

[technical data]

Woodpecker 159cm

Sidecut: 123-90-111 • Standard Mounting Point: 708mm • Radius: 17m

Who Would Ride It-

If you have to pick a favorite, it's high-speed groomers, but you want to be able to do a lot more. If it snows you're in the trees and looking for every bit of pow you can get. A day can't go by without indulging in at least one bump run. Speed Range: 6-10

Features-

A 90mm waist is the best shape for versatility leaning toward groomers. The 65%-35% Camber provides a catch-free tip that can hook up and carve like a race ski. At 90mm the Woodpecker can also handle soft snow and pow with ease. The Razor Cut sidecut gives this medium-wide ski incredible edge grip on the hardest snow.

Dimensions:

Camber:	TaL	TiL	CL	TaH	TiH	CH
	60	205	1325	20	50.2	10

Sidecut:	TaW	TiW	WW	TaWP	TiWP	TaN	SDL
	111	123	90	60	109	675	1421
