down, thus eliminating any unwanted movement and providing even weight distribution.

SCOTT RAS TECHNOLOGY

SCOTT'S AIR 30 RAS AND AIR 20 RAS, PAIRS SNOWPULSE TECHNOLOGY'S RELIABLE AND CONVENIENT REMOVABLE AIRBAG SYSTEM (RAS) WITH SCOTT'S PROVEN MULTIFUNCTIONAL PACK DESIGN. WITH THE ADDED OPTION OF REMOVING THE AIRBAG SYSTEM, THE PACK OFFERS THE USER A HIGHLY VERSATILE PRODUCT THAT CAN BE QUICKLY ADAPTED TO SPECIFICALLY CATER TO EACH DAY'S ADVENTURE.

SCOTT REMOVABLE AIRBAG SYSTEM (RAS)

▲ | SCOTT AIR 30 RAS

▲ | SCOTT AIR 20 RAS

RAS

Weighing in at only 1.4kgs, the removable airbag system is both light and compact. The system can be removed and reinstalled with ease from its dedicated pocket at the top of the pack. It is also easy and affordable to refill.

SECURITY

The airbag trigger is integrated into the shoulder strap for easy access, and can be quickly stowed to avoid any accidental deployment. Safety buckles made from strong aluminum on the chest and waist straps provide a snug fit and guarantee proper security in the event of an avalanche.

AVALANCHE TOOL COMPARTMENT

The AIR RAS packs feature an external pocket specifically designed to offer quick access to your organized avalanche safety tools.
